U.S.-Japan Work Group on High Technology will be established to foster high technology industries and to expand trade in high technology products between these two countries.

In the area of advanced science and technology, the GOJ will actively study the possibility of joint research and joint development of technology between Japan and the U.S., and Japan and Europe, as well as in other multilateral contexts.

---

[1] While the Japanese appear to have made use of cooperative R&D activity, it is not clear that government-directed or industry with joint R&D yields more technological progress than does R&D procedures based on the principles of competition.

[2] It should be noted, however, that U.S. companies have reportedly been able to establish joint research projects both directly with the GOJ and with private Japanese firms. Moreover, we do not know to what extent U.S.-owned firms have actually requested entry into GOJ-sponsored R&D cooperatives.

C. Administrative guidance

Discussion

In the first half of the post-war period, the Japanese Government's power to implement and enforce its industrial policies derived mainly from MITI's "license and approval authority." MITI's own establishing law gives it the power to plan "fundamental policies for production, distribution, consumption, and foreign trading of commodities under its jurisdiction," and to "regulate the production and circulation of mining and manufacturing products." Under two other laws MITI also had the power to approve how virtually all long- and short-term capital funds were to be spent in Japan. This included control over how foreign exchange would be permitted to be spent, and control over the introduction of foreign capital and foreign technology. After 1964, as Japan began to liberalize its international trade in response to pressure from its trading partners, the latter two laws fell into disuse. Since then, MITI has increasingly come to rely on the practice or "administrative guidance" in its implementation of policy, include those policies affecting both exported and imported goods and capital.

Administrative guidance is a process that consists of a government ministry's giving suggestions or advice to private business or public organizations over which the ministry has regulatory jurisdiction. (Ministries other than MITI, including the Ministry of Finance (MOF), and the Ministry of Agriculture, Forestry, and Fisheries (MAFF), thus also exercise administrative guidance. For example, MAFF has exercised administrative guidance to limit imports of pork, depending on their perception of market conditions. Occasionally, guidance is set out in a written memo, but typically it is oral. For instance, a manufacturer may be called in to MITI and verbally instructed to install pollution control equipment. The vast majority of actual administrative guidance takes place at the lowest levels of the ministries, implementing ministry policy made at higher levels. It is important to note, however, that since acceptance of administrative guidance is discretionary rather than mandatory, it may not always be followed.

Compliance is usually a matter of individual cooperation, in form even when compliance is in fact coerced. Except where a law covering a particular industry delegates specific authority, guidance is based on the general grant of jurisdiction in an agency's establishment law, and there are no legal sanctions for disobedience (although the agency is free to withhold benefits, such as licenses, within its control). But because the guidance process is a dialogue between agency and industry, the industry has usually been alerted about the content of the guidance via the trade press, conferences, or industry advisory committees to the ministry. In the process, the agency gets feedback from the industry and revises its guidance to the point that voluntary compliance can be expected. Often, the agency instructs the industry to do what it (or its most powerful firms) would like to do anyway.

Administrative guidance may be a potent trade-restrictive force. The guidance is given by government officials who may have the power to provide—or withhold—loans, grants, subsidies, licenses, tax concessions, government contracts, permission to import, approval of cartel arrangements, and other benefits to the company. In addition to this potential for direct reward or punishment, there is also a tradition of business reliance on government leadership for informal solutions to market problems. Foreign firms selling in Japan may find that access in certain market sectors is limited by administrative guidance that favors domestic over foreign sources or that pressures importers to limit imports to a certain level. The government may use administrative guidance as a valve to slow down importation of a specific product, to protect local producers. This is particularly true in the case of targeted industries, where the MITI policy objective is to provide maximum volume advantages in the domestic market; in declining industries and in basic industries where the objective is to preserve employment and desired levels of domestic production.

GOJ Action

The recent trade initiatives do not contain any specific, concrete measures regarding administrative guidance. * * * The Prime Minister identified as a misunderstanding or mistaken image the argument that Japan still uses administrative guidance to protect its domestic products. The statement also went on to ask "those in public administration" as well as private firms to "be even more clear and forthcoming in taking the attitude of extending a welcoming hand to foreign products and not discriminating against them."

D. Government procurement

Discussion

In Japan, as in many countries including the United States, some of the most significant barriers to trade have been the procurement policies of government agencies as well as government-owned public corporations. In Japan, public corporations have taken on a particularly important role. There are approximately 115 of these agencies—with separate budgets estimated to comprise about half of Japan's annual government expenditures—including such entities as the Nippon Telegraph and Telephone Corporation (NTT), Japan National Railways, Japan Electric Power Development Corporation, and the Japan Tobacco and Salt Public Corporation (JTS). Several aspects of government procurement practices in Japan have coincided to restrict imports into Japan. First, many of the public corporations have followed explicit or tacit "Buy Japan" procurement policies. Second, the research and development programs of the public corporations, notably that of NTT, have involved joint R&D of the products purchased by the public corporations. Hence, both R&D and procurement had become a close loop, reinforcing their import restrictive effects by impinging on foreign firms' access to both Japanese markets and Japanese technology.

GOJ Action

With Japan's accession to the MTN Government Procurement Code, and the inclusion of Nippon Telegraph and Telephone Public Corporation under Code procedures, substantial progress has been made in widening U.S. access to Japanese Government procurement. In fact, the scope of coverage of Japanese entities under the Code is substantially broader than that of most other Code signatories. However, some of Japan's state corporations (including New Tokyo International Airport Corporation, Electric Energy Company, Okinawa Electric Company, Japan Broadcasting Company, Japan Atomic Energy Research Institute, and all the national universities) are not included under Japan's entity coverage, allowing them to continue "Buy Japanese" policies for procurement. Not all U.S. entities are included either, however.

Japan has met all of its technical obligations under the U.S.-Japan Agreement on NTT. However, U.S. sales to NTT are still quite small. In addition, to date there have been no sales of high technology products, e.g., central office switching equipment. NTT has undertaken to encourage greater participation by U.S. firms in its purchases and there have been some positive indications. However it is still uncertain whether the agreement will actually produce significantly increased sales of U.S. telecommunications equipment.

* * * * *

E. Government monopolies and state trading

Discussion

A barrier related to those encountered in government procurement is that found in those government-owned monopoly corporations, which control the sale of imported goods or services to the Japanese public.

1. *Tobacco Products.*—One such government monopoly with import restrictive effects is the Japan Tobacco and Salt Public Corporation (JTS). JTS is obligated to buy all domestically produced tobacco leaf (some 140,000 tons annually) at prices three times the world price. (It also purchases some 70,000 tons of imported leaf). In addition, JTS strictly controls sales of imported cigarettes, cigars, and pipe tobacco, permitting them to be distributed at only 20,000 of 250,000 tobacco products shops and selling them at much higher prices than domestic cigarettes. And it enforces a ceiling on advertising expenditures that U.S. producers feel makes it difficult for their brands, new to the Japanese market, to gain market share. In addition, Japan imposes a 35 percent tariff on imported cigarettes. The effect is that imported cigarettes sell in Japan for 55 percent more than comparable Japanese brands, even though their pretariff price when entering Japan is about the same as the price of Japanese brands.

As a consequence of these tariff and nontariff barriers, the U.S. share of the Japanese cigarette market is still only slightly over 1 percent.

GOJ Action

In the May 28 package, the Japanese Government committed itself to allow all tobacco retailers to handle imported products. The announcement stated that this measure will be implemented in stages until fiscal year 1985, and that in fiscal years 1982 and 1983, the number of retailers handling imported products will be increased from the present 20,000 to 70,000. It also stipulated that limitations on advertising expenditures will be increased to meet market situations. It further stated that the GOJ will study accelerating the establishment of a study group to assess the market situtation of manufactured tobacco products in Japan and related problems. However, no reductions were made in the tariff, which the U.S. industry considers the most important barrier.

A study presently being conducted by the GOJ as to administration reform measures may make substantial changes in the structure and relationship to the GOJ of a number of public corporations, including both the JTS and NTT.

2. *State Trade in Food Grains*—Apart from rice, production of other food grains such as wheat is limited, and the GOJ permits imports to satisfy domestic demand. So under the Food Control Law, the Food Agency of the MAFF administers the pur-

chase of wheat imports. The internal resale price of wheat to millers is set so as to discourage the consumption of wheat vis-a-vis rice, which restrains the level and growth of wheat imports. Under the Food Control Law, rice and barley are also state traded.

GOJ Action

None.

3. *Data Processing and Telecommunciations Services*—Private data processing services over the telecommunications network are a monopoly of Nippon Telegraph and Telephone Public Corporation.

Japan's telecommunication public companies (NTT and KDD) use their monopoly over telecommunications services to restrict the kinds of services that private data processing companies can provide using the telecommunications network. In addition, they have delayed or denied approval for use of their network to American firms pending their own development of such services.

Present legislation governing such services restricts the kinds of service that American data processing companies can offer, and in particular, prohibits joint use and third party use of the communications lines and switching data between computer centers in the U.S.

GOJ Action

The May 28 package states that the GOJ will relax restrictions, including those on joint use and third party use.

PRIVATE SECTOR BARRIERS

1. Industrial structure: the Keiretsu

Discussion

A very large share of Japan's production and sales is controlled by sixteen business groups, known as *Keiretsu*, each of which has an interlocking, interdependent relationship among banks, manufacturers, and trading companies. This structural aspect of the Japanese economy effectively acts as an import barrier to American and other foreign goods and services.

Each Keiretsu is composed of a variety of firms in all or most of the major sectors of the Japanese economy. These firms are bound together by both equity interownership and debtor-creditor ties. All of the Keiretsu are organized around large comercial banks which use their financing functions to coordinate the business activities of group members.

The Keiretsu structure affects imports into Japan in a number of ways. First, business connections between Keiretsu members produce interdependent business strategies that tend to exclude non-group, not to mention non-Japanese, business. Within any particular Keiretsu, members generally have strong supplier-consumer relations, facilitated by the Keiretsu's commercial backing.

Hence Keiretsu members tend to purchase from other members of the group. Since the Keiretsu account for such a large part of the Japanese economy, foreign suppliers find their ability to compete limited in a considerable segment of the Japanese market.

Second, in those market segments dominated by a few producers, the structure of the Japanese economy facilitates horizontal agreements and cartel-like behavior among Japanese firms, the effect of which is often to hinder imports of foreign products.

Japanese importers have upon occasion boycotted foreign products or agreed to restrict imports to a certain level or to limit the price offered for imported products. The effectiveness of these agreements has been enhanced because Japan's major importers for many products are trading companies that belong to the Keiretsu and thus tend to import only where imports do not displace business opportunities of other Keiretsu firms.

The GOJ itself sometimes fosters this interdependent structure, particularly in "target" industries. The result may be an import-restricting business environment.

* * * * *

2. Distribution system

Discussion

High costs and inefficiencies in the Japanese distribution system fall more heavily on imports than on domestic products. Wholesalers and retailers are governed by long-standing supplier relationships and rarely promote sales of foreign products. Cartel-like activities among Japanese firms, in some cases, make it difficult to obtain access to distribution systems for U.S. firms, or for new Japanese market entrants. However, the Japanese distribution system is not static. New, more direct channels of distribution are developing, particularly in the case of chain discount department stores.

Japan's distribution system is considered by many to be a non-tariff barrier to imports. The difficulties may sometimes result from government policy, (such as the Small Stores Law), but more often from a complex, somewhat archaic system that, particularly with regard to consumer goods, evolved over time to meet the particular needs of the domestic market. Criticism of the Japan distribution system often focuses on the very high retail prices of imported goods. This reflects Japan's traditional multilayer distribution system that for some products involves primary, secondary, and tertiary distributors.

Japanese wholesalers play a more dominant role in the distribution of goods than their counterparts in the United States or Europe. In Japan, with a population about half that of the United States, there were 340,000 wholesalers in 1976 compared with 370,000 in the United States in 1972. Further, there are more retail establishments in Japan than in the United States (1.61 million as opposed to 1.55 million).

Breaking into this vast distribution network, with more wholesalers and retailers per capita than any of the other advanced industrial nations, is a difficult as it is important. The multilayered network fosters close buyer/supplier relations, based not only on financial considerations but on ties of obligation and loyalty and on a strong premium placed on secure supply. These factors put foreign suppliers, particularly those whose product is imported rather than manufactured in Japan, at a disadvantage.

The Japanese trading companies are cited by exporters as contributing to the difficulties importers confront in distribution, since they typically operate on very narrow profit margins and are thus reluctant to take on imported products whose marketability in Japan is still unproven or to distribute foreign products that require an extensive network of after-sale service and maintenance facilities. In addition, the trading companies frequently have links to domestic manufacturers that may blunt their interest in handling competing foreign product lines or Cartel-like activity among Japanese firms can limit access to distribution channels in Japan. For example, U.S. soda ash can be delivered in Japan at a price significantly under that of local Japanese producers. However, imports are made only by trading companies designated by the Japan Soda Ash Industry Association—which in turn is controlled by the major soda ash producers. In fact, specific trading companies are assigned to specific U.S. exporters. When the U.S. companies have tried to sell more by going directly to the users, they have been told this will be impossible because of the "delicate relationships" these companies have with the trading companies and the Japanese producers.

This type of situation is repeated in many industries, such as paper and petrochemicals. This is one result of the Keiretsu system in which importers, producers, and distributors are all financially linked through a bank or trading company. Management linkage is also possible. The system acts to restrain imports. The trading companies tend to dominate warehousing, tank farms, and bulk transport. It is difficult for the end-user to bypass this traditional distribution system without great expense. Moreover, the banks, which finance the distributors, also own equity in the producers. Consequently, great pressure can be placed on anyone who upsets the system with excessive imports.

GOJ Action

The May 28 package incorporated several initiatives to improve foreign access to, and fair treatment in the distribution process. Specifically, the announcement stated that the GOJ:

Invited foreign entities and individuals concerned to present their views to a GOJ advisory council on ways to facilitate imports, the Committee for Manufactured Goods Import Measures of the Trade Conference. The Committee will investigate ways to eliminate import problems caused by particular distribution channels and business practices.

Would establish, in cooperation with JETRO and the Japan Trade Association, a system to use business consultants to help foreign firms gain access to, or expand their operations in, the Japanese market.

Decided to intensely monitor distribution of imported goods. Practices that restrict competition, should such be found, will be countered where applicable, by fair and strict application of the Antitrust Law.

3. Buy national attitudes

Discussion

Japanese companies, but not Japanese consumers, show a deep-seated preference for domestic products, even where imported goods may excel in price and quality.

In the view of many American companies, Japanese companies are only interested in purchasing raw materials, or foodstuffs, etc. from the United States. They will buy U.S. manufactured goods only if they incorporate technology unavailable to domestic manufacturers; lower prices, novel design features, or better quality are immaterial factors in these buying decisions. The deep-seated preference for Japanese products is sometimes masked by charges of poor quality or reliability of American-manufactured goods.

This inclination of Japanese companies to buy from Japanese suppliers is a powerful attitudinal impediment to trade. It is paralleled and reinforced by the perceived need among mid-level government officials to protect Japanese companies from foreign competition.

In contrast, in consumer preference polls, Japanese consumers like their American

counterparts, express a desire to buy the origin. But they do not have an equivalent opportunity to do so. A smaller range and volume of foreign consumer products are imported, and those which are imported are typically sold at prices above comparable Japanese rival products. It is not surprising then to note that nationwide surveys conducted in April 1982 found that while two-thirds of the American adults sampled stated that they had recently purchased a Japanese product, 60 percent of the Japanese adults stated that they had *not* recently purchased an American one.

GOJ Actions

As noted earlier, Prime Minister Suzuki's May 28 statement made a direct appeal to the Japanese in both public administration and private firms to be even more welcoming to foreign products and not discriminate against them. The Prime Minister's statement also noted that "Japan already abolished the "Buy Japanese Policy" about 10 years ago; and that what is necessary for the measures in the Japanese initiatives to bring about concrete results," is the attitude to welcome foreign products or foreign investment in actual administrative management and economic activities.

● Mr. O'NEILL. Mr. Chairman, I rise in support of this bill. I do so not because I am against free trade but rather because I am for fair trade. I do so not because I am against cars made overseas but rather because I want cars made in America. I do so not because I want to disrupt trade with Japan but rather because I want to balance trade with Japan.

At the moment imports have 28 percent of a depressed American auto market. Since 1978 over a million workers have lost their jobs in auto-related industries. If the current trend continues a million more will lose their jobs by 1990 because imports will have half of the domestic market.

It is sheer folly to permit this to happen. Auto manufacturing is a crucial sector of the U.S. economy. If it is not healthy our economy will not be healthy. It is a critical part of our industrial sector. We cannot be a first-rate power if we scrap our industrial might. We must save it.

And we can do it—not by voting subsidies—but rather by encouraging investment. This bill is an incentive for foreign auto makers to invest in the United States. It is an incentive for American corporations to invest here. American workers are among the best in the world. Volkswagen and Sony can attest to that. It is about time that Toyota and Nissan found it out as well.

In these days of modern technology, modern communications, and multinational corporations there is simply no excuse for not encouraging those who seek to gain a substantial share of the domestic auto market to be encouraged to build their cars here. We would welcome that investment. In fact we have a right to expect it.

Following World War II our Government encouraged international economic recovery by generous trade and foreign investment policies. We were remarkably successful in promoting economic growth among countries devastated by war. We also made a huge investment in defense expenditures to protect democracy and free trade in the world. We are still doing this. In fact we are increasing spending on defense.

This Nation is now spending $1.6 trillion over a 5-year period to protect the security of the free world. Without that protection free trade would end and capitalism would be dead. We have provided that security for over 30 years. It has cost us almost 3 trillion in 1972 dollars during the period. We have done our share and we will continue to do it.

But how can we expect our citizens to pay the high price for the security of the free world and not have economic security here at home. The answer is we cannot.

There are 13 million Americans out of work. Our industrial heartland is in a depression. Franklin Roosevelt said every American has a right to earn a decent living yet we are reluctant to protect that right for millions in the auto industry.

At the moment American automakers are trying to make a comeback. They have made significant increases in capital investment and taken necessary steps to improve the quality of their products.

However, a misguided and disastrous tight money policy has crippled the industry. High interest rates and an overvalued dollar have reduced the price of imports and at the same time discouraged the sale of domestic automobiles.

This bill is necessary to make that comeback a success. Without it, our basic industries may not recover. And if they do not this country and millions of its citizens will suffer the consequences. Consequences that the Nation cannot afford—not to mention millions of its citizens.●

Mr. REGULA. Mr. Chairman, I rise today in support of H.R. 5133 recognizing full well the arguments that have been raised against this legislation, but also realizing the necessity of sending our trading partners a clear message relative to our concerns at this time. That message is that the United States has had enough of other nations merely paying lipservice to the concept of free and fair trade and has finally decided to force the issue.

No one here needs to be educated relative to the positive aspects of free and fair trade and an open market system. However, while the United States has practiced what it has preached in this area, our trading partners have responded by imposing barriers against our exports of goods to their countries and at the same time taken advantage of our relatively open market by flooding it with their own subsidized products.

Other nations have also benefited from our disproportionate shouldering of the international defense burden, which has enabled them to redirect the funds they save on defense back into their capital jobs base. Japan, in particular, has reaped the fruits of this situation and their capital intensive automotive industry is a direct reflection of their minimal defense costs.

We cannot continue to ignore the impact imports have had on our economy and the employment situation. It is merely wishful thinking that this situation will be corrected voluntarily by our trading partners. Without a strong signal from this Government that we are prepared to fight fire with fire, there is no hope that negotiations to open foreign markets to our goods will be successful. Passage of H.R. 5133 will make our allies take notice that the United States finally is ready to be serious in the international marketplace, in seeking fair trade.

● Mr. HARKIN. Mr. Chairman, some have suggested this bill would start a trade war with the Japanese in which the United States would be the loser.

While I have no desire to see a trade war, I do think it is time to fire a warning shot. Passage of this bill by the House would serve that purpose.

Our lopsided trade balance with the Japanese is disgraceful. It is the result of protectionist quotas and other trade barriers imposed by the Japanese on a wide range of commodities such as American beef, pork, poultry, and many others.

Recent attempts by the administration to liberalize this trade has proved futile. As recently as October 20, 1982, our negotiators met in Honolulu to discuss beef and citrus restraints with the Japanese. The Japanese quickly made it clear they had nothing to offer and the United States broke off negotiations. No further negotiations have been scheduled.

The case for beef is particularly instructive. Despite the strong demand for American grain-fed beef in Japan, only 30,800 metric tons are permitted to be imported annually from all sources. To obtain this quality beef, for which the American consumer pays about $3.50 per pound, the Japanese consumer must pay over $13 per pound.

With that price, it is not surprising that the per capita beef consumption in Japan is only 11 pounds per year. Japan could be a major user of our beef. But under their present import policies only 7 percent of the meat consumed in Japan comes from the United States. Japan could use a lot of our products if it were not for their protectionist philosophy. While they may talk about the need for open markets, they do not practice it.

Yes; the time has come to send a strong signal to the Japanese that the United States will no longer tolerate such restrictive trade practices. Passage of this bill in the House this session will, I predict, find the Japanese returning to the negotiating table ready to seriously negotiate on such key issues as meat imports.●

● Mr. HERTEL. Mr. Chairman, this bill encourages the production of automotive products in the United States by requiring manufacturers to use specific levels of American-generated materials in vehicles sold in the United States. Content requirements vary according to the companies' total U.S. sales. Those manufacturers selling fewer than a 100,000 automobiles in this country are exempt from these requirements.

Manufacturers receive credit for the value of all production-related activities and all costs incurred in the United States. Two or more manufacturers are prevented from double counting the value of the same automotive product in figuring their respective domestic content. Finally, it requires large scale manufacturers to maintain certain records and directs Federal agencies to report to this body on the bill's impact on manufacturers and the auto industry in general 1 year after the bill has been in effect.

This bill results from the loss of almost 1 million jobs in auto and related industries since 1978. There can be no doubt that the auto industry comprises a substantial component of our Nation's industrial base. That industrial base has been seriously eroded by foreign-manufactured automobiles. The foreign share of the American car market is now nearly 30 percent. Of that share, Japanese imports represent 80 percent of all foreign cars sold in this country for an astonishing 22 percent of the entire U.S. car market.

There are numerous myths which surround the causes for the deteriorating state of the auto industry in this country. There has been much criticism of the American labor force in this debate; accusations of high costs and low productivity. I think that it is vitally important that this body listen to some figures from the 1982 "Japan and International Comparison Study" by the Keizai Koho Center, the Japan Institute for Social and Economic Affairs.

The annual earning and tax benefit position of a typical worker in a major company, calculated according to the average annual exchange rate of the International Monetary Fund, shows the gross annual earnings of a typical worker in the United States to be $14,949. The typical Japanese worker's annual gross earnings are $16,960. Of the 11 major U.S. trading partners, the typical American worker ranks eighth.

ANNUAL EARNINGS AND THE TAX/BENEFIT POSITION OF A TYPICAL WORKER IN MAJOR COUNTRIES (1980) [1]

	Annual gross earnings [2]	Payments to Government				Cash transfers from the Government	Disposable income	Disposable income ratio (percent)	Rate of income tax paid (percent)	Rate of social security paid (percent)

Japan	100.0	100.0	100.0	100.0	100.0	100.0
U.K.	249.4	53.4	107.0	119.7	87.0	95.1

I think we do our workers a grave disservice by underestimating the skills and ability of our people.

The Japanese do deserve a great deal of credit. While their productivity is yet to equal the United States, they have made enormous strides in increases in productivity based upon the cooperative governmental, industrial, and labor cooperation to make state of the art investments in targeted areas such as automobiles.

Unfortunately, the burden which our Government places by taxing our workers is more than $1,000 in excess of the comparable tax burden placed on Japanese workers, which allows Japanese workers to have the second highest disposable income of any worker in major free world countries. This reduced tax burden is a direct result of the defense subsidy the United State insures Japan. It has allowed this nation to channel its resources into productive sectors of the economy to the detriment of our labor. An examination of the August 1982 U.S. Department of Commerce International Trade Administration compilation of "Current International Trade Position of the United States" shows that in the first two quarters of 1982, Japan enjoyed a $35 billion trade surplus with the United States. No other single nation approaches this condition. It disturbs me that the administration is not concerned about a situation which is tantamount to economic colonialism. I can think of no other nation in the world which would allow more than one-quarter of its basic industry to be exported to another country, while simultaneously subsidizing the domestic security of that country.

Those who oppose the domestic content bill raise red flags of possible trade wars. I must respectfully disagree with these Members of Congress because there are already trade wars, and our Nation has suffered far more serious losses than any sneak attack in any conventional war. It is burying our heads in the sand to believe that worldwide eonomic upturn will improve the economic conditions in the auto industry. To do nothing about the tragic condition of one of our most fundamental industries is to raise a white flag of surrender. We soon will be economically conquered and our people will be paying their tax dollars in tribute for the defense of foreign markets which are now exploiting them.●

● Mr. MURTHA. Mr. Chairman, this week I received the most recent unemployment statistics for my district in western Pennsylvania. I am very disheartened by the large jump in laid-

off workers over the last several months. For example, more than 5½ percent of all persons employed last May in Cambria County, which relies chiefly on heavy industry for a strong economic base, are now without jobs. As of October, unemployment reached 19.5 percent, an increase of 2½ percent over September's figure. In Westmoreland County, another highly industrialized section of the district, the increase is 4 percent since May.

These figures come to me after months of anticipation of the economic recovery that the American people have been promised. I am still looking for the upward break in the statistics charts that indicates recovery is assured. So are the many thousands of newly laid-off workers standing in food lines and collecting unemployment checks.

The economy of Westmoreland County is particularly affected by the auto industry. It is the home of the New Stanton Volkswagen plant, which is suffering from dangerously low production rates and dangerously high layoff rates. Westmoreland County is also home for a number of specialty steel companies, which manufacture all automobile parts requiring high stress, and high heat, and corrosion-resistance parts.

In Cambria County, the leading employer in the steel industry is Bethlehem Steel Corp. Twenty-five percent of all of Bethlehem's final steel products are shipped to Detroit for automaking. The slump in car sales in Michigan has had a heavy impact on steel production and employment in Cambria County. The results of steel and auto layoffs, combined with the general economic recession, have made western Pennsylvania one of the hardest hit areas in the entire United States. Newscasts regularly feature stories on new layoffs. Special efforts to provide food and other essentials by community groups for unemployed families are underway throughout both Westmoreland and Cambria Counties. In the meantime, pessimistic predictions on the ripple effect abound, and the result is unemployment in such areas as food sales and Christmas retail sales.

There is no doubt that many factors have had a cumulative effect on the problems of western Pennsylvania and the entire United States. But there can also be no doubt that the American people have identified foreign imports as one of the key reasons for America's economic recession. I could not agree more.

Just yesterday, in neighboring Armstrong County, a businessman took out a one-half-page newspaper advertisement concerning foreign imports and has reproduced it to affix to all the packages he ships across the United States. That ad shows an old biplane piloted by a Japanese person dropping bombs on the United States. The bombs are in the shape of Japanese-produced automobiles. That shows the emotional depth of the feeling against foreign imports.

It is against this backdrop that the United Auto Workers have prepared and developed this content law legislation we are debating today. I would like to congratulate the United Auto Workers on the outstanding lobbying effort they have done throughout 1982. I have had several meetings with them on difficult points in this legislation and they have done a magnificent job of developing creative, productive solutions to parts that needed ironed out, thus creating the strong legislation we have before us.

My strongest concern is for the Volkswagen plant in Westmoreland County. There is no doubt that this Congress must give attention to the entire American auto industry. One fact is very clear: The U.S. economy will not be back on track until the American auto industry is back on track. Behind all the production and unemployment figures in the auto industry, one fact stands clear: 1 out of every 5 jobs in the United States is tied to the production of automobiles. When auto production is down, it affects rubbermaking, spare parts production, steel production, and a host of other items, all the way down to the local community, where in western Pennsylvania we have seen a score of local auto dealers close their doors in the last year. Each one of those closings, too, adds another 15 to 20 people to the unemployment rolls and robs the community of jobs for teenagers and individuals who offer new skills.

Many of our trading partners have domestic content laws of their own, or maintain restrictive tariff policies that virtually eliminate the threat of foreign competition in automobiles and other domestic businesses. Other countries maintain policies that are designed to prevent the threat of extinction of their businesses. The United States so far has resisted any such action. Perhaps our most surprising trading partner is Japan, which actively opposes restraints by the United States to imported automobiles. Yet Japan maintains an excessive tariff and time-consuming inspection policy on incoming cars that virtually price foreign models out of its local market.

One of the chief arguments against H.R. 5133 is the worry of retaliation by trading partners in other export fields. The fact of the matter is that our competitive trading partners condone protectionist policies and have not suffered considerably from the onslaught of trade wars. In spite of skeptics that insist the United States will suffer irreparable damage from passage of the content law legislation, this proposal will demonstrate to our competitors that the United States will not stand idly by as our domestic auto industry continues to severely slump, and that our Government is not afraid to take a stand against the unfair trade practices of foreign countries.

Again, an important point to bear in mind is that this content law, if passed, would help boost auto production here in the United States and ripple through the entire economy. Jobs for auto workers means jobs for steelworkers, rubber workers, glassworkers, vocational training institutions, and all the way down through all segments of the community.

Lastly, I have seen firsthand the hard times that our unemployed endure. I regularly schedule workshops in my district and meet with unemployed families. Believe me, the time is ripe to show these people that our Government cares.●

● Mr. MURPHY. Mr. Chairman, like the great majority of my colleagues—and I am sure the majority of Americans—I have long believed that our economy benefits most when economic competition remains free of Government interference. The principles of laissez-faire created an atmosphere in which American hard work and ingenuity propelled us to the forefront of the industrial world. Unfortunately, conditions no longer allow us to continue to sit on the sidelines while our basic industries crumble around us and our neighbors join the long lines of the unemployed.

Fair trade benefits everyone, and I know that we would be better off if we were permitted to compete in free markets. However, the world markets are no longer free. Competition is no longer fair, and our Nation can no longer operate under the illusion that it is fair. Many of the industrial countries around the world are unfairly subsidizing their own companies and helping them sell their products in the United States far below the actual costs of prouction. We can no longer afford to let this happen. The 12 million unemployed Americans cannot afford to wait for the administration to seek legal remedies. Our existing trade laws have not worked. We must make changes.

Mr. Chairman, more than 15,000 Americans, formerly employed in the steel industry, became unemployed last month. There were 162,228 people on layoff in our steel industry as of November 27, 1982, and another 13,426 working short weeks. However, we continue to import. Imports for the month of October equaled 1,145,847 tons, and we have imported 14,313,615 tons of steel so far this year. The American Iron and Steel Institute has estimated that each 1 million tons of steel imported into this country results in the layoff of 5,000 Americans. We cannot allow this to continue. We

cannot afford for this to continue. While foreign producers have increased their share of our market to over 22 percent this year, our domestic producers' rate of production utilization has dropped to 48.1 percent. Last year at this time, the domestic steel industry was working at 78.9 percent of capacity. That is a drop of 39 percent.

I rise today to introduce the Fair Trade Act of 1982, which has two basic goals. First of all, the Fair Trade Act establishes a schedule which limits penetration of foreign steel to a level dependent upon the rate of production utilization in the domestic steel industry. This legislation limits imports to 2 percent of the market when the domestic steel industry is operating at less than 60 percent of capacity. When the domestic steel industry is working at 60 percent to 85 percent of capacity, the quota on imports would be increased to 10 percent. There would be no limit on imports when the domestic steel industry is operating at greater than 85 percent.

Second, the Fair Trade Act would also establish the President's Commission on Basic Metals, which would bring together spokesmen from labor and industry, members of the Cabinet and the administration, as well as noted experts in fields such as economics, trade, industrial analysis and planning, and defense, who would analyze and determine the needs of the basic metals industries. The function of the Commission is to monitor the progress of the industry under the act.

I do not profess to have all of the answers. If the industry is not improving under this legislation, then it would be one of the duties of the Commission to recommend changes that should be made to the President and to Congress. The Commission would also be asked to propose other actions that could be taken to revitalize all of our basic metals industries. As a nation, we have the intellectual and physical abilities to turn our economy around. It is essential that we begin to make use of that ability.●

● Mr. WALGREN. Mr. Chairman, every day the unemployment pictures gets grimmer and dimmer. With 12 million people out of work, unemployment is now at 10.8 percent, the highest since 1942. The steel industry is operating at 31.6 percent of capacity, with unemployment in that industry at an astounding 38 percent. In my home area of Pittsburgh, unemployment in the steel industry has reached 50 percent. In the automobile industry, 275,000 people are on indefinite layoff, putting the level at 35 percent in that industry.

As a cosponsor of H.R. 5133 and one who worked in the Energy and Commerce Committee for its enactment, I am pleased to support the domestic content legislation that I hope will put Americans back to work. This bill would require any car manufacturer who sells more than 100,000 cars a year in the United States to use a substantial amount of American parts and be assembled largely by American workers.

The auto industry has been in a crisis for almost 4 years, which has resulted in the closing of 30 major plants, the indefinite layoff of 285,000 auto workers and the loss of another 670,000 jobs in industries supplying car manufacturers, such as steel.

Our committee developed this bill because we believe that unfair commercial relationships between United States and certain foreign auto-producing nations are a principal cause of our high levels of unemployment in the auto industry. Most auto-producing nations have established trade restrictions which limit automobile imports to a very small share of domestic markets. The United States, however, has placed virtually no restrictions on foreign auto makers' access to our market. As a result, imported car sales, which were around 15 percent in 1970, were at 27 percent in 1981. Thus, this bill is a step that would adjust American automobile trade and industrial policy to the realities of other nations' promotional and protectionist measures. It would help to rectify a trade inequity that has gone on for too long and has cost too many jobs.

It is our hope that this bill can help alleviate our serious unemployment situation. It can do so by encouraging foreign auto manufacturers that have captured large shares of our market to locate facilities here in our country. This is not so far-fetched. In Westmoreland County, Pa., which borders my district, Volkswagen of America has been making Rabbits and light trucks since 1978. Today, all Rabbits sold in the United States are made in this U.S. facility. These cars have 70 percent U.S. content of parts and labor. Nissan is currently constructing a $500 million plant in Tennessee which will employ 2,900 people. And Honda will open a plant in Marysville, Ohio.

Last year, Toyota, Nissan, and Volkswagen, sold about $15 billion in parts and vehicles in the United States. I believe it's only fair to expect companies to contribute to an economy from which they derive great benefit. If this bill becomes law, we can expect that by 1986 foreign auto companies will spend about 50 percent of their U.S. sales volume in the United States, rather than at the current level of 15 percent.

One study has shown that this bill could result in over a million domestic jobs by 1986 in the auto industry and its suppliers. We must have a healthy auto industry to have a healthy economy. The auto industry consumes 29 percent of all the steel used in this country, 50 percent of the malleable iron, 34 percent of the zinc, 12 percent of the primary aluminum, 13 percent of the copper, and 60 percent of the synthetic rubber. A bill that can mean over a million jobs is a must bill during a time when employment is approaching 11 percent. Unemployment has huge emotional, disrupitve costs to individuals. It has costs to society as well. Losing these jobs could cost the U.S. treasury $25 billion a year in increased welfare and unemployment payments, lost tax revenues, and a bigger Federal deficit.

There are those who will say that this is protectionist legislation, that it will invite retaliation by Japan and other countries. In my view, this bill will invite Japan and others to remove trade barriers that have blocked U.S. goods from entering their markets. Thirty-one countries now have auto domestic content laws in force. Japan's restrictive policies have meant that U.S. auto companies have a total of 0.9 percent of the Japanese market. Japan has a 30-percent share of ours. This bill is but a modest response to a long history of systematic trade discrimination.

I hope my colleagues will join me in approving it.●

● Mrs. HOLT. Mr. Chairman, this is truly beggar-thy-neighbor legislation.

It is designed to provide one part of the American economy with a captive market for its products by eliminating its major foreign competition.

It would reduce the pressure on the American auto industry to improve its products, increase productivity, and restrain prices. It is the most anticonsumer piece of legislation I have seen since coming to Congress 10 years ago.

Worse yet, there is a clear danger that the enactment of this legislation could ignite a chain reaction toward protectionism. It would be a violation of the international General Agreement on Tariffs and Trade.

The United States has been a leading advocate of free trade because exports are extremely important to our economy. If we take this major plunge into protectionism, we would be inviting retaliation against our own products in international markets.

I would remind my colleagues from Maryland that our State has a great stake in free trade because of the preeminent role of the Port of Baltimore in the Maryland economy. Maryland would lose jobs in a world absorbed in protectionsim.

In fact, every economic report I have seen on the impact of this legislation predicts that it would cause the American economy to lose many more jobs than it would maintain in the auto industry.

The Commerce Department estimates that $15 billion of U.S. exports would be vulnerable to retaliation, especially aircraft, office equipment,

electrical components, and farm commodities.

Mr. Chairman, I have been very impressed with the vigorous efforts of the American auto industry to improve its competitive position in terms of quality, productivity, and restraint on prices. The competitive forces in the market are producing these results.

I have been very concerned at the tragic loss of jobs in the auto industry because of the recession, foreign competition, and the technological revolution.

But if we want economic growth and more jobs for the American people, we will not lunge into protectionism that would create havoc in world markets that would damage other American industries.

If we want to avoid turning a world recession into a global depression, we will not enact legislation that would make us the leaders in protectionism.

If we want American consumers to continue having the widest choices of products to meets their needs, we will not make them a captive market for a few manufacturers.●

● Mr. TRAXLER. Mr. Chairman, the issue is jobs—jobs for Americans, the people we represent. For too long now our Government has taken the attitude that any effort to preserve American jobs would result in retaliation from our trading partners. But nowhere in this discussion do the opponents of this type of legislation remind themselves of the fact that every other major trading nation in the world has trade policies far more restrictive than any we are proposing.

Unemployment in my State of Michigan is 17.2 percent, far more than the national rate of 10.8 percent. If we had only the national unemployment rate in Michigan, many people would think that our economic problems are ending.

But when the people I represent fear every day that they may be losing their job, when they see that their neighbors are being forced to move to find gainful employment, when they find banks and Government agencies threatening foreclosures on their homes for delinquent mortgages, my constituents know what it is like to live in a depression.

Some will claim that the auto industry should blame only itself for its problems. They should have been prepared to meet the competition from the Japanese. Workers should have scaled back their wages. These people who will claim to know better than those who have to work on these problems every day ignore the fact that autoworkers have scaled back on wage demands and have put off pay raises. They ignore that the quality of the American automobile is significantly higher than it was in the past, including the fact that American-made car are far safer than most imports.

Today, Mr. Chairman, those of us who have sponsored domestic content legislation from the start come before our colleagues to say enough is enough. We want to preserve jobs for the people we represent, and we want those companies that are taking so many dollars out of the American economy to start contributing to its well-being. One out of every five Americans have jobs that are linked in some way to the auto industry. Auto part suppliers are feeling the difficulties. Support industries are feeling the difficulties. Most importantly, our Federal budget is feeling the difficulties. Every 1 percent unemployment adds $25 billion to our deficit in the form of demands for governmental assistance and lost tax revenue. If we want to get our budget deficit under control, put Americans back to work.

Over 30 countries impose domestic content requirements, including Italy, France, Germany, and Great Britain. France limits Japanese imports to 3 percent of its domestic market, while Italy limits imports to only 2,000 units annually.

Japan itself has some of the most restrictive trade policies in the world. While it has committed itself as a nation to rebuilding its industry and in particular its auto industry, it has some of the highest tariffs in the world as so many of our farmers who are trying to sell grain and beef to Japan know so well. Let the Japanese open up discussion about buying American agricultural goods if they want to maintain their access to the American auto market. You and I both know that they are unwilling to do this. The reason? They want to protect their domestic economy.

There has never been a substantial recovery from a recession without a recovery in the auto industry. If we want to see our economy get better, then we must act to help our auto industry improve. It is not to help GM or Ford or Chrysler or AMC. It is to help States like Michigan, Ohio, Illinois, and Indiana that are having very difficult times in the face of massive unemployment and demand for Government services to the needy. It is for the quarter of a million people who have been indefinitely laid off, and the additional half million people who have been laid off from auto support industries. It is for the nearly 1 million families that are trying to live through the strain of unemployment, and the millions more who live with the fear of unemployment.

While Japan's share of our auto sales jumped from 12.1 percent to 21.8 percent between 1978 and 1981, our unemployed autoworkers have exhausted their extended unemployment benefits. The cruel hoax of the benefit extension in President Reagan's last tax increase bill did not provide any help to the people in Michigan who could not meet the requirements of the bill. The industry's capacity utilization is at the lowest rate in 30 years, while the President goes sleepwalking into the future every time that he says "Don't worry, my program will work."

Mr. Chairman, the chief form of Federal assistance to the State of Michigan may be the food stamp program, which is providing in excess of $35 million to Michigan each and every month. This is not a fact of which we are proud, it is a fact which shows how serious our problems are.

There comes a time when we must stand up and defend the interest of the people we represent. My constituents want work. They want to be able to buy new furniture, new cars, and new homes so that others may return to work. They want to see America moving again, but if they see America moving in a Toyota while we sit here with good wishes for the future, they have every right to ask whether or not Congress cares about the problems of the American people.

I urge the adoption of H.R. 5133, the Fair Practices in Automotive Products Act.●

● Mr. GILMAN. Mr. Chairman, I rise in support of H.R. 5133, the Fair Practices in Automotive Products Act. While I recognize the adverse effects of protectionist policies and realizing the repercussions that this kind of legislation could have on our exports, I say also cognizant that this bill is highly supportive of American jobs and the value and integrity of the American autoworker and all workers whose jobs are closely connected to them including parts suppliers, steel companies, tire manufacturers, and textile firms. With unemployment approaching 11 percent and our economy struggling to make a comeback, this is an appropriate time to take a firm stand for the automobile industry and for the workers of America. The Bureau of Labor Statistics estimates that every direct auto manufacturing job creates 2.35 additional positions in steel, rubber, glass, textiles, and other industries. Approximately 5 million jobs are involved in producing, selling, and servicing automobiles.

The objective of this bill is salutary in serving to remedy the unfair commercial relationships between the United States and certain foreign auto-producing nations by requiring certain manufacturers to produce vehicles for sale in the U.S. market that contain specific levels of U.S. labor and parts.

I know firsthand the agonies experienced by autoworkers when a plant closes.

Recently a Ford assembly plant closed in my region in New York State with the loss of 5,000 jobs. Another

8,000 jobs are threatened in the General Motors plant in North Tarrytown, N.Y. We cannot deny that foreign imports have put pressure on American jobs and the automobile industry. Our Nation has been open to all foreign trade and we have welcomed products from countries with different living standards and government policies of industrial support, which have impacted severely on product price and quality. These same nations have considerable import restrictions and often domestic content laws, keeping out U.S. automobiles. We do not want this legislation to stand for a retaliation against their policies, but rather to stand for our support for fair trade and our belief that American products have the ability to compete fairly with any on the market because they are produced by the finest workers in the world with the greatest imaginations and perseverance. Yet when it comes time to judge why we are losing ground against an influx of imports, the argument of high American wages is inevitably put forth by opponents of this kind of legislation.

Certainly the American industry must become competitive with foreign imports in the automobile industry—that is the basis of our free enterprise system. Auto workers have made concessions on wages and benefits already this year to hold onto their jobs and to keep their plants in operation. I am proud to live in a nation that places the worker first and the quality of life to which he and she are entitled. Yet we are asking the automobile worker and the auto industry to take it on the chin from competition that has considerable Government protection in the countries from which they come.

I urge my collegues to support this measure because I believe its passage will send a signal to other nations and to our own workers that we stand firmly behind American products and are committed to fair trade.●

● Mr. COURTER. Mr. Chairman, I rise in opposition to H.R. 5133, the Fair Practices in Automotive Products Act. I do so for several reasons.

First, one erroneous assumption this legislation is predicated upon is that it will create new jobs. A recent Congressional Budget Office study estimates that possibly between 38,000 and 100,000 auto jobs could be created by the 1990's, the new jobs are more than offset by the possible loss of up to 104,000 in factories that make goods for American exports. The burden of these losses would be in the electronics, agricultural and service industries. What I am saying is that if we erect trade barriers to protect our automobile industry, our Western trading partners in Europe and the Far East will retaliate in kind.

Second, I oppose this legislation because it places the blame for the condition of our automobile industry almost exclusively on imports. This is not true. Surely, high interest rates and a lagging economy have hurt American industries across the board, especially automobiles and automotive supplies. But the point remains that the foreign import market has grown by only 200,000 more sales than 5 years ago, accounting for 27.7 percent of the total auto sales market in the United States. Our U.S. Trade Representative, Bill Brock, has succeeded in communicating to the Japanese Government and industrial leaders that voluntary export restraints by Japan can help in alleviating the loss of American jobs in our automobile industry. It is my understanding that the Japanese Government is now showing some willingness to cooperate with the United States in order to help preserve our trade relations.

Third, domestic content legislation, which is on the books in 30 foreign nations, does not work. Only 3 out of the 30 countries, Spain, Greece and Australia, are considered industrialized, but none of those 3 nations is competitive in any way in this industry.

Fourth, I am concerned about the cost effect this legislation would have on new car and trucks sales here, if enacted. The Congressional Budget Office estimates an average increase of $333 per vehicle due to curtailed imports on parts and equipment. Of course, higher sticker prices will reduce domestic sales, and thereby reduce jobs.

Equally important, this legislation prohibits American automobile manufacturers from seeking out less expensive parts and equipment from abroad, which could reduce or at least hold the line on domestic car/truck costs. The car of today's automobile industry is made up of components from around the globe. American manufacturers must procure quality parts and equipment from wherever they can find the best price to keep the cost to the American consumer down.

In conclusion, I would like to state there is no Member of the House who wants to see our automotive industry disappear. That would be terrible, not only to this industry but to our entire economic well-being. The problem with this legislation is that it really does not do anything concrete to assist our automotive industry or the American economy. I originally cosponsored this legislation to give our Special Trade Representative the leverage he needed with Japan to secure their cooperation in removing tariff and nontariff trade barriers.

While I can understand, and in fact, share the sentiments of those who want to preserve American jobs against unfair foreign competition, I believe restrictive trade policies can cause greater harm to our overall economic situation. The export-import industry plays an important role in providing greater employment opportunity for all American workers. Instead of adopting protectionist policies which, in the long run, will reduce the potential for economic growth and jobs, I believe we must firmly challenge those specific policies adopted by foreign nations, and seek to reduce those tariff and nontariff trade barriers raised by Japan and other nations. We cannot base our international trade on tariffs, barriers, or even indefinite voluntary restrictions by our partners. We must permit our companies to obtain the parts and equipment they need from wherever to produce competitively priced products.

H.R. 5133 is not the answer and I ask my colleagues to join me in opposing this bill.●

● Mr. HAMMERSCHMIDT. Mr. Chairman, the bill before us, H.R. 5133 amounts to a well intentioned but misguided effort to compete with foreign auto markets through import controls. While I share my colleagues concern about high unemployment rates in the auto industry, this legislation is not the answer to the auto industry's ills. Although the original bill had strong support, many Members have now revealed their second thoughts about the wisdom of this bill.

Clearly, the U.S. automotive industry is facing severe difficulties that must be solved. However, the industry's problems are complex and will require considerable ingenuity through our trade and tax laws and through a new alliance by Government, labor, and managment to be resolved. The recession and high interest rates have contributed to the drastic reduction in domestic auto sales.

To the extent imports are contributory to the industry's ills, the administration has supported voluntary export restraints extended by the Japanese Government. These Japanese voluntary restraints are effectively meeting the import problems without jeopardizing American exports, jobs, and trade.

As stated earlier, high interest rates are widely blamed for the problems facing the domestic auto industry. Recent reports released in mid-November reveal that car sales, due to special low interest offers and rebates, have increased sales on domestic cars an average of 42 percent in recent months. That major issue to be addressed today, is whether or not the domestic auto industry can recover without the passage of H.R. 5133. I think the answer is yes.

As long as foreign cars are produced for substantially lower prices they will beat out domestic lines. Americans vehicles will cost more as long as hourly wages and benefits remain over 70 percent higher than foreign markets. Moreover, we should not underestimate the rising billion dollar cost of

Federal regulation. The central problem in the auto industry has been its failure to recognize the threat and quality posed by its competitors abroad. Detroit designed vehicles were not made for the swiftly developing energy efficient needs of today's marketplace.

Although advertised or billed as a jobs savings bill, the domestic content bill will actually cost jobs in the United States. The Congressional Budget Office (CBO) has predicted a maximum of 100,000 jobs might be generated because the bill restricts foreign imports; however, other sectors of the economy will be directly and negatively affected. Basically, what this means, is that although some gains will be made in auto industry jobs, they will be more than offset by positions lost by longshoremen, automobile importers, foreign car dealers, and a multitude of other ripple industries. In fact, it is estimated that H.R. 5133 will eliminate some 104,000 U.S. jobs because of retaliatory restrictions that would most certainly be adopted on nonauto exports.

The bill would hurt domestic auto companies rather than help them since it would severely restrict their ability to trade internationally and obtain lower cost components. The result in the end would be increased costs to both dealers and consumers. CBO stated that U.S. auto prices would increase 10 percent, an average of $333 per car. Each job created would cost consumers almost $100,000 in higher prices. The consumer's choice of models, prices, and performance will be more limited.

U.S. Trade Representative William Brock has properly labeled this proposal "the worst threat to the international trading system and our own prosperity to be put before Congress in the last decade." By approving this measure, any further efforts to open foreign markets will be hampered. This bill is tantamount to a protectionist policy that is against the best interest of our national trading policy.

Passage of this bill would be a clear violation of our international obligations under the General Agreement on Tariffs and Trade (GATT). We have just returned from the Geneva GATT ministerial meeting during which time member nations led by the United States agreed to attempt to eliminate trade restrictions. Therefore, approval of a domestic content bill would surely place the United States in a hypocritical position. This protectionist approach advocated by the supporters of H.R. 5133 would have serious international trade reprecussions. It would assuredly establish a dangerous precedent which could lead to retaliatory gestures by our major trading partners. The United States must continue to take the lead in the free world in resisting protectionist postures.

The farm community in my home State of Arkansas has consistently petitioned the congressional delegation to reduce agriculture trade barriers. I have traditionally proposed efforts under GATT to resist protectionist tactics at all costs which could bring forth serious reprecussions in world trading.

Approval of this bill would pose a real threat to farmers since one-fourth of the U.S. farm income revolves around export markets. It is difficult to predict how these countries might react and assess the damage back home. Their reaction could possibly include limitations on our $40 billion agricultural exports market.

Since we export 2 out of every 5 acres of crops grown and nearly a fourth of farm cash receipts are from export sales, this bill would endanger these sales. For the past 2 decades the Eurpoean Community has been seeking a chance to overturn its commitment in GATT to import oilseeds and nongrain feed ingredients free of import duties and restrictions. The United States exports over half of its soybeans and the European Community purchases nearly half of these exports.

The bottom line is that this bill will harm our national economy which in turn will further destabilize the auto industry. With farmers facing their third consecutive year of depressed prices and still suffering the gross effects of previous embargoes of their products, this is not the time to jeopardize our present agricultural trade market.

Considering the enormous and dangerous consequences of the bill, the House of Representatives should properly reject this ill-advised measure. A free society should not except such Socialist inspired restraints on trade and consumer freedom of choice. The consumer should always set the flow and price of goods sold in a free enterprise system.

Mr. Chairman, I, too, am concerned about our auto industry. But is protectionism on a scale unequaled since the Great Depression, protectionism that by its very nature invites similar reactions from other nations, the right answer? I submit that it is not.●

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the committee amendment in the nature of a substitute recommended by the Committee on Energy and Commerce now printed in the reported bill is considered as an original bill for the purpose of amendment and said committee amendment in the nature of a substitute is considered as having been read.

The text of the bill is as follows:

H.R. 5133

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fair Practices in Automotive Products Act".

SEC. 2. PURPOSE.

The purpose of this Act is to encourage the production of automotive products in the United States.

SEC. 3. DEFINITIONS.

(a) IN GENERAL.—As used in this Act—

(1) The term "automotive products" means motor vehicles and parts for use in the production of new motor vehicles.

(2) The term "added domestic value", when used with respect to a vehicle manufacturer for any model year, means the aggregate of—

(A) the production costs of all automotive products sold by the vehicle manufacturer in the United States, other than for export, during that model year, and

(B) the export value of all automotive products that were either—

(i) manufactured by the vehicle manufacturer in the United States and exported from the United States by, or on behalf of, such manufacturer during that model year, or

(ii) manufactured in the United States by any other person and purchased by the vehicle manufacturer and exported from the United States by, or on behalf of, such manufacturer during that model year, but only to the extent that the export value of such automotive products is not included in automotive products to which clause (i) applies;

reduced by the aggregate appraised value, as determined for purposes of the customs laws, of all automotive products that were entered by, or on behalf of, the vehicle manufacturer during that model year.

(3) The term "domestic content ratio" means, with respect to a vehicle manufacturer for any model year, the percentage determined by multiplying by one hundred the factor obtained by dividing—

(A) the added domestic value determined for that manufacturer for that model year under paragraph (2); by

(B) the production costs determined, for purposes of paragraph (2)(A), for that manufacturer for that model year.

(4) The term "entered" means entered, or withdrawn from warehouse for consumption, within the customs territory of the United States.

(5) The term "model year" means a vehicle manufacturer's annual production period (as determined by the Secretary) which includes January 1 of a calendar year, or if a vehicle manufacturer does not have an annual production period, the calendar year. A model year shall be designated by the year in which January 1 occurs.

(6) The term "motor vehicle" means any three-wheeled or four-wheeled vehicle propelled by fuel which is manufactured primarily for use on the public streets, roads, and highways (except any vehicle operated exclusively on a rail or rails), and which is rated at ten thousand pounds gross vehicle weight or less. Such term does not include (A) any motorcyle, or (B) any vehicle determined by the Secretary to be an automobile capable of off-highway operation within the meaning of section 501(3) of the Motor Vehicle Information and Cost Savings Act.

(7) The term "production cost" means, with respect to an automotive product, the wholesale price to dealers in the United States for that product as set forth in the vehicle manufacturer's official dealer price list that is in effect at the time the product is sold at wholesale.

(8) The term "Secretary" means the Secretary of Transportation.

(9) The term "vehicle manufacturer" means any person engaged in the business of producing motor vehicles for ultimate retail sale in the United States and includes as one entity all persons who control, are controlled by, or are in common control with, such person. Such term also includes any predecessor or successor of such a vehicle manufacturer.

(b) DETERMINATION OF ADDED DOMESTIC VALUE.—For purposes of applying paragraph (2) of subsection (a)—

(1) Two or more vehicle manufacturers may not include, for purposes of determining their respective added domestic values, the value of the same automotive product; but such manufacturers may, under rules prescribed under section 4(b), apportion the value of that automotive product among them.

(2) The term "export value" means, with respect to an automotive product—

(A) the free-on-board price for which the vehicle manufacturer sells the product for exportation from the United States; or

(B) if the vehicle manufacturer sells the product for such exportation to a buyer that controls, is controlled by, or is under common control with, such manufacturer, the price at which such or similar products are freely offered for free-on-board sale to all purchasers in the principal markets of the United States in the usual wholesale quantities and in the ordinary course of trade for such exportation.

(3) Any automotive product that is entered by a person other than a vehicle manufacturer shall, if such product is purchased or otherwise acquired by the manufacturer (and whether or not used in the fabrication of another automotive product which is acquired by that manufacturer), be treated as having been entered by that manufacturer.

SEC. 4. CONTENT RATIOS FOR MODEL YEAR 1984 AND THEREAFTER.

(a) RATIOS.—For each model year beginning after January 1, 1983, the minimum domestic content ratio for a vehicle manufacturer shall not be less than the higher of—

(1) the domestic content ratio achieved by the vehicle manufacturer in model year 1983 reduced by 10 per centum; or

(2) the applicable minimum content ratio specified in the following table:

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Model Year 1984	
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 30,000.
Over 900,000	30 percent.
Model Year 1985	
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 15,000.
Over 900,000	60 percent.
Each Model Year After Model Year 1985	
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 10,000.
Over 900,000	90 percent.

(b) ALLOCATION OF AUTOMOTIVE PRODUCTS AMONG MANUFACTURERS.—In order to carry out the purpose of this Act, the Secretary shall prescribe rules for allocating automotive products among vehicle manufacturers in appropriate cases such as where—

(1) a vehicle manufacturer sells automotive products manufactured by it in the United States to another vehicle manufacturer;

(2) two or more vehicle manufacturers in joint venture produce automotive products in the United States; and

(3) a vehicle manufacturer produces motor vehicles for ultimate retail sale in the United States, some of which will be sold by that manufacturer and some by another vehicle manufacturer.

SEC. 5. INFORMATION AND REPORTS.

(a) VEHICLE MANUFACTURERS RECORDS AND INFORMATION.—Each vehicle manufacturer that produces more than one hundred thousand motor vehicles for sale in the United States during any model year after model year 1982 must establish and maintain such records, and provide such information, regarding the production and sale of automotive products by it as the Secretary by rule shall require for purposes of carrying out section 4(a) and the enforcement provisions of section 6.

(b) AUTHORITY TO OBTAIN INFORMATION.—(1) The authority granted to the Secretary under subsection (b)(1) of section 505 of the Motor Vehicle Information and Cost Saving Act (as in effect on the date of the enactment of this Act) to obtain information and data, and access thereto, that is deemed advisable by him for purposes of carrying out part V of that Act may be used by the Secretary for purposes of obtaining the information and data, and access thereto, that is necessary or appropriate to carry out section 4 (a) and section 6.

(2) The authority granted to the districts courts of the United States under subsection (b)(2) of such section 505 to enforce compliance with action taken by the Secretary under subsection (b)(1) of such section may be used by such courts to enforce actions taken by the Secretary pursuant to paragraph (1) for purposes of carrying out this Act.

(3) The Secretary shall disclose any information and data obtained under this subsection and subsection (a) to the public only in accordance with seciton 552 of title 5, United States code; and any matter described in subsection (b)(4) of such section shall not be disclosed to the public, except that where such matter may be relevant to any administrative or judicial proceeding to enforce this Act, such matter may be disclosed in such proceeding only in a manner which would not result in competitive damage or disadvantage, as determined by the Secretary or a court, because of such disclosure.

(c) ANNUAL REPORTS.—As soon as practicable after the close of each model year after January 1, 1983, the Secretary shall prepare and make available to the public a report setting forth the domestic content ratio achieved by each vehicle manufacturer during such model year.

SEC. 6. ENFORCEMENT.

(a) FAILURE TO MEET CONTENT RATIOS.—(1) It is unlawful for a vehicle manufacturer to fail to meet for any model year the applicable minimum domestic content ratio required under section 4(a).

(2) If the Secretary finds, after notice and an opportunity for a hearing in accordance with section 554 of title 5, United States Code, that a vehicle manufacturer has violated paragraph (1), the Secretary shall issue an order prohibiting the vehicle manufacturer from entering, or having entered on its behalf, during the twelve-month period beginning on the date on which the finding becomes final—

(A) a quantity of motor vehicles that exceeds the total quantity of motor vehicles that was entered by, or on behalf of, that manufacturer during the model year in which such violation occurred reduced by the number of motor vehicles that bears to such total quantity the same percentage by which the vehicle manufacturer failed to meet the domestic content ratio for that model year; and

(B) parts for motor vehicles in an aggregate value (as appraised for purposes of the customs laws) that exceeds the total aggregate appraised value of parts for motor vehicles that were entered by, or on behalf of, that manufacturer during the model year in which such violation occurred reduced by parts of an aggregate value that bears to such total aggregate value the same percentage by which the vehicle manufacturer failed to meet the domestic content ratio for that model year.

(3) An order issued pursuant to paragraph (2) shall specify the total number of motor vehicles and the aggregate appraised value of parts for motor vehicles that may be entered during the applicable twelve-month period by, or on behalf of, the vehicle manufacturer. The Commissioner of Customs shall take such action as may be necessary to ensure that the entries made by, or on behalf of, the vehicle manufacturer during such twelve-month period do not exceed the limits specified in the order.

(4) Any person against whom an order is issued under paragraph (2) may, within sixty calendar days after the date of the order, institute an action in the United States court of appeals for the appropriate judicial circuit for judicial review of such order in accordance with chapter 7 of title 5, United States Code. The court shall have jurisdiction to enter a judgment affirming, modifying, or setting aside in whole or in part, the order of the Secretary, or the court may remand the proceeding to the Secretary for such further action as the court may direct.

(b) OTHER VIOLATIONS.—(1) Any person who knowingly violates any provision of this Act (other than failure to meet the applicable domestic content ratio for any model year) or any rule or regulation issued under

this Act shall be liable to the United States for a civil penalty of not more than $10,000. Each day of a continuing violation under this subsection shall constitute a separate offense.

(2)(A) Before issuing an order assessing a civil penalty against any person for violation of paragraph (1), the Secretary shall provide to such person written notice of the proposed penalty.

(B) The Secretary shall promptly assess such penalty, by order, after the date of the receipt of the notice under subparagraph (A) of the proposed penalty.

(C) If the penalty has not been paid within sixty calendar days after the assessment order has been made under subparagraph (B), the Secretary shall institute an action in the appropriate district court of the United States for an order affirming the assessment of the civil penalty. The court shall have authority to review de novo the law and the facts involved, and shall have jurisdiction to enter a judgment enforcing, modifying, and enforcing as so modified, or setting aside in whole or in part, such assessment.

(D) If any person fails to pay an assessment of a civil penalty after the appropriate district court has entered final judgment in favor of the Secretary under subparagraph (C), the Secretary shall institute an action to recover the amount of such penalty in any appropriate district court of the United States. In such action, the validity and appropriateness of such final assessment order or judgment shall not be subject to review.

(3) The Secretary may compromise, modify, or remit, with or without conditions, any penalty that is subject to imposition or that has been imposed under this subsection.

SEC. 7. STUDY OF DISCRIMINATORY PRACTICES AFFECTING DOMESTIC PRODUCTION OF MOTOR VEHICLE PARTS.

Within one year after the date of the enactment of this Act, the Secretary and the Federal Trade Commission shall jointly undertake an investigation, and submit to Congress a written report, regarding those policies and practices of vehicle manufacturers that are used to persuade United States motor vehicle dealers, in chosing replacement parts for motor vehicles, to favor foreign-made parts rather than domestically produced parts. Such report shall include, but not be limited to, recommended administrative or legislative action that the Secretary and the Federal Trade Commission consider appropriate to assure that domestic producers of replacement parts are accorded fair access to the United States market for such parts.

SEC. 8. GAO REPORT

Not late than one year after the date of the enactment of this Act and each year thereafter, the Comptroller General of the United States shall transmit to the Congress a report on the impact of this Act on the automotive and related industries in the United States. Each report shall contain an analysis of the impact of this Act during the period for which the report is submitted—

(1) on the prices of new, domestic and foreign motor vehicles;

(2) on the employment within the United States in motor vehicle manufacturing and in related industries and on employment in the United States in export industries;

(3) on the productivity and profits of vehicle manufacturers who have sales of their motor vehicles in the United States;

(4) on the productivity and profits of foreign vehicle manufacturers who have production facilities in the United States; and

(5) on the development of motor vehicles suitable for use in more than one country.

Each report shall also contain recommendations for such legislation as the Comptroller General determines is appropriate.

The CHAIRMAN. Are there amendments to the bill?

Mr. GIBBONS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I regret every time we get into this subject the gentleman from Michigan (Mr. DINGELL) has to get into personal remarks. I do not believe I ever recall hearing from him on trade issues until this bill was introduced. I could be wrong.

He has said nothing that I agree with that I have not heard before. Some of the things he says I disagree with.

I take no umbrage with anybody about jurisdiction. If the Ways and Means Committee had any time to consider this bill we would have given it serious consideration. Because of a historic accident we were deprived of ever even getting our hands on it or holding a hearing until the 21st of September of this year. In fact, I had to begin the hearings before the bill was even being referred to the Committee on Ways and Means. That is the history of my relationship with the gentleman from Michigan on this bill.

I have no monopoly on trade. I have no monopoly on my love for my country or my belief in my country. But I want to set the record straight as to where we are on this.

When the hearings began I gave notice to everyone that wanted to appear within the limited amount of time that we had, and we had hearings on religious holidays in order to make the fastest progress we could.

I was even-handed with the hearings. I tried not to stack them. I purposefully scheduled everybody that I thought would be in favor of the bill, and they are all in the hearing record.

When the hearings were cut off because the bill was jerked out of the Ways and Means Committee with no consideration by my subcommittee, or anybody else, I still had literally more than 100 interested people that wanted to appear opposing this bill. Their chance in the American Congress to testify about this bill was cut off. I contrast that with the roughly 2 or 3 hours of hearings that were given in the other committee on this bill.

Every charge that has been made on this floor here today by the proponents of this bill is fully answered in 856 pages of testimony by American witnesses that have their life at stake in this legislation.

□ 1310

Mr. BAILEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I do want to say that the gentleman from Florida is correct. The hearings were exhaustive, they ran all day, for countless hours. Both sides were presented. I sat through those hearings with the gentleman from Florida. He was completely and totally fair to me at all times. We do disagree on policies at times, but I hope there is no question as to whether a complete and total hearing was fairly given to everyone to present views from all sides of this issue. Given the time alloted, I want to compliment the gentleman from Florida. He did a fantastic job of providing a fair hearing forum for everyone.

Mr. GIBBONS. I thank the gentleman from Pennsylvania. While the gentleman and I at times disagree on the merits of legislation, I have never disagreed with the gentleman's motives and with his sincerity and with his diligence and with his skill. He is a very fine gentleman, and I for one will certainly miss him when he has to leave this Congress.

Of course, hearings are no excuse for action. I do not say that they are. We have had other proposals in our committee. We are working on reciprocity legislation. We hope to go to conference with the Senate on that kind of legislation if they will ever move over there—and I have almost given up on that body.

Mr. OTTINGER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I testified at the hearings of the gentleman from Florida. I will agree that they were fair. The gentleman sought to be exhaustive. I would like to say to him, though, there was no reason to start those hearings at the late date that he did. He already did precede the time the bill was referred to him—again, which we had no control over. But the bill was before the House a whole year prior to that, and if the gentleman had wanted to have more extensive hearings, it certainly was within his prerogative to have done so during the preceding year.

Our international trade situation today is deplorable. The American industrial base has been disappearing, in an important measure, because of predatory practices that have been exercised by our trading competitors, which the gentleman from Florida acknowledged. Now, he says the automobile industry has become noncompetitive and that our solution, therefore, ought to be to give some charity to the workers who have been displaced and watch the automobile industry disappear from America. I think that is not an answer that America can accept.

The automobile industry is central to our industrialized capacity. It is needed for defense; the automobile industry makes tanks and many other

items of military equipment. The automobile industry is probably the most employment intensive and central industry in our entire economy, because on the automobile industry rides a lot of the steel industry, a lot of the rubber industry, the tire industry, the glass industry, and the textile industry. We just cannot sit by and say, "Well, the automobile industry got out of date, so we are going to let it disappear."

The automobile industry today is making a tremendous effort to modernize. I have seen that in my own district, where we have a major automobile facility. We are becoming competitive and indeed the foreign manufacturers who operate in the United States, like Honda and Volkswagen, have testified that their production here is as efficient or more efficient than it is in their own countries. There is no question that we can manufacture competitively here. We need to overcome some of the predatory practices that have been exercised against us, and we need to give a chance to our own automobile industry to revive and to recapture a rightful share of our market. To say that we should just sit by and let it disappear, to me is very disturbing.

Last year the U.S. primary exports were of raw materials, and our primary imports were of manufactured goods. That is the trend we are seeing in this country, and it is a trend that we cannot afford to allow to happen.

There is a great deal of talk on the floor today and the principal argument this bill seems to be on the basis of supposed retaliation. I think that that just plain is not true. First of all, every major industrial country that produces automobiles at the present time has restrictions on imports of foreign automobiles, and there has been no retaliation.

Second, 31 countries have automobile domestic content provisions, many of which are far more restrictive than we have in this legislation, and there has been no retaliation.

Take a look at the horror list that the gentleman from Michigan recited with respect to Japanese restrictions on our trade: agricultural goods, leather, wood products, and all kinds of U.S. manufactures. We have sat idly by and watched that happen and we have taken no measures to assure our products are treated equitably.

Just recently our trade negotiator, Ambassador Brock, went to Geneva, and he tried to get the other major trading countries of the world to take a look into their investment practices and their subsidy practices, and they said they wanted no part of it. Mr. Brock came home empty handed.

I would submit to you that he came home empty handed because they know, when they hear from the President of the United States that we are unalterably committed to free trade, "whether you retaliate against us or not," that we are going to pursue free trade high principles, even if no other country follows suit.

I am for those high free trade principles, but I am for those high principles only if they are exercised universally. When we have the kind of discrimination against the United States and the kind of erosion of our basic industrial job structure that exists today, then I say we have to take action.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has expired.

(By unanimous consent, Mr. OTTINGER was allowed to proceed for 1 additional minute.)

Mr. OTTINGER. I think if we pass this bill, then the other trading countries of the world are going to say, "Look, if we keep up this kind of restriction, the United States is going to take action, at least the U.S. Congress is going to take action," and we will be able to negotiate some meaningful trade agreements to achieve equity in the international markets and acceptable and universal free trade.

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Indiana.

Mr. SHARP. I want to compliment my colleague on the work he has done on this legislation and the statement that he has just made. I think he is right on target. It is important for people to recognize that if we are going to be successful in these negotiations, we are going to have to back it up with strength. And if we will pass this bill today, we will send a very strong message that, while this administration opposes this legislation, I dare say we will improve their ability to get agreements with the Europeans and to get agreements with the Japanese, that we are simply not going to sit by in this country any longer.

Mr. OTTINGER. I cannot understand this administration. It would seem to me that they would support this legislation as the best tool that they possibly have to tell the other countries of the world, "Look, we have got this Congress of the United States, they are bent on achieving equity; if you do not do something to relax your trade barriers, then you are going to be faced with very restrictive trade legislation." I think that is the only way we are going to get a meaningful response to our full trade entreaties.

Mr. YOUNG of Alaska. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this legislation is very popular, of course, in one major industry, and that is the automobile industry. But I think, when we pass legislation like this, we should look at some of the causes, the causes of the automobile industry and the collapse of that industry, and I would like to submit to you that, without looking at all of those causes, we are doing a disservice to the people of America and to those people we are trying to help out.

The gentleman who just spoke in the well said that we are exporting resources, natural raw resources, very few finished products, and importing much of our consumptive goods today.

I would submit at this time that one of the biggest exports we are involved in is 110 billion for fossil fuels and minerals.

I would submit to the Members that the auto industry which we are trying to help here today has been led by a union that has not recognized, by action of their support of taking land out of production, of opposing every major piece of energy legislation, including the gas line that we just tried to have built that would have delivered approximately 400,000 barrels of oil Btu equivalency to the United States, opposed the Alaskan oil line itself that delivers now one-fifth of our domestic consumption each day, 1,600,000 barrels a day, and, in fact, has backed up every environmental issue that comes before this floor, including the same groups that said their goal is to ban all combustion engines by 1990.

□ 1320

They are led by a union that does not understand they are being cut by the same people that they back up.

We hear of the great unfairness of the Japanese automobile industry. To my knowledge, the Japanese automobile industry has never been on strike since 1945. To my knowledge today I believe the United Auto Workers today make more money than any other industry in the automobile field around the world. Now, I do not object to that. I think all Americans should have their just due. What I do object to is the union's inability to police its own ranks about the product which they are putting into the American market.

I have a little story I want to tell to this group today, and to the listening audience, that is a true story.

I have been driving American-made cars. That is more than I can say about some of the Members on this floor, including some of those who are promoting this bill. They are not new, they are older cars, and I have worked on them and rebuilt them, because they were built in an era and time of pride in workmanship—the 1966's, 1967's, and 1968's.

Because I have got up to an older age now I like to have a new car. I have tried to buy one.

I ordered a brandnew Z-28 Camaro Indy pace car with all the goodies you could imagine, a $16,000 car. I waited 3 months for it. And I was excited.

When it was finally delivered to me, when I got it home, I was very impressed with the engineering of that car, finest engineered car in the world today. I lifted the hood to look at that magnificent fuel-saving engine that took time to develop, and I could not put the hood down, could not figure it out. Finally I got my wife and daughter and we eased it down.

I took it back to the dealer. I had driven this car 2 miles. I got to the dealer and the dealer is a great dealer. And I said, "Sir, there is something wrong with the hood of this automobile. And there are also 14 finishing errors—paint runs, screw holes not filled, nuts not tight, rubber not meeting in the right spots."

He called his mechanic up and said, "It has to be out of adjustment" Raised the hood up, could not get it down. The mechanic tried to put it down. He said, "It is not out of adjustment, it is cracked," because it was a glass hood and painted across. A $16,000 automobile.

I asked the dealer why. He said because there is no policing of the union of its own workers. They knew each worker that worked on that car that day. Each worker they knew, because of the serial number. Now, management cannot go in and fire those people because they are protected by the shop steward. This is the strength of the union. But when will management and labor work together so they can provide to the American public an automobile that they rush to buy?

The CHAIRMAN. The time of the gentleman from Alaska (Mr. YOUNG) has expired.

(By unanimous consent, Mr. YOUNG of Alaska was allowed to proceed for 2 additional minutes.)

Mr. YOUNG of Alaska. Until we address this, you can pass all the protection legislation in the world, all the protection legislation in the world, and it cannot achieve what we are seeking here.

I say this hopefully, and not just outright criticism. We must work together. But I read in the paper each day about it. The football strike—$90,000 a year guaranteed minimum income. Really, I cannot figure that one out.

Now I am looking at the automobile industry, the steel industry. I believe those workers deserve everything they can get, if they are producing the product that is compatible and comparable with the competition. That is what I am asking people to do.

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Indiana, my good friend, an excellent and fine member of all the committees he serves on.

Mr. SHARP. I thank the gentleman for yielding.

The gentleman raises a very important point about the quality of the American products. This industry and labor union and others involved in industry understand that and are moving rapidly to try to upgrade the quality of what the gentleman and the industry described as the so-called fits and finishes which are important to all of us as consumers.

But on the whole everyone agrees as to durability and basic operation of American cars, they are superior on the whole to foreign-made cars. They have had a problem of fits and finishes. They are addressing that.

I might tell the gentleman, workers in this industry in my area and management in my area are moving rapidly to change work rules, patterns of management, to change so they are in fact producing a quality car that the gentleman can be proud of and will buy, and I hope the gentleman will.

Mr. YOUNG of Alaska. I agree. I think that progress is being made. But it is time that the union directly involved and management work as a team and not in confrontation. Right now we just finished the Chrysler strike. It has caused tremendous hardship on the Chrysler industry itself. That is the wrong way to approach it.

There is no nation more unionized than Japan. No nation. But they do not go on strike. And it is both sides of the street, management and labor.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I move to strike the last word.

Mr. Chairman, during the very extensive and exhaustive hearings that the Trade Subcommittee held on this bill, one of the issues that I consistently addressed for clarification were accusations that have been made time and time again about the productivity and the relative cost of American wages in the automobile and other capital intensive industries when compared with those industries abroad.

I say this to the gentleman from Alaska. Consistently it was agreed to, unquestioned by Government witnesses, and cited by union members that we had testimony before us, and also by company leaders by that wage rates, and I want the record to show this—the wage rates of American workers in the automobile industry, contrary to what you have heard, been told or read, are comparable to automobile wage rates in Japan, and, as a matter of fact, when you look at comparable rates in Europe, the European rates in some cases are in fact higher.

Let the record show that, lest anyone think that these spurious arguments about the disadvantages of American labor costs or labor packages are somehow a root cause of this problem.

As to the right to strike—I hope that in this modern Nation we can put behind us questions concerning labor's right to strike. We have benefited greatly from these industrial relations and those rights that labor now enjoys, and wage rates are not the cause, not the reason why we have the difficulties that we do.

Let me also say something in defense of American management.

It is wrong to come here to the House of Representatives and criticize American management and American management decisions when they have only responded the best way that they can and know how to a legal environment, to a regulatory environment, to a tax environment that we have created for them.

American automobile companies and American workers did not decide or control the preferences of American consumers that led to the debacle caused by OPEC price increases with oil, the thing that the gentleman from Florida really means, I think, when he is talking about an industry in transition.

It is wrong to criticize American management and American labor who are doing a fantastic job of retooling an industry in response to billion dollar needs for changeovers required by consumer preference changes.

I see the gentleman from Minnesota. The gentleman from Minnesota is on the floor. I wonder if we might engage in a little colloquy that we had discussed earlier concerning the Japanese decision to restrict their markets to our cigarettes. The gentleman had come to me and wanted to perhaps put a little on the record. We discussed this issue during the Trade Subcommittee hearings. On page 657 of the committees' testimony, is a copy of the article that appeared in the Washington Post. The gentleman wanted to make some remarks and I yield for that purpose.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield to the gentleman from Minnesota.

□ 1330

Mr. FRENZEL. Mr. Chairman, I thank the gentleman and I also thank him for being sharp enough to pick this thing up. It has required the ability to read the Wall Street Journal and understand it. I had missed it that day.

It was as the gentleman had stated. We had negotiated a new cigarette agreement and one has to go into the history of the United States-Japanese cigarette agreements, because there are tens of thousands of cigarette outlets in Japan, but only a few thousand are allowed to sell American cigarettes and they normally sell at 150 to 200 yen more than the Japanese cigarettes.

This is a country monopoly. We had made a deal to get in to a few thou-

sand more outlets and get the price differential down a little.

Trade representative Ruben Askew accepted that deal, although the Trade Subcommittee said, "Don't do it." But he accepted it. "It's not good enough. The Japanese have got to give more," but he accepted it, and when we accepted it, later we found, thanks to the Wall Street Journal and to our comrade, Congressman BAILEY, that apparently the Japanese had a pretty deep-seated bureaucratic plot to prevent the implementation of the agreement which they had signed. It is something that we have to get into more deeply with the Japanese, but if so, it is a terrible indictment of the people who signed that agreement and those people within the Japanese cigarette monopoly who refused to live up to the agreement which their country signed.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(At the request of Mr. FRENZEL, and by unanimous consent, Mr. BAILEY of Pennsylvania was allowed to proceed for 1 additional minute.)

Mr. FRENZEL. Mr. Chairman, will the gentleman continue to yield?

Mr. BAILEY of Pennsylvania. I will continue to yield.

Mr. FRENZEL. Mr. Chairman, I just want to say, I think the gentleman has done an awfully good job and in his absence we are going to continue to pound on that thing.

I appreciate the gentleman bringing it up.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I thank the gentleman.

I would just like to finish with this comment. When the German Volkswagen firm made a decision to locate a factory in the United States, one major reason they chose to come to the United States, and this is documented and the company will confirm this as they did in testimony before our subcommittee, was because of the productivity of American workers; skill levels above those anywhere else in the world.

I hope that inaccurate criticisms of poor American worker productivity will stay completely out of this debate. It is not a fair criticism. It is not an accurate criticism. The record clearly shows that it could not be an honest criticism.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. GIBBONS. Mr. Chairman, I ask unanimous consent that the gentleman from Pennsylvania may proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida (Mr. GIBBONS)?

Mr. OTTINGER. Reserving the right to object, Mr. Chairman, I will not object, but I would like to say that we are anxious not to have a filibuster on this and to get into the amending process.

I will, therefore, have to object in the future and insist on the regular order, but I will not object at this time.

Mr. GIBBONS. Well, if the gentleman will yield, all I have got to say, it sure takes a lot of courage after you have sat on a bill for 1½ years not to let me have 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida (Mr. GIBBONS) that the gentleman from Pennsylvania (Mr. BAILEY) be permitted to proceed for 2 additional minutes?

There was no objection.

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield to the distinguished gentleman.

Mr. GIBBONS. Mr. Chairman, we talk about wage rates and I know perhaps the gentleman was referring to some of my remarks about wage rates. There is no reason why the American worker cannot be just as productive as the Japanese worker, and perhaps he is. There is a problem, though, that American ownership and management has not given the American worker the proper tools to work with and the proper design layout.

I have gone through American automobile manufacturing plants and Japanese automobile manufacturing plants. When you see the Japanese plants, you see gentlemen standing around in white gloves, workers standing around in white gloves watching American-designed machines make cars.

When you go through our plants, and some of our plants are modernizing, you see American workers, hard-working American workers, swinging rubber mallets at the cars they are trying to get into shape so that they can sell them to the gentleman from Alaska.

Now, I promised the gentleman from Pennsylvania (Mr. BAILEY) that I would not tell him all the horror stories I know about some of our fine american products. I will not even tell the gentleman the ones that other Members of Congress have told me about the fine American products that they have bought; but we do have a problem on quality, or at least a perception on quality.

Mr. BAILEY of Pennsylvania. I thank the gentleman for his comments.

I will only say that those companies and our workers exist in the kind of tax environments and regulatory environments that we give them.

I do not like the relationship between Japanese industry and its government any more than the gentleman from Florida does and I would not recommend it to anyone; but it must not be used as an excuse to destroy markets in this country or to attack markets around the world, first of all.

Second, the Japanese system is not an ideal free enterprise, nor does it represent an efficient allocation of resources kind of system that we should recommend.

Third, when we write law here, either tax law or trade law, we must not be blind or naive about the implications of those industrial policies and their impact on our system. The problem is here not in our board rooms or on our production lines.

I would like to conclude by entering the contents of the Wall Street Journal article:

[From the Wall Street Journal, Thursday, Sept. 30, 1982]

HOW JAPAN TRIES TO SHUT OUT FOREIGN GOODS

(By Urban C. Lehner)

A document from a Japanese government-owned corporation has surfaced in business circles here that provides rare, firsthand evidence in writing of Japanese attempts to shut out foreign businessmen and officials have long alleged but have rarely been able to prove. Indeed a broader look at the controversy underlying the document provides a case study of the kind of elaborate web of restrictions the Japanese can weave when they're determined to have their domestic market to themselves.

The document came out of the Japan Tobacco & Salt Corporation (JTS), a government-owned monopoly that exercises exclusive control over all tobacco-products distribution in Japan. U.S. officials and the three American tobacco makers who sell here through the JTS have long believed and have at times formally complained to the Japanese government that the monopoly tries to obstruct foreign cigarette sales.

The document could well become a *cause celebre* in the ongoing efforts of the U.S. and Europe to persuade Japan to open its market to foreign products. The Japanese government has been trumpeting the claim that it's doing everything possible in that respect. But the document, a six-page battle plan detailing how one of JTS's local offices in Tokyo was to carry out its sales and promotion activities last July, specifically orders steps to squelch foreign cigarette sales.

"Curb stocking of imported cigarettes in vending machines," the document says at one point, indicating further that no foreign brands should appear in small machines containing fewer than 10 columns of cigarettes.

RETAILERS WON'T TESTIFY

"Remove displayed POP (point-of-purchase promotion) items for imported cigarettes in prominent locations," it says. (The American makers say many Japanese retailers have told them that JTS salesmen tear down posters and other promotional materials for foreign cigarettes. But they say the retailers won't testify to that because they depend on the JTS for licenses to do business and for a continuing supply of tobacco products.)

A JTS official involved in drawing up the battle plan confirmed that the document is authentic. A JTS spokesman declined direct comment because he hadn't seen the document. But he said "it's unlikely" that JTS

would tear down promotional material or change the brands in vending machines "without the retailers' consent."

The document emerges at a time when officials in Washington are showing increasing displeasure at what they regard as Japanese foot dragging in carrying out earlier promises to open their market. The Japanese government earlier this year announced two packages of measures aimed at removing obstacles to foreign products, and missions of Japanese Dietmen have come to the U.S. to tout the measures. But U.S. officials say most of the measures that Japan announced with such fanfare have yet to be carried out. And a reading of the JTS document and talks with the American tobacco companies suggest that in the case of the JTS at least, new "impediments" are being thrown in the path of imported tobacco products every day.

Promoting the success of cigarette sales here is especially important to Washington, because cigarettes are one product that U.S. officials believe could easily make a significant dent in Uncle Sam's enormous ($18 billion last year) trade deficit with Japan. Cigarette sales come to a staggering $5 billion a year here, and U.S. cigarettes have proved very competitive in other foreign markets. Moreover the JTS, sole manufacturer of Japanese domestic cigarettes, is hardly a tower of business strength; there are moves afoot in the Japanese government to dismatle the monopoly because of its inefficiency.

"If American made cigarettes were allowed to gain just 10 percent of the Japanese market," argues Philip Morris International, one of the American makers, in a position paper, "the imbalance in trade would be reduced by half a billion dollars."

But as it stands, foreign cigarettes claim only 1.4 percent of the Japanese market. They're hindered in getting a bigger share by innumerable legal restrictions—even forgetting about such underhanded measures as those outlined in the JTS document. For example, under Japanese law and JTS regulation, foreign cigarette makers:

May sell their products through only 20,035 of the 247,801 Japanese retailers licensed to sell tobacco products. (As one of the measures announced earlier this year, that number is scheduled to rise to 40,041 by next March 31 and to all of the retailers by March 31, 1986. But the American makers say JTS is carrying out the measure in a way designed to minimize foreign sales as long as possible.)

Sell their products subject to a 35 percent tariff and to a tax and pricing formula, which combined with the tariff causes foreign cigarettes to sell at a retail price 60 percent above domestic Japanese brands. That's true even though the price of American cigarettes when they land in Japan is about the same as the factory price of the Japanese cigarettes.

Are sharply limited in their ability to advertise and test-market their products.

Must distribute their products solely through their chief competitor—the monopoly JTS. "There's no way your principal competitor is going to help you," says Joel Silverstein, Japan representative for Brown & Williamson Tobacco Corp., another of the American makers.

John Sandor, who runs Philip Morris's operations locally, complains that JTS never seems to have enough of Philip Morris's products in stock to meet orders from retailers. For example, he says, when retailers order Lark, Japan's best-selling foreign brand (Japanese smokers favor "charcoal filters" like the one Lark features). "The monopoly will normally indicate that a sufficient number aren't in the warehouse and a competing domestic product—in the case of Lark, Cabin—will be partially substituted."

The JTS internal document suggests that the monopoly uses a variety of subtle tricks to hold down foreign sales. For July in Tokyo's Sumida ward, the document ordered special emphasis on sales of five domestic brands. One of them was Marlboro (though a Philip Morris brand, it has been produced by JTS under license here for over 10 years). According to Tsuyoyuki Asaka, one the JTS officials who helped draw up the document, Marlboro was chosen because it's considered an effective domestic "rival brand to counter imported brands."

Then there are the not-so-subtle tricks, like tearing down or stopping the posting of foreign posters, advertising displays or the electrically lit "light boxes" placed on top of a vending machine displaying the name and logo of a brand. R.J. Reynolds Tobacco International, a subsidiary of R.J. Reynolds Industries Inc., complained several months ago to the new ombudsmen's office that JTS salesmen were telling retailers they weren't legally allowed to display promotional material for foreign brands. The case was settled when JTS agreed to inform retailers in writing that such materials could be displayed.

Then in early August a retailer in Tokyo's Shibuya section informed an American maker that a JTS salesman appeared to have taken away the retailer's "light box" atop the vending machine. But when Japanese government investigators acting on a complaint from the maker that didn't name the retailer, blanketed the area to interview retailers, no one mentioned the JTS. Missing light boxes were blamed on other causes—one was said to have blown away in a typhoon. The moral the investigators drew was that Americans make reckless allegations without proof.

U.S. officials and cigarette makers drew a different conclusion: Retailers are so vulnerable to the JTS pressure, explicit or implicit, that they can't afford to testify against the monopoly. There is at least some evidence that JTS doesn't shrink fro using pressure to get its way with retailers.

Some retailers themselves make the same point. "Sure there's pressure (not to use foreign cigarette posters)," says Hinako Nakajima, a tobacco-shop owner in Nagoya. "The government hasn't abolished the monopoly system." Asked if JTS salesmen have ever forcibly removed posters from her shop, she will say only "please don't make me answer that question."

BLITHELY UNCONCERNED OFFICIALS

David Guilfoile, R.J. Reynolds Japan country manager, says, Reynolds agents talk at least once a month to a large percentage of the 4,300 retailers in Tokyo licensed to sell foreign brands, "and the most common problem is the retailer will say, I can't allow you to put up that (poster or light box) because the JTS will get upset." Mr. Guilfoile says Reynolds hesitates even to complain about such abuses to the government because "we end up getting the retailers we're trying to develop as customers into trouble."

Japanese officials, for their part, seem blithely unconcerned with the tobacco question. Before one of the Dietmen's missions went to the U.S. a few months ago, one of the Dietmen was asked about tobacco at a special press conference for foreign correspondents. He replied that Japan's cigarette maker was "completely free" and thus there was nothing to discuss with the U.S. government.

Nonetheless, in the second package of measures the Japanese did come up with some tobacco concessions. They agreed that the U.S.-Japan "study group," which had been scheduled under the November 1980 Japan-U.S. tobacco agreement to be formed by March 31, 1983, will convene instead next month, an acceleration of six months. It isn't clear what scope the study group will have, however. U.S officials say the Japanese have agreed to put the tariff question "on the agenda" but haven't agreed to negotiate a lower tariff.

It also isn't clear how meaningful the other concession in the second package—the increase in the number of retail outlets—will prove in the short run. U.S. officials and makers complain, for example, that all the outlets the Japanese have unilaterally selected to be included in the increase to take effect next March are outside the two regions of Japan where 60 percent of the foreign cigarettes are currently sold. That means the foreign makers won't be able to get more bang out of the sharply limited television advertising dollars they're allowed to spend, which by necessity are concentrated in those two regions.

"That isn't the way you'd do it if you were operating in the spirit" of opening the market. Mr. Silverstein contends.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and my colleagues, we have heard our colleague, the gentleman from Florida, speaking in all humility, saying that he does not know everything about this issue. How much more is humility the portion of one like myself, and I acknowledge it freely; but I am concerned with our position in the world and with the direction that this country is taking. Are we or are we not going to move toward an orderly world in which every country and every man's word is good, in which we have agreements which we try to live up to, insisting that others try to live up to them also; when they fail to do so we must put teeth in the agreements so that they will be lived up to. We must have orderly procedures, as we have in many of our commissions, even with the other department, arrangements whereby we can consult when there is a misinterpretation either on our part or on the part of the other party.

We ought to live that way. There is no other way. Dog eat dog and beggar your neighbor, take what you can if you are powerful, is not a system this world can afford any more. We must come to grips with something reasonable; justice under law, as my colleague, the gentleman from Florida said, and as a President of the United States said long ago, "the business of government is justice." We must proceed in this spirit or we will not have peace.

I would say also, with all humility, that I cannot take the same light view of the special interest group contribu-

tions that come here, not because I am inpugning or in any way denigrating my colleagues. God knows some of the finest people I have ever known are in this House.

But what does the public think? What does the public say? I read my mail. It is turning from disappointment and worry to contempt. They do not know what the effect of these tremendous contributions might be, a million, $200,000-and-some from only three groups? What are the rest doing?

I do not know how your constituency stands it. I know why I never took these contributions, not because anybody ever pressured me, but because I did not think my people would like it. I thought they would be ashamed if they saw their representative speaking for something desired by those who had contributed. Now, that is not quite the way it works and there are fine people down here who have a certain point of view which is rewarded by those who share that point of view, and that is the way it is looked at here. But it is not looked at that way by the public. We must pay attention to what is written in the newspapers and magazines, in the letters to the editor and letters to their Representatives. This morning I got one again. But I turn again to the consideration of the bill before us.

I do not know, my colleagues; I suppose there is no use getting so heated up over all this; but I tell you in all candor, we can do better than this. What we do demand in this country, and I think we have a right to, is a more orderly world. The question is, How are we going to reach toward it? There is the question, and when I see the responding faces in this House, I am encouraged. That is where we must lead the world.

Yes, we may have to pay for it here and there; we must be tough, as well as fine and strong in principle; we ought to be able to show others that we know how to be strong, honest, just, and searching for peace.

Mr. HAGEDORN. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to my colleague.

Mr. HAGEDORN. Mr. Chairman, I want to compliment the gentlewoman from New Jersey on her statement.

I, too, rise in opposition to H.R. 5133. While this legislation identifies one specific industry in our Nation, it jeopardizes many others. In the area of agriculture and in many areas of other jobs that will be threatened and many of those people put on unemployment rolls, this is not the solution to our trade problems.

This legislation is the product of a deepening protectionist sentiment in the Congress and across this country. I, too, share the concerns of our growing trade problems. Earlier this year, I introduced legislation that established the concept of reciprocity of market access as a key principle of U.S. agricultural trade policy and trade law. The bill required the identification and elimination of barriers maintained by our major trading partners and strengthened the provisions of the Trade Act of 1974 that provide remedies against foreign unfair agricultural trade practices.

However, the domestic content legislation will violate the General Agreement on Tariffs and Trade and only provoke an international trade war. Retaliation by our trading partners, particularly Japan and the European Community, will devastate U.S. farm and high technology exports. Agriculture is one of the few sectors where we are clearly more competitive and efficient than our partners. It is unconscionable to attempt to achieve temporary relief in one sector at the expense of other more efficient sectors.

At a time when the United States has an enormous capacity to produce agricultural commodities, and do so very efficiently, it is imperative that we seek new markets and continue to be a reliable supplier to our existing ones. Agriculture is the only major U.S. economic sector that continually has a trade surplus. This legislation will only serve to nullify those efforts and jeopardize the livelihood of U.S. farmers.

In addition, this legislation will not provide the desired results. The Department of Commerce estimates this bill will increase U.S. car prices by 10 percent and will place an additional cost of $3 to $5 billion on our economy. The Japanese already enjoy lower cost advantages in the production of automobiles and will certainly not give them up by moving their production facilities to the United States.

The current Japanese export quota limit of 1.68 million cars has already put many U.S. dealers in financial difficulties. Toyota Motor Co., the largest exporter of cars to the United States, estimates that one-fourth of their U.S. dealers are operating in the red. The American International Automobile Dealers Association has reported that since the quotas were imposed nine Toyota dealers and 19 dealers of Nissan Motor Co., the second largest exporter, have gone out of business.

We have to realize that the major reasons for our increasing trade deficit are the result of a slow recovering domestic economy, a recession in Europe and a depression in most developing countries, and most importantly, a strong dollar which decreases the price competitiveness of U.S. exports.

Rather than provide a quick-fix protectionist solution, the United States should concentrate on reducing its own debt and work with the Japanese to restore the proper relationship between the dollar and the yen. A credible U.S. fiscal program would go a long way in negotiating trade policy with Japan as well as other major trading partners.

In the interim, we should develop legislation, such as I introduced, to provide the President more authority to enforce U.S. rights under trade agreements and to repond in an expeditious manner to certain foreign trade practices, particularly agricultural subsidies. The results of the recent GATT ministerial meeting indicate that no substantial progress was made to seek redress to our trade problems. The dispute settlement procedures provided in the GATT and the accompanying subsidies code have not been effective in resolving our trade disputes. In that regard, I believe the Congress needs to focus its attention through the concept of equivalent market access, where we seek to reduce trade barriers rather than raise them. The legislation before us will simply unravel our past and future progress toward open and freer trade. Thank you, Mr. Speaker.

□ 1340

AMENDMENT OFFERED BY MR. STRATTON

Mr. STRATTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STRATTON: On page 9, after line 12, insert a new subsection (c) as follows:

(c) ADJUSTMENTS IN CONTENT RATIOS, NUMBER OF VEHICLES, AND MODEL YEAR SCHEDULES.—Not less than 6 months following the enactment of this Act, the Secretary shall determine:

(1) the extent to which foreign automobile manufacturers, as a result of this legislation, have decided to construct plants in the United States;

(2) the extent to which the specific ratios and schedules set forth in subsection (a) above may have made it economically impossible for foreign auto manufacturers to establish or to retain existing plants in the United States.

If the Secretary determines that certain changes in the ratios and schedules contained in subsection (a) would (1) prevent the closing of existing foreign automobile manufacturing plants in the United States; or (2) increase investment in existing foreign automobile plants in the United States, or (3) encourage the construction of foreign automobile plants in the United States, he shall report forthwith to the Congress the specific changes and adjustments in ratios schedules which, in his opinion, would best serve those purposes.

Such changes and adjustments shall become effective thrity days after they have been submitted to the Congress.

Renumber the remaining sections accordingly.

Mr. STRATTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. OTTINGER. Mr. Chairman, I reserve a point of order on the amendment.

Mr. STRATTON. Mr. Chairman, I said earlier in general debate that I supported this legislation but I did not support it primarily as a means of reducing Japanese imports of automobiles into the United States. I supported it because I regarded it, and I believe that is what the United Automobile Workers also regard it, as a device for encouraging the Japanese automotive manufacturers to construct manufacturing plants here in the United States, that move is already underway: A Datsun plant in Tennessee, in the district of the gentleman from Tennessee (Mr. GORE).

We have a Honda plant in Ohio, as the gentleman from Ohio, Mr. BROWN, was mentioning earlier in general debate.

And if the newspapers are to be believed, Toyota and General Motors are negotiating an agreement for construction of either a joint automobile or at least a Toyota plant combined with a General Motors plant.

I think this is the kind of development we want to encourage. And it is the kind of thing that this bill is designed to do. We do seem to be moving gradually in that direction, but it is my understanding from what I have heard, and I think that the gentleman from Ohio, who is not here unfortunately, referred to the schedules of ratios in section 4 and the number of cars that have to have such-and-such a ratio of domestic content, and the dates on which they have to have that particular ratio of content. I do not know where those figures have come from; not from Mount Sinai, I assume. Somebody has perhaps pulled them out of the air, and suggested that this constitutes a reasonable schedule.

I think the basic thrust of these schedules is OK. There should be an increase in domestic content from year to year; but my understanding is that some manufacturers who are already in the United States or who are contemplating building auto plants in the United States have said, that this schedule of increased domestic content is really going to make it impossible for them to operate economically.

I understand in the case of the Honda plant as Mr. BROWN of Ohio mentioned, that has now turned out the first U.S.-made Honda in Ohio, they indicate that these schedules in section 4 would require them to close down. Obviously, we do not want to do that.

So my amendment simply suggests this: That the Secretary of Transportation, who is already given authority to administer this legislation if it passes, would 6 months following the enactment of the act, examine the extent to which foreign automobile manufacturers, as a result of this legislation, have actually decided to construct automobile plants in the United States.

Second, he should also examine the extent to which the specific ratios and schedules that are set forth in the bill might have made it economically impossible for companies to establish or retain existing automobile plants in the United States.

If the Secretary does determine that certain changes in these schedules, for example, from 30 percent to 25 percent, or something like that, would prevent the closing of all existing foreign automobile manufacturing plants in the United States, or would increase foreign investment in existing foreign automobile plants in the United States—for example, Datsun might not only manufacture trucks in Tennessee, but perhaps might even consider making the Sentra or some of those other romantic cars that they make; or would encourage the construction of another foreign automobile plant in the United States; a new Toyota plant, for example.

In that case the Secretary would report the specific changes which, in his opinion, would serve these purposes, and those changes could become effective 30 days after they have been submitted to the Congress.

I think this is the kind of thing that we ought to have. There should be some flexibility so that we do not discourage the one hopeful aspect of this particular legislation.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Does the gentleman from New York (Mr. OTTINGER) insist on his point of order?

Mr. OTTINGER. Mr. Chairman, I do not assert the point of order, but I seek recognition in opposition to the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Chairman, I understand the good intentions of my colleague from New York. I would submit, however, that the amendment that he offers would, in effect, gut the bill. It would allow this adminsitration, which has declared its unalterable opposition to the legislation, to have untrammeled, without any standards or criteria whatsoever, discretion to be able to relative any of the companies to which this bill applies from its applicability.

Further, there is the possibility of enormous mischief, because we are giving the Secretary the power to discriminate in favor of one company against another. There are just billions of dollars that are at stake in making those determinations, so if we do not have an objective standard and we give the Secretary the untrammeled authority to be able to adjust the standards, he could use that as the most loudly ringing bell ringer we ever saw and then some company, unless they kick in to the coffers of the Republican committee, or do whatever else we want to do, he will change the standards on them.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I will yield in 1 minute.

Mr. Chairman, there is no administrative review that is provided in this legislation. Therefore, I think it would be highly mischievous.

Mr. STRATTON. Mr. Chairman, will the gentleman yield to me?

Mr. OTTINGER. I will yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, the gentleman is accusing me of being mischievous. I want to point out that I am not mischievous.

Mr. OTTINGER. No; I am saying that is the effect of the amendment.

Mr. STRATTON. Mr. Chairman, I would like to have a colloquy with the gentleman.

Mr. OTTINGER. Let me yield to the gentleman at this time, then.

Mr. STRATTON. The gentleman just complained a moment ago that we had not begun the amending process, and he asked me if I would get it started, and I think we have gotten it started and we are not now just talking about whether the Japanese are bad guys or whether the American workers are all poor, or what have you. We are getting down to the specifics of this legislation.

I drafted this amendment while we were sitting here this morning, and I do not think it is probably the be-all and the end-all.

But does the gentleman not recognize that these quotas might have effect, as in Ohio, of actually shutting down an existing foreign auto plant, which certainly we do not want? Does the gentleman not feel that there ought to be some way—we certainly do not have to give the Secretary the total power—but somebody or some procedure should be in this legislation to make these adjustments if, in fact, the legislation proves at times to be counterproductive.

That is all I am trying to do. If there is a better way of doing it with administrative review or anything else, I certainly would have no objection. This is just something that desperately needs to be done so that these numerical standards are not written totally in concrete.

Mr. OTTINGER. I appreciate the gentleman's good intent.

Mr. Chairman, I will tell the gentleman that the bill was crafted very carefully, and after a lot of study by both outside groups and inside groups. It is crafted so that the standards that are established are met by every

American company at the present time. They are met by Volkswagen at the present time.

The only other foreign manufacturer that has substantial manufacturing facilities in the United States is Honda. Honda, operating this plant on a full three-shift basis, without it building anything else, would be able to meet the standard.

I think in this kind of a situation we have to have an objective standard. We cannot have a discretionary determination by the Secretary because the amount of money and the amount of power that is represented there is just too great.

□ 1350

So, while I indicated that I did not think the gentleman was intending to be mischievous by any means, I understand his concern, I think the standards do have to be objective. I do not think that the standards as applied would cause harm to anybody.

Mr. STRATTON. But if it discourages somebody like Toyota coming in or should be burdensome to a plant that is already there, does not the gentleman feel that there ought to be some machinery? The gentleman can perfect my amendment. I am sure it can be perfected so that we would adjust those things in a rational way.

Mr. OTTINGER. I would not want to put it in the hands of any administration, this administration or any other, the kind of power that the gentleman is suggesting. I think we ought to make sure that the standards that we put in are fair, and indeed if they are arbitrary or capricious there is access to the courts. But, I think giving any administrative official the power to waive or the power to adjust the standards gives him so much power to make mischief that it would not be well advised.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this amendment should be entitled, "I Know the Bill Is Rotten, and So If We Pass This Amendment We Will Prove We Didn't Mean It."

What it does is this: It gives the Secretary the authority to throw out the bill. Normally, I would like to support anything which gives anybody the authority to touch a match to this awful mess, but I must admit that the gentleman from New Jersey (Mr. FLORIO) is dead right.

The amendment gives a huge, unprecedented grant of authority to a Cabinet official. We almost never give the executive department this kind of unrestricted authority to legislate. It is the Congress responsibility to legislate. We cannot give up that authority.

I say to the gentleman from New York (Mr. STRATTON): If he is nervous that this bill will louse up the economy, he is dead right. It is going to louse up the economy. It cannot be cured by amendment, even when we amend it to say, "I really didn't mean it when I passed the bill."

Vote down the bill. That is the only possible remedy.

Mr. GIBBONS. Mr. Chairman, I move to strike the requisite number of words, and I rise to oppose the amendment.

Mr. Chairman, one of the advantages of having hearings on a bill is that you do learn a lot. From the hearings that we held I learned that the bill was a disaster, and of course the Stratton amendment is just a tornado on top of a hurricane; something you really ought to experience to really appreciate.

On page 118 of the hearings, that Secretary of Transportation representative was testifying, and I want to give the Members some excerpts of his testimony. Then they can judge the validity of Mr. STRATTON's amendment.

He says:

Verifying the domestic content, on the other hand, would require tracing the source of all the materials and all the components in a vehicle, where there are literally thousands of suppliers involved, and where sourcing may change from day to day.

If we are to do a thorough job of determining domestic content, we will be dealing not only with the dozen or so manufacturers who sell more than 100,000 vehicles a year in the United States, but with the 40,000—

I repeat for emphasis—

40,000 or more large and small firms in the supply network.

Many of these firms supply more than one manufacturer, and many use materials or parts which, themselves, are imported.

I quote further:

The bill asks the Department—

This is talking not about the Stratton amendment now, but the bill itself—

The bill asks the Department to rule on how to allocate these foreign and domestic components of each supplier among manufacturers for purposes of determining final domestic content.

I do not know precisely how we would rule, but I do know that it would not be simple or easy and that we would inevitably add to the bureaucratic burden on Government and the industry.

I interrupt here to say that this is a bureaucrat testifying. He goes on to say:

Every manufacturer and every supplier firm would have to keep track of the domestic content of all the parts and material it uses and of all the products it delivers.

To verify the reported domestic content, the Department would have to pry into proprietary purchase, production, and sale records of at least a significant fraction of those firms.

The firms and the Department would have to do this on a real time basis because the bill provides that each year's compliance with the domestic content requirement determines the next year's allowable imports.

In short, recordkeeping, data collection, and paperwork burdens on industry and the Government would be increased, and the Government would need to be a more intrusive presence in the automobile industry and its supply chain.

Mr. Chairman, the Stratton amendment does not help this bill. The Stratton amendment means that it would be even more impossible to administer this already impossible bill. The agency that would have to administer it says that it is unadministratable.

In addition to that, in the verifying process not only would they have to go to 40,000 firms and all their suppliers and try to trace who they sold to, but price on a fluctuating yen that varies from day-to-day, from hour-to-hour, from minute-to-minute. They would have to find out when the product was bought, not just in the United States, but in all the 150 countries of the world.

Gentleman, this proposal is so ridiculous—not just the Stratton proposal, but the proposal of the domestic content and tracing it. Setting quotas, trade restrictions on the basis of it, is an impossible task to carry out in any kind of manner that would meet any test of law.

IBM would perhaps be the biggest beneficiary of all of them, because every factory would have to set up an IBM system just to monitor where they bought their materials, what the exchange rate was at that time, who they sold it to. Nobody could ever trace it all.

America would become more inefficient. America would become uncompetitive. America would lose jobs. Prices would go up, and we have shot our own people in the back.

Mr. BLILEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I commend the words of the gentleman from Florida and the gentleman from Minnesota. This is a bad amendment on a very, very bad bill.

The way that we should be proceeding is to create jobs, not remove them. Every unbiased person that has looked at this bill has said that the net effect would be a loss somewhere between 100,000 to 200,000 jobs. What we need to do is to open Japanese markets to our goods and not close our markets to Japanese goods.

I met yesterday with representatives of the Japanese auto industry in my office, and urged them to take a message to the manufacturers that they represent, for these manufacturers to contact the Government, to get the Government to change its policy that

discriminates against American citrus and American beef, and in particular against American tobacco.

The Japanese people are the fourth largest consumers of cigarettes in the world. If they were to open their markets to American cigarettes they could reduce the balance of trade deficit by 10 percent. The colloquy between the gentleman from Minnesota and the gentleman from Pennsylvania earlier alluded to this. The Nakasone government is taking steps to try to change things. I appreciate the problem that the Prime Minister has in that he represents, the basis of most of his support is from the farmers, but he could open his tobacco market to U.S. cigarettes and not affect that.

□ 1400

Mr. Chairman, it would be a big help toward creating greater understanding between the countries.

Mr. ALBOSTA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am from Michigan, a State that has over 17 percent unemployment. I am from a State that is adding to the Federal budget at the cost of $30 billion to the Federal Government for every 1 percent of unemployment in this country.

I am from a State that, if we would separate from the union and apply for a "Great Lakes basin initiative"—like we are proposing for the Caribbean Basin for economic development—we would qualify and we would probably be better off.

I have to ask this body, when we are considering legislation that is going to affect all these jobs in the automobile industry, whether we should not be sending out of this body strong signals to competitors that are not really competitive and do not really believe in fair trade. They believe in free trade all right, but they do not believe in fair trade. When I go back to my district and talk to my people, where I have some counties that have nearly 30-percent unemployment, there is not any question where those constituents stand. They think we ought to be doing something down here to solve their problems, and they do not want any more welfare nor do they want unemployment. They want to go back to work, I say to my friends, that it is important that we do something here to get them back to work. Let us not create make work jobs, let us not create jobs that are not constructive, but let us do something now to create those constructive jobs that will actually bring about some dignity to families that are desperate. Let us get Michigan and this country moving again.

Let me give the Members a couple of examples of the kind of free trade we now have with the Japanese in terms of agricultural commodities. Wheat exported to Japan is bought in our country right now for a little over $4 a bushel. It can be exported there, and it is going to cost the miller in Japan about $9.40. It costs roughly 50 cents to export it, for the shipping of it, but yet it is going to cost the miller in Japan about $9.40.

Is that free trade? Is that moving our commodities into their markets freely? The answer has to be, no, it is not.

Another clear example involves beef exports to Japan. Beef sells for about $20 a pound in Japan. That is what the Japanese farmer who produces beef is guaranteed. They can buy the same beef in the United States for about $4 a pound but the Japanese consumer is going to have to pay the equivalent of whatever the retail market is after Japanese farmers are first guaranteed $20 a pound.

Mr. Chairman, I say to my friends it does not make any sense to sit here any longer with the problems that we have created from high unemployment and not do anything about it, at least in the context of sending over there a good, strong signal that we have had it and we are going to do something about that problem if they do not sit down immediately and seriously negotiate with us. I am concerned and I am shaken by the fact that some Members believe that we do not have to do anything, that we can sit here continually and let our neighbor and good friend—I am not saying they are not a good friend—let our neighbor outsmart us in almost every category I can think of. It will no longer be just automobiles; it is going to be computers and it is going to be every other technical item we can buy in this country or can sell or manufacture.

The local content law will promote fair trade by setting minimum domestic content requirements for manufacturers who sell more than 100,000 cars per year in the United States. This will certainly promote fair trade. And without fair trade among the nations, there cannot be free trade.

Second, we cannot overlook the importance of the local content law giving thousands of American workers something they have not had for years—a chance for a job. With the unemployment rate at 10.8 percent nationwide and over 17.2 percent in my home State of Michigan, we need the jobs that would be recreated by this bill.

We in Congress have a responsibility to help put our people back to work and stimulate this Nation's economy. By supporting this legislation, we could make available over 87,000 jobs in the auto industry and another 188,000 jobs in supplier industries across the country. These are job opportunities we cannot afford to give up.

So, Mr. Chairman, we have to be concerned about our people first, and we ought to send from this body today a clear signal to our friends across the ocean that we mean business. I urge my colleagues to join me in support of the local content bill.

Mr. MICHEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, back in 1938 an American airplane pilot named Douglas Corrigan took off from New York supposedly to fly to California. He eventually landed not in California but in Ireland, and for this escapade he has ever been immortalized as Wrong Way Corrigan.

This measure is the Wrong Way Corrigan of job creation and economic growth. It aims at protecting and even creating jobs and at sending a warning to trading partners who, it is felt, are treating the United States unfairly.

These are admirable goals. We all share them. But if we use this piece of legislation as the vehicle——

Mr. STRATTON. Mr. Chairman, if the gentleman will yield, is the gentleman saying I am going the wrong way?

Mr. MICHEL. Excuse me? I did not hear the gentleman.

Mr. STRATTON. Is the gentleman addressing the amendment, or is the gentleman saying I am going the wrong way?

Mr. MICHEL. No, my friend, the gentleman from New York goes the right way most of the time. It is just that I had, under the circumstances, to rise in opposition to the amendment because there was so little time in general debate to make the kind of comments I wanted to make.

Mr. STRATTON. Mr. Chairman, I wish the gentleman would address the amendment instead of going back on the same old business. I think this is a constructive amendment, and I am surprised that my friend, whom I supported fully when we fought together to lift the unwise sanctions on the Soviet gas pipeline, should now be opposing my simple amendment.

Mr. MICHEL. Mr. Chairman, I will not yield further to the gentleman because I want to complete this. There was not time enough to address this issue in general debate.

Mr. STRATTON. Mr. Chairman, let me——

The CHAIRMAN. The gentleman from Illinois (Mr. MICHEL) does not yield further. The gentleman has the time, and he does not choose to yield.

Mr. MICHEL. Mr. Chairman, if there had been enough time for consideration of this measure, we might have known exactly what the impact of this amendment might be. Then we might very well know that we could rise either for or against it, but under the circumstances, we have got to use

the alternative of simply striking the last word, which the gentleman from Illinois has resorted to.

Now, Mr. Chairman, I again say that what is intended here is an admirable goal. We all share these goals. But if we use this piece of legislation to get to these goals, we will find ourselves in the position of "Wrong Way Corrigan" and we will have arrived at precisely the opposite destination that we originally sought.

As many of the Members know, my hometown is Peoria. It happens to be the worldwide headquarters of Caterpillar Tractor Co., the largest employer in my congressional district. It exports, as it did in 1981, a total of $3.5 billion of exports and provides jobs for 31,000 U.S. employees. Half of those employees owe their jobs to an export market. They depend on our ability to export and sell abroad.

What would this piece of legislation do for Caterpillar employees and their families? Well, it would make them the first, but not the last, victims of a trade war. There is another argument that has to be considered. Industries upon which the American automobile industry depends, rubber and steel, will have a captive market all to themselves if this legislation passes. Caterpillar, among others, would also find itself paying more for materials, thereby making its products less competitive.

Where will the demand for protectionist legislation end? How will we compete as an exporting nation if walls of retaliation are erected around the world? What do we say to the children and families of the 100,000 workers who are going to be thrown out of work by this well-intentioned but disastrous bill?

No nation in the world ever prospered by closing in upon itself. Greatness and strength in nations, as well as in human beings, depend on the willingness of human beings to go beyond their present limitations, to reach out, to expand and build bridges, not to turn inward and build walls.

The instinct to huddle together in the comparative safety and temporary warmth of the tribal cave is as old as the human race. But if you stay where you are, if you do not compete in the world, you die. That is true for nations as well as for human beings.

This country grew strong on its ability to export. Its future and its very freedom depend on export growth. But this measure asks us to turn our backs on what we do best. It almost demands of the rest of the world that trade barriers be erected to our products.

We have heard quite a bit about so-called buy American legislation. This piece of legislation ought to be called bye-bye American legislation. If it ever became law, this country could wave bye-bye to any hope for economic growth and expansion over the next decade. This is a job-losing, export-reducing, inflation-causing piece of politically motivated, economically unsound, special-interest legislation, and it really ought to be soundly defeated in the names of millions of American workers and their families.

□ 1410

Mr. COLLINS of Texas. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the bill before us today is presented to us by many of my colleagues who have always been advocates of free trade in the past. Through the years I have been impressed with the sincerity and logic of their dedicated convictions that America should build up and encourage fair and balanced trades.

Let us take the past decade here in Congress and review the foreign trade affecting oil. Oil is absolutely essential to our Nation's economy. Back in the seventies our country imported $3 billion a year in oil. This year our country is importing $80 billion in oil. Imported oil has increased from $3 billion to $80 billion a year. Yet, there is no tax on imported oil. There are no limitations on imported oil. No tax—no limitations on $80 billion of imported oil. So many who spoke today recommended this $80 billion imported oil. Our country produced and is capable of producing much more oil through its own natural resources. America is importing $80 billion this year in oil with no tax, no restrictions.

What is interesting is the fact that Congress recently passed a tax called the windfall profit tax and this tax applies to all of the oil produced in the United States. The tax is 70 percent on American oil, but the interesting part is there is no tax on this foreign oil.

I have listened to the Members speak and I have heard so many who favored the idea of a 0-percent tax on foreign oil and a 70-percent tax on American oil. These 0 percent taxers on foreign oil said they were strong, dedicated, firm believers in an open door policy on foreign imports. Why do these same Members come before us today and say $80 billion in oil imports is excellent, but $3 billion of auto imports is a disaster.

In Texas they tell me that over 40 percent of the oil rigs in this country are idle. We could double our domestic exploration of finding more oil.

The bill before us requires that auto corporations in the United States meet certain U.S. value added ratios. They take the number of cars and if over 100,000 they divide by 10,000 which equals what must be made in the United States, with anything above getting a penalty. For example, if you sold 500,000 cars in the United States divided by 10,000 equals 50. That means 50 percent of the value of those 500,000 cars must be made in the United States.

Here we are talking about a bill which will bring on a cost to consumers of around $3 billion a year for their new automobiles. You worry about a $3 billion cost for automobiles and yet you have no concern about $80 billion for gasoline that you would use for the cars to run on. Where is your consistency?

The experts agree that this bill would also violate our international obligations under the General Agreement on Tariffs and Trade. This would also give our trading partners a legal right to retaliate against U.S. imports. This would clearly have a negative affect on U.S. exports and industries.

I would like to quote a portion from the minority dissenting views on H.R. 5133: "The Congressional Budget Office estimated that by 1990, some 70,000 auto jobs would be created as a result of the quota-induced U.S. domestic auto production increase, while some 220,000 nonauto jobs are eliminated because of the restrictions imposed on nonauto exports." According to CBO's projections, under this bill the United States would actually be losing 150,000 jobs by 1990.

The facts clearly show that this bill is inflationary, unnecessary, in direct opposition to our international trade agreements, and actually detrimental to jobs in our country.

How are you consistent when you voted for a 0-percent tax of foreign tax and 70-percent tax on American oil? If we support this protectionist legislation that will insulate the U.S. auto industry from foreign competition, what will the foreign countries pass in the way of retaliation.

Let us have fair trade but let us have balanced trade.

Mr. MOORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have to rise and speak on the amendment because the amendment simply points out the unworkability of the bill.

I do not think the amendment is really going to help the bill to become that much more administerable.

In sitting here today and listening to the debate, as well as yesterday on the rule, I have come to the conclusion that this bill is a ruptured duck bill in a lameduck session, cannot possibly fly on its own merits and it should not fly politically. We ought to dispose of this bill today, begone with it, finished with it today, and never bring it up again.

If we take a look at the bill we know that we are trying to help autoworkers. That is abundantly clear and I do not question anybody's motives in trying to help those people who are out of work.

But there are two groups that I would like to call some attention to who we are not helping but are hurting. Just consider for a moment what you are doing to other people in the name of trying to help autoworkers.

The first group is the one probably that is the broadest possible category, the one that we are all a member of, the consumers of America. You have heard that automobiles will go up an average of 10 percent or some $333 per unit.

The Congressional Budget Office goes on to say that inflation will go up by 0.2 of 1 percent when we have just gone through 2 tough years of voting to cut back domestic spending trying to get a cap on inflation and that is beginning to work.

Third, the GNP would go down 0.1 of 1 percent. We are trying to get the GNP generated again. We voted on hard questions this year and last year to do that, to put people back to work, and this goes in the opposite direction.

Fourth, they compute that there will be a net loss, not gain, net loss of jobs across the country of 66,000, a sizable figure, again going the wrong way when we have high unemployment.

I would put on top of that the fact that nobody seems to have mentioned the fact that you are probably going to increase gas consumption in the country and force energy prices back up again by this kind of legislation, by forcing off the market some very, very desirable automobiles in terms of energy efficiency.

Let me address that for just a minute.

I think it is erroneous to say that in 1984 we are going to find foreign automobiles meeting the component part requirement of this bill. That is a joke and we know it. We might as well be honest.

What this is is a very cleverly designed way to get those automobiles off the market entirely for the years 1984 and 1985, and we do not know about the out years. That is for the simple reason that there is no way that they can buy the component parts at this late date in producing the 1984 models to have them on the market to meet the requirements of the bill.

No. 2, we know that they are not going to build plants in this country at a time when interest rates are high and demand for the product soft.

So what you are doing is going to tell the consumers of America that you may have liked a Datsun or you may have liked a Toyota, but Congress in its infinite wisdom is once again going to try to repeal the law of supply and demand or the law of a free market and we are going to tell you you do not know what is good for yourself; you cannot buy that automobile anymore and we are going to take it off the market. You will be able to buy the 100,000 limit, all right, but boy, wait until you see what you are going to have to pay for that if you can find it.

So here we are in Congress at this late hour trying to tell the American people what they should and should not buy, the consumers, something I think that is just about as violently anticonsumer as anything we have seen come to the Congress in many, many years. Let us realize that. We are just taking these products off the market.

Our second group of people that ought to be addressed that are being hurt, and they have been addressed in the debate so far to some extent, is those groups of people involved in agriculture.

Japan is the single largest foreign buyer of our agricultural products, $6.6 billion a year. We know that 2 acres in every 5 all across our farm production across the country is going into exports, some 42 percent of our total crops are going into exports, and here we are doing something that Presidents have done and we criticized them for, we are going to eliminate that market.

Let me take you back to 1973 when President Nixon inadvisedly issued the boycott on the export of foreign products. Do you remember that?

What that did is put the American farmer in a hole that they have never gotten out of ever since, and several additional Presidents after that time made the same mistake, boycotts.

What those boycotts did in particular in 1973 was convince the Japanese that we were no longer stable sources of supply for soybeans. So they went someplace else. They went to South America.

They raised the money to put Brazil and Argentina into the soybean business and they are now our biggest competitors because of the stupidity of the thinking back in 1973.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. MOORE) has expired.

(By unanimous consent Mr. MOORE was allowed to proceed for 2 additional minutes.)

Mr. MOORE. As a result of that action in 1973 Brazil in the last 9 years has tripled their soybean production and Argentina has increased theirs eighteenfold. Today we find the Japanese buying a very significant amount of their soybeans from those two countries.

Japan still buys one-sixth of their soybean needs from this country. But what do you think they are going to do after we pass this bill? They are going to say the United States is coming through again, this time the Congress is getting into the act and trying to one-upmanship Presidents who have made mistakes in the past with boycotts. Now we have a congressional boycott. That is what this is, a boycott on their products coming in here so that they simply boycott ours going there and tell the Brazilians and the Argentines to go ahead and plant a few more rows of soybeans. Then you are going to find us out of business.

□ 1420

What are you going to do with the thousands of farm families, the thousands of teamsters who drive those trucks, delivering those products to ports, the thousands of longshoremen who load them and the thousands of seamen who carry them? What are you going to tell them when you put them out of business?

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. MOORE. I yield to the gentleman from Florida.

Mr. GIBBONS. In addition to that, the thousands of Americans who are UAW members, who labor in plants making those machines that harvest those crops, that plant those crops, and all of those.

I think the gentleman is making an excellent point.

Mr. MOORE. I thank my chairman.

I would point out that a moment ago one of the gentlemen mentioned that the price of American wheat in Japan is high. But did you know that they are still buying our wheat? Japan is the third biggest buyer of American wheat behind only the U.S.S.R. and China. Two-thirds of our wheat production goes overseas, and Japan is a big buyer.

My colleagues, this is a ruptured duck in a lameduck session. It cannot fly, and it should not. I hope you will defeat the amendment and the bill.

Mr. CROCKETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am in a rather unique position. I represent the motor capital of the world, the city of Detroit. The 13th Congressional District probably contains more automobile workers than any other single district in the country. Additionally, there is located in my district the headquarters for the International Automobile Workers Union. Obviously, I am concerned about their welfare. There also is located in my district the world headquarters for General Motors Corp., and I am concerned about the progress of that institution. Most of its executives live in the Grosse Point area, which likewise is in the 13th Congressional District.

And so you see, I have a problem on which side do I come down with respect to this legislation that is sponsored by the automobile workers and opposed by the automobile makers.

There has been a lot of talk here about sending a message to the Japa-

nese. I would invite you to send a message to the automobile workers. I can tell you now that the length of the unemployment lines, the length of the lines in the soup kitchens in Detroit should be sending you a message, and that message is that their hope has been exhausted. And the question now is: How long will their patience last?

I served as a judge of the criminal court in Detroit in 1967 when the first of our great national riots broke out. It was not one single incident that brought on that manifestation of despair. Instead, it was the accumulation of events, such as the accumulation that is taking place now and that has caused my district to have an unemployment rate the highest in the Nation, 24.9 percent. And many of you are expressing concern about an unemployment rate of 10.9 percent.

I do not know what wisdom requires in this situation. But I am willing to trust the judgment of a million auto workers who feel that this is at least one thing that this Congress can do that will give them some hope, that will perhaps prevent the explosion that I am convinced and that many of the leaders in Detroit are convinced is going to take place unless this Congress does something to alleviate that condition.

For more than 2 years now I have sat here in this body; I have listened to all of the talk about jobs, I have listened to all of the talk about unemployment. Nothing whatever has been done.

I would implore my colleagues to send a message. But this time, send a message of hope, that maybe we do not have even here the best answer, but we are willing to trust the judgment of the automobile workers who believe that with the passage of this bill there is at least the possibility that something can be done to reduce the unemployment lines and the bread lines, particularly in the Detroit area.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. STRATTON).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. STRATTON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 11, noes 331, not voting 91, as follows:

[Roll No. 434]

AYES—11

□ 1440

Mrs. SMITH of Nebraska, Mr. MICA, and Mr. COLEMAN changed their votes from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. OTTINGER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5133) to establish domestic content requirements for motor vehicles sold in the United States, and or other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill we have just had under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to proceed for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have asked for this time for the purpose of inquiring of the distinguished majority leader the program for next week.

Mr. WRIGHT. Mr. Speaker, will the distinquished minority leader yield?

Mr. MICHEL. I am happy to yield to my friend, the gentleman from Texas.

Mr. WRIGHT. The distinguished minority leader asks about the program for the remainder of the week and for next week.

This concludes the legislative program for this week.

When we adjourn today I am going to ask unanimous consent that we adjourn to meet at noon on Monday. We will plan to meet at noon on Monday, and on Tuesday, and then 10 o'clock on Wednesday, and the balance of the week.

On Monday, we will consider certain bills that are eligible for consideration under suspension of the rules. I have listed on the whip notice some 24 of them. There conceivably might be others. If we cannot finish them Monday, we can use them throughout the week as fillers if it is acceptable to the distinguished gentleman from Illinois and other Members of the House.

Mr. MICHEL. Well, if I might respond at the moment, let me say that if I recall, Monday night is the evening for the traditional invitation on the part of the President for Members of the Congress to come down to the White House.

Now, I think it is a time-honored practice around here that when that invitation is issued and enough warning is given, that we be able to come to a firm decision on when we are going to wrap-up, rather than leaving the White House hanging as to whether we are going to be or not going to be there. There are some preparations that have to be made.

I would like to have some firm declaration here that we be out by such and such a time. As I recall, I think upon being reminded, the party is scheduled for 8 o'clock. Obviously it takes some time for Members to get organized and get down there; but if we could come to some agreement as to when we are going to wrap-up for sure on Monday, that would be helpful, I think, for all the Members.

Mr. WRIGHT. Well, I agree with the gentleman. Of course, when the President of the United States invites Members of Congress and their families to come to the White House on an annual Christmas celebration it would be a virtual sacrilege for us to put ourselves in a position where we could not accept that gracious invitation.

Therefore, let us just resolve between ourselves and among ourselves that whatever happens, we will be finished with our business on Monday by not later than 7:30 and we will try to do it by 7.

Is that satisfactory to the gentleman?

Mr. MICHEL. That is agreeable.

Now, may I inquire of the gentleman what this housing bill is? Is that that $20 billion proposition or just what are we going to be debating on Monday?

Mr. WRIGHT. No. The bill will probably come to the floor around Thursday or so. It is a little mom and pop housing bill that permits moms and pops and prospective moms and pops, newly created family units who heretofore have not been able to purchase homes in which to rear their little families to be allowed to do so in fulfillment of the great American dream, as I am sure the gentleman from Illinois would agree.

Mr. MICHEL. Does the gentleman intend that we get out of here by Christmas? Are we really going to get this thing enacted by both Houses of Congress?

Mr. WRIGHT. Oh, it is my earnest hope, my definite expectation and my dogged determination to see if at all humanly possible that we shall have concluded our business by the end of next week and I hope that when we adjourn at that time we shall adjourn sine die to come here again on the 3d of January. That is what I hope.

Mr. MICHEL. Now, the gentleman had not concluded his long list of suspensions that he had cataloged for next week.

Mr. WRIGHT. No. May I read them scientifically, as they say?

Mr. MICHEL. If the gentleman has the same list as I have got, I would maintain a unanimous-consent request that they be considered as having been read and printed in the RECORD.

Mr. WRIGHT. I shall show them to the membership herewith.

It reminds me of the Chair's having examined the Journal of the last day's proceedings and announcing his approval.

Members have examined the list of suspensions.

The list of suspensions is as follows:

H.R. 3191, modification of North American Convention tax rules.

H.J. Res. 429, State Commissions on Teacher Excellence.

S. 2355, Communications Act amendments.

H. Con. Res. 204, Science Center for Communications and Electronic Education Programs.

H.R. 4281, Critical Materials Act 1982.

H.R. 1856, authorize GSA to donate certain property to State and local governments.

H.R. 7044, mail order consumer fraud protection.

H.R. 6519, student interns at the Internal Revenue Service.

S. 816, Clayton Antitrust Act amendments.

S. 2059, special prosecutor appointments amendments.

H.R. 4491, Capitol Historical Society.

S. 823, payment of losses incurred in tris-treated fabrics.

H.R. 7378, miscellaneous law revisions (codification changes only).

H.R. 6993, miscellaneous law revisions (codification changes only).

H.R. 6120, deep seabed hard minerals.

H.R. 5906, OCS (Outer Continental Shelf) amendments to title II.

S. 1621, authorize replacement of existing pump casings in southern Nevada Water Projects.

H.J. Res. 553, authorize Indian tribes to bring actions with repect to certain legal claims.

S. 2710, Indiana Wilderness.

S. 1965, Paddy Creek Wilderness, Missouri.

H.R. 7340, Oregon Wilderness.

S. 1501, Educational Mining Act.

S. 1661, Effigy Mounds Site, including Truman Historic Site.

S. 625, Voyageurs National Park.

Mr. MICHEL. Now, let me make it clear that these bills would be eligible for consideration, however, only on Monday and Tuesday.

□ 1450

Mr. WRIGHT. We will, unless the gentleman would agree, and I hope he might, that considering the need to get out of here, and sometimes the possibility of sitting around waiting for a continuing appropriation to come back from conference or something like that, we might find it expedient and useful to some of the Members who have an interest in some of these bills to consider them later.

I would like to ask unanimous consent that it might be in order to consider suspensions any day next week.

Mr. MICHEL. Mr. Speaker, reserving the right to object, and I think maybe I might very well have to object because the very reason I asked the question was to make absolutely sure that we were not obligating ourselves here now to something beyond what I see coming up for Monday and Tuesday, I would like to hold in reserve that aproval until we have had a thorough opportunity to examine just how this list might very well be adjusted.

Would the gentleman want to withdraw that unanimous-consent request?

Mr. WRIGHT. I do withdraw it, because under no circumstances would I want to press a unanimous-consent request that was not unanimously agreed to.

Therefore, with the gentleman's kind permission, I might like to revive the question next week, but I promise not to do it without the gentleman's prior knowledge.

Mr. MICHEL. Would the gentleman now like to proceed with the balance

of what he has in store for that week in response to my request?

Mr. WRIGHT. I am afraid it is time to do that.

Let us next focus on the probability that the continuing appropriations bill would be ready for our consideration on Tuesday. That bill will have the right of way over every other matter next week. Whenever it is ready, we expect to bring it. That will probably be on Tuesday.

Then on Wednesday and the balance of the week, meeting at 10 o'clock, we expect to take up and consider in roughly the following order such bills as I shall hereinafter enumerate:

H.R. 5133, the Fair Practices in Automotive Products Act, which has been under consideration. We would like to complete that.

H.R. 7357, the Immigration Reform Act, under a modified open rule with 5 hours of general debate and several amendments.

Mr. KAZEN. Several amendments?

Mr. WRIGHT. Would the distinguished minority leader yield to the gentleman from Texas (Mr. KAZEN)? The gentleman from Illinois (Mr. MICHEL) has the time.

This bill has several amendments pending, but we expect to bring it up on Wedensday or thereafter.

Then, we have scheduled the housing authorization bill, H.R. 6296, the bill we discussed a moment ago.

There may be some other things that I cannot anticipate. Obviously, conference reports are expected at any time, but once we finish the continuing appropriations and the President of the United States signs it, as I have every reason to expect that he surely will in the spirit of the Christmas season, then we will entertain a motion to adjourn sine die.

Mr. MICHEL. Mr. Speaker, I thank the gentleman.

Does the gentleman know of any other extraordinary unanimous-consent requests that might be made the balance of this day?

Mr. WRIGHT. Yes. There may be two from the Interior Committee, and there may be others with which I am not familiar.

Mr. MICHEL. I just want to be sure that the appropriate Members are here to either respond or handle those requests.

Mr. WRIGHT. There is one from Foreign Affairs as well, I am advised; not controversial.

Mr. GLICKMAN. Mr. Speaker, would my colleague yield to me?

Mr. MICHEL. I would be happy to yield to the gentleman from Kansas.

Mr. GLICKMAN. I thank the gentleman for yielding.

Mr. Speaker, may I ask the distinguished majority leader if there is any chance that the continuing appropriations bill will be up for consideration on Monday, or is it in all likelihood that it will be Tuesday for that bill?

Mr. WRIGHT. If the gentleman will yield further to me, the answer is that it seems much more likely that it will be Tuesday. If it were ready for consideration on Monday, I should not want to foreclose that possibility. However, I think it is very unlikely that we could get to it on Monday. I believe it is much more likely that it will be brought up on Tuesday.

Mr. GLICKMAN. I thank my colleague.

Mr. WRIGHT. It needs a rule, I say to the gentleman from Kansas. That is why we do not expect to be able to bring it on Monday.

Mr. MICHEL. I thank the gentleman.

Mr. WRIGHT. Mr. Speaker, I have two unanimous-consent requests if the gentleman is ready to entertain them.

Mr. MICHEL. Mr. Speaker, I have no more questions.

ADJOURNMENT TO MONDAY, DECEMBER 13, 1982

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the majority leader, the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the majority leader, the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON SMALL BUSINESS TO FILE AN INVESTIGATIVE REPORT

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that the Committee on Small Business have until midnight tonight to file an investigative report with the Clerk of the House.

The SPEAKER pro tempore. (Mr. WOLPE). Is there objection to the request of the gentleman from Maryland?

There was no objection.

PERMITTING TRIBAL AGREEMENTS TO DISPOSE OF MINERAL RESOURCES

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1894) to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes, with Senate amendments to the House amendment thereto, and concur in the Senate amendments to the House amendment.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendments to the House amendment, as follows:

Page 1, line 5, after "land" the second time it appears, insert "the".

Page 2, line 11, strike out "trust" and insert "beneficial".

Page 2, line 14, strike out "trust" and insert "beneficial".

Page 2, line 24, after "of" inisert "Federal".

Page 3, after line 2, insert:

(b) In approving or disapproving a minerals Agreement, the Secretary shall determine if it is in the best interest of the Indian tribe or of any Individual Indian who may be party to such agreement and shall consider, among other things, the potential economic return to the tribe; the potential environmental, social and cultural effects on the tribe; and provisions for resolving disputes that may arise between the parties to the agreement: *Provided*, That the Secretary shall not be required to prepare any study regarding envoronmental, socioeconomic, or cultural effects of the implementation of a Minerals Agreement apart from that which may be required under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

Page 3, line 3, strike out "(b)" and insert "(c)".

Page 3, line 16, strike out "(c)" and insert "(d)".

Page 3, line 20, strike out "Affairs" and insert "Affairs,".

Page 3, line 21, after "action." insert: The district courts of the United States shall have jurisdiction to review the Secretary's disapproval action and shall determine the matter de novo. The burden is on the Secretary to sustain his action.

(e) Where the Secretary has approved a Minerals Agreement in compliance with the provisions of this Act and any other applicable provision of law, the United States shall not be liable for losses sustained by a tribe or individual Indian under such agreement: *Provided*, That the Secretary shall continue to have a trust obligation to ensure that the rights of a tribe or individual Indian are protected in the event of a violation of the terms of any Minerals Agreement by any other party to such agreement: *Provided further*, That nothing in this Act shall absolve the United States from any responsibility to Indians, including those which derive from the trust relationship and from any treaties, Executive orders, or agreement between the United States and any Indian tribe.

Page 3, strike out all after line 21 over to and including line 24 on page 5.

Page 5, after line 24, insert:

SEC. 5. (a) The Secretary shall review, within ninety days of enactment of this Act, any existing Minerals Agreement, which does not purport to be a lease, entered into by any Indian tribe and approved by the Secretary after January 1, 1975, but prior to enactment of this Act, to determine if such agreement complies with the purposes of this Act. Such review shall be limited to the

terms of the agreement and shall not address questions of the parties' compliance therewith. The Secretary shall notify the affected tribe and other parties to the agreement of any modifications necessary to bring an agreement into compliance with the purposes of this Act. The tribe and other parties to such agreement shall within ninety days after notice make such modifications. If such modifications are not made within ninety days, the provisions of this Act may not be used as a defense in any proceeding challenging the validity of the agreement.

(b) The review required by subsection (a) of this section may be performed prior to the promulgation of regulations required under section 8 of this Act and shall not be considered a Federal action within the meaning of that term in section 102(2)(C) of the National Environmental Protection Act of 1969 (42 U.S.C. 4332(2)(C)).

Page 6, line 1, strike out "." and insert "6.".

Page 6, strike out lines 7 to 18, inclusive.

Page 6, line 19, strike out "9." and insert "7.".

Page 6, line 21, after "tribe" insert "or individual Indian".

Page 6, line 22, after "tribe" insert "or individual Indian".

Page 7, line 1, after "tribe" insert; or individual Indian".

Page 7, line 3, strike out "SEC. 10. (a)" and insert "SEC. 8.".

Page 7, line 15, strike out "section 4(b) and section 5" and insert "section 4".

Page 7, strike out all after line 18 over to and including line 10 on page 8.

Page 8, line 11, strike out "11." and insert "9.".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona (Mr. UDALL)?

Mr. BEREUTER. Mr. Speaker, reserving the right to object and I will not object, on behalf of the minority on the Committee on Interior and Insular Affairs, I rise to support the request of the gentleman from Arizona that the House concur in the Senate amendments to the House revision of S. 1894. As one Member who was much involved in the consideration of this legislation in the Interior Committee, I find the changes made by the Senate acceptable and I join the chairman in urging the House to concur in those changes.

This legislation is of great importance to those American Indian tribes which have mineral resources and the desire to develop them to the maximum benefit of their members and to the Nation. S. 1894 authorizes tribes to enter into any of the wide range of development agreements which are common to the minerals industry but which are precluded in Indian country by a 44-year-old statute that limits the method of development of Indian minerals to leasing only.

This bill will not cost the taxpayers any money.

S. 1894 is strongly supported by Indian tribes, the administration, and by companies interested in working with tribes to develop reservation mineral resources. It represents a large and positive step toward the future economic well-being of a large segment of this Nation's Indian population. I urge its speedy approval by the House.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. BEREUTER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Speaker, I rise in support of S. 1894.

Mr. Speaker, I join the Chairman of the Interior Committee in urging the House to concur in the Senate amendments to the House amendment to S. 1894.

This is meritorious legislation much desired by Indian tribes by the administration, and by companies willing to be partners with tribes in developing reservation resources.

This bill will provide tribes greater flexibility in their approach to development of their energy and nonenergy mineral resources.

It will clarify the authority of the Secretary of the Interior to approve a variety of minerals agreements that will enable tribes to realize greater profits from their resources as well as greater involvement in the management of their reservation resource development.

The bill provides guidelines for the Secretary to evaluate proposed agreements in his role as trustee for Indian lands and resources to insure that such agreements are in a tribe's best interest.

Mr. Speaker, this legislation will provide Indian tribes with greater opportunity to swim in the economic mainstream of American society. It will do so at no cost to the Treasury and with great potential benefit not only for Indians but also for the Nation as a whole. I urge approval of the Senate amendments.

Mr. BEREUTER. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, I associate myself with the remarks of the gentleman from Nebraska, join in the description of the legislation as put forth by the gentleman. This important legislation passed almost unanimously, or unanimously.

This bill provides authority for Indian tribes to enter into various business venture agreements for the development of their interests in oil, gas, coal, and other minerals. Under existing law, they are limited, for all practical purposes, to the use of lease for such development. This bill would permit them to take greater business risks with the opportunity for greater return on their resources.

The House passed this bill on August 17 of this year with an amendment in the nature of a substitute making extensive changes in the Senate-passed bill. The differences between the two versions were worked out over the election recess with the Senate Committee on Indian Affairs and representatives of the Department of the Interior. While I would have preferred to have retained all or most of the House language, there is some urgency about getting this bill passed in this Congress. Therefore, I support concurring in the further Senate amendments to the House amendment.

Mr. BEREUTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona (Mr. UDALL)?

Mr. MARLENEE. Mr. Speaker, reserving the right to object, may I ask the status of the bill? Have we had hearings? What has been the status of the bill in the Interior Committee?

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, this was passed by the Senate. We held hearings and markup in the House. It went over to the Senate, which made some changes that are perfectly acceptable to the gentleman from Nebraska (Mr. BEREUTER) and to me, and we are asking that we now concur in those Senate changes and send it to the White House.

Mr. MARLENEE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona (Mr. UDALL)?

There was no objection.

A motion to reconsider was laid on the table.

□ 1500

DECLARING THAT UNITED STATES HOLDS IN TRUST CERTAIN LAND IN PIMA COUNTY, ARIZ., FOR PASCUA YAQUI TRIBE IN ARIZONA

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4364) to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz., with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 2, strike out lines 1 to 13, inclusive, and insert:

(1) the east half of the southeast quarter of section 22;

(2) the northeast quarter of northeast quarter, south half of northeast quarter, north half of southeast quarter, south half of northwest quarter, southwest quarter of section 23;

(3) the southwest quarter of the northwest quarter of section 24; and

(4) the southeast quarter of northeast quarter of northwest quarter of section 24.

Page 2, after line 13, insert:

SEC. 2. Nothing in this Act shall deprive any person or entity of any legal existing right-of-way, legal mining claim, legal grazing permit, legal water right, or other legal right or legal interest which such person or entity may have in land described in section 1.

Page 2, line 14, strike out "SEC. 2" and insert "SEC. 3.".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. WOLPE). Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

Mr. BEREUTER. Mr. Speaker, reserving the right to object, I do so only to explain that this bill provides that approximately 560 acres of lands administered by the Bureau of Land Management will be held in trust by the United States for the benefit of the Pascua Yaqui Tribe of Indians in Arizona. The bill passed the House a year ago by unanimous consent. The Senate amendments make technical changes in the land descriptions and adds boilerplate language preserving all existing valid rights with respect to these lands. The committee has no objection to these amendments.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. BEREUTER. I yield.

Mr. UDALL. Mr. Speaker, I rise in the support of the bill.

Mr. BEREUTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

NATIONAL PARK VISITOR FACILITIES FUND ACT

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the speaker's table the bill (H.R. 7316) to establish the National Park System Visitor Facilities Fund, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so simply to ask the gentleman from Ohio if he would explain just what this legislation does.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, H.R., 7316, a bill to establish the National Park System Visitor Facilities Fund, was introduced by the distinguished ranking member of the Committee on Interior and Insular Affairs, MANUEL LUJAN. The bill is noncontroversial and would establish the National Park System Visitor Facilities Fund for reconstruction, rehabilitation, replacement, improvement, relocation, or removal of federally owned visitor facilities within units of the National Park System. The fund would be administered by the Secretary of the Interior through grants to the National Park Foundation to accomplish authorized projects. H.R. 7316 is identical to the bill S. 2715 reported from the Energy and Natural Resources Committee on December 3, 1982.

Numerous structures located within the 333 units of the National Park System were constructed many years ago and are now in serious need of major maintenance and rehabilitation. The Department of the Interior and the Congress have recognized that need and have appropriated increased funds in the last several years in an attempt to remedy the problem. However, such funds have primarily been directed to work on major park structures. There are over 1,000 small buildings in the park system—mostly cabins and small motels, including associated support facilities—which are owned by the U.S. Government, which is responsible for nonroutine maintenance, and which are used for overnight visitor accommodations or for providing support services for visitors. These buildings have been consistently placed at the bottom of the priority list for maintenance funding and most are now in critical need of major rehabilitation. It has become apparent that the nature of these small scattered structures have not, for various reasons, been accorded priority for maintenance funding and that special efforts must be made to assure maintenance before the structures deteriorate to the point where rehabilitation is economically infeasible.

The National Park Foundation was established in 1967 by Public Law 90-209 to assist the National Park Service by undertaking functions that are most appropriately accomplished by a quasi-private tax-exempt organization, which as such, is in a unique position to provide for small scale operations and to integrate private and public expertise to accomplish the needed work. The National Park Foundation is also able to serve as a conduit for the merger of public and private finances to meet the objectives of this legislation.

Mr. Speaker, our colleague, MANNY LUJAN, has artfully crafted H.R. 7316 to solve this problem in an innovative way and I urge all of the Members of the House to support this bill.

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the bill, as follows:

H.R. 7316

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Park Visitor Facilities Fund Act".

SEC. 2. DEFINITION.—For purposes of this Act—

(1) "Foundation" means the National Park Foundation established under the Act of December 18, 1967 (81 Stat. 656);

(2) "Fund" means the National Park Visitor Facilities Fund established under section 3 of this Act;

(3) "Secretary" means the Secretary of the Interior; and

(4) "visitor facilities" means improvements in which no possessory interest is outstanding to real property within the areas of the National Park System used to provide food, lodging, or other services to visitors, including concessioners' employee dormitories.

SEC. 3. ESTABLISHMENT OF FUND.—There is hereby established in the Treasury of the United States the National Park Visitor Facilities Fund. Notwithstanding any other provision of law to the contrary, beginning October 1, 1983, there shall be covered into the Fund, National Park System franchise fees, including building user fees and other remuneration due and owing the United States for the privilege of providing visitory accommodations and services in areas of the National Park System.

SEC. 4. APPROPRIATIONS.—Beginning in fiscal year 1984, moneys covered into the Fund pursuant to this Act are hereby authorized to be appropriated to the National Park Service, to be made available for expenditure by the Foundation to carry out its functions under this Act: *Provided,* That in fiscal year 1984 there is authorized to be appropriated from miscellaneous receipts of the Treasury a sum equal to the amount collected by the United States in the previous fiscal year from franchise fees, including building user fees and other remuneration due and owing the United States for the privilege of providing visitor accommodations and services in areas of the national park system, as referred to in section 3. In addition to the amount authorized to be appropriated pursuant to this section, such sums not to exceed $1,000,000 may be appropriated and made available to be matched on a dollar-for-dollar basis by cash or in-kind contributions made to the Foundation for the purposes of this Act. Except as provided in section 8 of this Act, sums appropriated under this section shall remain available until expended.

SEC. 5. ADMINISTRATION OF FUND PROJECTS.—(a) The Secretary shall, as soon as practicable after the date of enactment of this Act, appoint the Executive Committee of the National Park Foundation, who shall act as a committee of the Board to consider and recommend Fund projects to the Foundation. If a vacancy occurs on the

committee, the Secretary shall appoint a nongovernmental member of the Board to serve the remainder of the unexpired term.

(b) Prior to the beginning of each fiscal year, the National Park Service shall submit to the committee detailed recommendations for the construction, rehabilitation, other improvements, relocation, or removal of those visitor facilities qualifying for moneys from the Fund during the forthcoming year.

Following the committee's review, those recommendations having the concurrence of the National Park Service, the Secretary, and the committee, shall be submitted to the Board of the Foundation for its approval.

Any project undertaken by the Foundation shall be consistent with the purposes for which the park where the project is sited was established and/or any final general management plan which has been prepared for the park.

(c) Upon arrival by the Board, the Secretary shall make grants to the Foundation for the purpose of carrying out projects so approved. Such grants shall be derived from sums appropriated from the Fund pursuant to section 4. The Foundation shall administer such projects and expend Federal funds from such grants in accordance with applicable law and regulation. By undertaking to administer any project under this Act, the Foundation shall be deemed to have agreed that all right, title, and interest in any visitory facility with respect to which such project is carried out shall vest in the United States. The United States shall not be liable for any debts, defaults, acts, or omissions of the Foundation in connection with its activities under this Act.

(d) The Foundation shall include in its annual report to the Congress a description of Fund projects and the Foundation's accomplishments under this Act.

SEC. 6. AUTHORITY OF THE NATIONAL PARK FOUNDATION.—For the purposes of this Act, the Foundation, in addition to any other authorities it may have—

(1) shall have all necessary and proper powers for exercise of the authorities vested in it by this Act;

(2) may execute all instruments deemed necessary or appropriate in the exercise of any of its functions under this Act; and

(3) may expend a portion of moneys received under this Act for such reasonable personnel and incidental expenses as are necessary to carry out its functions under this Act.

SEC. 7. RESPONSIBILITIES OF THE SECRETARY.—The Secretary shall continue to exercise all the authorities and responsibilities vested in him by the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented, and the Act of October 9, 1965 (79 Stat. 969).

SEC. 8. EXPIRATION OF AUTHORITY.—The authorities contained in this Act shall expire on September 30, 1989. After that date, any moneys previously covered into the Fund under this Act which have not been appropriated, or if appropriated, which have not been obligated, shall be transferred to miscellaneous receipts of the Treasury.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER pro tempore. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute: Strike out all after the enacting clause and insert: That this Act may be cited as the "National Park System Visitor Facilities Fund Act".

DEFINITIONS

SEC. 2. For purposes of this Act—

(1) "Foundation" means the National Park Foundation established under the Act of December 18, 1967 (81 Stat. 656; 16 U.S.C. 19e and following).

(2) "Fund" means the National Park System Visitor Facilities Fund established under section 3 of this Act;

(3) "Secretary" means the Secretary of the Interior; and

(4) "visitor facility" means any structure, fixture, or improvement—

(A) which is located within a unit of the National Park System upon land owned by the United States;

(B) in which no concessioner has a possessory interest (within the meaning of section 6 of the National Park Service Concessions Policy Act (16 U.S.C. 20-20g)); and

(C) which is used to provide food, lodging, or other services to visitors.

Such term also includes concessioners' employee dormitories which meet the requirements of subparagraphs (A) and (B).

ESTABLISHMENT OF FUND

SEC. 3. There is hereby established in the Treasury of the United States the National Park System Visitor Facilities Fund. There shall be credited to the Fund an amount equal to all National Park System concession fees, including franchise fees and building user fees, paid to or due and owing to the United States after October 1, 1982 for the privilege of providing visitor accommodations and services in units of the National Park System (other than revenues obtained under the provisions of section 111 of the National Historic Preservation Act of 1966) (16 U.S.C. 470-470t).

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. (a) Beginning in fiscal year 1984, amounts credited to the Fund pursuant to this Act are authorized to be appropriated to the National Park Service, to be made available for expenditure by the Foundation to carry out its functions under this Act.

(b) In addition to the amount authorized to be appropriated pursuant to subsection (a) of this section, there is authorized to be appropriated, not to exceed $1,000,000 to the National Park Service, to be made available for expenditure by the Foundation to carry out its functions under this Act. Such sums shall be available for expenditure by the Foundation only to the extent such sums are matched on a dollar-for-dollar basis by cash or in-kind contributions made to the Foundation for the purposes of this Act.

(c) Except as provided in section 8 of this Act, sums appropriated under this section shall remain available until expended.

ADMINISTRATION OF FUND PROJECTS

SEC. 5. (a) In a timely fashion, the Director of the National Park Service, with the concurrence of the Secretary, shall submit to the Executive Committee of the National Park Foundation detailed recommendations for the reconstruction, rehabilitation, replacement, improvement, relocation, or removal of visitor facilities. The Director shall specify those projects which he deems to have the highest priority for funding under this Act. The Executive Committee shall consider such recommendations and, with the concurrence of the Director of the National Park Service, recommend projects to the Board of the Foundation for its approval.

(b) The Secretary shall make grants to the Foundation from amounts available in the Fund for the purpose of carrying out projects approved under this section.

(c)(1) Any project approved and carried out under this section shall be consistent with the purposes for which the park system unit involved was established and with any approved general management plan applicable to that unit. Any plans for, and location and design of, any specific project shall be reviewed by and concurred in by the Director of the National Park Service.

(2) In recommending any project under this Act with respect to any property listed on, or eligible for listing on the National Register of Historic Properties, the National Park Service shall take into account the recommendations of the Advisory Council on Historic Preservation and any project affecting any such property shall be carried out in a manner consistent with the requirements of the National Historic Preservation Act (16 U.S.C. 470-470t).

(d) The Foundation shall carry out projects under this Act, and expend grants made available under this Act, in accordance with applicable provisions of law and regulations. All grants for any projects to be carried out under this Act shall be in accordance with Circular A-110 published by the Office of Management and Budget applicable to Federal grants. The Foundation shall be responsible for managing the construction activities, including the selection of persons to perform architectural, engineering, construction, and related services.

(e) By undertaking to administer any project under this Act, the Foundation shall be deemed to have agreed that all right, title, and interest in any visitor facility with respect to which such project is carried out shall be be vested in the United States. The United States shall not be liable for any debts, defaults, acts, or omissions of the Foundation in connection with its activities under this Act.

(f) The Foundation shall include in its annual report to the Congress a description of projects undertaken under this Act and the Foundation's accomplishments under this Act.

SEC. 6. AUTHORITY OF THE NATIONAL PARK FOUNDATION.—For the purposes of this Act, the Foundation, in addition to any other authorities it may have—

(1) shall have all necessary and proper powers for exercise of the authorities vested in it by this Act;

(2) may execute all instruments deemed necessary or appropriate in the exercise of any of its functions under this Act; and

(3) may expend a portion of moneys received under this Act for such reasonable personnel and incidental expenses as are necessary to carry out its functions under this Act.

SEC. 7. RESPONSIBILITIES OF THE SECRETARY.—Nothing in this Act shall affect the authorities or responsibilities of the Secretary under other provisions of law, including the authorities and responsibilities vested in him under the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1, 2, 3, and 4) and under the National Park System Concessions Policy Act (79 Stat. 969; 16 U.S.C. 20-20g).

SEC. 8. EXPIRATION OF AUTHORITY.—The authorities contained in this Act shall expire on September 30, 1989. After that

date, any moneys previously credited to the Fund under this Act which have not been appropriated, or if appropriated, which have not been obligated or expended, shall be transferred to miscellaneous receipts of the Treasury.

Amend the title to read: "An Act to establish the National Park System Visitor Facilities Fund and for other purposes."

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I assume that this is the amendment that was passed in committee?

Mr. SEIBERLING. It is the committee amendment, and it is agreed to by all concerned.

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

JERRY L. CROW

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate bill (S. 835) for the relief of Jerry L. Crow, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. YOUNG of Alaska. Mr. Speaker, reserving the right to object, and I shall not object, I would like the gentleman from Ohio to explain the bill.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, as reported, S. 835 would provide one individual in Alaska and two people in Colorado the right to buy certain public lands at rates other than current fair market value.

BACKGROUND

This bill passed the Senate on May 10, 1982, as private relief legislation for a named individual (Jerry L. Crow).

Mr. Crow since 1967 has been attempting to obtain title to a tract of BLM land adjoining the Denali Highway in Alaska. He applied for the lands under the act of May 14, 1898, which provides for transfers to U.S. citizens of "trade and manufacturing sites" in Alaska. Such transfers are to be for lands which the applicant will use for business purposes. The lands covered by Mr. Crow's application were intended to be used for a commercial campground.

BLM denied Mr. Crow's application, on grounds that he had failed to meet the requirements established by applicable law and regulations. This denial was upheld subsequently by the Department of the Interior's Board of Land Appeals and by the U.S. District Court for the District of Alaska.

As passed by the Senate, S. 835 permitted Mr. Crow to obtain not more than 10 acres of the lands covered by his application, at current fair market value, excluding any value added to the lands by Mr. Crow. With respect to the rest of the lands covered by the 1967 application, that is, about 70 acres, the bill directed the Secretary to offer to lease all or part of them to Mr. Crow for 30 years, with an option for him to purchase them for fair market value at the time the option is exercised.

THE COMMITTEE AMENDMENT

The committee adopted an amendment—offered by Representative BROWN of Colorado—which added a new section—section 4—to the bill. The amendment is identical in effect to the provisions of H.R. 5171. It would authorize and direct the Secretary of the Interior to convey to a named couple—Ralph D. and Connie V. Hubbell—all right, title, and interest of the United States to about 1.25-acres of public lands which they are currently occupying.

The background to the amendment—according to the report of the Department of the Interior—is as follows:

In 1964, the Hubbells purchased from C. J. and Naomi M. Jackson 3.10 acres of land, which included the 1.25-acre parcel in question, for the construction of a home. Documentary stamps on the warranty deed indicate a purchase price of $5,000 or about $1,600 per acre. The description of the parcel conveyed appears to be based on an updated sketch plat signed by Robert D. Scarrow, registered land surveyor No. 3317, State of Colorado, showing a computer tie to an existing corner of the U.S. rectangular survey system. This did not conform to land survey requirements of Colorado State law and resulted in an inaccurate survey.

The Colorado Division of Highways suggested that there was unauthorized use when its field surveyors were surveying to realine Colorado State Highway 82 to its present location. The Bureau of Land Management (BLM) performed an independent resurvey in 1972 which was approved on October 14, 1975. That survey definitely established the occupancy trespass. It is not known what caused the differences between where the private surveyor surveyed the 3.10-acre parcel and where the Bureau's resurvey eventually determined the property boundary to be, but the difference does exist. The BLM survey is the official survey of the tract.

The Hubbells filed an application under the Color-of-Title Act but it was rejected because they did not meet the requirements of that act. The BLM reviewed all its disposal authority to determine whether any other law could be used to convey the land to the Hubbells. It was determined that the only available authority under which the Hubbells could qualify is under section 203 of the Federal Land Policy and Management Act of 1976 (FLPMA). Accordingly, the Bureau prepared required reports including a mineral report dated June 8, 1981, that classified the tract as nonmineral in character for locatable, leasable, and salable minerals. The parcel was offered for direct sale so the Hubbells could acquire the property without competition and end the unauthorized use situation. Conveyance would, or course, be made at fair market value.

A notice of realty action was mailed to the Hubbells on June 19, 1981, with the sale set originally for September 15, but later changed to October 20. Mr. Hubbell protested the appraised fair market value of $20,000, and the sale was postponed. The basis for protest and the facts in the case were thoroughly reviewed. The appraisal was found to have been based on proper consideration of all the factors affecting the fair market value of the land. No change was indicated.

Thereafter, on November 27, 1981, a notice of final determination was issued allowing the Hubbells until December 15, 1981, to file a written offer to purchase the land at the $20,000 appraised value. That notice was amended to postpone the proposed sale until March 15, 1982, to comply with a request to hold in abeyance any actions concerning the property until the Subcommittee on Public Lands and National Parks had an opportunity to consider the bill. On December 10, 1981, Mr. Hubbell requested BLM to postpone final action on the property until December 15, 1982, to allow a full legislative year for consideration of special legislation in his behalf and to allow time for his review of the BLM appraisal.

SECTION-BY-SECTION ANALYSIS

As reported, the bill is in four sections:

Section 1 permits Jerry L. Crow, within 1 year after enactment, to select no more than 10 acres of public lands covered by his original application to purchase a trade and manufacturing site and to notify the Secretary of the Interior of his intention to purchase the selected lands under the provisions of his bill.

Section 2 directs the Secretary to sell to Mr. Crow the lands selected under section 1 at a price based on their fair market value as of the date of enactment of the bill, excluding any value added to the lands by Mr. Crow.

Section 3 requires the Secretary to offer to lease to Mr. Crow all or part of the rest of the public lands included in Mr. Crow's original application for a trade and manufacturing site. The lease is to be for 30 years, with an option to purchase, and rental is to be based on the land's fair market value. If Mr. Crow exercises the option to purchase, the purchase price shall be the fair market value at the time of purchase. Fair market value is to be determined by the Secretary or his designee.

Section 4 authorizes and directs the Secretary to convey to Ralph D. and Connie V. Hubbell all Federal interests in certain described public lands, aggregating about 1.25 acres, upon payment of the 1964 fair market value of the lands.

INFLATIONARY IMPACT

Pursuant to rule XI, clause 2(1)(4) of the Rules of the House of Representatives, the committee believes that enactment of S. 835, as amended, will have no inflationary impact on the national economy.

COST AND BUDGET ACT COMPLIANCE

The committee is unable to accurately estimate the administrative costs which will result from implementation of this bill if enacted. The committee notes that the United States would be compensated for the lands to be conveyed under the bill. It is true that with respect to the Colorado property the compensation would be less than would be received if the sale were made under applicable provisions of existing law, but the committee believes that both the Colorado and Alaska cases are sufficiently unusual as to justify a departure from the normal requirements. At the same time, the committee underscores that it does not view with favor any departures from the requirements of the Federal Land Policy and Management Act of 1976 or the act of May 14, 1898, or other applicable law, and does not view its approval of this bill as establishing a precedent applicable to any other particular case or type of cases, in Alaska, Colorado, or elsewhere. In particular, the committee's action with respect to this bill should not be construed as reflecting any disagreement with the Department's interpretation of the requirements of the act of May 14, 1898.

The analysis of the Congressional Budget Office follows:

OVERSIGHT STATEMENT AND LEGISLATIVE HISTORY

The Committee on Interior and Insular Affairs will have continuing responsibility for oversight of the implementation of this bill if enacted. No reports were received pursuant to Rule X clause 2(b)(1) of the Rules of the House of Representatives.

S. 835 passed the Senate on May 10, 1982. The Subcommittee on Public Lands and National Parks held a hearing on the bill on December 2, 1982. The Subcommittee had held a hearing on H.R. 5171 (which now is included as section four of the bill as reported) on August 9, 1982. On December 8, 1982, the bill was recalled to the full Committee on Interior and Insular Affairs by unanimous consent, was amended, and, as amended, was ordered reported by a voice vote.

Mr. YOUNG of Alaska. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 835

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Jerry L. Crow may, within one year of the date of enactment of this Act, select not more than ten acres of land from the public lands included in his original application to purchase a trade and manufacturing site located at mile numbered 68 on the Denali Highway in the State of Alaska and shall notify the Secretary of the Interior of his intention to purchase the selected land under the provisions of this Act.

SEC. 2. Notwithstanding the provisions of section 203 of the Federal Land Policy and Management Act (90 Stat. 2743) and as soon as practicable upon receipt of a notification under section 1 of this Act, the Secretary is directed to sell the selected land to Mr. Crow at a price based upon their fair market value as of the date of enactment, of this Act excluding any value added to the lands by Mr. crow.

SEC. 3. The Secretary shall offer to lease to Mr. Crow for thirty years, with an option to purchase, for use as a trade and manufacturing site, all or a portion of the lands included in his original application, with rental based on the land's fair market value. If the option to purchase is exercised by Mr. Crow, the purchase price shall be the fair market value at the time of purchase. Fair market value shall be determined by the Secretary or his designee.

AMENDMENT OFFERED BY MR. SEIBERLING

Mr. SEIBERLING. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SEIBERLING: Add a new section 4 as follows:

"SEC. 4. That the Secretary is hereby authorized and directed to convey to Ralph D. and Connie V. Hubbell, Carbondale, Colorado, all right, title, and interest to the United States in and to a tract of land situated in lot 19 of section 27, township 7 south, range 88 west of the sixth principal meridian, Garfield County, Colorado, consisting of one and twenty-five one hundredths acres, more or less. Notwithstanding any other provision of law, such conveyance shall be made upon prompt payment of the 1964 fair market value, as determined by the Secretary. For purposes of this Act, prompt payment shall be no more than thirty days after notification by the Secretary of such value."

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act for the relief of Jerry L. Crow and Ralph D. and Connie V. Hubbell."

A motion to reconsider was laid on the table.

PROVIDING PROTECTION OF JOHN SACK CABIN IN TARGHEE NATIONAL FOREST

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate bill (S.764) to provide for protection of the John Sack cabin, Targhee National Forest in the State of Idaho, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. YOUNG of Alaska. Mr. Speaker, reserving the right to object, can I ask the gentleman to explain the bill?

Mr. SEIBERLING. Will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, earlier this week the Committee on Interior and Insular Affairs ordered reported the Senate-passed bill (S. 764) to provide for the protection of the John Sack Cabin. For the benefit of our colleagues, I am including at this point in the RECORD excerpts from the committee's report on that bill.

PURPOSE

S. 764 would authorize the Secretary of Agriculture, in consultation with the Island Park Interpretive Association and other interested organizations, to take such action as may be necessary to provide protection and maintenance of the John Sack Cabin and associated structures.

BACKGROUND

The John Sack Cabin is an unusual structure located at Big Springs near Island Park, Idaho, on lands within the Targhee National Forest. Constructed by Mr. Sack in 1932, the picturesque cabin and surrounding smaller structures, set near a hot springs and water wheel, have become a local landmark and attraction for visitors, artists, and photographers. The cabin was identified for inclusion on the National Register of Historic Places as of April 19, 1979.

The cabin is reportedly remarkable for its interior woodwork, which is of high quality characterized by an interesting and attractive planed-bark finish. Many of the original furnishings were also built by Sack, utilizing the same bark finishing technique. The workmanship apparently exhibits considerable skill, imagination, and attention to detail.

The special-use occupancy permit for use of the cabin expired December 31, 1979. The private-use cabins in the area are scheduled for eventual removal. The permittees, Mr. and Mrs. Rudy Kipp, transferred the title of John Sack Cabin to the Island Park Interpretive Association on December 15, 1979. The Forest Service issued a 5-year term special-use permit to the association on July 17, 1980, with renewable provisions. The cabin is now being operated, protected, and maintained under those circumstances.

SECTION-BY-SECTION ANALYSIS

The bill is in a single section, which is self-explanatory.

INFLATIONARY IMPACT

Pursuant to rule XI, Clause 2(1)(4) of the Rules of the House of Representatives, the committee believes that enactment of S. 764 would have no inflationary impact on the national economy.

COST AND BUDGET ACT COMPLIANCE

S. 764 authorizes no appropriations, and should not involve significant costs to the Federal Government.

LEGISLATIVE HISTORY AND COMMITTEE RECOMMENDATION

S. 764 passed the Senate on May 10, 1982. On December 2, 1982, the Subcommittee on Public Lands and National Parks held a hearing on the bill. On December 8, 1982, the full Committee on Interior and Insular Affairs recalled the bill from subcommittee by unanimous consent, and ordered it favorably reported to the House by a voice vote.

DEPARTMENTAL REPORT

The views of the Department of Agriculture concerning S. 764 were reported to the committee in the testimony of the Department's witness at the subcommittee hearing. The gist of the prepared statement of the witness is as follows:

STATEMENT OF J. LAMAR BEASLEY, DEPUTY CHIEF, FOREST SERVICE, U.S. DEPARTMENT OF AGRICULTURE BEFORE THE SUBCOMMITTEE ON PUBLIC LANDS AND NATIONAL PARKS, COMMITTEE ON INTERIOR AND INSULAR AFFAIRS, U.S. HOUSE OF REPRESENTATIVES, CONCERNING S. 2710, S. 764 AND S. 705 DECEMBER 2, 1982

Mr. Chairman and members of the subcommittee: thank you for the opportunity to appear here today to present the Department of Agriculture's views on S. 2710, S. 764 and S. 705. I would like to discuss each bill separately.

S. 764—Protection for the John Sack Cabin, Targhee National Forest, Idaho.—This legislation provides for the protection of the John Sack Cabin on the Targhee National Forest in Idaho. We regard existing authorities as adequate to protect the cabin and we would prefer that special legislation not be enacted. However, we do not strongly object to the legislation.

Mr. YOUNG of Alaska. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 764

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purpose of providing for the public use and enjoyment of the John Sack cabin, Targhee National Forest, State of Idaho, and to protect and preserve such cabin as a unique example of craftsmanship, the Secretary of Agriculture, in consultation with the Island Park Interpretive Association and other interested organizations, shall take such action as may be necessary in order to provide for the protection and maintenance of the John Sack cabin and associated structures. In carrying out the requirements of this Act, the Secretary is authorized, in accordance with existing law, to enter into a cooperative agreement with, or to issue a special use permit to, an appropriate person or organization pursuant to which such person or organization shall provide such protection and maintenance.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the two bills just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

COMMUNICATION FROM THE SENATE OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the Senate of the United States:

Ordered, That the Secretary of the Senate be directed to request the House of Representatives to return to the Senate the bill (H.R. 6758) entitled "An Act to authorize the sale of defense articles, defense services, and unclassified defense service publications to United States companies for incorporation into end items to be sold to friendly foreign countries", including the Senate amendments thereto.

EXPRESSING THE SENSE OF CONGRESS ON SITUATION IN POLAND

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from the further consideration of the concurrent resolution (H. Con. Res. 432) expressing the sense of the Congress on the situation in Poland and calling for a determined policy aimed at ending the repressing of the Polish people, and ask for its immediate consideration in the House.

□ 1510

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

Mr. BROOMFIELD. Mr. Speaker, reserving the right to object, I first wish to give the gentleman from Indiana (Mr. HAMILTON) an opportunity to explain the purpose of this concurrent resolution.

Mr. HAMILTON. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Indiana.

Mr. HAMILTON. Mr. Speaker, almost 1 year ago today the regime of General Jaruzelski imposed marshal law in Poland. In that year many of us watched with heartfelt sympathy and sadness the suffering of the Polish people. The purpose of House Concurrent Resolution 432 is to signal to the Polish leadership our acknowledgment of the real but limited steps that have been taken thus far.

Lech Walesa has recently been released from detention. The indications are that marshal law may be lifted. The Holy Father is scheduled to visit Poland in June. We cannot underestimate the significance of these encouraging developments, but clearly much more needs to be done.

This concurrent resolution is intended to make possible an even fuller restoration of civil liberties and seeks to stimulate that movement by a policy of positive incentives.

Mr. Speaker, it is my hope that the administration will make the most of the unique opportunity which now presents itself in terms of influencing the course of development in Poland. As an expression of support for the President in following this positive approach, I urge adoption of House Concurrent Resolution 432.

Mr. BROOMFIELD. Mr. Speaker, I join the chairman of the Foreign Affairs Committee, the gentleman from Wisconsin (Mr. ZABLOCKI), in supporting House Concurrent Resolution 432. This timely resolution calls for a determined policy aimed at ending the repression of the Polish people. As I have already stated before this body, there should be an immediate lifting of martial law, a release of the remaining detainees, and a resumption of dialog by the Polish Government with Solidarity and the Catholic Church.

December 12 marks the first anniversary of the imposition of martial law in that country. Our colleagues in the other body are already considering a resolution, declaring this a National Day of Solidarity and Prayer with the Polish people.

Let us hope that the repressive martial law in Poland will be lifted on the anniversary of its imposition. The noble and brave people of Poland have suffered greatly in their tragic search for freedom and liberty.

Some Polish citizens have given their lives in Poland's struggle to rid itself of external influence and coercion. Many are still being held as prisoners of the state. Those external forces who created the repression in Poland are the only ones who can lift it.

As all of you know and appreciate, having the Soviet Union as a next-door neighbor has been a liability, in many respects, for Poland. Over a year ago, when Solidarity was active in Poland, the Kremlin decided that the workers' union was moving in the wrong direction. The Soviets' solution to the problem was to establish a Polish police state. Later, when Solidarity called for a nationwide strike, Soviet armor units massed on the Polish border and conducted intimidating "maneuvers." Finally, the puppet Polish Premier declared martial law, banned Solidarity, and imprisoned Lech Walesa. It is widely known that the Kremlin leaders orchestrated all of this; only they—not the United States—will be able to end the repression.

I know that my colleagues will join me in welcoming the Polish authorities' promise to lift martial law. In that spirit, I support this resolution.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. Further reserving the right to object, I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am pleased to rise in support of House Concurrent Resolution 432, a resolution expressing the sense of the Congress on the situation in Poland and calling for a determined policy aimed at ending the repression of the Polish people.

I want to commend both the chairman and ranking minority member of the Committee on Foreign Affairs, Mr. ZABLOCKI and Mr. BROOMFIELD, respectively, for their leadership on this issue and for bringing this resolution before the House.

It is most fitting and proper that we consider this measure today which is the 34th anniversary of the signing of the Universal Declaration of Human Rights at the United Nations.

The resolution before us notes the close and lasting admiration for the people of Poland based on our mutual respect for freedom. It further recalls that 1 year ago this month martial law was imposed and Solidarity leader Lech Walesa was imprisoned as a part of a widespread repression of the legitimate aspirations of the Polish people for true civil rights and personal liberties.

Although Lech Walesa has recently been partially freed from his imprisonment and there is talk of a lifting of martial law, nothing short of a full lifting of martial law and the full release of all prisoners is required to eliminate the brutal suppression of human freedom by the Polish regime.

As signers of the Universal Declaration of Human Rights, the Helsinki accords and numerous other international agreements guaranteeing the Polish people their freedom, the current military government has continuously violated their duties and responsibilities to the Polish nation.

House Concurrent Resolution 432, therefore, expresses the sense of the Congress that the American people reaffirm their support for the people of Poland and the struggle to regain their freedom, dignity and economic security. It calls for an immediate lifting of martial law, release of prisoners and a renewed dialog with the church and the leaders of the Solidarity movement to seek common solutions to Poland's problems. Furthermore it calls for an affirmative policy of incentives by the United States to reinforce the positive developments in Poland and encourage the restoration of the basic human and civil rights of all Polish people. Finally, we should encourage economic and political reforms that will result in economic prosperity and political freedom for the Polish nation.

Accordingly, I urge all my colleagues to join in supporting House Concurrent Resolution 432.

Mr. DAUB. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. Further reserving the right to object, I yield to the gentleman from Nebraska.

Mr. DAUB. Mr. Speaker, on April 7, 1981, I introduced House Resolution 124, expressing the sense of Congress that the United States could not remain indifferent to external aggression or internal repression against the people of Poland and that such developments would have serious consequences for East-West relations.

That resolution, with over 70 cosponsors, passed almost unanimously on July 30, 1981.

Today, I am pleased to rise in support of House Concurrent Resolution 432, of which I am a cosponsor. This measure notes the recent positive developments in Poland, such a release of Lech Walesa and other Solidarity members, the efforts of the Polish Government to restore previously held freedoms, and imminent possible lifting of martial law.

In addition, just as House Resolution 124 was introduced to demonstrate that the House is behind the people of Poland in their struggle for fundamental liberties, House Concurrent Resolution 432 too demonstrates our support for their quest, by affirming that any concessions of human rights made by the Polish Government should be met with positive actions by the U.S. Government.

With talk of martial law being lifted in Poland, every effort should be made to encourage the Polish Government to continue along this line.

I commend the chairman of the Foreign Affairs Committee, Mr. ZABLOCKI, on his introduction of this resolution, thank my ranking member, Mr. BROOMFIELD, and encourage my colleagues' full support for this worthwhile measure.

● Mr. ZABLOCKI. Mr. Speaker, December 13 will mark 1 year that the brave people of Poland have suffered under the repression of martial law. Over that time the American people have shared the agony of freedom-loving Poles.

The overriding aim of U.S. policy toward Poland has been to relieve the suffering of the Polish people and to reinforce their desire for civil liberties and economic security. In large measure as a result of that balanced and prudent policy we have begun to see changes in Poland.

Only recently the leader of Solidarity, Lech Walesa, has been freed; there are encouraging signs that martial law may soon be lifted; as a sign of further progress, his Holiness, Pope John Paul will hopefully return to his homeland next June.

These are all encouraging developments. They are welcome, indeed, long overdue. However, hundreds more remain in detention and Solidarity has been outlawed. Accordingly, while we welcome these positive steps we recognize that there is still a long way to go.

What House Concurrent Resolution 432 addresses itself to is that distance yet to be traveled. In short, it applauds the real but limited progress already achieved. More importantly, though, its chief aim is to stimulate

still further movement toward freedom by a policy of positive incentives.

House Concurrent Resolution 432 was introduced on December 2 with 13 cosponsors, including the ranking bipartisan members of the Committee on Foreign Affairs, Mr. BROOMFIELD, Mr. FASCELL, and Mr. DERWINSKI; other prominent members of Polish-American heritage such as Mr. ROSTENKOWSKI; and members with large Polish constituencies. We believe that House Concurrent Resolution 432 can serve as a base from which can emerge new intiatives and opportunities in United States-Polish relations.

In setting forth this resolution, we recognize that the President's policy has helped the Polish people and we urge that each freedom restored to the Polish people result in a corresponding U.S. action to assist in the rebuilding of Poland. Indeed, we are convinced that this approach will ultimately serve the best interests of both the United States and Poland.

For instance, should martial law be lifted, we might respond by restoring, in a limited fashion, or trial basis, LOT's U.S. civil aviation privileges or Poland's MFN status.

Further significant progress on the part of the Polish Government might be met with such initiatives as exploring the possibility of providing Eximbank and OPIC credits limited to specific projects. We might also consider joint United States-Polish agricultural and marketing programs to improve industrial and agricultural output in Poland and build Polish export markets. Such projects would help to strengthen the weakened Polish infrastructure, increase the material well-being of the Polish people, and promote sound and enduring economic ties between Poland and the United States. However, I would emphasize that any such action on our part would be directly linked to concrete steps by the Polish Government to restore full economic and civil rights.

While circumstances will dictate which specific approaches the administration may wish to pursue, I offer suggestions such as those outlined above as examples of how we may constructively encourage future movement toward an even fuller restoration of civil liberties and economic growth in Poland.

The basic philosophy underlying this approach was articulated in detail in my letter to President Reagan of December 2, 1982, a copy of which I wish to include as part of these remarks.

My colleagues and I hope that the administration will make the most of the unique opportunity which now presents itself in terms of influencing the course of developments in Poland. As an expression of support for the administration in following this positive approach we urge adoption of House Concurrent Resolution 432:

COMMITTEE ON FOREIGN AFFAIRS,
Washington, D.C., December 2, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Since the imposition of martial law in Poland on December 13, 1981, your policy has been balanced and prudent. As you know, I have warmly supported your efforts aimed at improving the lot of the Polish people and restoring their human rights and civil liberties.

As we fast approach the first year observance of the martial law regime in Poland, it is obvious that your policy has helped to attain real if limited advances. From that fact, however, comes a new challenge—and opportunity. My sincere wish is to contribute to your deliberations as you approach this dawn of a new, albeit still imperfect, chance for Poland.

Within the last few weeks certain encouraging developments have taken place in Poland to which your consistent and determined policies have clearly contributed. Most recently, Lech Walesa has been released; the Holy Father is scheduled to visit Poland in June; and it is highly likely that martial law will be lifted later this month. Obviously, more—far more—remains to be done: hundreds remain in detention; individual freedoms must be won through renewed dialogue with Solidarity and the Church; and fundamental economic reforms are long overdue.

In order to reinforce those real if modest developments it is necessary to undertake a new and different approach to Poland. In fact, to the extent that Poland has complied in significant degree with the conditions you have established, a rethinking of U.S. policy is certainly required. My hope is that the basic direction of such a revised policy will be one that offers positive incentives for further change.

Accordingly, in response to the partial compliance of the Polish government to your basic conditions and on an immediate-range basis, I urge that some of the following actions be considered:

A partial lifting of the restriction on U.S. government-sponsored food shipments to Poland on the receipt of "absolute assurances" that the distribution of such products will be monitored by independent agencies.

Initially limited restoration of LOT's U.S. civil aviation privileges, perhaps related to charter group flights of Americans travelling to Poland for the Pope's visit.

Limited to a trial basis, a restoration of Poland's long distance fishing fleet's right to operate in U.S. waters.

An indication that Poland's MFN status might be restored if clear progress is made in freeing all detainees and restoring basic human rights.

As continued progress is made in Poland toward full restoration of economic and civil rights a second-stage set of policy initiatives might be undertaken. To that end may I recommend for your careful consideration some of the following:

Along with similar efforts by West European governments, the United States might explore the possibility of providing Eximbank and OPIC credits to Poland linked to specific projects and export programs.

Consider using U.S. government-held Polish zlotys and contributions from private sources to establish an agricultural extension service and business marketing institute in Poland manned by Americans and qualified Poles to help improve Polish agricultural and industrial productivity and the quality of Polish exports.

Encourage additional joint ventures between Polish and American firms, especially those involving industrial equipment products, through licensing arrangements.

Encourage Poland to join the International Monetary Fund and the World Bank.

Provide direct bilateral aid linked to Poland's private agriculture and small business sectors.

The assumption underlying all of these suggestions is that of simultaneously leading and prodding the Polish government toward basic economic and political reforms. In addition to the lifting of martial law, the release of political prisoners, undertaking an open dialogue with Solidarity, and a renunciation of force against the Polish people, the Jaruzelski regime should be expected to undertake a number of other actions. For example, it should rationalize the price structure of basic commodities, link income to productivity, professionalize its economic bureaucracy, and introduce greater material incentives for private agriculture. Joint economic ventures with Western firms would also have to be coupled with determined efforts at earning the hard currency Poland needs to pay off its huge foreign debt.

Mr. President, I recognize that not all of these initiatives may be possible or desirable at this time. Surely there are other possible approaches on which I have not touched.

However, I believe the essential thrust of what I have attempted to outline here for your consideration embodies the type of positive approach U.S. policy toward Poland should take at this opportune juncture in our relations and in the cause of advancing U.S. interests and an improved situation for the people of Poland.

In all of this I stand ready to work with you and continue my support of your efforts to bring freedom to Poland.

With best wishes, I am

Sincerely yours,

CLEMENT J. ZABLOCKI,
Chairman.●

Mr. BROOMFIELD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. SAM B. HALL, JR.). Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 432

Whereas the American people have a close and lasting admiration for the people of Poland based on their mutual respect for freedom; and

Whereas the imposition of martial law on December 13, 1981, and the imprisonment of Solidarity Leader Lech Walesa repressed the legitimate aspirations of the Polish people for true civil rights and personal liberties; and

Whereas the full lifting of martial law and the release of all political prisoners is required in order to further eliminate the brutal suppression of human freedoms by the Polish regime; and

Whereas the Polish people urgently need and deserve an improved economic opportunity which will enhance their dignity and well-being: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress—

(1) that the American people reaffirm their determined support for the people of Poland in their rightful aspirations for freedom, dignity, and economic security;

(2) that there should be an immediate lifting of martial law, a release of remaining detainees, and a more complete resumption of a full and open dialog with Solidarity and the church aimed at seeking common solutions to Poland's problems;

(3) that in order to reinforce the real if limited positive developments in Poland an appropriate United States response is necessary; and

(4) that such response by the United States embody an affirmative policy of providing positive incentives that will lead the Polish Government to restore to all Polish people their basic civil and human rights and to institute the economic and political reforms that will result in economic prosperity and political freedom for the Polish people.

● Mr. ANNUNZIO. Mr. Speaker, I rise in support of the bill I cosponsored with my good friend and colleague from Wisconsin, the Honorable CLEMENT J. ZABLOCKI, the chairman of the House Foreign Affairs Committee, expressing the sense of the Congress on the situation in Poland and calling for a determined policy aimed at ending the repression of the Polish people.

One year ago, on December 13, martial law was declared in Poland and the freedoms of the Polish were severely repressed. Polish Americans in my own city of Chicago and all over this Nation have expressed their continuing deep concern and worry for the safety of their relatives, their friends, and the future of freedom itself in the Polish nation. Excerpts from the publication "Poland Watch" follow on the brutal martial law regime in Poland:

On December 13, 1981, martial law was declared in Poland. Fifteen months of unprecendented hope and exhilaration came to an abrupt end. The "Solidarity period" had seen an enormous upsurge in political and social activity which, for the first time in post-war Poland, brought fundamental human and civil rights to the forefront of everyday life. The introduction of martial law put a halt to this—for the time being. The Polish people once again find themselves confronting a political system in which their role is confined to implementing decisions emanating from the state and party apparatus. In the meantime the struggle continues; in a multitude of ways men and women in Poland are registering their protest, and although Solidarity has effectively been banned, and "underground Solidarity" movement continues to exist and organize.

Moreover, the current situation in Poland transcends academic or humanitatian concern. First, it is clear that what happens in Poland can either heighten or reduce international tensions, and thus affect the lives of all of us. Second, it is not too far-fetched to say that our reaction can influence—even if only modestly—the course of events in Poland. Polish human-rights activists have stressed repeatedly that they derive enormous moral support from the knowledge that their struggle is followed closely in the West. In addition, the pressure of public opinion, both in its own right and as mediated by Western governments, can influence the actions of the Polish authorities. Third, the aspirations and goals of the Polish people in striving for a democratic society may give us insights into how to make our own society more democratic.

The specific measures of martial law were spelled out in a decree formally passed by the Council of State. The decree imposed servere restrictions (in many cases amounting to a complete ban) on virtually all forms of communication and movement. Solidarity was "suspended," along with a number of other organizations. The main provisions of the decree were as follows:

Anyone over the age of 17 could be interned for the duration of martial law if there were "justified suspicions" that they would present a threat to state security if allowed to remain at liberty;

All publishing, printing, and the dissemination of information in any form (including live theatrical performances) required prior permission from the appropriate authorities;

All organizations "whose activity threatens the interests of the security of the state" were suspended;

The right to strike was suspended;

No public meetings (including theater and cinema performances and sports events, but excluding church services) could be held without permission;

The wearing of "specific uniforms and badges" was banned.

The "appropriate state authorities" were empowered to:

Impose a curfew;

Ban travel to and from the region under their jurisdiction, including across frontiers;

Suspend or limit all forms of travel and transport;

Make it necessary to obtain permission before changing one's address for a period longer than 48 hours and to register with the militia immediately upon arrival;

Limit or stop all postal and telecommunications services;

Censor the mail and telephone conversations;

Requisition radio transmitters and two-way radio receivers;

Ban the taking of photographs or filming of certain buildings or in specified areas.

In addition, for the duration of martial law, everyone aged over 13 was required to carry an identity card at all times. Anyone living in a border area was required to obtain a permit to do so, and anyone wishing to visit such an area had to obtain permission in advance. Finally, all sailing on both inland and territorial waters was prohibited.

Anyone found infringing the provisions of martial law could be tried by summary and speeded-up legal proceedings. Military Courts would have jurisdiction over cases involving the infringement of regulations in those sectors of the administration and the economy which had been militarized. The decree stipulated sentences of up to ten years' imprisonment for anyone found guilty of any such infringements.

Mr. Speaker, we as Americans, along with free people all over the world, must join our hearts and our minds with the courageous Polish people, who have never lost their fervent desire for freedom. The shipyard workers, the coal miners, the farmers, and all the people of Poland must know that Americans will never be silent about this brutal war on their liberty.

On December 15, 1981, the Congress approved a resolution in support of the Solidarity movement in Poland and its attempt to bring human dignity to Poland. The bill, which was adopted unanimously, places the responsibility for the martial law oppression directly on the Soviet Union, and I urge my colleagues to approve this additional resolution today in an effort by the United States to provide positive incentives that will lead the Polish Government to restore to all Polish people their basic civil and human rights and to institute the economic and political reforms that will result in economic prosperity and political freedom for the Polish people.

As the Christmas season approaches, we all join with the brave people of Poland in their prayers and struggles for a just and peaceful resolution of their beloved country's difficulties.●

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3942. An act to amend the Commercial Fisheries Research and Development Act of 1964.

COMMERCIAL FISHERIES RESEARCH AND DEVELOPMENT ACT AMENDMENTS

Mr. BREAUX. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3942) to amend the Commercial Fisheries Research and Development Act of 1964, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The text of the Senate amendment is as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Fisheries Amendments of 1982".

TITLE I—COMMERCIAL FISHERIES RESEARCH AND DEVELOPMENT ACT

SEC. 101. (a) Section 4(a) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b(a)) is amended—

(1) by striking the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(2) by adding at the end thereof the following new paragraph:

"(3) $5,000,000 for each of the fiscal years ending September 30, 1984 and September 30, 1985.".

(b) Section 4(b) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b(b)) is amended—

(1) by striking "and" at the end of paragraph (2);

(2) by inserting "; and" at the end of paragraph (3); and

(3) by adding at the end thereof the following new paragraph:

"(4) $2,500,000 for each of the fiscal years ending September 30, 1984 and September 30, 1985.".

(c) Section 4(c) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b(c)) is repealed.

TITLE II—MARINE MAMMAL PROTECTION

SEC. 201. Section 14 of the North Pacific Fisheries Act of 1954 (16 U.S.C. 1034) is amended to read as follows:

"SEC. 14. (a)(1) The Secretary of Commerce is directed to take such actions as are necessary and appropriate to determine the effect of the Japanese salmon drift gillnet fishery on marine mammal populations, and to reduce or eliminate the incidental taking of marine mammals, particularly Dall's porpoise, by this fishery. Such actions shall include, but not be limited to:

"(A) the placement of duly authorized observors of the United States onboard Japanese salmon fishing and research vessels while within the Fishery Conservation Zone, for the purpose of making scientific observations and studies relating to the biology of the Dall's porpoise and the incidental taking of marine mammals, seabirds, and king salmon of North American origin;

"(B) the collection of a representative sample of biological material and data on all marine mammals incidentally taken in the fishery; and

"(C) the adoption of requirements, by permit conditions or agreement, governing the incidental taking of marine mammals by Japanese salmon fishing vessels within the Fishery Conservative Zone, which will insure that new fishing gear or techniques, or both, are implemented in the North Pacific salmon fishery which will reduce porpoise mortality to the greatest extent practicable.

"(2) The introduction of new fishing gear or techniques, or both, in the fishery under paragraph (1) of this subsection shall be accomplished no later than is specified in the following timetable:

"(A) 25 per centum of the fleet by the commencement of the 1984 season;

"(B) 50 per centum of the fleet by the commencement of the 1985 season;

"(C) 75 per centum of the fleet by the commencement of the 1986 season; and

"(D) 100 per centum of the fleet in order to be eligible for a new permit for the period after June 9, 1987.

The Secretary shall have the authority to decide, based upon available fishery research, which types of fishing gear or techniques offer the most practical and effective opportunity for reducing porpoise mortality, and to specify which of these fishing gear or techniques, or both must be implemented during the time periods specified in subparagraph (A) through (D) of this paragraph. In addition, the National Marine Fisheries Service may require the implementation of new gear types or fishing techniques, or both, on a faster schedule if the Service determines that faster implementation is technically and economically feasible.

"(b) the General Permit issued under the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) to the Federation of Japan Salmon Fisheries Cooperative Association on May 7, 1981 (hereinafter referred to as the 'General Permit') is extended through June 9, 1987, unless earlier terminated by the Secretary pursuant to applicable law: *Provided*, That:

"(1) all other provisions of the General Permit and applicable law shall remain in effect during that period;

"(2) the Secretary shall by January 1 of each year during that period prepare and make available a report covering the results of the annual review required by condition B-2 of the General Permit and a proposed action plan for the forthcoming fishing season setting forth monitoring, research and development, and any other necessary actions to assure compliance with the General Permit, resolve questions about the status and trends of marine mammals affected by the Japanese high seas and land-based salmon gillnet fisheries, and reduce the annual incidental take of marine mammals in the fishery conservation zone, and shall publish a notice of availability of the report in the Federal Register. The Secretary shall, by April 30 of each year during this period, prepare and make available a report covering a final action plan and shall publish a notice of availability of the report in the Federal Register.

"(3) the Memorandum of Understanding between the Government of the United States of America and the Government of Japan dated June 3, 1981 relating to such incidental taking shall be modified or renegotiated by June 9, 1984 so as to apply to this extended period and to ensure the conduct of necessary monitoring and research and development efforts to implement the action plans described in paragraph (2) of this subsection.

"(c) The taking of marine mammals incidental to fishing operations by Japanese salmon fishing vessels within the fishery conservation zone shall be regulated in accordance with the General Permit, except that the Secretary shall take appropriate steps, including the suspension or modification of the General Permit, if the Secretary determines that the General Permit holder or certificate holders are not adhering to the conditions of the General Permit or to the conditions specified in paragraphs (a)(1)(C) and (a)(2) of this section and publishes such determination and its basis in the Federal Register.

"(d) The terms and conditions under which the General Permit is issued may be modified by the Secretary in such manner as the Secretary determines to be consistent with and necessary to carry out the purposes of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) and this Act.

"(e) The Secretary shall ensure that any Memorandum of Understanding between the Government of Japan and the Government of the United States of America shall require no less of a commitment to marine mammal research and seabird research than that required by this section and the Memorandum of Understanding in effect on the date of enactment of the Fisheries Amendments Act of 1982.

"(f)(1) In order to assure full implementation of the provisions of this section, the Secretary shall include as a condition of such General Permit and any Memorandum of Understanding that the Government of Japan or the permit holder, shall provide:

"(A) appropriate funding each year to carry out fully a joint research program on Dall's porpoise and other marine mammals incidentally taken in the Japanese fishery; and

"(B) a full report each year on the activities undertaken by the Government of Japan and the General Permit holder relating to marine mammal research and the progress toward the elimination of the incidental taking of marine mammals in the fishery.

"(2) If the Secretary finds that such research cannot be successfully conducted because of a lack of adequate funding by the Government of Japan or the General Permit holder the Secretary shall immediately suspend the General Permit until such time as adequate funding is provided.".

SEC. 202. The first sentence of section 201(b)(1) of the Act of October 21, 1972 (16 U.S.C. 1401(b)(1)), is amended to read as follows: "Effective September 1, 1982, the Commission shall be composed of three members who shall be appointed by the President, by and with the advice and consent of the Senate.".

TITLE III—NORTH ATLANTIC SALMON TREATY

SEC. 301. This title may be cited as the "Atlantic Salmon Convention Act of 1982".

SEC. 302. As used in this title, the term—

(1) "Act of 1976" means the Act entitled "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (16 U.S.C. 1801 et seq.);

(2) "Commission" means any of the Commissions of the Organization that are established by the Convention;

(3) "Commissioner" means a United States Commissioner appointed under section 403 of this title;

(4) "Convention" means the Convention for the Conservation of Salmon in the North Atlantic Ocean, signed at Reykjavik, Iceland, on March 2, 1982;

(5) "Council" means the Council established by the Convention;

(6) "fishing" has the same meaning as such term has in section 3(10) of the Act of 1976 (16 U.S.C. 1802(10));

(7) "Organization" means the North Atlantic Salmon Conservation Organization established under the Convention;

(8) "person" has the same meaning as such term has in section 3(19) of the Act of 1976 (16 U.S.C. 1802(19)); and

(9) "salmon" means all species of salmon which migrate in or into the waters of the Atlantic Ocean north of 36 degrees North Latitude.

SEC. 303. (a) The United States shall be represented on the Council and Commissions by three United States Commissioners to be appointed by the President to serve at his pleasure. Of such Commissioners, one shall be an official of the United States Government, and two shall be individuals (not officials of the United States Government) who are knowledgeable or experi-

enced concerning the conservation and management of salmon of United States origin.

(b) The Secretary of State, in consultation with the Secretary of Commerce and the Secretary of the Interior, may designate alternate United States Commissioners. In the absence of a Commissioner appointed under subsection (a) of this section, an alternate Commissioner may exercise at any meeting of the Organization, the Council, or any Commission all functions of such Commissioner.

(c) Individuals who serve as Commissioners and alternate Commissioners shall not receive any compensation for such service. Such individuals shall be considered to be Federal employees while performing such service, except for purposes of injury compensation or tort claims liability as provided in chapter 81 of title 5, United States Code, and chapter 171 of title 28, United States Code.

(d) In carrying out their functions under the Convention, the Commissioners may consult with the appropriate Regional Fishery Management Councils established by section 302 of the Act of 1976 (16 U.S.C. 1852), and may consult with such other interested parties as they consider appropriate. The Federal Advisory Committee Act (5 U.S.C. App. 1 et seq.) shall not apply to consultations described in this subsection.

SEC. 304. (a) The Secretary of State may—

(1) receive, on behalf of the United States, reports, requests, recommendations, proposals, and other communications of the Organization and its subsidiary organs;

(2) with the concurrence of the Secretary of Commerce and the Secretary of the Interior, approve, object to, or withdraw objections to regulatory measures proposed in accordance with the Convention; and

(3) act upon, or refer to other appropriate authority, any communication referred to in paragraph (1) of this subsection other than a proposed regulatory measure.

(b) If the concurrence required under subsection (a)(2) of this section has not been obtained by the Secretary of State—

(1) regarding the approval of, or the objection to, a proposed regulatory measure within 45 days after the measure was received on behalf of the United States; or

(2) regarding the withdrawal of an objection of the United States to a proposed regulatory measure within 45 days after such withdrawal is proposed by the Secretary of State;

the Secretary of State shall submit the matter in disagreement, together with a statement of the opposing positions, to the President for timely disposition.

SEC. 305. (a) The Secretary of Commerce, in cooperation with the Secretary of the Interior and the Secretary of the Department in which the Coast Guard is operating, shall promulgate such regulations pursuant to section 553 of title 5, United States Code, as may be necessary to carry out the purposes and objectives of the Convention and this title, and to implement regulatory measures that are binding on the United States under the Convention. Any such regulation may be made applicable, as necessary, to all persons and all vessels subject to the jurisdiction of the United States, wherever located.

(b) The Secretary of Commerce, in cooperation with the Secretary of the Interior, shall prepare all statements, reports, and notifications required by Articles 14 and 15 of the Convention and submit such documents to the Secretary of State for transmission to the Organization.

SEC. 306. (a) In carrying out the provisions of the Convention, the Secretary of Commerce, in consultation with the Secretary of the Interior, may arrange for the cooperation of agencies of the United States and the States, and of private institutions and organizations.

(b) Appropriate agencies of the United States may cooperate in the conduct of scientific and other programs, and may furnish facilities and personnel, for the purposes of assisting the Organization in carrying out its duties under the Convention. Such agencies may accept reimbursement from the Organization for providing such services, facilities and personnel.

SEC. 307. (a) It is unlawful for any person, or any vessel, subject to the jurisdiction of the United States—

(1) to conduct directed fishing for salmon in waters seaward of twelve miles from the baselines from which the breadths of territorial seas are measured, in waters of the Atlantic Ocean north of 36 degrees North Latitude; or

(2) to violate any provision of the Convention or this title, or of any regulation promulgated under this title.

(b) Any person who commits any act that is unlawful under subsection (a) of this section shall—

(1) be liable to the United States for a civil penalty under section 308 of the Act of 1976 (16 U.S.C. 1858) to the same extent as if such act were an act prohibited under section 307 of the Act of 1976 (16 U.S.C. 1857); and

(2) be guilty of an offense under section 309 of the Act of 1976 (16 U.S.C. 1859) to the same extent as if such act were an act prohibited by section 3207(1) (D), (E), (F), or (H) of the Act of 1976 (16 U.S.C. 1857(1) (D), (E), (F), or (H).

(c) Any vessel used in the commission of an act which is unlawful under subsection (a) of this section shall be subejct to civil forfeiture under section 310 of the Act of 1976 (16 U.S.C. 1860) to the same extent as if such vessel was used in the commission of an act prohibited by section 307 of the Act of 1976 (16 U.S.C. 1857).

SEC. 308. The Secretary of Commerce and the Secretary of the department in which the Coast Guard is operating shall enforce the provisions of this title and any regulation issued under this title. For purposes of such enforcement, such provisions and regulations shall be considered to be provisions of the Act of 1976 to which section 311 (a), (b), (c) and (d) of the Act of 1976 (16 U.S.C. 1861 (a), (b), (c) and (d), respectively) apply.

SEC. 309. There are authorized to be appropriated from time to time such sums as may be necessary for carrying out the purposes and provisions of the Convention and this title, including—

(1) necessary travel expenses of the Commissioners and alternate Commissioners in accordance with the Federal Travel Regulation and sections 5701, 5702, 5704 through 5708, and 5731 of title 5, United States Code; and

(2) the United States contribution to the Organization as provided in Article 16 of the Convention, not to exceed $50,000 for fiscal year 1983, and not to exceed, for each succeeding fiscal year, the amount assessed by the Organization for the United States for such year.

TITLE IV—GOVERNING INTERNATIONAL FISHERY AGREEMENTS

SEC. 401. Notwithstanding any other provision of law, the governing international fishery agreement entered into between the Government of the United States and the Government of Japan pursuant to the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et seq.) signed at Washington on September 10, 1982, is approved, and shall become effective on January 1, 1983.

SEC. 402. Notwithstanding any other provision of law, the governing international fishery agreement entered into between the Government of the United States and the Government of Spain pursuant to the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et seq.) signed on July 29, 1982, is approved.

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. Notwithstanding the failure of the vessels named below to meet the requirements contained in sections 111 and 112 of the Vessel Documentation Act, as amended (46 U.S.C. 65 (i) and (j)), and section 27 of the Merchant Marine Act, 1920, as amended (46 U.S.C. 883), on the date of this Act, the Secretary of the Department in which the Coast Guard is operating shall cause the vessel Centurion (officially numbered 236815), owned by Joseph B. Simoncelli of Scranton, Pennsylvania, and the vessel Ellen Ruth (officially numbered 282354) owned by Jefferson B. Burton, of Isle of Palms, South Carolina, to be documented as vessels of the United States upon compliance with all other requirements of law, with the privilege of engaging in the coastwise trade.

SEC. 502. The Merchant Marine Act, 1920 (41 Stat. 988), as amended (46 U.S.C. 861 et seq), is amended by adding at the end of section 27: "For the purposes of this section, after December 31, 1983, or after such time as an appropriate vessel has been constructed and documented as a vessel of the United States, the transportation of hazardous waste, as defined in section 1004(5) of the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6093(5)), from a point in the United States for the purpose of the incineration at sea of that waste shall be deemed to be transportation by water of merchandize between points in the United States: *Provided, however,* That the provisions of this sentence shall not apply to this transportation when performed by a foreign-flag ocean incineration vessel, owned by or under construction on May 1, 1982 for a corporation wholly owned by a citizen of the United States; the term citizen of the United States, as used in this proviso, means a corporation as defined in section 2(a) and 2(b) of the Shipping Act, 1916 (46 U.S.C. 802 (a) and (b)). The incineration equipment on these vessels shall meet all current United States Coast Guard and Environmental Protection Agency standards. These vessels shall, in addition to any other inspections by the flag state, be inspected by the United States Coast Guard, including drydock inspections and internal examinations of tanks and void spaces, as would be required of a vessel of the United States. Satisfactory inspection shall be certified in writing by the Secretary of Transportation. Such inspections may occur concurrently with any inspections required by the flag state or subsequent to but no more than one year after the initial issuance or the next scheduled issuance of the Safety of Life at Sea Safety Construction Certificate. In making such inspections, the Coast Guard shall refer to the conditions established by the initial flag state certification as the basis for evaluating the current condition of the hull and superstructure. The Coast Guard shall allow the substitution of an equivalent fit-

ting, material, appliance, apparatus, or equipment other than that required for vessels of the United States if the Coast Guard has been satisfied that fitting, material, appliance, apparatus, or equipment is at least as effective as that required for vessels of the United States."

SEC. 503(a) Section 20 of the Act of March 4, 1915 (38 Stat. 1185), as amended (46 U.S.C. 688) is amended.—

(1) by redesignating that section as section 20(a); and

(2) by adding at the end thereof the following new subsection:

"(b)(1) No action may be maintained under subsection (a) or under any other maritime law of the United States for maintenance and cure or for damages for the injury or death of a person who was not a citizen or permanent resident alien of the United States at the time of the incident giving rise to the action, if the incident occurred—

"(A) while that person was in the employ of an enterprise engaged in the exploration, development, or production of offshore mineral or energy resources—including but not limited to drilling, mapping, surveying, diving, pipelaying, maintaining, repairing, constructing, or transporting supplies, equipment or personnel, but not including transporting those resources by (a) vessel constructed or adapted primarly to carry oil in bulk in the cargo spaces; and

"(B) in the territorial waters or waters overlaying the continental shelf of a nation other than the United States, its terrotories, or possessions. As used in this paragraph, the term 'continental shelf' has the meaning stated in article I of the 1958 Convention on the Continental Shelf.

"(2) The provisions of paragraph (1) of this subsection shall not be applicable if the person bringing the action establishes that no remedy was available to that person:

"(A) under the laws of the nation asserting jurisdiction over the area in which the incident occurred; or

"(B) under the laws of the nation in which, at the time of the incident, the person for whose injury or death a remedy is sought maintained citizenship or residency.".

(b) The amendment made by this section does not apply to any action arising out of an incident that occurred before the date of enactment of this section.

SEC. 504. Section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883) is amended by inserting the following immediately before the period at the end thereof: *"Provided further,* that for the puposes of this section, supplies aboard, United States documented fish processing vessels, which are necessary and used for the processing or assembling of fishery products aboard such vessels, shall be considered ship's equipment and no merchandise".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

Mr. PRITCHARD. Mr. Speaker, reserving the right to object, I shall not object, but I would like to have the chairman of the subcommittee explain in detail this legislation, H.R. 3942.

Mr. BREAUX. Mr. Speaker, if the gentleman will yield, under his reservation of objection, I would be pleased to do that.

Mr. Speaker, the bill before us, H.R. 3942, amends the Commercial Fisheries Research and Development Act and was earlier passed by the House by unanimous voice vote on November 4, 1981. The Senate has further amended the bill to address a wide range of very important international fisheries and merchant marine related provisions.

These amendments, some of which were contained in other measures from our committee that have also already passed the House, have been worked out in close consultations with both the majority and minority members of our committee, and I commend the bill to my colleagues. I would like to take just a few moments, Mr. Speaker, and outline some of the more important provisions contained in the bill, as amended by the Senate.

The bill which we sent to the Senate in November of 1981 has become title I of the new package. As I indicated when the bill was first before us, the commercial fisheries program is a vital link between State and Federal efforts to erect practices for the effective utilization and conservation of our very important fishery resources. Essentially, the Senate preferred the existing formula for determining State grants over the new formula proposed by the House. The Senate has also added a 3-year authorization for this very important program.

Title II of the bill provides for continued cooperative scientific studies between the United States and Japan of seabirds and marine mammals, particularly Dall's porpoise, taken incidentally to the Japanese North Pacific high seas salmon fishery. Such incidental harvest is strictly limited under a permit issued by the Secretary of Commerce pursuant to the Marine Mammal Protection Act of 1972. As an amendment to the North Pacific Fisheries Act of 1954, title II of H.R. 3942 provides for the extension of the Japanese permit; requires, as a condition of the permit, the phasein of new gear and fishing techniques designed to substantially reduce such incidental harvest; and further provides for U.S. observers to monitor Japanese compliance with permit conditions. Clearly this bill not only provides for the protection and better understanding of marine mammals and seabirds but further contributes to the maintenance of positive and cooperative United States-Japanese fishery relations.

Mr. Speaker, title II of the bill also amends the Marine Mammal Protection Act of 1972 for the purpose of strengthening the process for appointing members to the Marine Mammal Commission. The Commission oversees virtually all activities that affect the protection, conservation, recovery, and care of marine mammals.

It has played a highly active and constructive role in marine mammal activities through administrative efforts, coordination of research, and financial assistance. Furthermore, it has worked closely with Federal agencies, States, and other parties in coordinating the implementation of the Marine Mammal Protection Act. In conformity with the existing responsibilties of the Congress for oversight of the Marine Mammal Protection Act, H.R. 3942 provides that all appointments to the Commission are subject to the consent of the Senate.

Title III of the bill provides for the implementation by the United States of the Convention for the Conservation of Salmon in the North Atlantic Ocean. This convention was signed in Reykjavik, Iceland, on March 2, 1982, for the purpose of conserving and managing species of Atlantic salmon. The United States is currently committed to the restoration of Atlantic salmon in New England rivers and streams, where it was once among the most valuable fishery resources. These salmon make extensive migrations during the course of their life history and in the past were intercepted in massive numbers by foreign fishermen off foreign coasts at substantial economic loss to the United States.

The Atlantic Salmon Convention is designed to protect U.S. Atlantic salmon from such interception and to assure that these fish are able to return to their native U.S. waters to spawn. H.R. 3942 provides for the United States to participate in the conservation and management of U.S. salmon throughout their range in the North Atlantic as members of the North Atlantic Salmon Conservation Organization along with Canada, Norway, Iceland, and the European community.

Mr. Speaker, title IV of the bill provides for congressional approval, as required under section 203 of the Fishery Conservation and Management Act, of the new Governing International Fishery Agreement (GIFA) between the United States and the Government of Japan signed at Washington on September 10, 1982. The new United States-Japan GIFA fully incorporates the provisions of "fish and chips" policy developed in the American Fisheries Promotion Act of 1980 under which the United States is able to derive the maximum economic benefit from those surplus fishery resources the U.S. fishing industry has not yet developed the capacity to harvest.

Pursuant to this policy, foreign nations are granted access to surplus fishery resources in U.S. waters in return for actions on their part which contribute to the development of the U.S. fishing industry. During the past year, Japanese fishing interests have participated in four separate joint ventures with U.S. fishermen in the Bering Sea, Gulf of Alaska, and Northwest Atlantic. Each of these oper-

ations provided U.S. fishermen with the opportunity to harvest substantial tonnages of underutilized species where they had no such opportunity before.

Japan is also the world leader in purchases of U.S. fishery product exports and as such has made a significant contribution to our efforts to relieve the current $3 billion U.S. trade deficit in fishery products. In consideration of the past performance of the Government of Japan, and in anticipation of future benefits to the U.S. fishing industry to be realized under the new GIFA, I urge the Members here today to support the approval of this agreement.

This title also approves the new GIFA between the Government of Spain and the United States, signed in Washington on August 13, 1982.

Mr. Speaker, title V of the bill contains several miscellaneous provisions. One amends section 27 of the Merchant Marine Act of 1920 for the purposes of clarifying U.S. documentation law which currently requires that merchandise transported by a vessel between two points in the United States be on a U.S. vessel whose document has a coastwise license endorsement. Unfortunately, under current documentation law, several major processing vessels which operate in the U.S. fisheries zone are unable to secure such a coastwise license endorsement for certain of their activities and are forced to operate under awkward restrictions.

This is due to a recent U.S. Customs Service ruling that supplies used by fishing vessels for processing fish on board, for example salt, plastic wrappers, and cardboard, qualify as merchandise is coastwise trade even though such supplies leave the vessels in an irreversibly altered state relative to when they were loaded. As a result, such processing vessels are unable to enter U.S. ports, take on fish processing supplies and return to the fishing grounds to process fish. I think the Members here today will agree that this is an unnecessary and unusual burden on an industry just barely getting off the ground in this country.

I urge my fellow Members to support H.R. 3942, which will redefine such supplies as "ships equipment" under the Merchant Marine Act of 1920.

A second provision is identical to a measure contained in the maritime authorization bill that passed the House unanimously on September 28, 1982. This provision requires all new vessels engaged in the ultrahazardous incineration of toxic wastes in U.S. waters to be built by U.S. citizens in U.S. shipyards according to U.S. standards; that they will be inspected by the Environmental Protection Agency and the U.S. Coast Guard according to U.S. standards; and that they will be operated by U.S. officers and crews according to U.S. standards. If adopted, this amendment will insure that the incineration of hazardous wastes in U.S. waters will be the safest in the world—safe for the public, safe for the environment, and safe for the personnel aboard these vessels.

The amendment also provides an exemption from the new Jones Act requirement for two existing incinerator vessels which operate under foreign flags. Lacking any current U.S. capacity to incinerate at sea, I am compelled to endorse this exemption. The 99.95-percent destruction efficiency of vessel incinerators provides an appealing alternative to landfill disposal techniques currently in use. I need not reiterate the human and environmental tragedies associated with the landfill approach.

I remain, however, deeply concerned with the standard of safety that will be achieved by the two foreign vessels. I firmly believe that such vessels should be subject to the same rigorous standards and inspections required of U.S. vessels of this type, including a certificate of inspection in addition to any foreign certificates in their possession. The amendment generously provides for the acceptance of equivalents which are as safe and effective as U.S. products and so it should be clear that the amendment is not designed to require extensive vessel reconstruction. However, I want to stress that the intent of this legislation is to require that the two foreign-flag vessels which are grandfathered under this amendment pursue and achieve full compliance with the new and additional Coast Guard requirements imposed under this amendment within 1 year of the date of enactment of this legislation. I further want to stress that the exemptions provided for the two existing grandfathered vessels should not be construed to be applicable in any way to replacement of such vessels.

Mr. Speaker, I want to make it clear that the future of at-sea incineration in this country depends on public confidence. I do not have to tell you that the public cares deeply about its own safety and about the quality of the environment. I can assure you that the Coast Guard's implementation of this amendment will be closely monitored. Furthermore, corrective legislation will be introduced promptly if it becomes apparent that the full intent of this law is not carried out.

Mr. Speaker, a third provision of title V contains the provisions of a House bill reported by our committee. The legislation provides clear choice of law rules for certain foreign maritime workers. I believe that the Members should be fully aware of what this provision does and does not do.

It does provide clear choice of law guidance to U.S. courts confronted with litigation arising from accidents in foreign offshore areas.

It does maintain the full range of U.S. Jones Act protections U.S. courts currently afford U.S. citizens employed on both traditional merchant marine vessels and special purpose vessels engaged in exploration, development, or production of offshore mineral and energy resources, no matter where they are located.

It does maintain the full range of U.S. Jones Act protections U.S. courts currently afford foreign seamen employed on traditional merchant marine vessels, no matter where they are located.

It does maintain the full range of U.S. Jones Act protections U.S. courts currently afford foreign citizens employed on special purpose vessels engaged in exploration, development, or production of mineral and energy resources on the U.S. Outer Continental Shelf.

It does not deny a remedy to foreign workers employed on special purpose vessels engaged in the exploration, development, or production of mineral or energy resources on the Outer Continental Shelves of foreign nations. It does, however, require such foreign citizens to first pursue their remedies in either the country off whose coast they are working or where they are a citizen. If no remedy exists in either forum, they may pursue Jones Act actions in U.S. courts.

It does not shield U.S. companies from litigation in the courts of the foreign country off whose coast they are operating. It is standard practice for all such companies to submit themselves to the legal procedures of such countries in return for the granted offshore concession.

Finally, it in no way indicates a congressional preference for the hiring of foreign over domestic workers in foreign offshore areas. It is designed to make American companies more competitive in the world market, and in that sense is compatible with recent congressional actions such as reform of the income tax levied on Americans working abroad.

Finally, title V of the bill simply provides congressional authorization for the documentation of two vessels, the *Ellen Ruth* and the *Centurion* as vessels of the United States. Pursuant to H.R. 3942 and upon compliance with appropriate U.S. Coast Guard requirements, these vessels will be granted the privilege of engaging in coastwise trade, so long as such vessels are owned by citizens of the United States. Mr. Speaker, I urge my colleagues to support this legislation.

□ 1520

Mr. McCLOSKEY. Mr. Speaker, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from California.

Mr. McCLOSKEY. I thank the gentleman for yielding and want to thank the gentleman from Louisiana (Mr. BREAUX) for the assurances that the incineration language is precisely as the House-Senate conference has now agreed.

If the gentleman will yield for one other question, I note that the Marine Mammal Protection Act amendments are part of this package. May I ask the gentleman what, if anything, is included in this bill with reference to actions against the Japanese should they not go along with the recent actions of the International Whaling Commission in providing for a commercial moratorium on the taking of whales?

Mr. BREAUX. Mr. Speaker, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Louisiana.

Mr. BREAUX. I would respond to the gentleman from California with regard to his inquiry that there is nothing in this legislation that takes any action against a nation, such as Japan, which objects or holds a reservation on the International Whaling Convention.

However, in discussing this with the other body and in committee with staff over here, the position of our State Department and this administration has been that they would like to take specific actions against any nation, specifically the Japanese, who do object, contrary to our official position that they would take action against that particular country in the manner in which they allocate their quotas for fishing within our U.S. zone.

That has been a pretty strong position of the administration and they have assured us that that would be their position.

Mr. McCLOSKEY. So they could invoke either the allocation of fishing or the Pell amendment language should the Japanese violate the legislation, and that is discretionary and reposes in the administration and is not affected by anything in this act?

Mr. BREAUX. The gentleman is absolutely correct. We do not restrict the ability of the United States to take any actions against any country by anything in this legislation at all.

Mr. McCLOSKEY. I would hope that the Japanese in due course will read this particular portion of the CONGRESSIONAL RECORD, and I thank the gentleman.

Mr. PRITCHARD. I thank the gentleman for his explanation.

Mr. Speaker, I support the passage of H.R. 3942 which authorizes the Commercial Fisheries Research and Development Act of 1964. This bill passed the House on November 4, 1981, by voice vote. It is a very simple bill which authorizes this 18-year-old program for fiscal year 1984 and fiscal year 1985 at level funds.

I am aware of no opposition to these changes and I would recommend it to my colleagues.

The Senate has added a number of other initiatives as riders to H.R. 3942. The chairman of the subcommittee has already explained the provisions of title II, the marine mammal protection program, which extend the Japanese permit to fish for salmon in our waters; title III, North Atlantic Salmon Treaty, which implements the treaty and is an administration initiative; and title IV, the Japanese and Spanish GIFA's (governing international fishing agreements). I would like to state to my colleagues that I am aware of no opposition to these initiatives.

Finally, Mr. Speaker, title V of the bill has several provisions of interest to the Members.

Section 501 of the bill provides for the documentation of the vessels *Centurion* and the *Ellen Ruth* for the coastwise trade.

Section 502 of the bill incorporates a provision from the maritime authorization bill which extends the coverage of the Merchant Marine Act of 1920 (Jones Act) to include the transportation of hazardous waste material from a point in the United States for the purpose of incineration-at-sea, effective December 31, 1983, or such time as an appropriate such vessel (U.S.-built, U.S.-flag) has been documented as a U.S. vessel. Since the full committee markup, by the House Committee on Merchant Marine and Fisheries, much work has been done to insure that the existing foreign-flag operator is grandfathered into the Jones Act trade and still complies with the relevant U.S. Coast Guard and EPA standards. The existing operator is Waste Management, Inc., of Chicago, Ill, which owns two incineration ships. In order to insure that all such vessels, regardless of flag, are maintained in a very high state of repair, and meet all U.S.-mandated standards for ocean incineration, the committee has included language which insists upon regular Coast Guard inspection.

Section 503 substantially incorporates the provisions of H.R. 4863. That bill would require a foreign seaman injured while engaged in offshore drilling activity in waters of a foreign country to first pursue whatever legal remedy is available to him through the country in whose jurisdiction he was injured or in the country in which he is a citizen or resident before he comes of the U.S. judicial system. If there is a remedy available to him through a foreign jurisdiction, then he is precluded from instituting an action in the U.S. courts. However, if the injured party can show that there is no remedy available to him in either the country where the accident occurred, or his place of citizenship or residence, then he would be permitted to pursue his legal action in U.S. courts.

In recent years there has been a substantial number of cases instituted in the United States involving injuries sustained in foreign waters which appear to have little or no relationship with the United States. However, some courts have held that mere U.S. corporate ownership of a drilling activity may be enough to permit a lawsuit by a foreign seaman to proceed. Consequently, there has been an uncertain and confusing case law development regarding the offshore industry. H.R. 4863 is an attempt to establish a uniform approach to considering suits brought by foreign workers injured over the Outer Continental Shelf of a foreign nation.

Let me stress that this section only addresses those injuries suffered above the Outer Continental Shelf of foreign nations and is not intended to alter rights presently enjoyed by workers injured while working over the Outer Continental Shelf of the United States.

This section will not result in an increase in cost to the Federal Government and should, in fact, result in some decrease in expenses related to our now overburdened court system. The administration does not object to passage of this section, and I urge my colleagues to vote for it.

Section 504 exempts from the provisions of the Jones Act supplies aboard U.S. documented fish processing vessels which are necessary and used for the processing or assembling of fishery products aboard such vessels. These supplies are necessary for the general operation of a fishing vessel and are not sold or transported as marketable products or merchandise as that term is used in the general commercial sense.

● Mr. OBERSTAR. Mr. Speaker, the State Department in a letter to Senator BOB PACKWOOD dated December 4, 1982, made a firm commitment on behalf of the administration to use allocations under the new Japanese GIFA to bring about the Japanese adherence to International Whaling Commission decisions.

I was the author, along with Senators PACKWOOD and Magnuson, of the amendment to Fisheries Conservation and Management Act, under which nations certified as fishing in a manner to diminish the effectiveness of an international agreement for the conservation of marine resources, lose from 50 to 100 percent of their fishing allocations within the U.S. fishery conservation zone.

Unfortunately, the Packwood-Magnuson-Oberstar amendment does not provide us with an immediate response to the filing of an objection by the Japanese Government to the 1982

89-059 O-86-17 (Pt. 22)

IWC decision to begin a 5-year cessation of commercial whaling in 1986. While Japan fishes extensively in our zone, catching over 1 million tons of fish last year, the language of the amendment would not permit sanctions until 1986 when whaling in violation of the IWC decision actually began.

The allocations process under FCMA gives us a tool which, if used in a vigorous and timely manner, will permit forceful reaction without delay to overtly anticonservation acts such as the filing of objections to IWC decisions.

I expect, on the basis of written and oral assurances, that the United States will use the allocations process vigorously, beginning this spring, to bring about a retraction of Japan's objection, and will also use the allocations to prevent the filing of an objection by the Republic of Korea, a whaling nation which also fishes in the U.S. 200-mile zone. I will do my best to see that these assurances are honored, and that the allocation policy is forcefully applied.

I have been a strong supporter over the years both of the U.S. fishing industry and of whale conservation. I believe the goals of protecting the remnant stocks of great whales remaining, and of conserving the fish stocks upon which our fishermen depend, are entirely complimentary.●

● Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of this legislation and ask permission to revise and extend my remarks.

Mr. Speaker, the Commerical Fisheries Research and Development Act is an important measure that deserves to be reauthorized. As the Representative of the State with one of the Nation's largest fishing fleets, I am personally familiar with the good work that is done under this legislation. Many State fish and game agencies, including the Alaska Department of Fish and Game, utilize the funds authorized by this act to perform valuable research work which contributes to the harvest of an important source of food for the world. This bill deserves support for that reason alone.

In addition, I want to draw particular attention to one amendment which was added to this bill in the Senate. That amendment would expedite the approval of a new fishing agreement between Japan and the United States. The old agreement expires at the end of this month and the new agreement must be in place at that time.

It is unusual for me to take the floor in support of an agreement which allows the continuation of foreign fishing in our 200-mile zone. However, we must recognize that the United States and especially the U.S. fishing industry, does not exist in isolation. Japan is the market for approximately 70 percent of the processed fish products produced in Alaska and the Pacific Northwest. Japan has also begun to increase its purchase of fish from U.S. fishermen through over-the-side joint ventures. Although this activity could be increased, a start has been made. If Japan is unable to seek fishing privileges in our 200-mile zone for those species that are not harvested by U.S. fishermen but which are used in Japan then this trading relationship will suffer. Thus, approval of the new fishing agreement will benefit the fishing industry.

The agreement itself does not guarantee that Japanese vessels will be allowed to harvest fish in our 200-mile zone. Fishing privileges are allocated to foreign nations on the basis of certain criteria contained in the law and which are included as an integral part of governing international fishery agreements as this one. Each nation's allocation is judged on that nation's adherence to those criteria, especially those concerning fisheries trade. To quote from House Report 96-1138, part 1, which accompanied the bill expanding the original list of criteria:

> This trade-allocation linkage reflects a recognition of the fact that section 201(e) of the FCMA encompasses fisheries trade policies of foreign nations in the criteria for allocation of surplus U.S. fish. This is consistent with the terms of the GIFA's. However, it is clear that the more vigorous use of this device to improve U.S. fish export opportunities is in the national interest . . . allocations will be reduced or terminated for those nations that are unwilling to assist and encourage U.S. exports.
>
> While cooperation of foreign States with the United States in FCMA enforcement and conservation is essential and in fisheries research is important, market access is the touchstone.

The House emphasized the importance of fisheries trade as the basis on which foreign fishing allocations would be made in House Report 97-438. To quote:

> It is in the subcommittee's express intent that the existence of foreign tariff and other trade barriers be matters considered by the Secretary in allocating surplus fish among those nations that have applied for foreign fishing permits. A central purpose of the MFCMA is to give U.S. fishermen priority access to the fishery resources within the U.S. 200-mile zone, thereby providing an economic foundation for the development of the fishing industry.

Finally, the Committee on Merchant Marine and Fisheries specifically discussed the use of nonfisheries criteria in House Report 97-549, which accompanied a bill amending the Magnuson Fishery Conservation and Management Act. Included in the bill was an amendment to section 201(e)(1)(H) of the MFCMA, the so-called basket clause. The report states:

> The committee does not want to emphasize, however, its desire that this provision (section 201(e)(1)(H)) not be given greater weight than the seven specifically enumerated in this paragraph. *Resort to this provision should never entail an examination of political or other foreign policy issues not related to fisheries . . .*" (Italics added).

Mr. Speaker, I think the intent of Congress is clear: We welcome a mutually beneficial relationship in the fisheries area with Japan, just as we do with other countries. However, allocations are privileges to be earned, not rights to be expected. Further, those privileges will be granted on the basis of cooperation in fisheries matters and nothing else. Indeed, it is the express intent of Congress, as illustrated in the statements quoted, that political and foreign policy matters which do not involve fisheries are not to be used as a basis for granting or withholding fisheries allocations in our 200-mile fishery conservations zone. The governing international fishery agreement that we are approving today, along with the GIFA's entered into with other countries, incorporates this intent of Congress.

Mr. Speaker, I urge acceptance of this bill and express my hope for its quick approval by the President.●

● Mr. DINGELL. Mr. Speaker, I rise in support of H.R. 3942.

Section 401 of title IV of H.R. 3942 stipulates that the International Fisheries Agreement entered into between the United States and Japan, which was signed on September 10, 1982, shall become effective on January 3, 1983.

On December 4, 1982, Acting Secretary of State Kenneth Dam sent a letter to Senator BOB PACKWOOD, of Oregon, which affirms that the administation will do everything in its power to bring about the Japanese compliance with the International Whaling Commission's recent decision for a commercial whaling moratorium, and that the administration will utilize fisheries allocations to help assure that result.

In 1970, when my Fisheries and Wildlife Subcommittee first addressed the issue of marine construction, the traditional American fisheries were in deep trouble. Immense foreign fishing fleets were operating off our coasts, fast depleting the stocks of fish upon which our fishermen had sustained themselves for over a century, using only traditional fishing methods that changed gradually from generation to generation. In the Northeast Atlantic, the Soviets alone, with their modern fishing technology, were taking twice as many fish off our own coast as were U.S. fishermen. Formerly abundant species, such as the Georges Bank haddock, were close to complete disappearance. Most others were declining, some critically.

In 1970, the great whales faced virtual extinction at the hands of the whaling industry. Having destroyed the major stocks of larger Baleen

whales in 1950's and 1960's, the whalers were in a cleanup phase, during which the most profitable course of action was to whale full tilt, reinvesting profits elsewhere until the remnants became commercially extinct. The response of our Government to such atrocities as the effective destruction of large humpback whale populations along the Alaskan coast was handwringing. So, too, was their reaction to severe depletion by Soviets and other foreign fishing fleets of haddock and flounder off both our Atlantic and Pacific coasts.

During the early 1970's, my committee, along with the Senate Commerce Committee, undertook a number of concrete measures to help protect marine mammals, fish, and other marine life. Some measures were completed back then; others were only begun during my tenure as subcommittee chairman on the Merchant Marine and Fisheries Committee.

Today, thanks to the passage and implementation of the FCMA our coastal fishing industry is rebounding, just as the fish stocks on which it depends are replenishing themselves. After a decade of severe overfishing by foreign fleets, they are rising again toward optimum abundance. At the same time, the International Whaling Commission, which was little more than a whaler's club in 1970, has been reformed, and in no small part through U.S. efforts. This year's vote to begin a cessation of commercial whaling in 1986 is evidence that the IWC is at last determined to control whalers, rather than to be contolled by them. It is evidenced that the IWC nations are now ready to allow the eventual restoration of whale populations.

Mr. Speaker, it is fully appropriate that the fisheries allocations process under the governing International Fisheries Agreement now being considered here, be used to promote our national policy of protecting the great whales, a policy that has been strongly supported by the last four administrations of this country. It is a important means of addressing whaling nations, most particularly Japan, in the one language they are sure to understand—economics. If we do not express ourselves in economic terms, we will not be heard. The whalers will do exactly as they did in the 1950's and 1960's. They will file objections to IWC decisions they find adverse and continue to deplete the few remaining whale stocks to a point of commercial extinction.

I am convinced, Mr. Speaker, that we are on the right track in using fisheries allocations to obtain compliance with the IWC, and that this can be done simultaneously with protecting our own fishermen and fisheries.●

● Mr. LANTOS. Mr. Speaker, each year, many Californians are specially reminded of the treasure we enjoy due to sound management of great whales as we personally watch the California gray whales migrate along our coast. Nearly 1 million people have taken commercial whale-watching trips from California ports since the industry began 14 years ago in about 120 boats. Many ships are idle fishing boats augmenting their income during winter months, and most are individually owned. California grosses about $2.2 million annually, and the west coast's overall annual income has been estimated at $4–$5 million. These figures do not include a tourism multiplier. Auxiliary sales include jewelry, art, clothing, books, stationery, and other retail merchandise. These creatures obviously inspire the greatest awe, and call to our noblest instincts their gentle grandeur.

Yet, this species was severely threatened in 1947. Their recovery is one of the greatest triumphs of rational management and international cooperation of our industrial age. Unfortunately other species are now similarly threatened with extinction. The scientists who called attention to the California gray whales' plight in time to rescue it now urgently call for a worldwide cessation of commercial whaling. This summer, at the annual meeting in Brighton, England, the International Whaling Commission approved a cessation of commercial whaling for 5 years. This vote, made by a three-fourths majority, is the strongest measure the IWC can take to communicate to all the countries of the world that now is their time to act on conservation of these overexploited species.

This International Whaling Commission decision is in agreement with U.S. policy calling for a halt to commercial whaling. Some countries, however, namely, Japan, Norway, U.S.S.R., and Peru, have felt that the cessation decision should not apply to their industries. They have exempted themselves by filing objections to the resolution. This is unconscionable.

Therefore, in continuation of the U.S. tradition of leadership in marine mammal protection, I am very happy to support the new Government International Fishing Agreement with Japan, but only on the conditions agreed to by the State Department in Acting Secretary Kenneth Dam's letter of December 4 to Senator PACKWOOD and PERCY. This letter indicates that the U.S. fishing allocation process under the GIFA will directly reflect Japanese action on withdrawal of their objection to the IWC cessation of commercial whaling. No country or single country's interest must be allowed to obliterate this priceless resource of all the people of the world. I stand firmly with my colleague, Mr. BONKER, and my other colleagues in both House and Senate in this conditional approval of the GIFA with Japan.●

Mr. PRITCHARD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. O'BRIEN. Mr. Speaker, I rise for an item of personal explanation.

Somewhat like the distinguished Member from New York (Mr. STRATTON) in the heat of the battle yesterday afternoon on the State, Justice, Commerce, judiciary appropriation, I got so tied up that I failed to vote on final passage. So with the Chair's permission I would like on H.R. 6957, rollcall 431, to have the record indicate that had I been paying attention I would have voted in the affirmative.

U.S. FOREIGN POLICY IN CENTRAL AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BONIOR) is recognized for 60 minutes.

Mr. BONIOR of Michigan. Mr. Speaker, I rise today to speak on a subject that has concerned me deeply for several years—U.S. policy toward Central America. I do so in a special order because I believe it is important for Members of this body, from time to time, to step away from the pressures of daily debate, and reflect more broadly on the issues before us. No issue requires that kind of sober reflection more urgently than this crisis in our foreign policy.

I rise as a critic of current U.S. policy. While proclaiming a commitment to peace and democracy, the administration continues to pursue a policy that, by its very nature, is incapable of securing either of these goals. For the administration's policy is essentially a military policy based on a narrow, ideological conception of the region's problems and prospects. It is a policy that refuses to acknowledge the mistakes of the past, and is thus left without a realistic vision of the future.

While calling for demilitarization and an end to aggression in Central America, the administration continues to place arms at the disposal of some of the most ruthless forces in the region. The United States has provided hundreds of millions of dollars in military aid to El Salvador, to a government which, even our own Ambassador acknowledges, continues flagrant violations of its own citizens' human rights.

Today's AP will provide a graphic, and all too familiar example.

LA FLORIDA, EL SALVADOR.—Maria Ruiz says the killers came at midnight, firing machine guns and swinging machetes as she and her children lay quivering in their clay hovel.

The gang dragged seven screaming peasants from neighboring huts, stabbed them in the chest and face and hacked them to death in an orgy of blood before departing, Ms. Ruiz and about 12 other witnesses told an AP reporter.

"I heard the screams and the shots," she said. "The next day they found their bodies all cut up."

The heavily armed gang had stormed into the 600-acre cooperative farm in La Florida where Ms. Ruiz and about 300 other peasants lived. The date was Nov. 20.

Nobody knows who did it and why, but the atrocity bore the markings of right-wing paramilitary gangs, which terrorize civilians to keep them from associating with leftist rebels.

After the murders, work stopped at La Florida in the foothills of Santa Ana province 52 miles northwest of San Salvador. Frightened villagers began to flee.

Ms. Ruiz said she gathered her 10 children and went to live with relatives 12 miles away in Santa Ana City, where she was interviewed.

The victims, between 29 and 59 years old, appeared to have been felled by a machete whack on the nape of the neck, the La Florida Villagers said. The killers slit the throats of three victims, repeatedly stabbed them, sliced off the nose of another victim and sexually mutilated him.

Stunned neighbors buried the bodies a few days latter in makeshift graves by the roadside where the victims died. Caked pools of blood marked the killing ground.

An officer at the Santa Ana Army garrison denied the Army was involved in the killing. Police authorities said they had no information and refused to elaborate.

U.S. military aid to Honduras has multiplied in the last year, and threatens to destabilize a country where newly formed democratic institutions are struggling to maintain autonomy from the traditionally overpowering military. Costa Rica, a democratic nation that has long foresworn the desire for a large standing army, has been pressured by the United States to strengthen its arsenal. Now, President Reagan raises the specter of military aid to Guatemala, a country whose brutal military regimes have earned it the condemnation of the world.

The folly of this policy can be illustrated by examining some of the events of the past year.

Evidence has been accumulating for nearly a year, showing that the United States is involved in an escalating, covert campaign, a "secret war" aimed at Nicaragua. Earlier this year, the Washington Post reported that President Reagan authorized $19 million for the CIA to advise, train, and arm paramilitary forces along the Honduran/Nicaraguan border.

At a minimum, and without going beyond what the administration has conceded, the purpose of this operation was to stop the flow of arms across that border, and to engage in "hit and run" raids, to sabotage, to harass the Nicaraguan Government.

There is reason to fear that the operation has gone far beyond that. It has brought the United States into a working arrangement with former members of President Somoza's national guard, who are committed to the violent overthrow of the Nicaraguan Government. This is a sordid alliance, with people who promise: "a massacre in Nicaragua . . ." and who boast that when they return to power "there will be bodies from the border to Managua."

The uprooted, the wounded, and the dead in Nicaragua bear painful witness to the thrust of this campaign. Scores of Nicaraguans have been killed, and others have fled the region as guerrilla bands sweep down on isolated villages. Although still abetted by the United States, the actions of these paramilitary forces have gained momentum beyond U.S. control.

Let us be clear. U.S. support for covert activities against Nicaragua endangers not just the security of Nicaragua, but of the United States. It poses issues with respect to the United States actual interest in Central America and with respect to the process of forming U.S. foreign policy.

To oppose U.S. support for these covert activities is not to proclaim that the Nicaraguan Government is without problems, and there clearly is a need for that Government to encourage economic and political pluralism. It is merely to proclaim that U.S. policy in the region should not be formed through the implications of covert activities. These activities commit us to a specific foreign policy that has never been openly defended and supported, and whose outcome cannot be guided by our own democractic institutions

A few days ago, Congress voiced vigorous dissent from this policy by voting unanimously to prohibit funding to any paramilitary group for the purpose of overthrowing the Government of Nicaragua. I would like to express my admiration to Mr. HARKIN and others for their leadership on this issue, and to Mr. BOLAND, chairman of the Select Committee on Intelligence, for his clear expressions of concern and his dedication to the vigorous oversight of the consequences, both intended and unintended, of U.S. covert operations.

This policy is not just an isolated case, rather it displays, in microcosm, the fundamental flaws of U.S. policy throughout the region. The United States may have started with a limited goal—to end the alleged flow of Cuban-supplied arms across the Honduran/Nicaraguan border. But to do this required an alliance with groups like the Somoscitas who have an agenda of their own. We have, thus, become accomplices to acts of aggression against Nicaragua, and allies of groups committed to unmitigated cruelties. This pattern has been repeated again and again as, in the guise of fighting a Communist threat, the United States stakes its prestige on repressive military regimes whose actions we cannot endorse, control, or even moderate.

Instead of heeding the lessons of past and present errors in U.S. policy, the administration seems determined to repeat them. This is nowhere more evident than in President Reagan's recent embrace of Guatemala's Gen. Rios Montt. If the administration resumes military aid to Guatemala, it will not only be flaunting an explicit agreement to obtain congressional approval beforehand, it will be ignoring the overwhelming evidence concerning the atrocities committed by the Guatemalan Government.

In Guatemala's countryside, Rios Montt has adopted a sophisticated and ruthless counterinsurgency campaign, including a scorched-earth policy that destroys the base of rural livelihood, and forces the peasants to flee the country or to camps under military control. Amnesty International estimates that 2,600 civilians have died in massacres since Rios Montt came to power. Americas Watch has charged that "by adopting a policy of total war, and by abandoning the rule of law, the Rios Montt government has become responsible for the consistent pattern of gross violations of internationally recognized human rights in Guatemala."

On the mere promise that Rios Montt will announce electoral laws, President Reagan extols the Guatemalan leader's commitment to democracy. Yet, since July 1, Guatemala has been under an officially declared "state of seige" which prohibits political and union activity, requires private gatherings to be approved by the defense minister, allows military authorities to detain anyone suspected of "disturbing public order," permits home searches without a warrant, places severe restrictions on the press, and creates special military tribunals to try those accused of violating the state of siege.

Neither the promise of elections, nor elections themselves will guarantee peace or even democracy to Guatemala. Guatemala has had elections before. For 30 years, these have been controlled by the military and ridden with fraud. In the past decade, political opponents of the left and center have been mercilessly eliminated. To talk of including a broad spectrum of participants in the electoral process is to ignore Guatemala's past and present conditions. Have we forgotten that, last March, Rios Montt came to power by deposing a military leader

chosen through just such an electoral process? Have we forgotten that only a year ago, the State Department assured us these elections would be a democratic solution for Guatemala? If the United States provides military aid to Rios Montt now, it will only feed the climate of violence and intimidation which poisons the prospects for democracy in Guatemala.

Again, the Guatemalan case is not an isolated one, but has broader implications that go to the heart of our understanding of democracy. Democracy cannot be reduced to a simple formula or to the simple ritual of elections. It must rise from the hearts, minds, and experience of the people themselves. It cannot be imposed by fiat from above. We, in the United States, must never fail to recall that our own route to democracy was not without struggle, or bloodshed, and that the building of our own democratic institutions was not accomplished in a year or even a decade.

While expressing satisfaction with a mere skeleton of democratic procedures, the administration has wasted opportunities for a genuine political solution to the conflicts of the region, and has discarded chances to play a role in a concrete peace process.

Last spring, when Mexican President Lopez Portillo offered to serve as an intermediary among the conflicting factions throughout the region, the Reagan administration let the offer die after a few meetings between our Secretary of State and the Mexican Foreign Minister. This fall, when the Presidents of Mexico and Venezuela made a unique joint appeal to President Reagan and the heads of state of Honduras and Nicaragua, the United States showed only rhetorical interest. Instead, the administration quickly used a meeting of Central American Governments—which did not include Nicaragua, Mexico, or Venezuela—to endorse its own conditions for dialog, and declared this to be the only future forum for considering peace proposals.

I have long believed that regional cooperation provides the key to resolving the problems of Central America. Countries such as Mexico and Venezuela are far better equipped than the United States to understand the particularities of each country, and to bring together the forces necessary to secure a lasting peace.

The events of the last year have underscored this clearly. And the administration has yet to provide a convincing rationale for ignoring and undercutting these promising peace initiatives.

Recently there have been some auspicious signs from the administration. Much was gained from the President's trip to Latin America—his new respect for the individuality of each nation, and his emphasis on the overriding importance of economic development. I hope these themes will guide U.S. policy in the future.

Like many of my colleagues, I have the deepest respect for George Shultz, whose habits of careful decisionmaking and consensus planning promise great change in our attitudes to Central America. Secretary Shultz needs and deserves time, time to slowly move U.S. policy from the ideological rut plowed by Secretary Haig, time to implement changes of policy in a way that does not produce abrupt and unsettling tilts instead of secure progress.

Nonetheless, the administration continues to display a peculiarly one-sided ability to see and support progress. While mere promises of future elections make the Guatemalan regime a friend of democracy, fully implemented land reform programs in Nicaragua evidently mean nothing. While meagerly substantiated accusations of human rights abuses in Nicaragua make the Sandinista's the region's leading proponent of genocide, the continued documented massacres in Guatemala are chalked up, apparently, to reasons of state.

Let us be honest and straightforward. Few regimes in Central America are without their problems. The ability of the United States to perceive subtle distinctions and support shades of progress is the key to a mature foreign policy. But these subtleties must be carefully defined, carefully supported, and applied uniformerly or U.S. policy becomes blind support for any regime cloaked in anti-communism.

The United States must be able to see and support progress on the left as well as the right, and, it has to be said, on the left perhaps more than the right. There is no overlooking the history of the region, and given that history, there is no mature foreign policy that does not recognize and address the revolutionary potential of the region.

The Mexicans are want to say that each Central American country must face its own revolution, and while I might dissent from their determinism, their point is valid. The history of colonialism, repression, and poverty in region that will find expression in radical politics.

Democracy is the key to the region's future, but the assertion of that ideal has to be wedded to a real program for helping each country on its road to democracy. The United States has to find a way to remain close to and to influence countries as they move through rapid programs of social progress. This is the fundamental foreign policy task for the United States in Central America.

FAIRNESS AND COMMITTEE RATIOS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 60 minutes.

Mr. DANNEMEYER. Mr. Speaker, as I take the floor to deliver this special order this evening, I am reminded of several things. One is the distinguished history of this great institution. For more reasons than I have time to enumerate, our system of checks and balances has served us remarkably well. But it is not without its flaws. The grand design is always subject to interpretation and there is always room for improvement. Which brings me to my second recollection which is that there are 55 parliamentary democracies in the world. In 54 of them, the constituent assembly is organized into committees which, in turn, reflect the numerical strength of each political party on a proportional basis. That is to say the voting strength of each party in committee is proportionally the same as that party's voting strength in the constituent assembly as a whole. In only one parliamentary democracy—the United States—is this not the case. Strange as it may seem to some, the U.S. House of Representatives—this very institution—does not hold true to the concept of proportional representation on its committees, the concept of "one man-one vote" notwithstanding.

For the benefit of my colleagues, and the edification of those colleagues-to-be who will be part of this institution come January, let me provide a little background. Ever since the end of World War I, the rule of thumb in the House of Representatives has been that committee ratios shall be proportional to party membership in the entire House of Representatives with the exception of the exclusive committees where it was argued that leadership control considerations required a 60–40 majority in favor of the majority party. The only exceptions to this rule of thumb, prior to 1975 at least, were the Rules Committee, where a 2-to-1 majority was granted the majority party, and several instances when Republican membership in the whole House fell below one-third. Inasmuch as the "other body" sees no need for an additional working margin for the majority on its major committees, and the courts had ruled back in the 1960's that one man one vote was the law of the land, one would think that, if there were to be a change in tradition, the change that would have been made would have been in the direction of eliminating the exceptions rather than building upon them. However, in 1971 I believe, the Democratic Caucus voted to make

this "extra working margin" on exclusive committees 2 to 1 in some instances, most notably Ways and Means. At first, this change had no practical effect, because Republicans had only one-third of the seats in the House in the 94th and 95th Congresses, and people tended to forget about it. But, starting in the 96th Congress when GOP representation in the House rose to 36.3 percent, the injustice perpetrated by this change became more evident and people's memories were jogged. Or their sense of fairness was awakened. Or both. Republicans found themselves with a total of five less seats on the Rules, Budget, Appropriations, and Ways and Means Committees than a truly proportional allocation would have provided and eight less seats than they would have had under the "40 percent on exclusive committees (except Rules)" system.

But that was not all that Republicans found themselves short when it came to committee assignments. The majority party also saw fit to discount fractional entitlements when it came to calculating minority representation on subcommittees as well as full committees. The cumulative effect of that subtle move, coupled with the aforementioned "shorting" on the exclusive committees, was that Republicans had 15 less full committee and 58 less subcommittee seats in the 96th Congress than a truly proportional system of representation on committees would have dictated. And I might add that a letter of protest, signed by all the Republican Members of the 96th Congress, did not result in any relief from this discriminatory situation.

With the election of 1980, in which Republican congressional candidates actually got a larger percentage of the total congressional vote than did Democratic candidates (by a margin of 49.84 percent to 49.15 percent), some of us were willing to believe that, at the very least, this institution might return to the committee allocation system of the 1921-71 era. After all, Republicans had garnered 44.14 percent of the seats in the House of Representatives and a "40 percent of the exclusive committees except Rules" allocation would not unduly benefit them. However, when the dust had settled from the committee assignment process and an effort to add two more Republicans to the Ways and Means Committee had been defeated on a party line vote, Republicans found themselves with 30 less full committee and 37 less subcommittee slots in the 97th Congress than a truly proportional system would have indicated. Six of these slots were on the Ways and Means Committee alone and, if that were not enough, another new twist in the committee ratio determination process surfaced. Unlike in the 96th Congress, the majority party began treating the territorial representatives on the Interior Committee as if they did not count toward the correct committee ratio even though they do cast votes in committee proceedings.

Given the basic strength of our representational system of government, some may ask "what difference does a little bit of shorting make?" And that is a good question, because it is not just a simple shorting we are talking about, it is compound shorting and, as my colleagues know only too well, one or two votes one way or another in committee can make all the difference between passage, amendment or defeat of a bill in committee. In fact, on the Ways and Means Committee there were at least eight different instances in 1981 where the addition of six more Republicans would have reversed the outcome of a given committee vote. And who can tell how many times a Member or Members voted one way because they thought a bill would lose when they would have voted the other way if they thought it could pass.

If one conceded, as we hope everyone will, that systematic "shorting" of the minority party is inconsistent with fair play and the concept of "one man one vote," then the next question is, what can be done about it? The House Republican Conference has already gone on record, with a resolution, endorsing the principle of truly proportional representation on all committees of the House and we hope that the Democratic Caucus will see fit to take the same step. If such a consensus of opinion were to be reached, Republicans would get 38.16 percent of all the seats on all the standing committees and subcommittees of the House. Considering the fact that Republican candidates for Congress won approximately 43.8 percent of the total congressional vote in the country in the 1982 elections, this is hardly an unreasonable proposition. In fact, Republicans would get less representation on exclusive committees if this formula were adopted than if GOP Members insisted on a return to the pre-1971 tradition.

It is my sincere hope, of course, that the majority party will see the wisdom of truly proportional representation on all House committees and will put that concept into effect in the 98th Congress. But, if that should turn out not to be the case, at least this Republican is prepared to keep on fighting for fairer representation within Congress. As a number of my colleagues will recall, I am 1 of 14 Republican Members who joined in a lawsuit against the Democratic Caucus, the Democratic Steering and Policy Committee and the leaderhsip of the majority party in the House challenging the existing ratios and demanding redress. After our written protest got no meaningful response and after our attempt to redress the current imbalance on the Ways and Means Committee failed, those of us on the suit felt there was no other recourse but to go to court, however reluctantly, because all other avenues of appeal had failed. So we filed suit in the summer of 1981 in the U.S. District Court for the District of Columbia. In October of that year, that court ruled that we did indeed have standing—that this was a matter the court should look into—but that the separation of powers and the speech and debate clauses of the Constitution militated against our arguments. However, if the separation of powers doctrine gives the majority party the right to set committee ratios irrespective of "one man, one vote" considerations or any other standard of equity, then what is to prevent the majority party from limiting the minority to 25 percent membership, or 10 percent membership, on committees whenever it suits their political fancy? Accordingly, the plaintiffs appealed the decision of the district court and the case went to the U.S. court of appeals. That court heard oral arguments back last March but has still to render a decision. One can only speculate as to what that decision might be, but whatever it is, there is a likelihood of further appeal. The matter has too much consequence to simply fade away—especially if the shorting of the minority persists in the 98th Congress.

Mr. Speaker, it is my sincere hope that the shorting of the minority party on committees will not recur. Not only would truly proportional representation on committees bring us into line with other representative governments without compromising the strengths of our system, but it will give the American people a greater sense that our system really represents them. There are enough "outside" checks and balances on the legislative branch of government—the representative branch if you will—of an institutional nature to eliminate any need for "inside" checks of the politically inspired variety. Let us let the representative branch be properly representative.

□ 1550

THE 34TH ANNIVERSARY OF THE PASSAGE OF UNIVERSAL DECLARATION OF HUMAN RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. LELAND) is recognized for 60 minutes.

Mr. LELAND. Mr. Speaker, 34 years ago today the international community, acting through its representative body, the United Nations, passed a document of faith, a statement of principles, an instrument for the pres-

ervation of humankind. On December 10, 1948, the United Nations approved the Universal Declaration of Human Rights.

Across America today the passage of that declaration is being commemorated and honored. In my district today, in my home city of Houston, Tex., an annual celebration of the declaration is taking place at Rothko Chapel, under the leadership of Mrs. Dominique de Menil, a woman who has devoted her life to human rights. Today, the Menil Foundation she established with her late husband Jean is sponsoring a commemoration of the signing of this essential statement of international commitment. I want to take this opportunity, Mr. Speaker, to mark this important anniversary here in this Chamber, where we have, from time to time, an opportunity to take action that reinforces the commitment the peoples of the world made to themselves and their posterity 34 years ago.

If we look carefully around us on this December day in 1982—if we look at the world in which we live—I believe we would be well served to take this opportunity to recommit ourselves to the principles of the Universal Declaration of Human Rights. The advent of new technology, of instantaneous worldwide communication has made our world smaller. But the question must be asked, on this day of singular importance to the cause of human rights, is our world a better place, for all of its people, than it was 34 years ago?

It seems to me, Mr. Speaker, that the most appropriate point at which to begin is with the declaration itself. I will not read the entire document, although I commend it to you. But there are elements of the declaration that I believe we need to hear again.

The preamble of the Universal Declaration of Human Rights centers on four essential facts. They remain eternally true.

The first is that recognition of the inherent dignity and of the equal and inalienable rights of all members of the human rights is the foundation of freedom, justice, and peace in the world. That is a concept with which we should be deeply familiar. Our own Declaration of Independence is built upon it.

The preamble to the declaration says, second, that disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people.

Third, it says that it is essential, if man it not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law, and that, fourth, it is essential to promote the development of friendly relations between nations.

Those four points—equal and inalienable rights of all members of the human family, the barbarism that follows disregard and contempt for those rights, the need to protect human rights by rule of law and the need to promote world peace—are the essence of the declaration. They also provide us guidance for the future that begins today.

Within this framework, the declaration sets out the standards by which we may judge our claim to be a civilized world:

Everyone is entitled to fundamental human rights and freedoms without distinction of any kind, such as race or color, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.

Everyone has the right to life, liberty, and the security of person.

No one shall be held in slavery or servitude.

No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment.

Everyone has the right to recognition everywhere as a person before the law.

All are equal before the law and are entitled without discrimination to equal protection of the law.

Everyone has the right to an effective remedy, under law, for acts violating individual human rights.

No one shall be subjected to arbitrary arrest, detention or exile.

Everyone is entitled in full equality to a fair and public hearing by an independent and impartial tribunal, in the determination of his other rights and obligations and of any criminal charge against him.

The individual has the right to be presumed innocent until proven guilty.

No one shall be subjected to arbitrary interference with their privacy, family, home or correspondence, nor to attacks upon their honor and reputation. Everyone has the right to the protection of the law against such interference or attacks.

Everyone has the right to freedom of movement and residence within their country and the right to leave any country, including their own, and return to their country.

Everyone has the right to seek and enjoy in other countries asylum from persecution.

Everyone has the right to a nationality.

Men and women of full age, without any limitation due to race, nationality or religion, have thlright to marry and to found a family.

Everyone has the right to own property alone as well as in association with others.

Everyone has the right to freedom of thought, conscience and religion and to freedom of opinion and expression.

Everyone has the right to freedom of peaceful assembly and association.

Everyone has the right to work, to free choice of employment and the right to equal pay for equal work.

Everyone has the right to a standard of living adequate for the health and well-being of himself and his family.

Motherhood and childhood are entitled to special care and assistance.

Everyone has the right to education and to freely participate in the cultural life of the society.

Finally, in the exercise of these rights and freedoms, everyone shall be subject only to such limitations as are determined by law solely for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and the general welfare in a democratic society.

If you are like me, the recitation of these fundamental standards of human rights strike you as emminently proper and logical. It is hard to imagine that they are not universally upheld, because they reach out to the desires that reside in the hearts of men and women in every nation and in every culture in the world.

Our sense of our own humanity and identity, and the freedoms that humanity hungers for, make these fundamental human rights the goal of every citizen. And yet, no matter how logical they are, no matter that there are none in this Chamber who would disagree with a single one of them, they represent a list of goals for a civilized society that we have fallen far short of.

In the case of some of them, we fall far short in this country. Equal pay for equal work is still being struggled for. The courts have yet to publicly recognize that education is a fundamental right guaranteed by our Constitution. The right to a standard of living sufficient for health and well-being is a right that many cannot afford. Equal justice under the law continues to depend, in some places in this country, on who you are and who you know and what you can pay.

I think a recognition of our own shortcomings in insuring basic human rights to all of our citizens is appropriate on this anniversary of the Universal Declaration of Human Rights. But that recognition is also sobering and reinforcing, when you compare the status of human rights in this country to much of the rest of the world.

We can be justly proud that this country is as free as they come. We take for granted in America freedoms that are only dreams to oppressed peoples around the world. We can be

proud of that, but we must also recommit ourselves to human rights for all the world.

Repression of liberty and expression and association is rampant. Torture is commonplace in some countries. Death has become a constant companion to millions—death at the hands of totalitarians, and disease and famine.

Few of us in this country can imagine the terror and indignity of living in a country where every citizen is considered a potential subverter, where the horror of having a family member or friend simply disappear forever is a frequent nightmare. How can we really relate to a society where individual expression is relegated to hidden gatherings or is simply unknown?

Look around the world. The disappearances in El Salvador are frequently on the front pages of our newspapers. In Pakistan, those who steal to eat are subject to amputation of hands. Innocent women and children are brutally and openly murdered by South African commandoes in Lesotho in response to what South Africa says was a guerrilla plot to overthrow its government. But no one, least of all the South African Government, believes such an overthrow is even remotely possible.

In Poland, the freedom of association and organization that workers in America now take for granted, is forbidden to Polish workers. The rule of law in Poland is a rule of arms.

In Russia and Zaire, in Haiti and Chile, in El Salvador and Guatemala, in South Africa and Iran, human rights and freedoms which we hold dear and which we take for granted, are unknown, or at best, only dreamed of.

It is sad enough that oppression prevails in so many places. It is tragic that in some of those places, it prevails with our help. Time does not permit a recitation of the instances where misguided foreign policy makes us party to, instead of an opponent of, the deprivation of human rights.

It is more appropriate, it seems to me, to seize this opportunity to recommit ourselves to universal human rights as a fundamental goal of our foreign policy and of every action we take in this Chamber which affects our citizens and the people of the world.

I believe that the degree to which we are safe and independent and free, as a people, is related to the degree of our commitment to the rights of others to be safe and independent and free.

Consider the words of Abraham Lincoln, spoken more than a century ago:

What constitutes the bulwark of our own liberty and independence? It is not our frowning battlements, our bristling sea coasts, our army and our navy. These are not our reliance against tyranny. All of those may be turned against us without making us weaker for the struggle. Our reliance is in the love of liberty which God has planted in us. Our defense is in the spirit which prized liberty as the heritage of *all* men, in all lands everywhere.

Let us today recommit ourselves, and our Nation, to work for a world in which fundamental human rights are recognized as a gift of God, not to be tampered with or taken away; where peace and safety and well-being are the lot of all women and men, in all nations, not because their governments make it so, but because it is an essential of human life.

I thank the United Nations for its Declaration of Universal Human Rights. I thank you my colleagues for your attention!

□ 1610

GENERAL LEAVE

Mr. LELAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. LELAND. I will be glad to yield to the gentleman from Michigan.

Mr. WOLPE. Mr. Speaker, I thank the gentleman for yielding. I want to commend him on taking this special order to mark the 34th anniversary of the signing of the Universal Declaration of Human Rights by the U.N. General Assembly.

Mr. Speaker, today we mark the 34th anniversary of the signing of the Universal Declaration of Human Rights by the U.N. General Assembly. The Universal Declaration is one of the landmark documents of our time. For over three decades, it has been a beacon of hope for the world's poor, tortured, and oppressed. The Universal Declaration puts forth a vision of a world in which governments recognize and respect the inherent dignity and inalienable human rights of all men. This vision is more than an idealistic, utopian plan for universal freedom, justice, and peace. The Universal Declaration embodies the hope for a world order in which respect for human rights is a basic, indispensable component of international stability. The Universal Declaration recognizes that order based on force and repression is temporary and illusory. Only by guaranteeing basic human rights can the nations of the world hope to establish an international framework in which the peace we all desire can be achieved.

The anniversary of the Universal Declaration of Human Rights also provides us the opportunity to pause and reflect on our own national commitment to human rights. Can we say today that our Government has made human rights a key element of our foreign policy? Have our efforts to promote human rights progressed or receded during the past year? Has our foreign policy shown as much compassion for the oppressed as it has concern for those regimes which are important for our security but where corruption and oppression are hallmarks of domestic policy?

I believe strongly that promotion of human rights is not simply a nice thing to do in a foreign policy when it does not get in the way of what are often termed "overriding security concerns." Human rights are an important national interest of our country. Foreign policies which ignore basic human freedoms will continue to be self-defeating. They make no contribution to our long-term security interests, whether in Central America, southern Africa, the Far East, or Eastern Europe. When we turn a deaf ear to movements of social protest in countries where we have major security or economic interests, when we come to be viewed by native populations as the prop for repressive regimes, we not only violate our own national principles but we do major violence to our own national self-interest.

This anniversary also gives us time to reflect on the work of the human rights organizations and advocates throughout the world, who have labored to promote human freedom often under the most oppressive and dangerous conditions. The Mothers and Grandmothers of the Plaza de Mayo in Argentina; the Catholic Vicariate and Human Rights Commission in Chile; Solidarity in Poland; Charter 77 in Czechoslovakia; the various Helsinki Watch groups in Eastern Europe; the Catholic Church in El Salvador and the Philippines; Beyers Naude, Winnie Mandella and Bishop Desmond Tutu in South Africa; Andrei Sakharov, Yuri Orlov, and Anatoly Scharansky in the Soviet Union—the list could go on and on. These groups and individuals remain, for all of us who care deeply about human rights, courageous proponents of human dignity and human freedom in what sometimes seem the most hopeless situations. They remind us that the principles so eloquently enshrined in the Universal Declaration of Human Rights are alive and cannot be crushed. We owe it to these advocates of human freedom to rededicate ourselves today to a strong and forceful human rights emphasis in our foreign policy.

Mr. LELAND. Mr. Speaker, I want to thank the gentleman for participating with me, and also commend the gentleman for his incredible work, his industrious work, as chairman of the Subcommittee on Africa of the Foreign Affairs Committee. I know he has

used as a standard for his deliberations as chairman of that subcommittee the standard of human rights, universal human rights for all.

I commend him for that.

Mr. WOLPE. I thank the gentleman.

● Mr. ZABLOCKI. Mr. Speaker, today, December 10, marks the 34th anniversary of the adoption of the Universal Declaration of Human Rights by the U.N. General Assembly. The vote on adoption of this historic instrument was 48 (Western and Latin states) to nothing, with 8 abstentions (Soviet bloc, South Africa, and Saudi Arabia). A great American woman, Eleanor Roosevelt, then the U.S. Representative on the third committee of the U.N. General Assembly, was chiefly responsible for initiating and negotiating this Declaration of the United States.

The Declaration has had an enormous impact on governments and peoples everywhere. First, it gave substance to the U.N. Charter articles calling for promotion of human rights and fundamental freedoms and reaffirmed that these rights and freedoms were the legitimate concern of the international community of states. Influenced by British, French, and American traditions, the human rights and freedoms enumerated in the Declaration established a universal standard of common decency to which all governments eventually must aspire in treating their citizens. The theory and truth was, and is, that enjoyment of such rights and freedoms will promote socially and politically healthy societies and prevent another holocaust.

Second, the Declaration provided an important basis for the development of international human rights law: The International Covenants on Civil and Political Rights and on Economic and Social Rights; the Conventions on the Elimination of Discrimination Based on Race and of Discrimination Against Women; the Refugee Convention, as well as the Declarations prohibiting religious intolerance and prohibiting torture. Each of these instruments elaborates specific articles found in the Universal Declaration and obliges governments to adopt measures giving effect to the particular rights sanctioned by the conventions. Altogether, the Universal Declaration and the body of international human rights law defines the scope of internationally recognized human rights and the responsibilities entrusted to governments in promoting these rights within their domestic jurisdiction.

A third and related point is that the Universal Declaration has had an impact on domestic law. Upon independence, many new nations of Africa and Asia incorporated the Declaration in its entirety into their nations' constitutions. As for the United States, the Universal Declaration is probably the most frequently cited international instrument in the numerous human rights resolutions adopted by the House and Senate every year that condemn inhumane, barbaric, or other uncivil practices of certain foreign governments with respect to their nationals as well as particular individuals.

Sections of the U.S. Foreign Assistance Act of 1961, as amended, also reflect the impact of the Declaration. Sections 116 and 502B prohibit economic or military assistance to any country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights. These sections also require the Department of State to report annually to the Congress on human rights practices of countries proposed to receive such assistance, and in doing so, to account for the extent to which those countries are observing internationally recognized human rights.

Finally, the wide international acceptance of the principles of the Universal Declaration and our own evolving national human rights tradition have contributed to making human rights considerations a legitimate part of our foreign policy. Some lament such a status for human rights believing it is given too important a role. Others support the principle and believe human rights should play an even more important role. There is no doubt, however, that human rights is an important part of our foreign policy.

At the same time, it is necessary that we be balanced, prudent, and evenhanded in our approach to the application of human rights policy. We must take into consideration the practices of regimes of both the left and the right that violate human rights of their citizens and be concerned with such violations wherever they occur, whether in the Soviet Union, Poland, Nicaragua, Cuba, in South Africa or Chile. And we must not overlook violations in our own society. In this regard, the hearings held by the U.S. Commission on Security and Cooperation in Europe on human rights practices in the United States and the studies prepared by the U.S. Civil Rights Commission testify to the fact that the United States is able to monitor itself in respect to its observance, or lack thereof, of internationally recognized human rights. Thirty-four years ago today, the U.N. General Assembly, in adopting the Universal Declaration on Human Rights, created an important international standard of achievement for peoples and governments throughout the world. We must continue to promote broad acceptance of the principles of the Declaration; but, let us also dedicate ourselves to applying human rights in a balanced manner in the years ahead.●

● Mr. LEACH of Iowa. Mr. Speaker, today we commemorate the adoption by the U.N. General Assembly of the Universal Declaration of Human Rights on December 10, 1948. The United States was a leader in drafting the Declaration and in the effort to include within the U.N. Charter an unequivocable human rights standard.

In the intervening 34 years, the Universal Declaration of Human Rights has been augumented by a number of international conventions and covenants which embellish and broaden the standards set forth in the Universal Declaration. Unfortunately, the United States has not yet ratified a number of the major human rights treaties. From a human rights perspective, it could not be more timely for the administration to make a major effort in the coming year to review these treaties and work toward reconciling U.S. policy interests with the goals contained therein.

It would be a particularly positive step if the United States were to ratify the International Covenant on Civil and Political Rights as well as the Genocide Convention and to place the full moral and political weight of our Government behind as many of these international treaties as possible.

In spite of the progress made in the area of human rights law and institutions over the past 34 years, the human rights horrors of the past have not ended. In the years since the Nazi Holocaust, other holocausts have blotted the landscape of history. Countless numbers perished in Uganda and Cambodia in the 1970's. And today, the gassing of Homng tribesmen in the remote jungles of Laos and Afghan freedom-fighters on rock-studded mountains in Afghanistan is as morally reprehensible as the gassing of the Jews in the gas chambers at Dachau. In Iran, the peace-loving and gentle people of the Baha'i religious faith are being arrested, executed, tortured, and otherwise persecuted by the Iranian authorities.

Scores of other abuses are occurring around the world, both in countries hostile to the United States as well as in countries on friendlier terms with us. On this special commemorative occasion, it is fitting to recall the human rights principles set forth in the Universal Declaration of Human Rights and to recommit the U.S. Congress to the goal of achieving respect for the human rights of all peoples.●

● Ms. OAKAR. Mr. Speaker, the annual Human Rights Commemoration Day is especially meaningful to Americans. Our country was founded on the principles of human rights. The stirring words of our Declaration of Independence provided the basis for our Constitution, for our laws, and for the spirit which has animated our history. The major political struggles

during the course of our 200-year history have been human rights struggles. Many of these struggles took decades to resolve. One thinks of the efforts to eliminate slavery, to extend voting rights to women and blacks, to organize workers: all of these were human rights struggles.

The spirit that generated the American Revolution and produced our Constitution enabled past generations of Americans to win their particular battles for respect and personal liberty. Since we are all human, however, we are far from perfect. Continued work is required in the never-ending effort to achieve and secure human rights for all of our citizens. Today, the human rights struggle in our country involves efforts to provide our citizens with jobs, shelter, adequate nutrition, education, and opportunity for the youth, respect and dignity for the elderly.

The citizens of our country also have strong ties with countries throughout the world. My own district in Greater Cleveland reflects that in the diverse background of the origin of its citizens. It is fitting, therefore, that Americans express their support for human rights in different parts of the world, not only at home. Sadly, human rights principles are enshrined in various documents but are not always respected in fact.

In the Soviet Union, people of various nationalities—Ukrainians, Latvians, Lithuanians, Estonians, Jews, Armenians, Russians, and people of dozens of other nationalities—are subjected to crude repressions. This is especially true in those cases where people want to defend their culture and language from Russification, who seek to express the individual liberties we take for granted, or seek to worship in their own way.

In Latin America, crushing poverty based on social inequalities and enforced by brutal police tactics oppress the vast majority of people in several countries. The cruel and tragic deaths of the four American church people over 2 years ago in El Salvador first introduced Americans to the ugly viciousness that has been the daily lot for El Salvadorans for generations. Murder is the ultimate denial of human rights, but the daily indignities of poverty, perpetuated by privilege and enforced by violence, are the cancer that threatens the entire region with civil strife and anarchy.

In Asia, a steady stream of refugees demonstrated to the world what the consequences are of systematic violations of human rights in Cambodia, Vietnam, and China. The imprisonment of intellectuals, labor leaders, students and others in countries like Korea are but another blight on the map of the Asian Continent.

Africa has problems of its own, most prominently in South Africa with its evil system of apartheid. Other countries suffer from warfare and social injustice.

We are all familiar with the sad drama of the Middle East where thousands of individuals remain homeless and seek territorial integrity.

The sorry litany could go on. The point I would like to make, however, is that Americans who fought and won so many human rights struggles in the past must remain committed to the never-ending effort to aid their fellow human beings throughout the world in their individual and collective efforts to achieve the dignity and well-being that we summarize with the phrase "human rights." By pausing to rededicate ourselves to these lofty principles, let us hope that that dedication can serve us well at home and abroad in winning the struggle to make human rights more of a reality at home and throughout the world.●

● Mr. FAUNTROY. Mr. Speaker, I am pleased to join my colleague, Congressman MICKEY LELAND, in this special order to mark the anniversary of the Universal Declaration of Human Rights.

This is particularly important because this anniversary comes at a period in our Nation's history when we are faced with a retreat on the promotion and protection of human rights domestically and internationally.

The Reagan administration damages the effort to protect and promote human rights when it speaks up as it has, and ought to, on human rights violations in Poland but leads an effort to provide International Monetary Fund assistance to South Africa. The Reagan administration damages the cause of promoting and respecting human rights when it opposes human rights violations in Cuba, but publicly praises the vicious military government of Guatemala and refuses to recognize that many Haitian refugees have a legitimate claim for political asylum. The same damage is done to the cause of human rights when we speak out in behalf of Jewish dissidents in the Soviet Union, as we should, but all too often turn a deaf ear to the cries of the Palestinians in Diaspora for their human right of self-determination.

The Reagan administration damages its ability to represent this Nation as a promoter and protector of human rights when its practices and policies at home in matters involving fiscal, budgetary, and civil rights are unjust and favor the powerful and the rich.

Mr. Speaker, we need to demonstrate by actions here at home and abroad that we are committed to human rights on a universal basis, not just on behalf of those suffering under regimes of the left but also those suffering under fascist regimes such as South Africa. The Reagan administration, in its policy of "constructive engagement" with South Africa, is demonstrating the opposite of a universal commitment to human rights.

We are a better Nation than that.●

● Mr. GARCIA. Mr. Speaker, today is Human Rights Day. We celebrate this day in remembrance of the Universal Declaration of Human Rights, adopted by the U.N. General Assembly on December 10, 1948.

V. S. Naipaul, the Trinidad born writer, said, "Politics have to do with the nature of human association, the contract of men with men. The politics of men can only be an extension of its idea of human relationships." Mr. Naipaul has accurately described the reality of political attitudes. Disrespect for human rights, the use of terror for making a political point, the silencing of critics, and the total suppression of criticism are all ways in which a government controls its citizens. Drawing distinctions between authoritarian and totalitarian regimes, when speaking about human rights, is meaningless. These kinds of distinctions are only used to justify inexcusable policies.

I feel, however, that we should be wary of becoming self-righteous in our fight to preserve human rights. Again, to quote V. S. Naipaul, "Jargon turns living issues into abstractions." We cannot allow our ideals to stop us from maintaining at least a dialog with all nations.

Of course, this does not mean we should turn a blind eye against violators of human rights. We must never forget our responsibility to work for this cause. There are certain rights that must always be preserved; human dignity and the right to life cannot be violated. The United States must not allow any opportunity to pass in which we do not remind ourselves, and the other nations of the world, that we will not accept or tolerate the transgression of these most basic human rights.

I believe in a strong America with a consistent foreign policy. This will not be achieved by continuing a policy of excessive defense spending, or sending an inordinate amount of weapons and military aid to developing nations. Nor will it be achieved by turning a blind eye on the human rights violations of some of our so-called friends and allies. There is consistency in reason, and there is strength through peace and standing up for our ideals. These should be the underlying themes for American foreign policy.●

● Mr. LOWRY of Washington. Mr. Speaker, on this 34th anniversary of the passage of the U.N. Declaration on Human Rights, it is important to remember that the United States has only in the last decade begun to establish a true human rights policy. Respect for human rights is one of the foundations of our Nation and should serve as the guiding principle in our

relationships with other nations. We should work to defend human rights by promoting democratic processes in other areas of the world. A great example could be set, if we vigorously promoted democratic processes in our own hemisphere. Therefore, I would like to submit an article written by Leonel Gomez, a former Salvadoran land reform official who is presently seeking political asylum here:

[From the Boston Globe, Dec. 5, 1982]

BEHIND THE VIOLENCE IN EL SALVADOR

(By Leonel Gomez)

Ambassador Deane Hinton's recent public denunciation of crimes by "gorillas of the Mafia" and "extremists of the left and right" in El Salvador was an important departure from the U.S. State Department's previous posture on human-rights violations in my country. But he failed to identify the real source of the violence that has claimed more than 30,000 Salvadoran lives in the last two years: the armed forces.

Hinton's only reference to the armed forces was to "some elements of the security forces," as if the Treasury Police, the National Police and the National Guard operated independently of the Army. Indeed, he went out of his way to praise the military authorities for "speaking out unequivocally against the abuse of human rights."

What most Salvadorans know is that the Army itself is responsible for systematic political assassinations and massive killings of noncombatants. Murder and torture are not an accident: Repression has been institutionalized within the organization of the military. This organization is the key to the problems posed by Ambassador Hinton: why the human-rights violations continue, why there has been no genuine investigation of Americans' murders, why there is no functioning judicial system in El Salvador and why "death squads" continue to operate with impunity.

The institution of the armed forces, which includes the Army, the National Guard, the National Police, the Secret Police and the Treasury Police, is the most powerful force in El Salvador. The present-day role of the armed forces can be traced directly to the slaughter of 1932, when as many as 25,000 Salvadoran campesinos were massacred by the Army in retaliation for a peasant uprising, born of hunger, misery and desperation. Since that time, the Army's officers have come to take literally their official motto: "As long as the institution lives, the Republic lives."

THE OFFICER HIERARCHY

Over the past 50 years, a command hierarchy, pervasive corruption that enriches the officers in power and a system for passing that power on to the next generation of officers has evolved. The Army's power in El Salvador is a function of this unique internal organization, which is little known outside of the highest echelons of the institution itself. Army officers are organized into *tandas* when they enter military school. They train together, work together and move slowly up the ladder of advancement within the institution together. The *tanda* structure becomes a surrogate family for the young officers. Furthermore, the Army and the officers are so isolated from Salvadoran life that the *tanda* also becomes a substitute for society itself. The insularity and paranoia reflected in the Army's motto is a fact of life for officers who grow up within the *tanda* system.

Throughout the slow promotion process, *tanda* leaders emerge who will ultimately represent their comrades in the most exclusive and powerful organization in El Salvador: the Military National Security Council. The council is composed of 7 to 10 top-ranking officers, representing the most powerful *tandas* of the Army, the National Guard, National Police, Air Force and Army Intelligence Agency. For five years, council members dictate policy and oversee every action of the Army and security forces. And for five prosperous years, the council members and their allies within the armed forces will become fabulously wealthy through systematic corruption, fraud and kickbacks. At the end of five years, the Council members retire, and the next class of *tanda* leaders move in to take their place. In El Salvador, resourceful young officers can expect to be promoted from first lieutenant to second lieutenant to major to lieutenant colonel to colonel—to millionaire. The operation of the Security Council within the armed forces is remarkably like that of the Mafia: the "dons" on the council are only as secure as the entire armed forces "family." Thus, through corruption and rapacity, the needs of the entire institution are protected.

The Army's relationship with the country's economic elite is a mutually beneficial one. The oligarchy needs the Army to keep a starved and restless peasant workforce on the job for $133 a year. But the Army needs the oligarchy as well, to keep the economy going. Immense profits go to top officers from kickbacks from government contracts with large businesses and industries.

Because of the extreme poverty of most of its citizens, El Salvador's wealth is usually overlooked in the United States. The coffee crop in a good year is worth close to a billion dollars. When you consider that most agricultural workers earn less than a dollar a day when they work at all, that labor unions are illegal, that health care, housing and benefits for workers are nonexistent, the 300 to 400 percent profits sometimes earned by the country's economic elite are easy to explain. There is plenty of money for payoffs and kickbacks to Army officers who help make the system work.

While the Security Council is all-powerful, the possibility of a coup from lower-ranking officers always exists. First and second lieutenants and majors do not make much money in the armed forces. Their only hope of accruing great wealth is to bide their time until they reach the highest levels within the institution. If the Security Council jeopardizes the armed forces' lucrative relationship with the oligarchy or if the officers fear that the institution itself is threatened, the Security Council can be replaced.

SOMAZA FALL SHOCKED MILITARY

The fall of Nicaragua's Gen. Anastasio Somoza in 1979 was a huge shock to the Salvadoran military psychology and organization. Seeing the Nicaraguan National Guard crumble and its members killed in combat, exiled in disgrace or jailed by the Sandinistas, the Salvadoran officer corps literally feared for its own survival. After the military coup of October 1979, the Security Council was expanded to include representatives from other ranks and *tandas*. Historic links with the Salvadoran oligarchy were temporarily open to question, and the Army embarked on agricultural and economic reforms. The Army, however, soon saw a unique opportunity to plunder the economy directly, rather than taking kickbacks and payoffs from Salvador's great families. Progressive individuals within the military institution quickly lost ground again to traditionalists and massive corruption soon riddled the U.S.-supported land-reform project. Within a year, however, it was apparent that the Army needed the oligarchy to invest and procedure. The Army's mismanagement and corruption threatened to kill the goose that laid the golden eggs for so many years. The wealthy slowly returned to El Salvador, and the newly elected right-wing Constituent Assembly dutifully slowed agrarian reform to a virtual standstill. Meanwhile, the Army restored the Security Council, and the mutual beneficial cooperation between the oligarchy and the armed forces resumed.

Bloody repression further tightens the armed forces' organization. The Security Council decides who lives and who dies; Army troops and police carry out its will. El Salvador is a small country. The Security Council knows the union leaders, peasant organizers, opposition politicians and progressive teachers and clergy. It is not an accident that these people have been systematically eliminated by uniformed soldiers or plainclothes policemen. In April 1981, for example, the Security Council drew up and publicized a "hit list," including the names of labor, campesino, church and political leaders. Many of those on the list who stayed in El Salvador have either disappeared or live underground. Defense Minister Jose Guillermo Garcia has never renounced or withdrawn the list, in spite of international protests.

SLAUGHTER OF INNOCENTS

Similarly, the routine torture and execution of noncombatants in contested areas by Army troops is not a "command and control" problem. The slaughter of innocents is clearly a matter of Army policy. Civilians in guerrilla-contested areas are viewed as the enemy and are treated accordingly. Since the Security Council makes the policy, it is not surprising that not a single massacre has been investigated and not a single officer disciplined for carrying out that policy. The armed forces' refusal to reform itself and its failure to punish known murderers, rapists and torturers is a policy enacted at the highest levels of the institution: The Security Council must cover its own complicity in these crimes, as well as protect the younger officers behind them who are also implicated.

The U.S. ambassador surely knows the nature of the armed forces, and the Security Council's central role in continued bloody repression in El Salvador. His suggestion that independent right-wing "gorillas" are responsible for systematic torture and murder, but that the armed forces leadership is committed to human rights, is a cynical charade. Ambassador Hinton's Chamber of Commerce speech can only be viewed in the context of the State Department's likely support of Defense Minister Garcia's 1984 presidential candidacy. Since the State Department must certify to the US Congress that the Salvadoran armed forces are under control and not responsible for gross violations of human rights, another culprit must be found for the continuing atrocities. Constituent Assembly President Roberto D'Aubuisson is the logical scapegoat. The fact of the matter, however, is that neither man operates independently of the military structure that produced them. The two may be political rivals, but the institution of the Army and the role of the Security Council is more important than either of them.

Who the next president of El Salvador is matters less than what kinds of policies the Army as an institution makes. Neither D'Aubulsson nor Garcia will betray the institution that has benefited them and their friends—the organization will not allow them to. Their continued power in El Salvador assures the corrupt and bloody survival of the armed-forces system. Nothing short of a massive purge of the entire officer corps and its total subordination to a strong, progressive, civilian government can end the horror of war, poverty, and despair in El Salvador.●

● Mr. ROSENTHAL. Mr. Speaker, today, December 10, 1982, is a very important date. It is the 34th anniversary of the ratification of the U.N. Declaration on Human Rights; it is the first night of Chanukah, a holiday which commemorates Jewish freedom fighters who refused to have their religious identity denied; and it is the 75th day of Anatoly Shcharansky's fast for freedom.

Most of my colleagues are already familiar with Shcharansky's injustice and torture at the hands of those in the Soviet Union who would deny him his rights as a human being. His wife Avital, as well as other human rights activists around the world, have worked tirelessly to publicize his plight. Serving an extended term in Chistopol prison, often in isolation, denied proper food and medical treatment, the Prisoner of Conscience became desperate when even his contact with his mother was cut off last January. Shcharansky reportedly entered this fast on Yom Kippur knowing full well that in his condition he may not survive it.

This world reknown computer scientist and mathematician has been charged with treason and anti-Soviet agitation and propaganda but in reality his only crime was wishing to join his family in Israel and having the freedom to live as a Jew. These are freedoms denied in the Soviet Union where emigration figures continue to tell the devastating story. In 1979, 51,320 Soviet Jews were allowed to emigrate; in 1981, 9,447. In November 1982 only 137 Soviet Jews were let go and the total figure for 1982 is not expected to reach even 2,700.

We can only imagine the mental anguish that Shcharansky and other Jews trapped in the Soviet Union are suffering as the iron gates are allowed to clang shut and squeeze off the last hope of escape. Not only are they not allowed to leave, but their lives within the Soviet Union make a mockery of the Helsinki Accords and the U.N. Declaration of Human Rights.

Today it is especially fitting that our thoughts turn to Anatoly Shcharansky, despite the fact than no news of his condition has gotten out in the last few weeks. We must take every opportunity to communicate to the Soviets that the eyes of the world are on Shcharansky; not only on his personal treatment, but on Shcharansky as a symbol for all of Soviet Jewry. As Anthony Lewis stated in his eloquent November 18, 1982, New York Times column:

A Soviet decision to release Mr. Shcharansky would be a dramatic sign that the new leadership is pragmatic and wants to do diplomatic business.

It would also be a dramatic sign that the Soviet Union wants to finally honor the Helsinki accords which it committed to 7 years ago and would raise its stock considerably in the human rights field.●

● Mr. GILMAN. Mr. Speaker, I commend my colleague, the gentleman from Texas (Mr. LELAND) for taking the initiative to arrange this special order to commemorate the 34th anniversary of the signing of the United Nations Universal Declaration of Human Rights. Indeed, this declaration, which enumerates a broad spectrum of fundamental human rights which the member nations of the international community are urged to endorse and to respect, is as timely today as it was when it was adopted.

It is my hope that our Nation will intensify its efforts to assure that our policies adequately reflect the following principle which the Universal Declaration underscores:

Recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world.

One of the many areas about which I know my colleague from Texas and I share a strong concern, is outlined in the Universal Declaration of Human Rights, that is the right to food. In 1976, Congress passed the right-to-food resolution. That resolution reaffirmed "the right of every person throughout the world to a nutritionally adequate diet," stating also "the need to increase our assistance for self-help development."

The gentleman and I have introduced legislation, House Resolution 424, which would create in the House a Select Committee on Hunger to help formulate policies to resolve the critical problem of hunger and malnutrition.

We intend to reintroduce this measure in the 98th Congress, and I take this opportunity to urge our colleagues to support this legislation as a means to help promote one of the most basic of human rights—the right to food.●

● Mr. HALL of Ohio. Mr. Speaker, 34 years ago today, the U.N. General Assembly unanimously approved the Universal Declaration of Human Rights, codifying into international law 30 articles spelling out the civil, political, economic, social, and cultural rights of all men and women.

I take this opportunity to once again remind my colleagues of the importance of a strong human rights policy to the long-term foreign policy objectives of the United States.

By placing a strong importance on the human rights conditions in other countries, the United States extends its diplomatic efforts beyond the heads of state to the people who will ultimately chart the course of that nation long after the existing authorities have gone. It is a policy based on the idea that the people will recognize those who have a genuine concern for their welfare and civil liberties, and that this will influence their future dealings with the United States.

Too often, American foreign policy is directed toward placating current world leaders who may be out of step with their citizens or even taking overwhelmingly unpopular stands. Thus, it is poor planning for the United States to accept without criticism gross violations of human rights based on tenuous explanations. This serves only to bolster the existing regime while civil abuses in that foreign nation continue, with ultimate loss of credibility to the United States.

Providing arms or economic assistance by the United States to an authoritarian regime is not the same as assisting the people under that regime. Therefore, there is little reason to believe that we can maintain friendship with a nation by staying friends with its leaders. On the contrary, helping dictatorships that do not enjoy popular support can have the opposite effect. Even though the press may publicize world leaders shaking hands during a state visit, the very people we are trying to befriend may have great feelings of animosity.

A case in point was the recent visit of Philippine strong man Ferdinand Marcos to Washington. He was accorded a full red-carpet welcome by the U.S. State Department and hailed as a staunch ally in the Pacific. However, his poor record on human rights was officially ignored by the administration, and no effort was made to place any distance between his repressive domestic policies and the support he enjoys from the United States. Based on his reception in Washington, the Filipino people would have no reason to doubt that the Marcos regime with all of its dark sides is fully embraced by the American people.

When Marcos is ultimately succeeded by a future ruler who may or may not continue his present policies, how are the Filipino people to perceive the United States? President Reagan, too, may be long gone from the scene by this time. But the memories of the repression and denial of civil liberties will undoubtedly linger, and the blame is certain to be laid on all who supported those conditions.

Though dissidents in other countries may be only a small minority, we can never overlook their ultimate poten-

tial. It is important to keep in mind that the stability of any repressive regime is only illusory. The lessons of Iran and Nicaragua, for example, are that we cannot afford to sacrifice our essential enduring relationships with the people of a nation for short-term security objectives.

Contrary to critics of an activist human rights policy, U.S. concern over the internal affairs of other nations does not conflict with our own national security interests and other foreign goals. Though a superficial analysis may show a dichotomy, international human rights considerations cannot be separated from our ultimate goals.

This does not mean that the U.S. human rights policy is an attempt to mold foreign cultures into the unique mold of the American morality. The U.N. Universal Declaration of Human rights, the basic document guiding U.S. human rights considerations, is recognized by all major nations.

Our steady vigilance against human rights abuses has increased global sensitivity to the issue, aided in the release of political prisoners and the emigration of dissidents, eased repression, and even saved lives. Equally important yet harder to measure, the heightened U.S. attention to human rights has given renewed hope and encouragement to oppressed peoples the world over.

On this day commemorating the adoption of the Universal Declaration of Human Rights, it is appropriate to reevaluate the record of human rights considerations in our foreign policy. Being true to our own principles upholding the dignity of men and women the world over must be of highest priority.●

● Mr. BARNES. Mr. Speaker, I am pleased to join my colleagues today in recognizing the 34th anniversary of the adoption by the United Nations of the Universal Declaration of Human Rights.

This important declaration marked a turning point in marshalling the world's efforts to combat human rights violations made by governments against their citizens. When the shocking truth surfaced about the heinous crimes committed against millions of people during World War II, the United Nations raised the issue of human rights worldwide and recognized that governments around the world needed to take a collective stand against the actions of some which deliberately ran counter to the principles of freedom and respect for the dignity and worth of human beings.

Over these past 4 years, my service on the House Foreign Affairs Committee has given me a unique perspective of the hardship that literally millions in the world suffer because of the arbitrary, discriminatory, and capricious rule of their governments. As chairman of the Inter-American Affairs Subcommittee and as a member of the Subcommittee on Human Rights and International Organizations I see the important role that Congress can play in bringing human rights violations to public attention and speaking out forcefully against them. For the millions of silent persecuted in the world, our principles of freedom and our democratic traditions represent a living hope of a better life and symbolize the fortitude that comes with a respect for and commitment to human rights.

This past year has had particular significance for all of us fighting for universal respect for human rights. In Poland, against all odds, the people have worked for freedom, in expression, in the workplace, in their government, and they were making progress. However, when Solidarity's National Commission met 1 year ago to discuss the possibility of free elections and a public referendum on the government, Polish authorities, fearful of the revolutionary nature of these changes, clamped down with an ironhand by imposing martial law on Poland. The Polish people have, despite this setback, continued as best as they can to fight for their freedom. They continue to protest, risking their lives in the face of intolerance and harsher punishments of their government.

In the Soviet Union, Anatoly Shcharansky, a man who has become the symbol of resistance and strength, enters the 75th day of his hunger strike. Shcharansky represents thousands of others in the Soviet Union who have been harassed and persecuted, imprisoned, and silenced. His tragic ordeal is mirrored daily in the lives of many people around the world. What the Soviet Government has done to him and many, many others is wrong and the passage of time will only increase our indignation that such a situation continues to exist in the Soviet Union.

I have been personally involved over the past few years trying to gain permission for a young man who has applied numerous times to emigrate from the Soviet Union with his wife and daughter. His name in Alexander Pevzner. Alexander Pevzner is not asking for much. He is only asking that his family be permitted to join his parents and sister in the United States. After 10 years, Soviet authorities persist in their refusals. Alexander Pevzner's case is indicative of the Soviet's refusal to abide by their moral obligation to respect the fundamental human rights of its citizens. As long as I am in Congress and Alexander Pevzner is in the Soviet Union, I will continue my personal efforts on his behalf until he joins us in the free world.

In South Africa, human rights violations continue. The repeated harassment of union leaders, such as Thozamile Gqweta, continues as the racist South African Government continues to try to eradicate the movement against apartheid. South African authorities have tried to silence voices of those such as Philip Mthimkulu, a journalist who worked for improvement of working conditions and better wages for black journalists and media workers. Sooner or later, the people will break the barriers that, for so long, have held them back, and unfairly kept them from enjoying the freedom they deserve. The South African Government, with its policy of apartheid and its rule by force and intimidation, cannot stand forever, Its power to impose its will on the people, to destroy the dream of freedom in their hearts, cannot survive amidst the strength of those who, against all odds, will continue to fight. The South African Government must realize that might alone will fail to stop the inevitable changes that must take place in South Africa.

More than any other country in the world, the United States has a special commitment and responsibility to help foster peace and social justice in the world. Our history, our values, our principles, and our goals as a nation compel us to stand as a beacon of freedom to the world's oppressed. We in the United States are the fortunate ones. We expect, as a matter of course, to travel freely, to voice our opinions, to determine the leadership of our Government, to worship in the manner we choose, to have access to a free flow of information, and to have the chance to pursue a productive and fulfilling life. And everywhere in the world literally thousands of people are being persecuted.

All of us, as U.S. citizens, as people who have compassion for others and who cherish and uphold the principle of individual dignity and worth, must continue more vigorously to speak out openly and forcefully to those who continue to pawn and sacrifice human beings. International Human Rights Day reminds us of our Nation's firm commitment to foster respect for human rights in the world, and calls us to action.●

● Mr. HARKIN. Mr. Speaker, today, Human Rights Day, I would like to express my deep concern over the tragic suffering of the former Portuguese colony of East Timor, which was invaded and occupied by Indonesia just over 7 years ago and continues to be subjected to an illegal Indonesian military occupation. Amnesty International recently pointed out in a letter to the New York Times that the Indonesian occupation of East Timor is characterized by "extraordinary brutality."

But American awareness of the East Timor tragedy is growing. And along with this awareness is the correct perception that the Indonesian occupa-

tion of East Timor is no less illegal and immoral than, for example, the Soviet occupation of Afghanistan. And as in Afghanistan, a just solution guaranteeing the right to self-determination for the people of East Timor, even if it cannot be found immediately, must be achieved eventually.

Indonesia bears prime responsibility for the East Timor tragedy and it is Indonesia that must be convinced to come to the negotiating table before a solution can be achieved. As I pointed out in an article I wrote for the Progressive magazine 2 years ago, the United States also bears heavy responsibility for the Timor situation, through the arms we have supplied to Indonesia and the diplomatic support that successive administrations have provided for the Indonesian position.

But Portugal, the colonial ruler of East Timor until it abandoned the territory in 1975, has an especially heavy moral responsibility to the East Timorese. On December 14, the current Portuguese Prime Minister, Dr. Francisco Pinto Balsemao, will meet in Washington with President Reagan, and I understand that the Portuguese leader plans to discuss the East Timor issue.

It is to be hoped that Portugal will carry out an energetic diplomatic campaign, both in Washington and throughout the world, in an effort to find an equitable solution to a continuing conflict that already has claimed many tens of thousands of lives and caused untold human suffering.

For the benefit of my colleagues, I would like to insert for the RECORD Amnesty International's recent letter to the New York Times:

"EXTRAORDINARY BRUTALITY" IN EAST TIMOR

To the EDITOR:

In an Oct. 14 news article, "Indonesia Defends Role in East Timor," Foreign Minister Kusumaatmadja is cited as saying that reports of human-rights abuses against residents of East Timor are "untrue."

Amnesty International has followed the human-rights situation in East Timor since the territory was invaded by Indonesia forces in December 1975, and we find the Foreign Minister's comment disturbing.

It has been evident to Amnesty International in investigating the situation in East Timor that human-rights violations occur there within the context of an occupation of extraordinary brutality in which a whole right of fundamental human rights have been denied the population.

We believe that the population of East Timor has been systematically denied the rights to freedom of expression, association, assembly and movement. Persons exercising their right to petition the government for redress of grievances have been arbitrarily detained. Movement and communication within and beyond East Timor has been tightly controlled.

We are also disturbed by the Indonesians' failure to investigate a number of cases of human-rights violations in East Timor.

One case involved "Operation Fence of Legs." Undertaken by Indonesian forces from July to September of 1981 with the aim of eliminating Fretilin forces (the movement for an independent East Timor which resisted the Indonesian invasion), its strategy was to deploy tens of thousands of Timorese to form human fences that converged on and flushed out remaining Fretilin forces.

Reports indicated that civilians enlisted for this operation were required to advance in front of Indonesian forces and were unarmed or armed only with primitive weapons. While it is not possible to gauge the number killed in the operation, it is clear that many did not return to their homes.

We also received extensive reports of torture of detainees during interrogation. Forms of torture described in those accounts include burning with red-hot irons and cigarettes, electric shocks to the genitals and other parts of the body, extraction of finger and toe nails with pliers and slashing with knives.

We have raised these concerns with the Indonesian Government. So far there has been no response.

LARRY COX,
Deputy Director, Communications, Amnesty International.

NEW YORK, *October 22, 1982.*

Last year the first major event indicating the direction which human rights policy would take under the Reagan administration was the nomination of Ernest LeFever as Assistant Secretary of State for Human Rights and Humanitarian Affairs. I am sure everyone remembers the resulting controversy, leading to the defeat of his nomination.

Some progress has been made in the areas of human rights since then, although the Reagan administration's policy remains seriously flawed. One of the most dramatic moments during the LeFever debate was the appearance of the Argentine, Jacobo Timmerman, at the Senate Foreign Relations Committee's nomination hearings in May 8, 1981.

The next day, May 19, he held a press conference arranged by my office. His remarks were pertinent then, and on Human Rights Day, 1½ years later, they retain their significance. I would like to bring them to the attention of my friends and colleagues:

TRANSCRIPTS OF TIMMERMAN INTERVIEW

REPORTER. These are the ground rules, Mr. Timmerman does not want to testify, or to say anything specifically about the nomination because he doesn't know specifically about Mr. Lefever, or the situation in the United States. He will make a statement on what he thinks United States' human rights policy should be, if you would like to ask that.

Why did you come today and why did you not testify?

TIMMERMAN. I wasn't invited to testify and that is why I am not testifying. I am in Washington invited by the Washington Post. I had lunch with them. And Foreign Policy Review, I had breakfast with them and with a couple of Senators and Congressmen and I had dinner with them.

Reporter. But you came to the hearing.

TIMMERMAN. My son was having lunch with me and he mentioned many times the hearing, so I had half an hour, 40 minutes before the show I am going to now, an interview on radio, so I said that perhaps I just drop in and see it is. See how democracy works.

REPORTER. And how did you find that it worked?

TIMMERMAN. Well, I was applauded. I was very happy about that. I saw the discussions. It is very interesting. I hope that Argentina would have the chance to have this kind of hearing about Human Rights in the Argentine Congress as soon as possible.

REPORTER. Are you afraid the the Reagan Administration might retreat on human rights?

TIMMERMAN. I am not afraid because they have already retreated, so I am sure about that. And this is something that I really cannot understand. Just let me know when I am breaking the rules. Because you see your administration has the right to change an approach to a problem or even to change the strategy. They can change the approach to human rights, change the strategy about human rights, but they have not the right to change the ideology of the American people. And I think that the Reagan Administration is changing the ideology of the American people who were always for human rights in any conditions, in any countries, not depending on what kind of government they have. I think that if you are converting human rights policy just in a fight against communism, you are going to lose also the fight against communism. Let's suppose for instance that the dissident in the Soviet Union has been interrogated by a KGB man. And this KGB man says listen, the U.S. is interested in you, but not as human right, only against Russia because they only are doing this against only Russia, not against Argentina and not about Chile. So, if this dissident is a patriot, then he will think really that the U.S. is not interested in his human rights in the democracy of the Soviet Union, but only in fighting against his country, that means Russia. I think that after the Marshall Plan, the human rights policy was the first time the U.S. has captured the imagination of the full world, and had an impact in the world. I don't remember anything you have done after the Marshall Plan to have this kind of impact in the shape of ideologies, minds, feelings all over the world. And I don't know why you are going to jeopardize that, to lose it. I am of course interested in many things but also in the U.S. When people say that they are helping friends in Argentina, believe me that the true friends of the U.S. are the political parties, the civil associations, the labor union leaders and the mothers of the missing people. Not a group of corrupt generals.

REPORTER. Your name came up yesterday at the hearing. It was alleged that Pat Derian's visit to Buenos Aires helped to relieve you of the torture you were undergoing. Did that in fact (that is, the public outspoken policy of the U.S. government under Carter), help you?

TIMMERMAN. I was kidnapped in a clandestine jail when Ms. Derian arrived to Buenos Aires and she made a scandal to the President of Argentina in a meeting with him about the way I was treated. So I was taken after that to a legal jail. They let me have a shower and have a shave. They took me to the government house because the Minister of the Interior wanted to see how I was because of the scandal Pat Derian made. And when I arrived, he said to me (that was General Harguindeguy). He said that, "I am

sure that Pat Derian is a relative of yours. I said, "No, I just met her once years ago in a meeting." He said, "She must be a relative, probably a cousin, as far as we find out because the way that she reacted about your jail." And I said, "No, she is not my cousin." And he said, "Yes, we have information that she is your cousin." Well, I say OK. But after my release (and this is a funny story), I was at a luncheon in honor of Pat Derian, and she said, "Here is my cousin Jacobo." (Listen for the end of the story.) She said, "Here is my cousin Jacobo. And I have many cousins in the gulags of the Soviet Union, I have cousins in South Africa; I have cousins in Chile; I have cousins in South Korea." A man from UPI was there and he sent a cable to Buenos Aires, and it was published in La Prensa in Buenos Aires, saying: "This was first official confirmation of rumors that Jacobo and Pat are cousins." And it was published by La Prensa from a cable from UPI!

REPORTER. But for our purposes we need to know if you believe that her intervention really is what made a difference in the way you were treated.

TIMMERMAN. In that day, it made a big difference, it made a big difference. And I know positively of many lives that were saved only because Pat Derian was also making scandals about these problems. And I remember, that once she had a very bitter discussion with a military attaché of the American embassy in Buenos Aires about this problem of human rights. And it was published in the Buenos Aires press. She was always outspoken, and there is no other way. I think that after the experience of Nazi Germany we shouldn't be silent anymore. A silent diplomacy is silence. A quiet diplomacy is surrender. And this is my experience.

REPORTER. One question . . . What did you think of Undersecretary Buckley assuring Congress that there was not anti-Semitism going on in Argentina at this time, last week, in order to get the repeal?

TIMMERMAN. I think he is wrong, and he hadn't shown any proof about that. And if you go through the files of the American press you will see many, many cases of anti-Semitism in Argentina.

REPORTER. So that is not a correct statement that he made?

TIMMERMAN. I don't know why he made it.

REPORTER. Have you read the written statements about Lefever?

TIMMERMAN. No, I have not.

REPORTER. It sounds like you are taking a real slap at him without mentioning him, you're saying there is no other way, quiet diplomacy is surrender. When he has said only yesterday that quiet diplomacy is his style. Is that indirect criticism of him?

TIMMERMAN. Well, I read the articles written by Ambassador Kirkpatrick in Commentary. I had a meeting with Ambassador Kirkpatrick, and I read the statement made by Secretary Haig before the Tri-lateral Commission and I am referring to all this. Nothing about Lefever.●

THE REASON FOR ANTI-JAPANESE SENTIMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

Mr. NELSON. Mr. Speaker, around the country during the last election "get tough with Japan" surfaced in many congressional races. Frequently, we can spot now all across the Nation bumper stickers that say, "Remember Pearl Harbor" or "When you bought your Japanese car ten Americans lost their jobs."

This anti-Japanese sentiment reflects a growing feeling in America that the Japanese Government and Japanese industry do not play fair. The U.S. trade deficit with Japan is expected to reach $20 billion in this year of 1982; 1981 reflects another trade imbalance. Japan bought $21 billion worth of merchandise from the United States in 1981, but it exported to the United States $37 billion, a $16 billion bilateral deficit.

□ 1620

Obviously access to the American market is extremely important to Japan. The openness of the U.S. market, as contrasted to the closed nature of the Japanese market, is in large part the cause of the trade imbalance.

Another contributing factor is that the dollar has remained high against the yen since last summer. Rising unemployment among Americans is also a major factor causing anti-Japanese sentiment. With a devastating 10.8-percent unemployment, we are experiencing the highest level of unemployment since the Depression. We are concluding that Japanese goods made by the Japanese are replacing American goods made by Americans.

Additionally, with huge Federal Government budget deficits, Members of Congress, including myself, are increasingly impatient with Japanese resistance to increase its spending for defense, which, by the way, presently amounts to less than 1 percent of that nation's gross national product.

Compare that to 5.9 percent of our GNP in the United States that we are spending for defense. Resentment is building against Japan for its resistance to share more of the load for its own defense.

Perhaps some of the most disturbing news is of American business selling its high technology to Japanese industries. Instead of buying items from the United States, the clever Japanese industrial giants apply the technology that they have purchased from the United States and then produce goods that directly compete with similar American products. Why U.S. businesses ever sold that technology is mystifying and inexcusable.

I am presently vigorously urging the Department of Defense to erect immediate barricades to the transfer and sale of such defense technology to Japan, especially when it involves our defense systems. Presently the Japanese are trying to buy the high technology which has produced the most advanced airplanes in the world, the F-15's and the F-16's. If Japan succeeds, it will utilize that technology to produce aircraft which will then undermine the U.S. leadership in aviation.

Enough is enough. Presently the anti-Japanese sentiment is being expressed here in America, and as this body is reflective of America, it is being expressed here on this very day in the U.S. House of Representatives as we consider the domestic content legislation, which would require of automobiles sold in America that they be 75 percent American content. Perhaps this legislation is an important statement that is needed to be made to the Japanese.

But that legislation is not the answer to the unfair Japanese practices. Perhaps the answer lies in U.S. trade barriers and American tariffs or taxes on Japanese goods that are imported into the United States, taxes and tariffs to equal those trade barriers and tariffs erected by the Japanese upon similar U.S. goods being exported or attempted to be exported to Japan.

Mr. Speaker, I would say to my friends in Japan that it looks like now is the time that turnabout is fair play. The Japanese had best pay attention to the sentiments of fairness and equity that are so important to Americans as they deal with their friends.

MAJOR LEAGUE SPORTS COMMUNITY PROTECTION ACT

The SPEAKER pro tempore (Mr. MONTGOMERY). Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 20 minutes.

● Mr. STARK. Mr. Speaker, by its temporizing and inaction to date in failing to enact the Major League Sports Community Protection Act, Congress is threatening to endorse the equivalent of the "Al Davis Special Interest Bill of 1982." If we do not now enact the sports-community protection legislation and apply it to the Oakland Raiders' disgraceful abandonment of the Oakland community and its taxpayers, we will have abdicated our responsibility to the public, to the scores of mayors who have vigorously supported this legislation, and to the Governors and other public officials who have done so.

There now seems to be a consensus in the Congress that the two key elements of this very limited legislation deserve enactment. The bills, H.R. 6467 and S. 2784, merely allow professional sports leagues to protect local communities by: First, keeping successful teams where they are; and second, enabling leagues to share revenues to the benefit of teams in smaller, less well-situated markets.

There is wide bipartisan support for the legislation both in and out of the

Congress. It has been endorsed by a number of Governors and over 40 mayors, and it has been cosponsored by some 160 Members of the House, including many members of the Judiciary Committee, and 23 Senators.

Yet the Congress now seems immobilized by the weight of business before us in these closing days of the session and perhaps—and I say "perhaps" because I would prefer to believe otherwise—an inability to determine that this legislation should be made immediately applicable to protect the taxpayers in this country, particularly those in Oakland, Calif., who have built magnificent professional sports stadiums for teams such as the Oakland Raiders. The Raiders' top executive, Al Davis, obviously recognizes the justifications for applying this legislation to the Raiders' abandonment of Oakland merely for higher profit opportunities elsewhere because he has launched a strenuous lobbying campaign, to block the application of this legislation to the multiple and conflicting lawsuits over the Raiders' effort to walk out on the Oakland community.

When the Washington Senators left the Nation's Capital, Congress was outraged. When professional basketball teams hopscotched from city to city in the early seventies, remedial legislation was promptly proposed. When the NFL and the American Football League were authorized by Congress in 1966 to merge their operations, the Congress required commitments from the two leagues that they would maintain the operations of teams in communities which successfully supported teams both financially and with civic investments of emotion and pride. On these prior occasions, Congress squarely addressed the public interest, not private interests, and it met its obligation to protect the ordinary citizen and the taxpayers of this Nation, not the special interests who sometimes ride on the back of the taxpayer.

Now, however, in the face of the most unjustified abandonment of a community in the history of professional sports, Congress appears immobilized and unable to find the time to correct the injustice of the Oakland Raiders' abandonment of our Oakland-Alameda community. And why do we face this prospect? Largely through our own inaction and our failure to have adopted the Major League Sports Community Protection Act of 1982 earlier in this session, partially because of the unwillingess of some Members to act on this legislation until the NFL's labor-management issues were satisfactorily resolved, as they now have been.

But there are also some in the Congress—and I cannot fathom their reasoning—who appear to believe that the citizens and taxpayers of Oakland deserve no better treatment than convicted antitrust price fixers who are felons. There are some, in short, who seem to think that because the Senate last week refused to endorse legislation that would immediately bail out convicted price fixers, the Congress should now penalize taxpayers in northern California who built a magnificent stadium for the Oakland Raiders. But now Congress seems to act as if it cannot correct moral wrongs and injustices even when legislation to do so is before us.

In my view, there is absolutely no relationship between the Senate's antitrust "contribution" legislation and the sports-community protection legislation. Opponents of contribution bills could properly oppose their application to pending cases because, as they put it, the "retroactivity provision is repugnant and represents a special interest bailout for convicted price fixers." But there is nothing repugnant about protecting the taxpayers of this Nation, the communities of this Nation, the mayors of this Nation, and the sports fans of this Nation when private interests take "morally wrong" actions to destroy the public interest. So the Congress should not be paralyzed by an inflexible adherence to positions that sometimes make sense but sometimes perpetuate injustice. Congress has often applied legislation to pending cases when fairness and justice have supported such application, and Congress should do so in enacting the Major League Sports Community Protection Act of 1982.

The failure of Congress to apply this legislation to the Oakland Raiders' move will simply serve Al Davis' special interests in multiple ways. For one thing, it will allow the Raiders to return to the California Legislature in its next session to push for retroactive laws at the State level. Davis and his allies have already sought amendments to the California eminent domain statute to overturn the ruling of the California Supreme Court finding that the city of Oakland could buy the Raiders at fair value and keep the team in Oakland because it serves vital public interests there.

Second, Congress' failure to act will enable Al Davis to impose on Oakland taxpayers public debt service obligations of $1.6 million annually through the year 2005. It will also enable the Raiders to repudiate commitments of the American Football League made to the Oakland community to keep the Raiders in Oakland so long as the team was well supported.

Third, it will allow Davis to charge the public heavily on pay TV of Raiders' games—with Davis pursuing windfall profits. This is Davis' true motive in abandoning Oakland despite the multimillion-dollar profits he made there. Davis himself has been quoted as saying:

> Pay-TV is where it's going to be all at in a few years. It won't matter the size of the stadiums. But can you imagine 2 million viewers paying 10 bucks a head? That means the smart pro clubs have to be in the big TV markets. That's why we're thinking about a move to Los Angeles.

Fourth, at this late date, the Raiders have no formal agreement with the Los Angeles authorities committing the Raiders to play in Los Angeles. The Raiders still operate in Oakland. But more important, the proposed agreement between the Raiders and Los Angeles authorities threatens to permit the Raiders to appropriate as much as $15 million of revenues from the 1984 Olympic games to the sole benefit of the Oakland Raiders. The Los Angeles Times recently explained in an article entitled "Raiders' Davis May Win Gold From Olympics" that "the agreement, in effect, gives Davis control over the most valuable seats during the Olympic games"—despite a preexisting contract with the Olympic Committee with directly contrary provisions.

I find it unconscionable that a single businessman who has profited at the expense of one great city, Oakland, should now be permitted to do the same with the 1984 Los Angeles Olympic games.

I am enclosing for the RECORD several reports concerning this threat to the Olympics, including the Los Angeles Times article and a United Press report, "Al Davis Stands To Reap Millions on Olympics," where the Los Angeles authorities acknowledge that the Raiders' proposed agreement may be in violation of a contract between the Olympic Committee and the Los Angeles authorities.

THE UNFAIRNESS OF EXCLUDING OAKLAND FROM THE BILL

In summary, Mr. Speaker, it would be extremely unfair to the Oakland community and to the NFL to exclude the stalemated dispute from the coverage of the sports community protection legislation. Until the present Raiders matter arose, the antitrust courts had found that leagues and communities could keep successful teams in their existing locations. The antitrust court in the Raiders case is itself retroactively creating new rules wiping out the rights of Oakland and the NFL in an unprecedented manner.

If Congress endorsed this arbitrary treatment of Oakland and the NFL, it will be simply perpetuating an unfair discrimination. This point was eloquently made by the junior Senator from Nevada who, in recently speaking about applying another measure to pending cases, said that making legislation prospective only "would be an arbitrary decision by the Congress that * * * would unfairly discriminate against the parties in pending cases which gave rise to the need for the legislation in the first place * * *.

There are many examples of legislation applicable to pending cases in the antitrust file." Here where prior law and prior congressional policy fully supported the position of the Oakland community and the NFL, and where the city of Oakland has itself won an important victory in the California Supreme Court against the Raiders, the only evenhanded solution is to have Congress' legislation apply to the dispute that gave rise to the need for congressional action.

Like other cities, Oakland deserves protection. And how can the NFL, as a league of equal members, possibly operate when one of its most successful and profitable teams is given a congressionally approved license to move while other less-situated teams, with far lower revenues and sometimes losing money, are held to a different standard and required to remain in their existing communities.

Legislation that creates different rules for different parties is unfair. Equality under the law will be guaranteed here by making the Major League Sports Community Protection Act of 1982 applicable to all parties whether they are currently in the courts or whether they will be in the courts in the future. I thus urge the Congress to enact this legislation before we adjourn.

I have previously stated that after hearings on the sports community protection legislation, certain revisions would be made clarifying provisions that have drawn comment from witnesses in the hearings. This has now been done. We have also revised the provision of H.R. 6467 applying it to pending disputes in order to state on the face of the legislation itself the public interest and governmental reasons that justify such treatment in this legislation. The full text of the revised H.R. 6467 in its current form is set forth below:

H.R. 6467

A bill to clarify the application of the antitrust laws to professional team sports leagues, to protect the public interest in maintaining the stability of professional team sports leagues, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Major League Sports Community Protection Act of 1982".

FINDINGS AND DECLARATIONS

SEC. 2. The Congress finds and declares that the public has an interest in preserving stability in the relationship between professional sports teams and the communities in which they operate and in encouraging professional team sports leagues to promote the economic and geographic stability of their member clubs: Therefore, be it enacted, that—

(1) It shall not be lawful by reason of any provision of the antitrust laws for a professional team sports league and its member clubs—

(a) to enforce rules or agreements authorizing the membership of the league to decide that a member club of such league shall

not be relocated from its league-franchised home area, provided that nothing in this subsection (a) shall otherwise affect the applicability or nonapplicability of the antitrust laws to any action instituted by a municipality or other public authority challenging the relocation of a member club from its league-franchised home area or any action by a member club under the antitrust laws challenging a league decision disapproving the relocation of a member club if the member club seeking to relocate has incurred an annual net operating loss for four or more consecutive seasons immediately preceding its proposed relocation; or

(b) to enforce rules or agreements for the division of league or member club revenues that tend to promote comparable economic opportunities for the member clubs of such a league.

(2) Subject to the terms of subsection 1(a) of this section, any civil action under the antitrust laws to challenge a league decision granting or denying permission to a member club to relocate must be commenced in a United States district court having jurisdiction under title 28, United States Code, section 1331, except that no such action may be brought in any district wherein such member club is located or to which such member club proposes to relocate.

INAPPLICABILITY TO CERTAIN MATTERS

SEC. 3. Nothing contained in this Act shall—

(a) be deemed to change, determine, or otherwise affect the applicability or nonapplicability of the labor laws, the antitrust laws, or any other provision of law to the wages, hours, or other terms and conditions of player employment within any sports league, to any player employment matter within any sports league, or to any collective bargaining rights and privileges of any player union within any sports league;

(b) exempt from the antitrust laws any agreement to fix the prices of admission to sports contests;

(c) exempt from the antitrust laws any predatory practice or other conduct with respect to competing sports leagues which would otherwise be unlawful under the antitrust laws; or

(d) modify any existing Federal statutes relating to the television practices of sports leagues, or change, determine, or otherwise affect the applicability or non-applicability of the antitrust laws or communications laws to any form of joint dealing practices by sports leagues with respect to the sale of any form of television.

FEDERAL PREEMPTION

SEC. 4. Notwithstanding any other provision of law, no State or political subdivision thereof shall establish, maintain, or enforce any regulation of commerce that imposes any limitation on the collective conduct of professional team sports leagues or their member clubs authorized by this Act.

APPLICABILITY TO PENDING ACTIONS

SEC. 5. This Act shall apply to any action commenced after the date of enactment of this Act and to any pending action involving the termination of use of a municipal or other public stadium or arena by the relocation of a member club of a professional team sports league from its league-franchised home area if the stadium or arena used by such club in its home area was constructed with funds obtained through the sale of public or governmental bonds, the interest on which is exempt from income tax under title 26 and which are not fully retired, and the relocation is the subject of one or more lawsuits commenced in any State or Federal court by a municipality, a public authority, or any other party.

DEFINITIONS

SEC. 6. For purposes of this Act, the term "professional team sports league" means the organized professional team sports of basketball, football, hockey, or soccer.

[From the San Francisco Examiner, Nov. 19, 1982]

AL DAVIS STANDS TO REAP MILLIONS ON OLYMPICS

LOS ANGELES.—Raiders owner Al Davis could make millions of dollars during the 1984 Olympics because the Coliseum Commission gave him exclusive control over luxury boxes he plans to build at the Coliseum, it was reported today.

The disputed agreement with Davis, made to lure his NFL franchise from Oakland, apparently conflicts with a pact signed earlier with organizers of the 1984 Olympics, the Los Angeles Times said.

Twenty months prior to reaching the agreement with Davis, the commission signed a contract with the Los Angeles Olympic Organizing Committee that gave it use of "all of the facilities at the Coliseum" during the games and providing the committee with control "over the sales of tickets for all events."

The latest estimates say the luxury seats could bring in between $6 million and $15 million in ticket sales during the games.

"There are mistakes we made," M. J. Frankovich, president of the Coliseum Commission, told the Times. He said the contract signed July 7 to bring the Raiders to the Coliseum, vacated when the Rams moved to suburban Anaheim, "may be . . . in violation" of the earlier contract the commission signed with the Olympic committee.

The agreement, which has yet to be put in its final technical form, gave Davis complete control over 174 luxury boxes with 12 seats each that he plans to construct at his expense on the Coliseum rim before the 1984 games. The estimate cost of the 2,088 seats is $12 million.

Davis controls the seats for all events staged at the Coliseum, but is obligated to give the commission 25 percent of whatever he collects for Olympic events.

Under the agreement reached with Olympic organizers, the organizing committee was to keep 90 percent of the revenue and the Coliseum Commission was to get the other 10 percent as a rental fee.

Consequently, only the Olympic committee can sell tickets for the games, while Davis controls the best seats available at the Coliseum.

Frankovich said Davis has proposed "a fair deal" in talks with Olympic officials that would leave the Raiders' owner with 50 percent of the revenue from the boxes, with the Olympic committee and the Coliseum Commission evenly splitting the rest.

Olympics President Peter Ueberroth has turned down the proposal, but talks are continuing. Frankovich said, adding, "Both Ueberroth and Davis understand they must settle or someone will go to a lawsuit."

Meanwhile, a state auditor is looking into the finances of the Coliseum to determine if the traditionally self-sustaining complex will need a public bailout to meet its $2.5 million budget. The deal bringing the Raid-

ers to Los Angeles was among the matters being looked into.

[From the Oakland Tribune, Nov. 19, 1982]

OLYMPICS PROFIT FOR AL DAVIS?

(By Kenneth Reich)

LOS ANGELES.—Raiders owner Al Davis stands to make several million dollars from the 1984 Olympics if his disputed contract with the Los Angeles Coliseum Commission—giving him exclusive control over luxury boxes that he plans to build at the Coliseum—is allowed to stand.

The agreement, in effect, gives Davis control over the most valuable seats during the Olympic Games, seats which according to the latest estimates could bring in between $6 million and $15 million in ticket sales during the games.

But Los Angeles Olympic Organizing Committee objections to this arrangement have been stated more and more forcefully in the four months since the Coliseum Commission signed with Davis July 7, and even leaders of the commission have grown uneasy.

Coliseum Commission President M. J. Frankovich, acknowledging in an interview this week that "there are mistakes we've made," conceded that the contract bringing the Raiders to the Coliseum "may be . . . in violation" of the earlier contract the commission signed with the Olympic committee.

The commission's July agreement with Davis, which has not yet been put in final technical form, gave him total control over 174 luxury boxes with 12 seats each, a total of 2,088 seats, that he plans to construct at his expense on the Coliseum rim before the 1984 games. Their estimated cost is $12 million

Davis' control includes all events staged at the Coliseum, not just Raiders games, although he is obligated to give the commission 25 percent of whatever he collects for Olympic events.

But 20 months prior to the Davis agreement, the commission signed a contract with the Los Angeles Olympic Committee giving the committee use of "all of the facilities at the Coliseum" during the Olympics and providing that the Olympic committee "shall retain control over the sale of tickets for the (Olympic) events."

Under this agreement, the Olympic committee was to keep 90 percent of the revenue and the Coliseum Commission was to get the other 10 percent as a rental fee.

Frankovich conceded this week that the Olympic committee has legal control over the tickets.

So, as it now stands, only the Olympic committee can sell tickets to the games, but only Davis can offer the best seats in the house.

But this impasse cannot last indefinitely.

In a memo to Coliseum General Manager Jim Hardy, Joel R. Bennett, a special assistant Los Angeles County counsel, said that objections from the Olympic committee to the pact with Davis are valid insofar as distribution of the Olympic revenues from the luxury boxes is concerned.

"Do you think that (Los Angeles Olympics President Peter V.) Ueberroth . . . will plead a constructive breach of contract and move to the Rose Bowl?" Bennett asked in his memo.

"That might hit Al Davis where it hurts, because of the loan provision of the Raiders' contract giving him a hold on the Olympic rentals."

The loan provision Bennett referred to contains clauses giving Davis loans and credit totaling $6.7 million over the next five years, some of which presumably would be used to help pay for the boxes. And part of the money for the loans may come out of rent the Olympics committee pays for use of the Coliseum during the Games.

Suggestions that the Olympics Committee may move some events irritates some Coliseum Commission members who had a hand in working out the deal with Davis.

Defending the agreement this week, Stanley Sanders, who sat on the commission's three-man negotiating committee, remarked, "The Coliseum Commission can't be held to make a series of different lease agreements completely consistent with each other."

And Sanders added that if the Olympic committee does not like the deal with Davis, it has only two options: It can either refuse to sell tickets to the luxury boxes, leaving them dark during the games, or it can move the Olympics out of the Coliseum.

[From the Los Angeles Times, Nov. 19, 1982]

RAIDERS' DAVIS MAY WIN GOLD FROM OLYMPICS

(By Kenneth Reich)

Raiders owner Al Davis stands to make several million dollars from the 1984 Olympics if his disputed contract with the Coliseum Commission—giving him exclusive control over luxury boxes he plans to build at the Coliseum—is allowed to stand.

The agreement, in effect, gives Davis control over the most valuable seats during the Olympic Games—seats which according to the latest estimates could bring in between $6 million and $15 million in ticket sales during the games.

But Los Angeles Olympics Organizing Committee objections to this arrangement have been stated more and more forcefully in the four months since the Coliseum Commission signed with Davis on July 7, and even leaders of the commission have grown uneasy.

THERE ARE MISTAKES

Coliseum Commission President M. J. Frankovich—acknowledging in an interview this week that "there are mistakes we've made"—conceded that the contract bringing the Raiders to the Coliseum "may be . . . in violation" of the earlier contract the commission signed with the Olympics committee.

The commission's July agreement with Davis—which has not yet been put in final technical form—gave him total control over 174 luxury boxes with 12 seats each, a total of 2,088 seats, that he plans to construct at his expense on the Coliseum rim before the 1984 games. Their estimated cost is $12 million.

Davis' control includes all events staged at the Coliseum, not just Raider games, although he is obligated to give the commission 25 percent of whatever he collects for Olympic events.

But 20 months before the Davis agreement, the commission signed a contract with the Los Angeles Olympic Committee giving the committee use of "all of the facilities at the Coliseum" during the Olympics and providing that the Olympic committee "shall retain control over the sale of tickets for the (Olympic) events."

Under this agreement, the Olympic committee was to keep 90 percent of the revenue and the Coliseum Commission was to get the other 10 percent as a rental fee.

Frankovich conceded this week that the Olympic committee has legal control over the tickets.

So, as it now stands, only the Olympic committee can sell tickets to the games, but only Davis can offer the best seats in the house.

But this impasse cannot last indefinitely.

In a memo to Coliseum General Manager Jim Hardy, Joel R. Bennett, a special assistant Los Angeles county counsel, said that objections from the Olympic committee to the pact with Davis are valid insofar as distribution of the Olympic revenues from the luxury boxes is concerned.

"Do you think that (Los Angeles Olympics President Peter V.) Ueberroth * * * will plead a constructive breach of contract and move to the Rose Bowl?" Bennett asked in his memo.

"That might hit Al Davis where it hurts, because of the loan provision of the Raiders' contract giving him a hold on the Olympic rentals."

The loan provision Bennett referred to contains clauses giving Davis loans and credit totaling $6.7 million over the next five years, some of which presumably would be used to help pay for the boxes. And part of the money for the loans may come out of rent the Olympic committee pays for use of the Coliseum during the games.

Suggestions that the Olympic committee may move some events irritates some Coliseum Commission members who had a hand in working out the deal with Davis.

Defending the agreement this week, Stanley Sanders, who sat on the commission's three-man negotiating committee, remarked, "The Coliseum Commission can't be held to make a series of different lease agreements completely consistent with each other."

And Sanders added that if the Olympic committee does not like the deal with Davis, it has only two options: It can either refuse to sell tickets to the luxury boxes, leaving them dark during the games, or it can move the Olympics out of the Coliseum.

Commission President Frankovich agreed that the Olympic committee has some gripes coming, but he insisted that the way to settle the matter is for the committee to agree to split the revenue with Davis.

Indeed, he said, Davis has already proposed what Frankovich describes as "a fair deal."

Frankovich said that he and Davis had met privately with Ueberroth and his top aide, Olympics General Manager Harry Usher, at the Bel-Air Country Club the night of Nov. 11 said that Davis had suggested that he take 50 percent of the revenue from the boxes, the Olympic committee 25 percent and the Coliseum Commission 25 percent.

Frankovich said that Ueberroth had turned down the proposal but he said further talks are in prospect. "Both Ueberroth and Davis understand they must settle or someone will go to a lawsuit," he remarked.

Usher, speaking for the Olympic committee, responded that while Davis had "thrown some numbers up in the air" during the meeting, he did not believe that a formal proposal had been made. "There's talk, there's always talk sitting in a two-hour meeting, but I think it would not be proper to say there was an offer," he said.

But, he and Ueberroth both reported, Davis had made it plain that he rejected "totally" the Olympic committee's position that the committee's original contract with the Coliseum Commission ought to be en-

forced and that the committee should receive 90 percent of all ticket revenue at the Coliseum, including revenue from the boxes.

"As far as (our) alternatives are concerned" Usher said, "we've had discussions with our legal counsel as to our avenues of legal relief, including the ability to move parts of the things that are planned for the Coliseum area."

However, Ueberroth and Usher both indicated that they are by no means anxious to do this. They fear any move from the Coliseum would alienate both the black community near the facility and high officials at City Hall.

They declined to discuss their options—if agreement cannot be reached—in any greater detail. But they said that they do not intend to give in to what they regard as a breach of their contract. That contract they noted, will bring the Coliseum Commission at least $2 million to $3 million in rental fees and more than $5 million in Olympics-financed refurbishments.

In a brief telephone conversation, Davis declined to comment on the details of the dispute, other than to ask pointedly: "Who's going to build the boxes?"

Coliseum Commission officials emphasized that they feel that the commission had little choice but to give Davis a good deal, even if it contradicted their pact with the Olympic Committee.

Frankovich said, "We were sitting there knowing it was going to be difficult to get an agreement that would coincide with our other agreements."

But the fact of the matter, he explained, was that the commission no longer had the financing it had in 1980—when it first started dealing with Davis—to put in the luxury boxes on its own.

Frankovich said that once it became clear that only Davis could build the boxes, then there was little choice but to give him total control.

And the Coliseum Commission's public relations chief, Glenn Mon, said it is important to appreciate what a tough bargaining situation the negotiators faced in dealing with a professional team executive.

"Al Davis is not unique among professional football owners," Mon said. "They've got to be some of the most greedy piranhas anywhere."

The difficulty the Coliseum Commission faced was also referred to in a memo Asst. County Counsel Bennett wrote to state Deputy Atty. Gen. Norman Flette on the Commission-Davis agreement.

"Presumably, the July agreement might be justified on the ground that Los Angeles is willing to pay or do most anything to get and keep the Raiders," Bennett wrote.

Comment from the Raiders organization came mostly from Irv Kaze, a top assistant to Davis.

He said, "Al signed the lease without knowing anything at all relative to the Olympic lease."

Upon reading the two agreements, however, Kaze said it was obvious that the same attorneys were not used in the two negotiations, since, he said, "a single lawyer would not get involved in such discrepancies."

In fact, the Coliseum Commission did use private attorneys in its talks with Davis but public attorneys, from the state, county and city, in its earlier talks with Olympic officials. Frankovich said that in trying to put the July 7 agreement with Davis in final form, the commission is once again using public attorneys in an attempt to reconcile the two arrangements.

At the Olympic committee, officials estimate that if Davis wins, he could get a $6 million windfall.

Sanders, speaking for the Coliseum Commission, said he thinks Davis' profit will be on the order of $6 million or $8 million.●

YES VIRGINIA, THERE REALLY IS AN UNCLE SAM IN TROY, N.Y.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 5 minutes.

● Mr. STRATTON. Mr. Speaker, on September 11, 1982, a ceremony was held at the gravesite of Samuel Wilson in Troy, N.Y. Mr. Wilson is the gentleman whom we all know so well as "Uncle Sam," and it was in his honor that the title was originated.

Donald McNaughton, a retired editor of the Troy Record, gave the remarks at this ceremony. And since "Uncle Sam" Wilson has had an impact on the Federal Government in so many ways, I wanted to bring Mr. McNaughton's remarks to the attention of my colleagues.

There really was an "Uncle Sam" who played an important role in the history of the United States. My constituents in Troy, N.Y., and I are honored to have had such a highly regarded citizen as "Uncle Sam" Wilson from our area; and I am delighted to bring the observances on September 11 and Mr. Donald McNaughton's speech on that occasion to the attention of my colleagues.

The speech is as follows:

Most of you are familiar with the life and deeds of Uncle Sam Wilson, so my remarks today will not be confined to a mere repetition of these in detail but rather a discussion of the example he set which certainly has played a major role in leading so many of our sons and daughters to fame and immortality in our nation's history.

Born in Menotomy, Mass., which later became West Cambridge and is now Arlington, on September 13, 1766, Samuel Wilson migrated as a youth to Mason, N.H., when he was mustered out as a service boy in the American army during the Revolution. Accompanied by his brother Ebeneezer, he walked to Troy from Mason, N.H. in 1789, unaware that his name would some day capture and dramatize the American tradition.

He arrived here penniless but spurred by the belief that this new country was the land of opportunity, he eventually became one of the builders of Troy. Starting with hard work at odd jobs, he soon saved enough to open a brickyard and his field of business expanded. He established a slaughterhouse with his brother and quickly became known in the community for his honesty, kindness and thoughtful treatment of his employees, as well as his unshakable belief in God and his rigid observance of the Ten Commandments. This won him the love and respect of neighbors throughout the countryside—so much so that they began affectionately calling him their "Uncle Sam."

He was later appointed a Federal Meat Inspector during the war of 1812 and was ordered to furnish 300 barrels of prime beef to the Army. As these were inspected and stamped "U. S.", meaning United States, area soldiers said it meant it was Uncle Sam's beef and soon the sobriquet spread to everything bearing the initials "U. S." and cartoonists began characterizing him as the symbol of our Government.

Thus Troy gave birth to our National Symbol which has stood through the years and inspired so many Americans to greater roles in our Nation's history. Surely this was not an accident that could have just happened to any man. Actually, Samuel Wilson was able to accomplish what he did because of the clean, honorable life he had led, which enabled Americans psychologically to relate to the United States—not as an inanimate expanse of land—but rather as a watchful guardian, a kindly uncle, or yes—even a father, who was devoted to their welfare, who raised their standard of living to the highest plateau ever known to the human race.

When one reflects upon the nation's blessings of freedom to work and worship as they please, to select those who will govern them, to make of their lives what they will, to live out their days without the worry of political persecution, the one responsible for all this who comes to mind is "Uncle Sam"; and this came about because his own life was a living example of everything this great land should be.

Though Samuel Wilson died July 1, 1854 at the age of 88, his spirit has influenced the lives of untold millions of Americans down through the years. How many American fighting men ever went into service without a thought of Uncle Sam, to whom they could relate as everything for which this Country stood? Can anyone doubt that Uncle Sam rode with Lindberg on that first solo flight across the Atlantic for the glory of the United States, or that his spirit did not share that "small step for man, but giant stride for Humanity" with our first astronaut on the moon?

Likewise, the spirit of Uncle Sam has inspired many in Troy. John A. Griswold and John Winslow, during the Civil War, argued long and determinedly for the construction of the ironclad Monitor and cast its armor plates at their Troy foundry, with the result that the course of naval history was changed and Uncle Sam's realm preserved and the same two men, with Alexander Holley, made the first steel from iron ever produced in the United States, at their Troy plant.

Henry Burden devised a machine operated by the world's largest water wheel, to turn out millions of horseshoes so badly needed by the Union Army in the Civil War and later turned out spikes by the millions to unite this great nation by rail from coast to coast. These men, in effect, made Troy the cradle of the nineteenth century industrial revolution. Surely, the spirit of Uncle Sam played its part here. Many more Trojans attained fame in their fields from education, to invention and to sports.

When our Country was threatened by enemies in war, Americans by the millions fought bravely and determinedly to preserve the freedom and good life Uncle Sam had given them, in answer to his call of "I WANT YOU" proclaimed from posters outside recruiting offices throughout the Country.

Unforgettable among these, were two Troy heroes—Lt. Col. William J. O'Brien and Sgt. Thomas A. Baker, both of whom received the Congressional Medal of Honor Posthumously for their part in World War II. Never before had this highest honor

been given to two soldiers of the same city in the same unit, at the same time.

Ladies and gentlemen, all these people and many more represent the spirit of Uncle Sam. They are lasting proof that while his body lies beneath the sod here, the spirit he made famous has remained with us throughout the years and will never die.

Sam Wilson was not just a man who lived and died in the long, long ago. He was a man for whom God had a plan to inspire the people of a great new nation to live like he did—with honor, dignity, respect and justice for all.●

CONFERENCE REPORT ON H.R. 7072

Mr. WHITTEN submitted the following conference report and statement on the bill (H.R. 7072) making appropriations for the Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-957)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7072) making appropriations for the Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 8, 9, 10, 12, 30, 35, 36, 38, 39, 40, 41, 59, 69, 71, and 72.

That the House recede from its disagreement to the amendments of the Senate numbered 11, 17, 24, 25, 26, 27, 28, 29, 32, 46, 47, 48, 49, 50, 51, 52, 53, 54, 57, 58, 62, 63, and 68, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$452,378,000*; and the Senate agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,927,000*; and the Senate agree to the same.

Amendment numbered 4:

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$26,533,000;* and the Senate agree to the same.

Amendment numbered 5:

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$17,000,000;* and the Senate agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$5,760,000;* and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendments as follows:

In lieu of the sum proposed by said amendment insert *$244,966,000*; and the Senate agree to the same.

Amendment numbered 13:

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendments as follows:

In lieu of the sum proposed by said amendment insert *$2,000,000*; and the Senate agree to the same.

Amendment numbered 15:

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendments as follows:

In lieu of the sum proposed by said amendment insert *$5,451,000*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senator numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$267,915,000*; and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senator numbered 18, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$37,751,000*; and the Senate agree to the same.

Amendment numbered 20:

That the House recede from its disagreement to the amendment of the Senator numbered 20, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$51,035,000*; and the Senate agree to the same.

Amendment numbered 21:

That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$4,639,000*; and the Senate agree to the same.

Amendment numbered 22:

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,403,000*; and the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$31,912,000; of which not less than $1,480,000 shall be available for the Wholesale Market Development Program*; and the Senate agree to the same.

Amendment numbered 31:

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *22,310*; and the Senate agree to the same.

Amendment numbered 33:

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$123,745,000*; and the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$12,500,000*; and the Senate agree to the same.

Amendment numbered 43:

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$289,288,000;* and the Senate agree to the same.

Amendment numbered 44:

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert: *Provided further, That in addition to any other authority that the Secretary may have to defer principal and interest and forego foreclosure, the Secretary may permit, at the request of the borrower, the deferral of principal and interest on any outstanding loan made, insured, or held by the Secretary under this title, or under the provisions of any other law administered by the Farmers Home Administration, and may forego foreclosure of any such loan, for such period as the Secretary deems necessary upon a showing by the borrower that due to circumstances beyond the borrower's control, the borrower is temporarily unable to continue making payments of such principal and interest when due without unduly impairing the standard of living of the borrower. The Secretary may permit interest that accrues during the deferral period on any loan deferred under this section to bear no interest during or after such period: Provided, That if the security instrument securing such loan is foreclosed such interest as is included in the purchase price at such foreclosure shall become part of the principal and draw interest from the date of foreclosure at the rate prescribed by law; and the Senate agree to the same.*

Amendment numbered 61:

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$10,565,657,000*; and the Senate agree to the same.

Amendment numbered 64:

That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$82,146,000*; and the Senate agree to the same.

Amendment numbered 65:

That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$74,454,000*; and the Senate agree to the same.

Amendment numbered 66:

That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$22,892,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 14, 19, 34, 37, 45, 55, 56, 60, 67, and 70.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7072) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

TITLE I—AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING AND MARKETING

OFFICE OF THE GENERAL COUNSEL

The conferees direct the Office of the General Counsel to station an attorney for full-time work in the State of Oklahoma and another in the State of Mississippi. The conferees expect that these attorneys will be co-located with the FmHA offices at Stillwater, Oklahoma, and Jackson, Mississippi. It has come to the attention of the conferees that serious problems have developed in the delivery of Farmers Home programs because of a lack of departmental legal services within those States.

AGRICULTURAL RESEARCH SERVICE

Amendment No. 1: Appropriates $452,378,000 for the Agricultural Research Service instead of $451,530,000 as proposed by the House and $455,201,000 as proposed by the Senate.

For animal health and protection the conference agreement provides $21,468,000 as proposed by the House instead of $23,468,000 as proposed by the Senate.

For range and pasture research the conference agreement provides $6,482,000 as proposed by the House instead of $6,732,000 as proposed by the Senate.

For beef forage research the conference agreement provides $1,500,000 as proposed by the Senate instead of $1,220,000 as proposed by the House.

For dairy forage research the conference agreement provides $2,618,000 instead of $2,318,000 as proposed by the House and $3,000,000 as proposed by the Senate.

For the Beckley, West Virginia, soil laboratory the conference agreement provides $1,809,000 instead of $1,619,000 as proposed by the House and $2,000,000 as proposed by the Senate.

For grasshopper fungus the conference agreement provides $175,000 as proposed by the Senate instead of $153,000 as proposed by the House.

For the control of perennial weeds, including Johnson grass and Bermuda grass, the conference agreement provides $200,000 as proposed by the Senate instead of $144,000 as proposed by the House.

Amendment No. 2: Restores House language which will allow the Agricultural Research Service to construct a fruit and nut germplasm repository at Geneva, New York.

The conferees have agreed that up to $9,000,000 is available for the Human Nutrition Research Center at Tufts University and up to $6,000,000 is available for the Human Nutrition Center at Grand Forks, North Dakota. The conferees will expect that the funding for these two laboratories shall not adversely impact the budgeted amounts for the other nutrition research programs and facilities.

Buildings and facilities

Amendment No. 3: For buildings and facilities of the Agricultural Research Service the conference agreement appropriates $1,927,000 instead of $850,000 as proposed by the House and $2,750,000 as proposed by the Senate.

The conference agreement provides $827,000 for the Old West Veterinary School in Nebraska, instead of $500,000 as proposed by the House and $2,000,000 as proposed by the Senate. The $827,000 provided is to be matched by the State and will provide for the initial planning and design of the facility.

The conference agreement provides $350,000 for a small farm research demonstration station in Oklahoma, as proposed by the House. The Senate bill contained no provision for this research.

The conference agreement provides $750,000 for planning in connection with the establishment of a forage seed center at Corvallis, Oregon, as proposed by the Senate. The House bill contained no provision for this planning.

COOPERATIVE STATE RESEARCH SERVICE

Amendment No. 4: Earmarks $26,533,000 for special research grants instead of $24,409,000 as proposed by the House and $27,280,000 as proposed by the Senate. The following table reflects the conference agreement for special research grants:

	House	Senate	Conference
Soybean cyst nematode	$240,000	$300,000	$300,000
Energy research		500,000	
Aquaculture	240,000	300,000	270,000
Dairy photoperiod	34,000		34,000
Dairy goats	100,000		100,000
Bean flower	99,000		99,000
Peach tree short life		192,000	192,000
TCK Smut		361,000	361,000
Stocker cattle	140,000		140,000
Agronomic studies	110,000		110,000
Dried bean	24,000	25,000	25,000
Sunflower midge		80,000	80,000
Potatoes		300,000	200,000
Biomass energy		1,800,000	1,200,000
All other studies	23,422,000	23,422,000	23,422,000
Total	24,409,000	27,280,000	26,533,000

Amendment No. 5: Earmarks $17,000,000 for competitive research grants instead of $10,000,000 as proposed by the House and $18,000,000 as proposed by the Senate. Within the total provided in the conference agreement $15,000,000 shall be for plant science grants and $2,000,000 shall be for human nutrition research grants.

Amendment No. 6: Earmarks $5,760,000 for the support of animal health and disease research as authorized by section 1433 of Public Law 95-113 instead of $6,000,000 as proposed by the Senate. The House bill contained no provision for this research.

Amendment No. 7: Appropriates a total of $244,966,000 for the Cooperative State Research Service instead of $230,082,000 as proposed by the House and $246,953,000 as proposed by the Senate.

EXTENSION SERVICE

Amendment No. 8: Earmarks $3,000,000 for the urban gardening program as proposed by the House. The Senate bill contained no provision for this program.

Amendment No. 9: Earmarks $7,531,000 for the pest management program as proposed by the House instead of $7,067,000 as proposed by the Senate.

Amendment No. 10: Earmarks $1,020,000 for the farm safety program as proposed by the House. The Senate bill contained no provision for this program.

Amendment No. 11: Deletes House language earmaking $285,000 for the energy extension program.

Amendment No. 12: Deletes Senate language earmaking $702,000 for the nonpoint source pollution program.

Amendment No. 13: Appropriates $2,000,000 for the Renewable Resources Extension Act as proposed by the Senate. The House bill contained no funds for this program.

The conferees are concerned that the current distribution of the funds for the Renewable Resources Extension Act places a greater emphasis on building broad-based support throughout the States rather than targeting funds in a more limited fashion consistent with the purposes of the Act, namely the respective capabilities of their private forests and rangelands for yielding renewable resources and the relative needs for such resources. Therefore, the conferees direct the Department to reexamine the current funding formula in light of the conferees' concern as to the limited availability of funds, so funds can be distributed to States with the greatest need.

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $323,221,000 for the Cooperative Extension Service instead of $321,506,000 as proposed by the House and $321,439,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 15: Appropriates $5,451,000 for Federal administration and coordination of the Extension Service instead of $5,521,000 as proposed by the

House and $5,171,000 as proposed by the Senate. The agreement earmarks $280,000 for two pilot technology transfer projects instead of $350,000 as proposed by the House. The Senate bill contained no provision for this program.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Salaries and expenses

Amendment No. 16: Appropriates $267,915,000 for salaries and expenses of the Animal and Plant Health Inspection Service instead of $266,531,000 as proposed by the House and $270,332,000 as proposed by the Senate. The conference agreement includes the following program amounts:

	House	Senate	Conference
Boll weevil	$1,029,000	$2,846,000	$1,029,000
Pink bollworm	2,408,000	591,000	2,408,000
Range caterpillar		160,000	160,000
Brucellosis eradication [1]	77,796,000	90,896,000	84,346,000
Interstate inspection of livestock	5,199,000	4,709,000	4,709,000
Scabies eradication	493,000		493,000
Screwworm	52,740,000	46,086,000	49,413,000
Veterinary diagnostics	6,328,000	6,015,000	6,328,000
Miscellaneous animal diseases	233,000	224,000	224,000

[1] Includes such sums as may be required for whole herd depopulation.

The conferees direct that the rate structure for brucellosis indemnity payments, which was in effect on November 25, 1982, will continue. Further, the conferees direct the Animal and Plant Health Inspection Service to defer any revision to brucellosis indemnity payments until such proposals are submitted to the appropriate committees of Congress for their review in connection with the 1984 budget request.

The conferees take note that both the House and Senate have strongly expressed their continuing support of the brucellosis eradication program. Consequently, the conferees intend that no reprogramming of brucellosis funds will be approved during fiscal year 1983, and that only a fair share of administrative absorptions will be approved. The conferees will expect the Department to submit a supplemental budget request to fund the boll weevil eradication program when producers in those States pass referenda to pay at least 70 percent of the cost of the program.

Amendment No. 17: Earmarks $1,000,000 for emergency contingency expenses of the Animal and Plant Health Inspection Service as proposed by the Senate instead of $2,500,000 as proposed by the House. The conferees note that the need for contingency funds has been reduced because the Secretary now has the authority to transfer from other appropriations or funds such sums as he may deem necessary to meet emergency conditions for the arrest and eradication of contagious or infectious diseases or pests. The Secretary should exercise this emergency authority to meet needs as they arise, rather than budget for idle contingency reserves or request reprogramming of funds which were appropriated for other specific purposes.

FOOD SAFETY AND INSPECTION SERVICE

The conferees note that the Secretary shares the concern that adequate field supervision be maintained over meat and poultry inspection in the State of Michigan, and has given assurances that he will watch the situation closely to insure that the program in Michigan will operate smoothly during the period that studies related to area offices are being conducted.

ECONOMIC RESEARCH SERVICE

Amendment No. 18: Appropriates $37,751,000 for the Economic Research Service instead of $37,251,000 as proposed by the House and $38,251,000 as proposed by the Senate.

Amendment No. 19: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that not less than $66,000 shall be available for preparing and disseminating forecasts of farm sector receipts, production expenses, and net income indicators for the crop year 1983 on a quarterly basis commencing prior to December 31, 1982. The conferees agree that these reports are to cover crops planted in the fall of 1982 and spring of 1983.

STATISTICAL REPORTING SERVICE

Amendment No. 20: Appropriates $51,035,000 for the Statistical Reporting Service instead of $50,823,000 as proposed by the House and $51,185,000 as proposed by the Senate.

The conference agreement provides $62,000 added by the Senate to restore catfish and mink reports.

The conference agreement also provides $150,000 for the acquisition of LANDSAT data instead of $300,000 as proposed by the Senate. The House bill contained no funds for acquisition of LANDSAT data. The conferees have agreed to provide half of the funds requested for LANDSAT data and will expect the Department to renegotiate the contracts for the acquisition of this data. The conferees are convinced that the charges proposed for acquisition of LANDSAT data are excessive and can be renegotiated. The conferees will further expect that the Department will not reprogram any funds for the acquisition of LANDSAT data. However, should renegotiation fail to allow for the acquisition of all the data needed by the Department, the Department will be expected to submit a supplemental request to the Congress for the additional funds.

AGRICULTURAL COOPERATIVE SERVICE

Amendment No. 21: Appropriates $4,639,000 for the Agricultural Cooperative Service instead of $3, 999,000 as proposed by the House and $5,000,000 as proposed by the Senate. The increase of $640,000 over the House bill is based on an increase of $140,000 for the development of criteria cooperative managers can utilize in evaluating the financial performance of their cooperatives and an increase of $500,000 to allow for increased efforts to assist and encourage agricultural cooperatives in international marketing.

WORLD AGRICULTURAL OUTLOOK BOARD

Amendment No. 22: Appropriates $1,403,000 for the World Agricultural Outlook Board instead of $1,353,000 as proposed by the House and $1,453,000 as proposed by the Senate. The conference agreement provides $50,000 for the acquisition of LANDSAT data instead of $100,000 as proposed by the Senate. The basis for this agreement is discussed under LANDSAT data in connection with Amendment No. 20.

AGRICULTURAL MARKETING SERVICE

Marketing services

Amendment No. 23: Appropriates $31,912,000 for the Agricultural Marketing Service marketing services as proposed by the House instead of $30,412,000 as proposed by the Senate. The conference agreement also restores House language earmarking funds for the Wholesale Market Development Program.

The conference agreement includes an increase of $20,000 for the cotton fiber evaluation program to restore the spinning tests.

PACKERS AND STOCKYARDS ADMINISTRATION

Amendment No. 24: Appropriates $8,668,000 for the Packers and Stockyards Administration as proposed by the Senate instead of $8,268,000 as proposed by the House.

FARM INCOME STABILIZATION

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

Salaries and expenses

Amendment No. 25: Appropriates $55,962,000 for salaries and expenses of the Agricultural Stabilization and Conservation Service as proposed by the Senate instead of $54,699,000 as proposed by the House.

Amendment No. 26: Provides that the total funds available to the Agricultural Stabilization and Conservation Service for salaries and expenses shall be $370,780,000 as proposed by the Senate instead of $369,517,000 as proposed by the House.

The additional funds are provided for salaries and expenses associated with the restoration of the agricultural conservation program, the forestry incentives program and the water bank program.

Dairy indemnity program

Both the House and the Senate have provided $7,000,000 for the dairy indemnity program. This amount is in recognition of the losses suffered by dairy farmers in Hawaii during fiscal years 1982 and 1983 due to contamination of milk.

On September 21, 1982, the Food and Drug Administration announced a reduction in the action level for heptachlor, from 0.3 to 0.1 parts per million. The conferees expect that the Department will keep the appropriate committees of Congress fully apprised of the effect of this change upon the claims submitted for payment under the dairy indemnity program.

CORPORATIONS

FEDERAL CROP INSURANCE CORPORATION

Administrative and operating expenses

Amendment No. 27: Appropriates $235,200,000 for administrative and operating expenses of the Federal Crop Insurance Corporation as proposed by the Senate instead of $262,140,000 as proposed by the House. The conferees expect the Corporation to continue its work in developing equitable, actuarially sound premium rates. To accomplish this specific goal, the conferees direct full funding of the budget request for underwriting, actuarial, and program development work, and earmark $15,000 within the total provided for administrative and operating expenses for the development of insurance coverage for specific crops in certain counties in Oklahoma.

Subscription to capital stock

Amendment No. 28: Appropriates $150,000,000 for subscription to capital stock as proposed by the Senate instead of $200,000,000 as proposed by the House.

COMMODITY CREDIT CORPORATION

World markets

For agricultural commodities, the world price is the only real price. The rest of the world adds taxes to their world price for their domestic market. We, however, choose to support prices, supposedly to offset cost. Then, if we offer competitively at the world

price, as they all do, they claim "dumping." The error we make is that too many of our people listen to this claim.

As a result, they sell their commodities—we store ours. Thus, we hold an umbrella over the world price and let the rest of the world make the sales.

Export credit sales

The conferees expect the administration to fully utilize the Export Credit Sales direct loan program as necessary to stimulate additional sales of U.S. farm commodities and to help meet international competition. The conferees understand that the administration intends to increase farm exports through an expanded "blended-credit" program. The conferees expect that direct loan program funds provided in this Act be utilized for additional "blended-credit" usage.

Dairy programs

In the opinion of the conferees, the deduction of 50 cents per hundredweight from the proceeds of the sale of milk shall not be in effect, withheld or collected at any time unless surplus Commodity Credit Corporation-owned stocks of dairy products are regularly offered for sale for export to the highest bidder, as authorized by the Commodity Credit Corporation Charter. Lot sizes and delivery dates shall be determined by the Secretary to allow for orderly sales.

Refusing to sell surplus dairy products and then making the farmer pay the cost of that policy is unacceptable. These dairy products are surplus to domestic needs—they are not surplus to world needs. It is unbelievable that our Nation would refuse to sell food when millions of people throughout the world go to bed hungry every night, and then make the farmer bear the cost of that policy. This policy will not work. The history of our efforts at production controls clearly demonstrates that such controls are not a satisfactory substitute for competitive sales abroad.

TITLE II—RURAL DEVELOPMENT PROGRAMS

RURAL DEVELOPMENT ASSISTANCE

OFFICE OF RURAL DEVELOPMENT POLICY

Amendment No. 29: Appropriates $2,000,000 for the Office of Rural Development Policy as proposed by the Senate instead of $2,142,000 as proposed by the House.

The conference agreement includes $250,000 for contracts as provided in the House report.

FARMERS HOME ADMINISTRATION

Rural housing insurance fund

Amendment No. 30: Provides that $3,261,000,000 of loans shall be insured as proposed by the House instead of $3,391,000,000 as proposed by the Senate. The conference agreement deletes Senate language providing $130,000,000 for moderate income housing loans. The conferees support the moderate income housing program. However, with current Farmers Home income limits it is highly doubtful that any loans could be made under this program.

Amendment No. 31: Provides that 22,310 units may be assisted under rental assistance agreements instead of 17,560 units as proposed by the House and 27,060 units as proposed by the Senate. The conference agreement provides for renewal of 17,560 units of assisted housing and the addition of 4,750 new units.

Amendment No. 32: Accepts Senate language limiting funds to new agreements.

Amendment No. 33: Provides $123,745,000 for new rental assistance agreements instead of $73,745,000 as proposed by the House and $173,745,000 as proposed by the Senate.

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which adds language providing authority to reimburse the rural housing insurance fund for rental assistance payments. This language had been included in prior-year appropriation bills.

Agricultural credit insurance fund

Amendment No. 35: Provides $840,100,000 for real estate loans as proposed by the House instead of $818,000,000 as proposed by the Senate.

Amendment No. 36: Provides not less than $53,100,000 for water development, use, and conservation loans as proposed by the House instead of $31,000,000 as proposed by the Senate.

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *: Provided, That 20 percentum of the farm ownership loans and 20 percentum of the operating loans insured, or made to be sold and insured, under this provision may be for low-income limited resource borrowers; guaranteed economic emergency loans under the Emergency Agricultural Credit Adjustment Act of 1978, $600,000,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Rural development insurance fund

Amendment No. 38: Deletes Senate language which strikes out "For loans to" and inserts "Loans may".

Amendment No. 39: Provides $375,000,000 for water and waste disposal loans as proposed by the House instead of $300,000,000 as proposed by the Senate.

Amendment No. 40: Provides $300,000,000 for industrial development loans as proposed by the House instead of $350,000,000 as proposed by the Senate. The conferees agree that up to $75,000,000 of the industrial development loans (B&I) shall be available for alcohol production facility loans.

Rural housing for domestic farm labor

Amendment No. 41: Restores House language providing that $12,500,000 shall be available for rural housing for domestic farm labor to be derived from the unexpended balances of amounts appropriated under this head in prior years. The Senate bill proposed a new appropriation of $10,000,000. The conferees are in agreement that sufficient carryover funds from prior-year appropriations are available to maintain an ongoing level for this program.

Mutual and self-help housing

Amendment No. 42: Appropriates $12,500,000 for mutual and self-help housing instead of $5,000,000 as proposed by the House and $15,000,000 as proposed by the Senate.

Salaries and expenses

Amendment No. 43: Appropriates $289,288,000 for salaries and expenses of the Farmers Home Administration instead of $286,870,000 as proposed by the House and $291,706,000 as proposed by the Senate. The conferees have agreed that the increase over the House amount shall be available only for the purpose of hiring additional staff at the local county office level to be used for the purposes of servicing the existing loan portfolio including providing counseling to the individual borrowers.

The conference agreement also earmarks $1,300,000 for the circuit rider program as proposed by the Senate instead of $1,000,000 as proposed by the House. The conferees agree that these additional funds are required in fiscal year 1983 due to the fact that the Farmers Home Administration did not contract for these services in a timely fashion in fiscal year 1982.

Amendment No. 44: Amends Senate language which would have provided that Farmers Home Administration farm loans could not be liquidated against the wishes of the borrowers if they meet certain conditions. The conference agreement amends the Senate language to repeat the existing law (7 U.S.C. 1981a) which specifies that the Secretary has the authority to defer payment of principal and interest under certain conditions.

The conferees are concerned that many FmHA family farm borrowers, who have followed good farm management practices and who have a reasonable chance to repay loans in subsequent years, are unable this year to keep current on debt repayment obligations due to low commodity prices, high interest rates, and other adverse circumstances beyond their control. The conferees will expect the Secretary to make maximum use of his discretion under all authorities available to him to avoid loan collection actions that would force out of business these family farmers. The Secretary is, therefore, encouraged to apply, through FmHA, the full scope of his authorities to defer, reschedule or reamortize loan payments and to avoid other servicing actions that would compel such borrowers to involuntarily liquidate their farming operation. The conferees will expect the Secretary and the agency to do everything possible to help family farm borrowers stay in business during their current difficulties.

The conferees also note that although FmHA testified that regulations would be changed to allow borrowers who receive loan deferrals to maintain the lower rates of interest on their loans, final regulations to implement this change have not yet been issued. The conferees will expect expeditious action to correct this.

The conferees will also expect the Department to use every means at their command to encourage the Farm Credit Administration and the banking institutions of this country to work with agricultural borrowers to provide for refinancing or deferral of repayments where appropriate and justified. These financial institutions are outside the control of the Congress. Therefore, it is essential that every effort be made to encourage them to adopt a lenient policy during the period of severe economic stress. Unless such a policy is put into effect, the demands on the Farmers Home Administration will be far beyond their capabilities to serve agriculture.

The conferees remain concerned about the number of homes FmHA currently has in inventory and the need to decrease that inventory. However, it has been brought to the attention of the conferees that FmHA has initiated a policy which limits the availability of single family housing loans on a county-wide basis when the inventory of houses in the whole county appears excessive. This policy is implemented even

though the majority of the inventory may be in one community within a county. The conferees are concerned that this policy artificially restricts the availability of housing loans in communities that have no inventory problems nor are of close proximity to homes in FmHA's inventory. Therefore, the conferees believe FmHA should review this policy and assure the continued availability of FmHA single family housing loans in communities that do not have inventory problems.

RURAL ELECTRIFICATION ADMINISTRATION

Rural electrification and telephone revolving fund loan authorizations

Amendment No. 45: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which provides that the Rural Electrification Administration shall require concurrent supplemental financing in accordance with the applicable criteria and ratios in effect as of July 15, 1982.

Under a long-standing agreement between the Rural Electrification Administration and the Federal Financing Bank, FFB has reimbursed REA for its billing and collection costs on FFB loans guaranteed by REA. The conferees have been advised that the REA-FFB agreement expired on November 30, 1982, and has not been renewed because of FFB's reported refusal to continue this reimbursement process. In view of the fact that the 1981 amendments to the Rural Electrification Act now direct the FFB to make loans under an REA guarantee at the request of the borrower, FFB's legal obligation to make loans under REA's guarantee is not contingent upon the existence of an agreement between the two agencies. REA is expected to continue providing billing and accounting and related services on existing and new loans made by FFB under an REA guarantee, and FFB is expected to continue reimbursing REA for this service.

Rural telephone bank

Amendment No. 46: Deletes House language providing that appropriation is available only upon enactment into law of authorizing legislation. This language is no longer needed since the appropriation is now authorized by law.

CONSERVATION

SOIL CONSERVATION SERVICE

Conservation operations

Amendment No. 47: Earmarks $3,742,000 for snow survey and water forecasting as proposed by the Senate instead of $3,878,000 as proposed by the House.

Amendment No. 48: Earmarks $3,757,000 for operation of plan materials centers as proposed by the Senate instead of $3,781,000 as proposed by the House.

Senate Amendment No. 47 and 48 adjust the appropriation to reflect the transfer of standard level user charges to a new account.

The conferees will expect the Soil Conservation Service to accelerate the effort to digitize soil survey information and provide cartographic soil intelligence nationwide.

Watershed and flood prevention operations

Amendment No. 49: Appropriates $194,925,000 as proposed by the Senate instead of $189,925,000 as proposed by the House.

The conferees will expect in fiscal year 1983 that the Department fund all watershed project identified by the Soil Conservation Service as being ready for construction in fiscal year 1982.

Resource conservation and development

Amendment No. 50: Adds a new legislative citation to the bill language as proposed by the Senate.

Forestry incentives program

Amendment No. 51: Deletes House language limiting the cost share to 50 percent of the total cost. The conferees will expect the Department to review the cost share program and report to the appropriate committees of Congress as to the impact cost share rates have on the amount of reforestation work accomplished.

TITLE III—DOMESTIC FOOD PROGRAMS

FOOD AND NUTRITION SERVICE

The conferees feel that: (1) national efforts to reduce hunger and malnutrition should continue; (2) a national commitment to vital nutrition programs should continue; (3) the Federal government should retain primary responsibility for child nutrition programs; and (4) State and local governments be given increased responsibility for formulation and implementation of regulations governing such child nutrition programs.

Child nutrition programs

Amendment No. 52: Povides $3,178,000,000 for the child nutrition programs as proposed by the Senate instead of $2,825,781,000 as proposed by the House, and deletes House language providing that the funds are available for the period October 1, 1982 through August 15, 1983.

Amendment No. 53: Provides $896,324,000 for the child nutrition programs by direct appropriation as proposed by the Senate instead of $544,105,000 as proposed by the House. This amount reflects the budget amendment (H. Doc. 97-262) which has been submitted for these programs.

The conferees agree that the distribution of these appropriated funds among the various child nutrition programs is as follows:

Child nutrition programs:	
School lunch program	$442,500,000
Special assistance for free and reduced price lunches	1,824,900,000
School breakfast program	327,000,000
State administrative expenses	47,730,000
Summer food service program	99,400,000
Child care food program	334,800,000
Commodity procurement	94,200,000
Nutrition studies and surveys	2,470,000
Nutrition education and training	5,000,000
Total, Child nutrition programs	3,178,000,000
Transfer from section 32	−2,281,676,000
Child nutrition programs	896,324,000

Amendment No. 54: Deletes House language providing that only claims for meals served after September 1, 1982, submitted to State agencies prior to January 1, 1984, shall be eligible for reimbursement.

Amendment No. 55: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that, if funds available for Nutrition Education and Training grants require a ratable reduction, the minimum grant for each State shall be $50,000. The conferees note that they do not intend to address this matter again and suggest that this provision should be requested of the legislative committees.

Amendment No. 56: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which requires school authorities to submit final food service claims to States within 60 days of the claim month, and requires States to submit final reports to USDA within 90 days of the claim month. This language was submitted by the administration as a budget amendment in order to improve fiscal accountability at the local, State and Federal levels.

Special milk program

Amendment No. 57: Appropriates $20,100,000 for the special milk program as proposed by the Senate instead of $28,100,000 as proposed by the House.

Feeding program for women, infants and children (WIC)

Amendment No. 58: Appropriates $1,060,000,000 for the WIC program as proposed by the Senate instead of $652,000,000 as proposed by the House. The conference agreement provides full-year funding. The House bill had proposed that funds be available only for the period October 1, 1982 through May 15, 1983. This agreement reflects the budget amendment which has been submitted for this program.

Amendment No. 59: Deletes Senate language providing that all funds appropriated for the first quarter of fiscal year 1983 for the WIC program shall be allocated to the States immediately upon enactment of this Act. This provision has been overtaken by events.

Commodity supplemental food program

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which specifies that funds for the commodity supplemental food program remain available for a two-year period.

The conferees note that there are difficulties with the current administrative funding provisions of the commodity supplemental food program. However, the conferees have declined to recommend changes in statutory provisions, and urge the legislative committees to review the situation as soon as possible.

The conferees also note that the Secretary now has certain discretionary authorities which he can use to help mitigate the problem. Because not all programs provide the full commodity supplemental food package, it is inappropriate to base a local program's administrative funds merely on the number of people served by the program. Therefore, the Secretary should refine the administrative funding formula under existing law so that local program operators receive administrative funds based on the volume of foods provided by each local operator. The Secretary should also use his existing discretionary authority to supplement the administrative grant to CSF operators with funds from section 32 and CCC because certain food items that are regular elements of the CSF package are paid for with those funds rather than with direct appropriations.

Food stamp program

Amendment No. 61: Appropriates $10,565,657,000 for the food stamp program instead of $10,646,000,000 as proposed by the Senate and $9,291,707,000 as proposed by the House, and deletes House language providing that the funds are available for the period October 1, 1982 through July 15, 1983. This amount, together with the $250,000,000 reserve, provides a total of $10,815,657,000 for the food stamp program. This reflects the budget amendment (H. Doc. 97-262) which has been submitted for this program.

The conferees are concerned that the revised budget request for the food stamp program may be inadequate to support full-year funding. That request is $81,000,000 below the Senate-passed level, and also falls significantly below current Congressional Budget Office full-year estimates. Based on even the most optimistic economic projections, the requested amount may be inadequate to support the program for the entire fiscal year. Consequently, the conferees expect the administration to submit a supplemental request if the program's estimated costs change.

Amendment No. 62: Deletes House language defining the period of time during which reserved funds will remain available.

The conferees note that no funds are provided in this bill for the proposed cash-out demonstration projects. The conferees further note that the purpose of the food stamp program is to help people obtain a more nutritious diet, and that it is questionable whether cashing-out the program could serve this purpose.

Food donations programs

Amendment No. 63: Appropriates $156,266,000 for the food donations programs as proposed by the Senate instead of $165,200,000 as proposed by the House. The conferees agree that $100,000,000 of this amount is for the elderly feeding program.

Food program administration

Amendment No. 64: Appropriates $82,146,000 for food program administration instead of $80,146,000 as proposed by the House and $82,976,000 as proposed by the Senate.

TITLE IV—INTERNATIONAL PROGRAMS

FOREIGN AGRICULTURAL SERVICE

Amendment No. 65: Appropriates $74,454,000 for the Foreign Agricultural Service instead of $70,947,000 as proposed by the House and $77,961,000 as proposed by the Senate. The conference agreement provides $3,507,000 for acquisition of LANDSAT data. The House bill had deleted all funds for the acquisition of this data and the Senate bill provided $7,014,000 for this purpose. The House action was predicated on the concern that raising the cost of LANDSAT data from $300,000 in fiscal year 1982 to over $7,000,000 in fiscal year 1983 for essentially the same data was excessive. Therefore, the House had deleted all funds for this program in order to reflect this concern. The conference action of providing one-half of the funds is intended to encourage the Department to renegotiate the contract and provide for a more reasonable price for the LANDSAT data. The conferees wish to stress that they strongly support this program and will expect the Department to carry it on as they have been. Furthermore, the Department is not to reprogram any funds into this program. However, if additional funds are required, then the conferees will expect the Department to submit a supplemental request.

TITLE V—RELATED AGENCIES

FOOD AND DRUG ADMINISTRATION

Veterinary biologics

The Food and Drug Administration and the Animal and Plant Health Inspection Service are now considering initiating the licensing and/or regulation of manufacturers of veterinary biologics products which are not shipped in interstate commerce. These manufacturers have been subject to State regulatory agencies for many years. Considering the number of ongoing high-priority programs conducted by FDA and APHIS, the conferees feel that the proposal to initiate a program during a time of resource constraint is a subject for careful study. Therefore, the conferees direct the agencies to submit a thorough analysis of the advisability and justification of proceeding with this program to the appropriate committees of Congress for their review and possible action.

COMMODITY FUTURES TRADING COMMISSION

Amendment No. 66: Appropriates $22,892,000 for the Commodity Futures Trading Commission instead of $22,592,000 as proposed by the House and $22,999,000 as proposed by the Senate. The conferees note that this level of funding represents a 10.5 percent increase over the 1982 level.

New information provided on December 1, 1982, indicates that automatic data processing (ADP) obligations will be $1,772,000 during fiscal year 1983, and that information provided on August 3, 1982, was erroneous. The information now provided also clarifies the intended use of these funds. It is the conferees' intention that ADP obligations not exceed $1,772,000 during fiscal year 1983. Further, the conferees direct that any change in spending on categories within the total be reported to the appropriate committees of Congress.

TITLE VI—GENERAL PROVISIONS

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which provides that the Agricultural Research Service, Buildings and Facilities appropriation remain available until expended.

Amendment No. 68: Makes a technical correction as proposed by the Senate.

Amendment No. 69: Deletes Senate language which prohibits the use of funds in this Act to place in effect any rule or regulation which would not maintain or enhance the nutritional integrity of the foods available under the WIC program.

The conferees are concerned about maintaining the current nutritional quality of the WIC program. Decisions regarding national standards for the composition of the food package should be made on comprehensive scientific evidence, necessitating the consideration of a food item as a whole and not eliminate any food item based on a single component thereof. Therefore, the conferees direct that any modification in the WIC food package not yet implemented be based on this standard.

Amendment No. 70: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 625. Notwithstanding any other provision of this Act, appropriations under this Act to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, are $10,466,057,000, and, as authorized by law, the Commodity Credit Corporation shall carry out an Export Credit Sales direct loan program of not more than $500,000,000 in fiscal year 1983.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement deletes Senate language regarding production of agricultural commodities on highly erodible land which would prohibit payments and loans by the Commodity Credit Corporation and other funds under certain conditions.

The conference agreement includes language fully funding the President's budget amendment which requested a total of $10,466,057,000 for restoration of Commodity Credit Corporation losses. Without these additional funds, the Commodity Credit Corporation would have to shut down all farm programs in January 1983.

The agreement also makes the funds for direct loans for export credit sales discretionary. If commodities now in inventory are offered for sale competitively, as the conferees expect, more flexibility in this program would be appropriate.

Amendment No. 71: Deletes Senate language amending the Food, Drug and Cosmetic Act to establish a new standard of identity for milk. The Senate amendment would have written new, permanent legislation and, therefore, could not be accepted by the conferees.

The conferees point out that adoption of the amendment by the Senate indicates a desire for modification in the minimum standards for fluid dairy products. It is recognized that there is a unique interrelationship of this issue with a number of existing programs administered by the Department of Agriculture. The conferees believe that consideration of these interrelationships and the impact which an increase in these minimum standards would have on these various programs is warranted. Therefore, the conferees recommend review of this matter by the appropriate House and Senate committees at the earliest possible opportunity.

Amendment No. 72: Deletes Senate language which would have required the Secretary of Agriculture to develop a special standby export subsidy program by November 20, 1982, since that date has already passed. The conferees point out that the Commodity Credit Corporation Charter provides full authority to sell surplus U.S. commodities under such terms and conditions as are necessary to protect U.S. interests.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1983 recommended by the Committee of Conference, with comparisons to the fiscal year 1982 amount, the 1983 budget estimates, and the House and Senate bills for 1983 follow:

New budget (obligational) authority, fiscal year 1982	$31,841,329,000
Budget estimates of new (obligational) authority, fiscal year 1983[1]	31,833,247,000
House bill, fiscal year 1983	23,066,954,000
Senate bill, fiscal year 1983	25,155,989,000
Conference agreement, fiscal year 1983	31,733,548,000

Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1982	−107,781,000
Budget estimates of new (obligational) authority, fiscal year 1983	−99,699,000
House bill, fiscal year 1983	+8,666,594,000
Senate bill, fiscal year 1983	+6,577,559,000

[1] Includes $8,749,582,000 of budget estimates not considered by the House.

LAWTON CHILES,
QUENTIN N. BURDICK,
JIM SASSER,
Managers on the Part of the Senate.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ALEXANDER (at the request of Mr. WRIGHT), for today, on account of a death in the family.

Mr. MAVROULES (at the request of Mr. WRIGHT), for today, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WHITTAKER) to revise and extend their remarks and include extraneous material:)

Mr. ARCHER, for 60 minutes, December 17.

Mr. CAMPBELL, for 30 minutes, December 13.

Mr. DANNEMEYER, for 60 minutes, today.

(The following Members (at the request of Mr. BONIOR of Michigan) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LELAND, for 60 minutes, today.

Mr. STARK, for 20 minutes, today.

Mr. STRATTON, for 5 minutes, today.

Mr. BAILEY of Pennsylvania, for 60 minutes, December 13, 14, and 16.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. WHITTAKER) and to include extraneous matter:)

Mr. SHAW.
Mr. GILMAN in two instances.
Mr. BEREUTER.
Mr. MOORHEAD.
Mr. BAILEY of Missouri.
Mr. PORTER in two instances.
Mr. HOLLENBECK.
Mr. CONTE.
Mr. LOTT.
Mr. CLINGER in two instances.
Mrs. SNOWE.
Mr. DORNAN of California.
Mr. LEACH of Iowa.

(The following Members (at the request of Mr. BONIOR of Michigan) and to include extraneous matter:)

Mr. DELLUMS.
Mr. FROST.
Mr. ADDABBO.
Mr. FASCELL in three instances.
Mr. RANGEL in two instances.
Mr. FORD of Michigan.
Mr. FORD of Tennessee.
Mr. RODINO.
Mr. MCDONALD in five instances.
Mr. HUBBARD.
Mr. STARK.
Mr. BEDELL.
Mr. AKAKA.
Mr. YATRON.
Mrs. COLLINS of Illinois.
Mr. CLAY.
Mr. FUQUA.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 240. Joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. LELAND. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 25 minutes p.m.), under its previous order, the House adjourned until Monday, December 13, 1982, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5269. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting a notice of the decision to convert to contractor performance the administrative telephone service function at the Navy Public Works Center, Pearl Harbor, Hawaii, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5270. A letter from the Secretary of Education, transmitting notice that the Office of Education Professional Development has no findings and recommendations for certain of its programs no longer under its control due to the legislative changes that have taken place since the report was mandated pursuant to section 553(c) of the Higher Education Act amendments, as amended; to the Committee on Education and Labor.

5271. A letter from the Commissioner, Rehabilitation Services Administration, Department of Education, transmitting a delay on the report on activities of the Department until June 1, 1983, pursuant to section 13 of the Rehabilitation Act of 1973; to the Committee on Education and Labor.

5272. A letter from the Chairman, Task Force on Environmental Cancer and Heart and Lung Disease, transmitting the fifth annual report of the Task Force, pursuant to section 402 of Public Law 95-95; to the Committee on Energy and Commerce.

5273. A letter from the Chairman, Federal Trade Commission, transmitting the fiscal year 1981 annual report of the Federal Trade Commission, pursuant to chapter 311, section 6(f) of the act of September 26, 1914; to the Committee on Energy and Commerce.

5274. A letter from the Chairman, Foreign Claims Settlement Commission of the United States, transmitting the Commission's annual report for calendar year 1981, pursuant to section 8 of the War Claims Act of 1948, as amended, and section 3(c) of the International Claims Settlement Act of 1949, as amended; to the Committee on Foreign Affairs.

5275. A letter from the Comptroller General, transmitting a report on sharing the cost of Federal water project feasibility studies (GAO/RCED-83-18, December 6, 1982); jointly, to the Committees on Government Operations, Agriculture, Interior and Insular Affairs, and Public Works and Transportation.

5276. A letter from the Secretary of Health and Human Services, transmitting legislative recommendations with respect to reimbursement under title XVIII of the Social Security Act for optometrists' services in connection with cataracts and certain other services, pursuant to section 937(b) of Public Law 96-499; jointly, to the Committees on Ways and Means and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. S. 1501. An act entitled the "Educational Mining Act of 1982"; with an amendment (Rept. No. 97-952). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 7316. A bill to establish the national park visitor facilities fund, and for other purposes; with amendments (Rept. No. 97-953). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. House Joint Resolution 553. Joint resolution to authorize Indian tribes to bring certain actions on behalf of their members with respect to certain legal claims, and for other purposes; with amendments (Rept. No. 97-954). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. S. 1661. An act to authorize the Secretary of the Interior to acquire certain lands by exchange for addition to Effigy Mounds National Monument in the State of Iowa, and for other purposes; with an amendment (Rept. No. 97-955). Referred to the Committee of the Whole House on the State of the Union.

Mr. MITCHELL of Maryland: Committee on Small Business. Minority business development efforts of the Small Business Administration (Rept. No. 97-956). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee of conference. Conference report on H.R. 7072 (Rept. No. 97-957). And ordered to be printed.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 7397. A bill to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin region; with amendments (Rept. No. 97-958). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee on Appropriations. House Joint Resolution 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes (Rept. No. 97-959). Referred to the Committee of the Whole House on the State of the Union.

SUBSEQUENT ACTION ON REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X:

The Committee on Agriculture discharged from consideration of the bill (S. 1965) to designate certain lands in the Mark Twain National Forest in Missouri as a component of the National Wilderness Preservation System, and committed to the Committee on the Whole House on the State of the Union, and ordered to be printed.

The Committee on Agriculture discharged from consideration of the bill (H.R. 7340) to designate certain National Forest System lands in the State of Oregon in the National Wilderness Preservation System, and committed to the Committee on the Whole House on the State of the Union, and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mrs. COLLINS of Illinois:

H.R. 7404. A bill to provide for the establishment and operation of a national lottery to assist in financing the old-age, survivors, and disability insurance program; jointly, to the Committees on Ways and Means, the Judiciary, and Post Office and Civil Service.

By Mr. FLORIO:

H.R. 7405. A bill to establish a service industries development program, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MICHEL (for himself and Mr. PRICE):

H.R. 7406. A bill to designate a certain Federal building in Springfield, Ill., the "Paul Findley Building"; to the Committee on Public Works and Transportation.

By Mr. MURPHY:

H.R. 7407. A bill to restrict the importation of certain steel products during periods when the domestic manufacturing capacity for steel products is underutilized and for other purposes; to the Committee on Ways and Means.

By Mr. VOLKMER:

H.R. 7408. A bill to amend the Natural Gas Policy Act of 1978 to define abuse for purposes of determining whether passthroughs of amounts paid to interstate pipelines for natural gas should be denied, and to deny passthroughs to interstate pipelines for actions which are imprudent; to the Committee on Energy and Commerce.

By Mr. WYDEN:

H.R. 7409. A bill to amend title 18, United States Code, to provide a mandatory penalty for the commission of a third or subsequent robbery or burglary while in possession of a firearm; to the Committee on the Judiciary.

By Mr. CONTE:

H.J. Res. 629. Joint resolution amending Public Law 97-276 to make continuing appropriations for the fiscal year 1983; to the Committee on Appropriations.

By Mr. TAYLOR:

H.J. Res. 630. Joint resolution to commemorate the 150th anniversary of the founding of Greene County, Mo.; to the Committee on Post Office and Civil Service.

By Mr. WHITTEN:

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

516. By the SPEAKER: Memorial of the Senate of the Commonwealth of Pennsylvania, relative to delaying implementation of the 50-cent-per-hundredweight assessment on dairy farmers; to the Committee on Agriculture.

517. Also, memorial of the General Assembly of the Commonwealth of Pennsylvania, relative to and accelerated, public works program; to the Committee on Public Works and Transportation.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4779: Mr. WIRTH.

H.R. 5088: Mr. DIXON.

H.R. 6348: Mr. DIXON, Mr. LONG of Maryland, Mr. ANDERSON, Mr. DE LUGO, Mr. DORGAN of North Dakota, Mr. THOMAS, Mr. LANTOS, and Mr. FORD of Tennessee.

H.R. 7312: Mr. DORGAN of North Dakota and Mr. RAHALL.

H.R. 7313: Mr. RAHALL.

H.R. 7365: Mr. JEFFORDS.

H.R. 7372: Mr. VENTO.

H.R. 7373: Mr. BEREUTER and Mr. REGULA.

H.J. Res. 590: Mr. YATES.

H.J. Res. 591: Mr. BROOMFIELD, Mr. CONTE, Mr. STANTON of Ohio, Mr. MARTINEZ, and Mr. DYMALLY.

H. Con. Res. 425: Mrs. FENWICK, Mr. HOWARD, Mr. DANIEL B. CRANE, Mr. BROYHILL, Mr. DWYER, Mrs. HOLT, Mr. BEDELL, Mr. PORTER, and Mr. LANTOS.

H. Con. Res. 432: Mr. CONTE AND Mr. BAILEY of Pennsylvania.

H. Res. 606: Mr. SAVAGE, Mr. BEVILL, Mr. WIRTH, Mr. MINISH, Mr. STARK, Mr. PANETTA, Mr. GARCIA, Mr. FAZIO, Mr. DONNELLY, Mr. DELLUMS, Mr. EDWARDS, of California, Mr. WEAVER, Mr. BONKER, Mr. FLORIO, Mr. GUARINI, Mr. FROST, Mr. HOYER, Mr. STUDDS, Mr. WASHINGTON, Mr. BONIOR of Michigan, Mr. NEAL, Mr. LUNDINE, Mrs. COLLINS of Illinois, Mr. GINGRICH, and Mr. SEIBERLING.

H. Res. 610: Mr. TAUKE, Mr. FORSYTHE, Mr. KINDNESS Mr. FISH, Mr. EDGAR, Mr. SKELTON, Mr. EVANS of Iowa, Mr. OBERSTAR, Mr. WALGREN, Mr. BEDELL, Mr. DANIEL B. CRANE, Mr. ROTH, Mr. HORTON, and Mr. CONTE.

PETITIONS, ETC.

Under clause 1 of rule XXII,

674. The SPEAKER presented a petition of Jimmy Bryan Toyota, Fort Lauderdale, Fla., et al., relative to H.R. 5133, domestic content; which was referred to the Committee on Energy and Commerce.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5133

By Mr. BETHUNE:

—At the appropriate place, insert the following:

"(c) This section shall not apply unless the United States Trade Representative determines that its implementation shall not cause the United States to be in violation of the General Agreements on Tariffs and Trade.".

—On page 9, after line 12, insert the following:

"(c) This section shall not apply unless the Secretary of Commerce determines that its implementation will not tend to disrupt the export of goods manufactured in the United States.".

—On page 9, after line 12, insert the following:

"(c) This section shall not apply unless the Secretary of Labor determines that its implementation will not frustrate the creation of new jobs in the United States.".

—On page 9, after line 12, insert the following:

"(c) This section shall not apply unless the Secretary of Commerce determined that its implementation will not adversely affect any domestic industry.".

—On page 9, after line 12, insert the following:

"(c) This section shall not apply unless the Secretary of the Treasury determines that its implementation will not add to the U.S. government budget deficit."

—On page 9, after line 12, insert the following:

"(c) This section shall not apply unless the Secretary of Labor determines that its implementation will not tend to increase the Consumer Price Index."

—On page 9, after line 12, insert the following:

"(c) This section shall not apply to any auto manufacturer that receives federal credit assistance."

—On page 9, line 16, strike out "one hundred thousand" and insert in lieu thereof "ten million".

—On page 9, line 16, strike out "one hundred thousand" and insert in lieu thereof, "twenty million".

—On page 9, line 16, strike out "one hundred thousand" and insert in lieu thereof, "thirty million".

By Mr. BROWN of Ohio:

—Page 8, line 3, strike out "For" and insert in lieu thereof "Except as provided in subsection (b)".

Page 8, insert after the table before line 11, the following:

"(b) SPECIAL RULE.—(1) For each model year beginning after January 1, 1983, the minimum domestic content ratio for a vehicle manufacturer that began automobile production or assembly in the United States between January 1, 1980, and December 31, 1982, shall not be less than the applicable minimum content ratio specified in the following table:

Model Year 1984

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 90,000.
Over 900,000	30 percent.

Model Year 1985

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 45,000.
Over 900,000	60 percent.

Model Year 1986

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 30,000.
Over 900,000	90 percent.

Model Year 1987

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 15,000.
Over 900,000	90 percent.

Each Model Year After Model Year 1987

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The ratio determined by the Secretary under paragraph (2).
Over 900,000	90 percent.

(2) The Secretary shall establish the minimum domestic content ratio for each model year after model year 1987 for vehicle manufacturers selling over 100,000 but not over 900,000 motor vehicles in the United States during such year. In establishing each such ratio, the Secretary shall take into account the extent to which changes in the technological and economic factors applicable to the production of motor vehicles in the United States have affected the carrying out of the purposes of this Act, but a ratio established under this paragraph for any model year may not be greater than 50 percent, nor less than the percentage achieved in model year 1987.

(3) If during any model year the level of the automobile production or assembly in the United States of a vehicle manufacturer falls below the production or assembly level of such manufacturer in the United States during the model year beginning after December 31, 1981, then subsection (a) shall apply to such manufacturer.

Page 8, line 11, strike out "(b)" and insert "(c)".

—Page 8, line 3, strike out "For" and insert in lieu thereof "Except as provided in subsection (b)".

Page 8, insert after the table before line 11, the following:

"(b) SPECIAL RULE.—(1) For each model year beginning after January 1, 1983, the minimum domestic content ratio for a vehicle manufacturer that began automobile production or assembly in the United States between January 1, 1980, and December 31, 1982, shall not be less than the applicable minimum content ratio specified in the following table:

Model Year 1984

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 90,000.
Over 900,000	30 percent.

Model Year 1985

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 45,000.
Over 900,000	60 percent.

Model Year 1986

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 30,000.
Over 900,000	90 percent.

Model Year 1987

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 15,000.
Over 900,000	90 percent.

Each Model Year After Model Year 1987

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	Minimum domestic content ratio:
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 10,000.
Over 900,000	90 percent.

(2) If during any model year the level of the automobile production or assembly in the United States of a vehicle manufacturer falls below the production or assembly level of such manufacturer during the model year

beginning after December 31, 1981, then subsection (a) shall apply to such manufacturer.

Page 8, line 11, strike out "(b)" and insert "(c)".

H.R. 7145

By Mr. PARRIS:

—On page 22 at the end of line 3, insert the following section:

SEC. 216. None of the funds appropriated in this or any other Act may be used to abolish, reorganize, convert or relocate the United States Army Corps of Engineers' Coastal Engineering Research Center from its current location at Ft. Belvoir, Virginia.

[Omitted from the Record of December 9, 1982]

H.R. 5133

By Mrs. FENWICK:

AMENDMENT (1)

—Page 14, after line 11, insert the following new section:

SEC. 7. RELATION TO TREATIES, CONVENTIONS, AND AGREEMENTS.

Notwithstanding any other provision of this Act, nothing in this Act shall be deemed to supersede the terms or conditions of any treaty, international convention, or agreement on tariffs and trade which is in existence on the date of enactment of this Act and to which the United States is a party.

Renumber the succeeding sections accordingly.

By Mr. GLICKMAN:

—On page 15, before the comma on line 8 insert the following: "and on the overall balance of trade between the United States and nations with manufacturers subjected to content ratios under Section 4."; on line 22, delete the word, "and"; on line 24, delete the period and insert in lieu thereof "; and

"(6) on exports of other manufactured and agricultural products from the United States to nations with manufacturers subjected to content ratios under this Act."

EXTENSIONS OF REMARKS

DOMESTIC CONTENT LEGISLATION UNHEALTHY FOR U.S. ECONOMY

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CARMAN. Mr. Speaker, in a short while, this Chamber will begin consideration of H.R. 5133, the so-called domestic content bill. While purporting to boost employment in our Nation's troubled auto industry, the proponents of this legislation seem to have overlooked the damage it will cause to many other sectors of our economy.

If this bill passes, we will face stronger foreign trade sanctions from our trading partners. As a result of these sanctions, the Congressional Budget Office has estimated that over 173,000 jobs will be lost, GNP will be 0.1 percent lower by 1990, and the Consumer Price Index will increase approximately 0.2 percent above its projected level. Our industries most affected by foreign trade sanctions would be agriculture, aircraft manufacturing, and other high-technology industries.

Our international trade plays an increasingly important role in the health of our domestic economy. H.R. 5133 is a threat to our international trade and therefore, our economy.

Mr. Speaker, I submit to you that H.R. 5133 provides us with many more long-term disadvantages than short-term advantages. I urge my colleagues to vote against this bill.●

THE NATURAL GAS MARKETING ACT OF 1982

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mrs. BYRON. Mr. Speaker, I urge you to join Representative HOLT, Representative DYSON, and me in supporting and cosponsoring H.R. 7358, the Natural Gas Marketing Act of 1982. This bill addresses our growing concern with the dramatic increase in the price of natural gas going into effect this winter. The average increase for residents of Maryland alone is 30 percent. But as you are aware, this is not just a regional problem. It is one that is confronting each of us from coast to coast.

What we find is that the combination of the supply incentives of the Natural Gas Policy Act of 1978, and the structural insulation of the gas producer and transmission company from the marketing of natural gas have prevented appropriate signals for price reductions for natural gas costs.

On the heels of the gas shortages of the 1970's, the transmission companies raced to the producers and agreed to sign what now are overly generous contracts in order to be assured of adequate supplies in the future. The transmission companies, fearing a return of their shortage problems, agreed with the producers to include a clause known as "take or pay" in their purchase contracts. These clauses merely state that the pipeline is obligated to pay for a set volume of gas, at a set price, over the life of the contract without regard to the fact that conservation and supply surpluses would dramatically alter their ability to sell the gas at any price.

It is for this reason that we introduce H.R. 7358, the Natural Gas Marketing Act of 1982. This bill does not interfere with the supply incentives in the NGPA, stands alongside the Natural Gas Act of 1938, and is designed to make the natural gas industry market sensitive from the "burner tip of the wellhead."

The bill accomplishes this through two approaches. First, the bill allows from a distribution company or the State public utility commission to petition the Federal Energy Regulatory Commission (FERC) certifying that the proposed rates of the transmission company are not competitive with available and useable alternative fuels within the service territory. Upon this certification, FERC is mandated to suspend the proposed rate increase for a period of up to 6 months. During this period, the transmission company bears the burden of proof to show that the proposed rates are competitive with alternative fuels. If FERC finds the rates are competitive, it is authorized to approve the rates.

Second, if FERC finds that the proposed rate is not competitive with alternative fuels, it is mandated to adjust the rate to make it competitive. Once FERC makes this adjustment, the transmission company is automatically given the right to presume that these contracts, and just the noncompetitive contracts, contain a "market out" provision. This provision, when exercised, gives to the transmission pipeline an opportunity to renegotiate the gas purchase contract(s) if, in the sole opinion of the transmission company, the gas is not marketable in its service territory.

Through this legislation we have accomplished two goals: First, we have assured the ultimate consumers of natural gas that their rates will be the lowest possible. Second, with additional responsibilities to insure natural gas price competitiveness, pipelines will be certain to negotiate with the producers in their own interests. A clear signal will reach the producer that the consumers will not pay the prices being charged. With dwindling demands, the producers will react by reducing the price on their reserves in order to protect their share of the energy consuming market.

I urge my colleagues to carefully consider the contents of the Natural Gas Marketing Act of 1982 and join Mrs. HOLT, Mr. DYSON, and me in this effort to protect the residential natural gas users.

For the benefit of my colleagues, I am including the bill and a section-by-section analysis at this time.

THE NATURAL GAS MARKETING ACT OF 1982, A SECTION-BY-SECTION ANALYSIS

H.R. 7358, the Natural Gas Marketing Act of 1982, would revise the procedures and standards by which the Federal Energy Regulatory Commission (FERC) approves rate increases sought to be charged by interstate natural gas pipelines. Its purposes are:

(1) to assure that the views of the pipeline's wholesale customers with regard to the impact of the proposed rate increase on their ability to resell the gas at retail receive a full and fair hearing;

(2) to establish a minimum standard of conduct for pipelines seeking a rate increase, under which pipelines are held responsible to manage their gas acquisition practices and gas purchase contracts with a view to maintaining their gas prices at levels competitive with alternate fuels; and

(3) to assure that any pipeline rate increase ultimately approved by FERC will not be inconsistent with the marketability of that gas at retail in competition with alternate fuels.

The bill is titled the Natural Gas Marketing Act of 1982.

Section 2 of the bill establishes procedures and legal standards to govern FERC consideration of pipeline rate increase filings. Section 2(a) sets forth the event that will trigger the procedures described in the remaining paragraphs of Section 2. That "trigger" is the filing by a local distribution company or the public utility commission of any state, including the District of Columbia, of a complaint pursuant to section 4(e) of the Natural Gas Act alleging that a rate proposed to be charged by a pipeline is not just and reasonable, and certifying under oath that such proposed rate, taken together with any prevailing lawfully imposed charges for the retail delivery of such gas, results in a retail price for natural gas that is in excess of the per MMBtu equivalent price of a competing fuel currently available to and useable by existing retail customers

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

served by or through any of the pipeline's wholesale customers.

Local distribution companies and state public utility commissions are among those parties that already have the right to file a complaint under Section 4(e) of the Natural Gas Act challenging the lawfulness of any rate increase filing made by an interstate pipeline. Under the Natural Gas Act, FERC has discretion whether to set the complaint down for hearing. This bill describes one particular kind of complaint by these two types of parties which FERC must set down for hearing. If the complainant makes the certification under oath regarding the retail prices of gas and alternate fuels, FERC has no discretion to evaluate the merits of that certification or to deny the complainant a hearing. The complaint may address a proposed purchased gas adjustment (PGA) rate increase or any other type of pipeline rate increase filing.

Section 2(b) provides that, upon the filing of a "triggering" complaint, in addition to setting the matter for hearing, FERC shall suspend the operation of the pipeline's rate increase filing until the issuance of a final appealable order upon completion of such hearing. Under the Natural Gas Act, FERC currently has discretion to suspend the operation of a rate increase filing for any period from one day to five months. Thus the increased rate often goes into effect before the hearing on its lawfulness is completed; the only remedy if the increase is found unlawful is the ordering of refunds to the pipeline's customers. This bill would make suspension of the rate increase until conclusion of the hearing mandatory, and assure that pipeline customers are not required to pay, even subject to refund, an unlawful rate increase. However, Section 2(c) provides that the total suspension period will not exceed six months, only slightly longer than the maximum suspension under the Natural Gas Act.

Section 2(c) provides that, unless otherwise agreed by all parties, FERC shall conclude its hearing and render its final decision on any proposed rate challenged in accordance with this bill within six months from the date the rate increase filing was suspended. Under the Natural Gas Act, a five month limit is imposed on the period of suspension but there is no time limit on FERC's decision-making process. As a result, the proposed rate increase often goes into effect long before the matter is resolved, complaints remain pending for months and even years after the rate in question has been in effect, and the pipeline has no incentive to expedite the hearing or to urge FERC to do so. This bill would assure that FERC proceeds to conclusion of a hearing and issuance of a final appealable order within six months, and create a substantial incentive for the pipeline to expedite the proceeding. If the pipeline and other parties all agree, they may waive the six month time limit, but in that event the proposed rate increase remains suspended and may not go into effect until the matter is finally concluded.

Section 2(d) provides that the burden of proof at the hearing on the rate increase shall be on the pipeline to establish, among other things, (1) that its gas purchase contracts with its suppliers and its gas acquisition practices are designed to maintain its gas prices, taken together with any prevailing lawfully imposed charges for the retail delivery of such gas, at a level competitive with the retail price of alternate fuels in its service territory, and (2) that its average cost of purchased gas and its wholesale rates are and will be adjustable in response to increases and decreases in the retail prices of competitive fuels in its service territory. Under the Natural Gas Act, the pipeline seeking a rate increase already bears the burden of proof to show that the increased rate is just and reasonable. Section 2(d) of the bill describes two specific elements of the showing a pipeline must make in a hearing triggered by a complaint under this bill.

Section 2(e) provides that, if FERC finds that the pipeline has successfully discharged its burden of proof under Section 2(d), FERC may approve collection by the pipeline of all or any portion of the proposed rate. FERC has discretion to find that the entire increase sought is just and reasonable, or to find that some portion of the increase sought is nevertheless not just and reasonable on any ground for which FERC has lawful authority.

Section 2(f) provides that, if FERC finds that the pipeline has failed to discharge its burden of proof under Section 2(d), FERC shall prescribe an adjustment in the pipeline's rates which it finds is sufficient to render the pipeline's rates, taken together with any prevailing lawfully imposed charges for the retail delivery of such gas, competitive with the retail price of alternate fuels in its service territory and which it finds is consistent with the long-term gas supply needs of the pipeline's customers. The adjustment ordered may be all or any portion of the rate increase sought, or it may be a rate reduction. The remedy ordered requires FERC to make two findings. First, it must find what adjustment will render the pipeline's rates competitive with prices of alternate fuels in its service territory. Second, FERC must find that such an adjustment is consistent with the long-term gas supply needs of the pipeline's customers. FERC may revise the adjustment mandated by the first test only to the extent it finds that the second test is not met.

If FERC finds that the pipeline has failed to discharge its burden of proof under Section 2(d), Section 2(f) of the bill further provides that, effective immediately, each of the pipeline's gas purchase contracts shall automatically be deemed to include a "market-out" provision relieving the pipeline of its obligation to purchase the gas if, in the pipeline's sole opinion, the gas is not marketable in the pipeline's service territory. That provision would not preempt existing terms of the contract except to the extent they are inconsistent with the provision dictated by the bill.

Section 3 of the bill sets forth certain limitations on the foregoing sections. Section 3(a) provides that nothing in the bill shall be construed as altering existing law barring unduly discriminatory pipeline rates. This is a reference to, inter alia, Section 4(b) and Section 5(a) of the Natural Gas Act. This bill is not intended to alter the requirements of either of these sections or to condone any pipeline rate or rate structure that would violate either of these sections or any other existing law.

Section 3(b) provides that, in any allocation of costs approved by FERC in connection with a pipeline rate order issued pursuant to this bill, all purchased gas costs shall be allocated equally to all volumes sold. Consonant with the limitation contained in Section 3(a), this limitation precludes FERC from shifting the burden of purchased gas costs from one pipeline customer to another on the basis of the types of, or prices of, alternate fuels available to or usable by their retail customers.

Section 3(c) provides that nothing in this bill shall be construed as giving FERC authority to increase any rate to any customer other than in accordance with a proposal filed by the pipeline. Again consonant with the limitations in Section 3(a) and 3(b), this limitation precludes FERC from prescribing, as the result of a hearing under Section 2, an increase in the pipeline's rates to any customer greater than that sought by the pipeline, or pipeline rates that differentiate among the pipeline's wholesale customers in a manner not proposed by the pipeline.

Section 3(d) provides that nothing in this bill shall be construed as giving FERC authority to alter any charges duly approved by state or local governmental authorities for the retail delivery of gas purchased from the pipeline, or to make any other adjustments in any rate order to take such charges into account. This limitation is designed to make clear that this bill does not authorize FERC to investigate, scrutinize, or otherwise question the difference between any pipeline rate or proposed rate and the resultant retail rate to any customer or customers. These matters are now exclusively within the control of state or local regulatory bodies and do not enter into FERC's decision on the pipeline's rates. Nor may FERC adjust a pipeline rate or rate structure to compensate for variations in the lawful retail markups to various retail customers in the same or different jurisdictions. FERC is thus unable to achieve indirectly what it cannot do directly under this bill.

Section 4 provides the definitional basis of specific terms referenced in the bill.●

AMERICAN INDUSTRIES OPPOSED TO H.R. 5133

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. LENT. Mr. Speaker, tomorrow the House is scheduled to consider H.R. 5133, the Fair Practices in Automotive Products Act of 1982. H.R. 5133 is perhaps the greatest threat to international trade to come before the House in over a decade. This fact is not lost on American industry which is overwhelmingly opposed to this legislation. Some of the groups which have expressed opposition to this antitrade bill are as follows:

LIST OF OPPOSING GROUPS

Aerospace Industries Association of America.
American Association of Exporters and Importers.
American Association of Port Authorities.
American Electronics Association.
American International Automobile Dealers Association.
American Retail Federation.
American Soybean Association.
Auto Importers of America.
Caterpillar Tractor Co.
Certainteed Corporation.
Colonial Sugar Company.
Computer and Business Equipment Manufacturers Association.
Consumers for World Trade.

Continental Grain Co.
Council For a Competitive Economy.
Delaware River Port Authority.
Imperial Sugar Company.
International Apple Institute.
International Association of Ice Cream Manufacturers.
International Hardwood Products Association.
League of Women Voters of the United States.
Lockheed Corporation.
Massachusetts Port Authority.
Milk Industry Foundation.
Millers National Federation.
National Association of Stevedores.
National Association of Wheat Growers.
National Automobile Dealers Association.
National Broiler Council.
National Corn Growers Association.
National Council of Farmer Cooperatives.
National Customs Brokers and Forwarders Association.
National Foreign Trade Council.
National Grain Trade Council.
National Grange.
National Retail Merchants Association.
National Soybean Processors Association.
Philadelphia Port Corporation.
Port of Baltimore.
Port of Portland.
Poultry and Egg Institute of America.
Scientific Apparatus Makers Association.
Semiconductor Industry Association.
The Boeing Company.
The Rice Millers' Association.
U.S. Cane Sugar Refiners Association.
U.S. Chamber of Commerce.
U.S. Council for International Business.
Volume Footwear Retailers of America.
Xerox Corporation.●

AUTHORIZING APPROPRIATIONS FOR THE NUCLEAR REGULATORY COMMISSION

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BROYHILL. Mr. Speaker, as a member of the Energy and Commerce Committee and a conferee on H.R. 2330, I should like to clarify my disagreement with the colloquy conducted during the December 2, 1982, floor debate between Congressman DOWNEY and Congressman OTTINGER in connection with emergency preparedness plans and temporary operating permits in sections 5 and 11 of the bill. As the original sponsor of the reforms in the Energy and Commerce Committee, I intended the language in this bill to incorporate the principles of section 109 of the 1980 NRC Authorization Act, and of present and continuing NRC regulations relating to low-power operating licenses in our proposals included in sections 5 and 11 of the bill. It was our intention in section 5 to provide for a FEMA-approved State or local offsite emergency preparedness plan prior to the issuance of a final, full-power operating license, or in the absence of such a FEMA approved plan, a determination by the NRC that there exists a State, local or utility off-site plan which provides reasonable assurance that public health and safety is not endangered by full-power operation of the plant. On the other hand, it was our intention in section 11 to set forth the requirements for a more limited, temporary operating license. Such a temporary license is limited to an initial power level not to exceed 5 percent of rated full thermal power. In view of these initial limitations, it was not considered necessary to require an offsite plan, nor FEMA or NRC approval or other determination, and we only provided that some onsite emergency plan for the facility itself be filed with the Commission by the utility, locality or State prior to the granting of the temporary operating license.

There was no intention to, nor does the clear language of section 11 make a distinction between a plan filed by a State, by a locality or by a utility. However, there was an intention to make the distinction, discussed above, between the offsite emergency preparedness plan which is determined by the NRC to provide reasonable assurance that public health and safety is not endangered by full-power operation of the plant or which has been approved by FEMA, under section 5, on one hand, and on the other hand an onsite plan limited to the facility itself which is only required to be filed with the NRC before a temporary operating license for more-limited power operation under section 11 is issued.●

HON. ROBERT K. DORNAN

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ZABLOCKI. Mr. Speaker, I am pleased to join my colleagues in expressing my appreciation to the gentleman from California (Mr. DORNAN) for his service to this body, his constituents and the Nation.

During the past 2 years, BOB DORNAN has served on the Committee on Foreign Affairs where he has made an important contribution to our foreign policy debates. He has been a conscientious member of the Subcommittees on Human Rights and International Organizations, Africa, and Asian and Pacific Affairs and has been an effective and articulate exponent of his views on a wide range of issues.

While I may not have always agreed with his arguments or positions on some of these issues, I never doubted his conviction, his steadfastness of purpose, or his courage and candor in presenting his case, which always deserved, and I trust received, a fair hearing. We will miss these qualities which he has brought to public life in the years ahead.

I know his colleagues and friends in this body wish him and his family every success in his future undertakings, which I am certain will be carried out with the same dedication and competence which has characterized his work with the Committee on Foreign Affairs.●

THE KIDS WHO SAVED FORT WAYNE

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. COATS. Mr. Speaker, on March 14, of this year, Fort Wayne, Ind., became a nationally known city overnight. Floodwaters poured through the city destroying or severely damaging everything in its path. Through an amazing around the clock volunteer effort by many thousands of our area citizens, Fort Wayne, Ind., was spared incalculable damage from the waters of one of the worst floods in the city's history.

One group of individuals who worked especially long, hard hours were the young people of our city. They volunteered by the thousands to help fill and stack 1 million sandbags. It was through their dedicated efforts that many homes and businesses in Fort Wayne were saved from the rising waters. The spirit of voluntarism and neighborly love that was evident during this crisis represented the true spirit in today's youth.

In the December issue of the Reader's Digest, this spirit was portrayed in an article describing the flood situation and the key role the students played in protecting the city. I believe my colleagues would benefit from reading this article and recognizing how the "spirit of voluntarism" still prevails in our society and accordingly I am entering this article in the RECORD.

THE KIDS WHO SAVED FORT WAYNE

(By Patricia Skalka)

The floodwaters came to Fort Wayne, Ind., with fast-mounting menace. Fed by melting snows, the city's three rivers quickly overflowed their banks. By Sunday, March 14, 1982, cold, dirty-brown water ten feet deep had routed 3000 people from their homes. On Tuesday, the municipal Emergency Operations Center (EOC) called for the evacuation of 9000 more of the city's 173,000 residents. Then heavy rain began pelting down. Floodwaters backed through the sewer system, blowing manhole covers into the air. Earthen dikes built to contain the rivers were saturated and would soon be useless. From the city's east side came an especially dismal report: the Pemberton dike was as soggy as toothpaste.

Two thousand volunteers had helped fill and place 100,000 sandbags along Fort Wayne's river fronts. Ten times that number of workers would be needed if the

city was going to survive. One resource remained untapped: students.

Tuesday night, Mayor Win Moses, Jr., telephoned the city's school superintendent, who agreed to shut those schools not already closed. But because of liability-insurance regulations, he could not ask the students to help. The kids would have to come of their own volition.

Everyone knew the city lay on the brink of disaster. "What if the kids don't come?" someone asked Mayor Moses.

Seven a.m., Wednesday, March 17, David J. Kiester, the man in charge of Fort Wayne's volunteer flood-fighters, walked out to the front steps of Memorial Coliseum for a breath of air. There had been frantic calls almost throughout the night. Edgewater had needed help. Lawton Park had needed help. Floodwaters had threatened the water-filtration plant, the sewage-treatment facility and the main electric transformer station. We can't survive another night like that, Kiester thought.

He peered through a curtain of fog and his heart jumped. He could hardly believe the scene before him. A parade of school buses was moving up the highway toward the Coliseum. One by one, the buses turned into the parking lot, stopped and spilled out a torrent of teenagers. Behind the buses, row upon row of cars, vans and trucks pulled up with even more kids.

"You're sure you're all right?" Ruth Baker called after her daughter as she jumped from their car.

"I'm fine; don't worry," answered Sarah, 15, who was recuperating from the flu. She waved and hurried with her friends toward the Coliseum.

David Kiester blinked back tears as he surveyed the sea of bright faces. The kids had come, lively, energetic, eager to help. Maybe we can beat this thing, Kiester thought.

Wednesday noon hundreds of teen-agers had gathered inside the exhibition hall. Mountains of sand were piled on the floor. With enthusiasm, the kids shoveled sand into pink, green and white bags, tied them and tossed the bags into waiting dump trucks. Bag after bag. Twenty thousand an hour, and still not enough. David Kiester ordered a 20-foot-tall sand mountain set up in the parking lot. "I want 75 trucks filled with bags and ready at all times," Kiester said. The kids gave him his 75 loaded trucks.

In the midst of the toil one young girl began to cry. "I'm worried about my family," she said. "I don't know if they're safe." Another girl, a stranger, hugged her, sat her down on a pile of sandbags, and comforted her.

Near State Boulevard, Mary Zieseniss, 16, and Beverly Linville, 15, hurried toward the Coliseum. "This is the most exciting thing I've ever done," Mary exclaimed as they plodded through two-foot-deep water. Suddenly, Mary spotted an elderly woman, looking exhausted as she struggled to load her belongings into a rowboat.

"Look at her," Mary said, heading across the woman's waterlogged lawn. "The dikes can wait."

For 45 minutes, Mary and Beverly worked alongside the woman, loading her boat, seeing her safely on her way, before they set off again for the Coliseum.

Worried parents phoned city hall, searching for their children who had not reported home. "Where have you been?" one father demanded of his exhausted, mudsplattered, 16-year-old daughter. "I've been fighting the flood," she said quietly. An hour later, the man was at the Coliseum, shovel in hand, to help. "I came with my daughter." "I came with my son." The words became a familiar litany to the volunteer coordinators.

Adults in cars were stopping whenever they saw teen-agers gathered. "Need a ride? Where are you going? Hop in!"

Wednesday Afternoon. Radio station WMEE broadcast a message taped by North Side High School student-council president Terry Lovejoy: "I am appealing to all the students of Fort Wayne to help in this crisis," he said. "The city is depending on us." Waves of new volunteers rolled in, 200 an hour, ready to do battle.

The volunteers had been instructed to rotate off the lines and work indoors every two hours. But Betty Collins, an adult supervisor, saw trucks and buses coming back from work sites nearly three-quarters empty.

"Where are the kids?" she asked one driver.

"They won't leave!" the driver said, "They just keep working."

At West Brook, students helped elderly residents move their furniture away from threatening floodwaters. When a leak sprang at Spy Run, an army of teen-agers repaired it. When a sewer blew at Perry, a division of kids built a wall of sandbags to contain the water.

For the first time in nearly a week, a margin of safety was perceptible. Everywhere but at the Pemberton dike. Five blocks long, Pemberton's retaining wall held back a swell of water ten feet deep and two miles long. If it broke, a wave of destruction would crash through three square miles of homes.

The dike had to be reinforced. On either side of a frame house a mere 30 feet from the dike wall, a row of teen-agers passed sandbags weighing 50 to 80 pounds each. Thump, thump, thump. Arm to arm. Catch. Twirl. Toss. Off the truck, down the driveway, over the fence, through the yard. Thud. Onto the dike. Adults made decisions. They worried and wondered. The kids worked.

8 p.m., Wednesday. City transportation director Carl E. O'Neal walked the Pemberton dike. "It's leaking like a sieve," he radioed to the EOC. An hour later, as he walked into EOC headquarters, O'Neal heard a frantic message crackle from the radio: "The dike is moving!" O'Neal raced back to Pemberton. Weary or not, the volunteers would have to reinforce the dike further.

11:30 p.m. Police issued an evacuation order to the few residents near Pemberton who remained in their homes. "You are in immediate danger. Please leave now."

Midnight. Eight hundred kids kept the bags moving. "Heavy one. Easy one. Don't stop."

As Mayor Win Moses walked through the ankle-deep water in front of the dike, an eight-year-old boy staggered past. He held on to a sandbag with both hands, dragging it. "Mr. Mayor," a man said, "that's my son. Last week he wouldn't even take out the trash."

Fifteen lines of teen-agers were now moving 25 sandbags per minute per line, building an emergency wall in front of the saturated earthen dike. They were singing. "Oh when the saints . . . Go marching in. . . ." The kids were singing! "Oh when the saints go marching in. . . ."

The kids sang to keep going, to keep the sandbags moving. They sang to win. they sang because it is the nature of youth to turn a bravura face to danger.

2 a.m., Thursday, March 18. The Pemberton dike was giving way. A hole three feet wide opened in the dike. One block north, another. Water poured through.

Police sirens and bullhorns pierced the darkness. "Get everyone out of here. Evacuate *now*. All volunteers out of the area."

"We want to stay," insisted Brett Thomas, 18, a high-school junior. "We can fight it."

A circle of teens, mud caked on their faces, conferred among themselves and voted against leaving. They stood near an empty truck refusing to climb on. "We'll wait. Let us just wait and see."

Somehow, thanks to shifting earth, thanks to desperately tossed but well-placed sandbags, the holes were sealed. The torrents became trickles. The message came from headquarters: "If the volunteers want to stay—let's give it a try."

All night, the kids worked. Slowly, the wall of sandbags began to take shape. It crept higher and wider by the hour, spreading around tree trunks and swing sets, creeping toward houses and filling up carports and garages.

The volunteers ignored aching arms and sore backs. But a prediction of rain worried them.

"If it rains, everything will be lost."

"We can't give up."

"What can we do?"

"Pray for lighter bags." And they laughed.

Dawn, Thursday, Teen-age reinforcements poured into the Coliseum. "I've been working on the lev—ee," they sang as they shoveled sand into bags and waited their turn to work the dikes. By midmorning, 5,000 volunteers crowded the arena, and more kept coming. At Pemberton, 1,500 students continued the work begun by the indomitable crew of the night before. Their dam grew taller, 9 feet high in spots, 15 feet thick. "We will win or lose at Pemberton." Mayor Moses told the city.

In the middle of a break from sandbagging, North Side High School principal Daniel G. Howe encountered two boys he had expelled for misconduct. He had heard that they were kids who didn't care about anything. Yet here they were, working hard.

"Aren't these kids grand?" a man remarked.

"These kids have always been grand," Howe said, "People just never gave them the chance to prove it."

That night the Maumee River rose to 25.93 feet, two inches below the all-time high-water mark set in 1913. The sandbag dam at Pemberton also grew higher. Ten feet, 11 feet. Finally, some 27 hours after the monumental effort had begun, the job was done. At 2 a.m. Mark Meister, president of the National Honor Society at Concordia High School, tossed his last sandbag of the day. Except for a two-hour break, he'd been working the dam since seven the previous morning. Now, covered with mud and exhausted, he could hardly believe what he heard; they could go home.

The secondary dam was finished. It stood 12 feet high, measured 30 feet across, and stretched for five blocks. Each of its 300,000 sandbags had been filled, tied, tossed and thumped into place by hand. It was awesome.

But would it hold?

Friday, March 19. Rain fell. The volunteers filled additional sandbags, watched the rain fall and waited.

At noon, it was still raining. But the dam held. At 5 p.m. the word came that the

Maumee River had dropped to 23.89 feet. And still the dam held.

The weather bureau issued a new forecast. No further rain was predicted.

Saturday, March 20. Fort Wayne returned to business as usual. In all, an estimated 50,000 people had joined the flood-control effort, nearly 30,000 of them students. At one stage eight children of the Hewitt family, ages 12 to 28, had worked the dikes with their father, Gene. Rachel Hewitt, 15, had put in a 52-hour shift.

At the Pemberton dam, a general from the Army Corps of Engineers surveyed the students' work. Later he told Carl O'Neal that the kids of Fort Wayne had performed an engineering miracle. "They did the impossible," the general said. "They did what could not be done."

Carl O'Neal cried.●

URANIUM MILL TAILINGS, TEMPORARY OPERATING LICENSE AND EMERGENCY PREPAREDNESS PLAN COLLOQUIES ON NRC AUTHORIZATION BILL (H.R. 2330)

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. LUJAN. Mr. Speaker, on December 2, 1982, during floor action on the Nuclear Regulatory Commission authorization conference report for fiscal years 1982 and 1983 (H.R. 2330), several floor colloquies occurred. These are recorded in the CONGRESSIONAL RECORD of that date beginning on page 28560. As a conference member, I indicated on the floor at that time that I had not had an opportunity to review these colloquies, that the general level of noise and activity on the floor made them difficult to follow, and I therefore did not know if I could agree with their phrasing. Having now had an opportunity to study them in detail, I would like to comment further on my understanding of the intent of the conference agreements.

Mr. Speaker, I fully support thorough and adequate regulation of the hazards posed by uranium milling activities. However, I believe that this regulation must also be reasonable and not impose burdens whose major attribute is simply to drive up costs and put more uranium miners out of work. There are enough unemployed uranium miners in my State already. In sum, I am concerned that regulations not only be adequate to protect the public but also that they be reasonabale and supported. In light of some possible confusion on the issue, I feel it advisable to clarify the intent of the conferees, of which I was one, concerning the regulation of uranium mill tailings as provided in sections 18 through 22 of the NRC authorization bill. I, along with the other conferees, of course intend that all reasonable regulatory measures necessary to protect the public health and safety be implemented. However, it is important to note that this does not translate into congressional approval for certain actions taken by NRC and EPA. In particular, the conferees in no way intend the bill to be interpreted as a ratification of any or all of the NRC regulations known as the Uranium Mill Licensing Requirements. Indeed, many of us were troubled by numerous indications that the regulations were largely devoted to minimizing radon flux from tailings piles but that the radon emanating from the piles did not pose a significant risk to the general population or, for that matter, to local residents. Obviously it makes no sense to impose costly regulations on the industry and on taxpayers to address insignificant risks. NRC and EPA must review this question and, before imposing substantial regulatory burdens, must actually ascertain that a risk is significant by comparing it to other risks which we as society view as significant. Many of us were also troubled with indications that NRC and EPA may not be formulating regulations whose costs stood in a reasonable relationship to their expected benefits. The agencies, however, assured us that they either were doing so or would take action to conform, and we decided for purposes of this bill to take them on their word and not to make any finding that they had in fact performed adequately. I emphasize that we all believed that it would not be sufficient for the agencies simply to examine whether their regulatory impositions were "feasible"—that is, that their requirements would not bankrupt the Government or private industry. We all felt that some kind of balancing is required. We decided to clarify our intent that the agencies regulate only significant risks and that their requirements exhibit a reasonable relationship between costs and benefits by adopting section 22. To reiterate, I can state absolutely and unequivocally that we did not and do not intend in any sense to ratify or to give any congressional imprimatur to all or any portion of NRC's regulations. We left the question of the validity and lawfulness of these regulations to the courts. We accordingly decided not to suspend the NRC regulations ourselves but to leave that issue to the courts, and the courts may decide to take such action if, among other things, MRC fails to demonstrate in a supportable fashion that radon poses a significant risk and that its requirements exhibit a reasonable relationship between costs and benefits.

Finally, many of us felt that, as Congress originally intended in 1978, EPA should issue its final standards in advance of NRC regulations and DOE remedial action. However, we were also concerned about EPA's inability to devise and to publish reasonable standards and we desired the regulatory program to proceed. We have accordingly modified the law to permit DOE remedial action in response to proposed standards and to permit NRC to issue regulations in the absence of EPA standards. This in no way suggests approval of any proposed standards emanating from EPA. It simply reflects our frustration with the tardiness of the Agency.

Mr. Speaker, I wish to add a few comments on the issue of State regulations of mill tailings. Under the Atomic Energy Act, certain States, known as "agreement States," are allowed to regulate their mill tailings instead of the NRC. However, the agreement State must impose requirements which, "to the extent practicable," are at least as stringent as those developed by the Federal Government. Under this language, the agreement State may adopt differing and less stringent requirements if those at the Federal level are impracticable. An agreement State's program can be revoked by NRC only pursuant to notice and a hearing before the five commissioners themselves. We reaffirmed these basic principles in adopting section 19.

Mr. Speaker, let me now express the intent of the Members who originally proposed and amended the language in section 5 relating to emergency preparedness plans, and in section 11 relating to temporary operating licenses. I consider the floor colloquies on these sections to inaccurately reflect the conferees' agreements and the clear language of those sections in the bill itself.

A temporary operating license is limited initially to low-power operation of up to 5 percent of rated full thermal power of a plant. Due to these limitations, there is no need for an approved offsite emergency preparedness plan such as that contemplated under section 5, and so the clear language of section 11 of the bill merely provides that some plan must be filed with the NRC prior to the issuance of a temporary operating permit; it need not be approved by FEMA nor determined by the NRC to meet the requirements of section 5 since the only requirement of the bill is for filing prior to the issuance of a temporary operating license. Thus the requirements for a full power operating license and a temporary operating license are not exactly the same under the clear language of the bill.

Similarly, with respect to the type of emergency plan, the bill makes a distinction between an onsite emergency plan limited to the facility itself for a temporary operating license under the amendment of section 11 to section 192a(4) of the Atomic Energy Act, and a final, full power operating license that should have a more complete emergency preparedness plan either

approved by FEMA or determined by the NRC to provide reasonable assurance that public health and safety is not endangered by full power operation of the plant under section 5. Thus the filing of much more limited onsite "plan for the facility" is all that is required under section 11. Should the temporary operating license under section 11 be amended in staged increases to finally become a full power operating license, it is clearly our intention, as expressed on pages 27-28 of the conference report, that "ultimately every nuclear powerplant will have applicable to it a State emergency response plan that provides that the public health and safety will not be endangered in the event of an emergency at such plant requiring protective action" as determined by the NRC or as approved by FEMA. Thus, the clear language of the statute makes a distinction between a limited "plan for the facility" filed for a temporary license under section 11 and a final, State emergency response plan approved for a full power license under section 5.

Finally, a distinction is indeed made in section 5 between a State or local plan which is FEMA approved and a utility—or State or local plan—which the NRC may determine exists and is adequate in the absence of a FEMA-approved State or local plan. This distinction is not contained in section 11 which only requires that a "(s)tate, local or utility emergency preparedness plan for the facility" be filed with the Commission in order for a temporary operating license to be issued.

Frankly, these provisions—allowing a utility to file an onsite plan for a temporary operating license, and allowing the NRC to determine that an adequate offsite plan of a utility exists in the absence of an FEMA-approved State or local plan for a final, full power license—were included to insure that Federal premption in the area of nuclear power would not be frustrated in the emergency planning area by foot dragging on the part of a reluctant State or locality. The wisdom of including such Federal provisions is underscored by the situation which we understand exists in one district where a county has sued to try to enjoin its State from approving an emergency plan. The clear language of the statute and our intent throughout the legislative process was to insure that a plant could operate if there existed some plan—State, local or utility sponsored—providing reasonable assurance of the public health and safety.●

AUTHORIZING APPROPRIATIONS FOR THE NUCLEAR REGULATORY COMMISSION

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. BROYHILL. Mr. Speaker, as an original sponsor of the vital licensing reforms contained in the fiscal year 1982-83 Nuclear Regulatory Commission authorizations bill, I would like to clarify certain elements in the legislative history.

My remarks are addressed to the so-called Sholly amendment which authorizes NRC to issue amendments to operating licenses for nuclear powerplants in advance of any requested hearing if the NRC determines that the amendment involves no significant hazards consideration. The amendment directs the NRC to issue regulations establishing standards for such determinations.

The conference version of the Sholly amendment contains two provisions not included in the bill previously passed by the House. It would require NRC to consult with the affected State before making a determination of no significant hazards consideration. It would also require public notice and opportunity for public comment on any such proposed determination. I have no objection to those additional safeguards, but I am also assured that they do not alter the basic intent of the amendment to give NRC the final say in the technical judgments involved in making its determination.

NRC has already published proposed standards, which I understand NRC plans to adopt, for making determinations of no significant hazards consideration. They would permit such a determination only upon a three-part finding that the proposed amendment, first, would not involve a significant increase in the probability or consequences of an accident previously evaluated; second, would not create the possibility of an accident of a type different from any previously evaluated accident; and third, would not involve a significant reduction in a margin of safety. If the amendment failed to meet any of these tests, NRC would afford an opportunity for hearing in advance of issuance of the amendment even if NRC decides on the merits in favor of the amendment.

NRC's approach appears responsive to the expressed intention of the conference report that NRC's standards should, to the extent practicable, draw a clear distinction between those amendments which do or do not involve a significant hazards consideration. It is obvious, however, that for many amendments NRC will have to do a careful review and make a technical judgment as to whether the amendment meets NRC's standards. I am sure that NRC will take into account any comments it receives from the State or interested members of the public. It is my understanding of the intent of the Sholly amendment, however, that no opponent of a license amendment could hold up issuance of the amendment by asking for a prior hearing simply because he disagreed with the NRC's judgment.●

SECRETARY OF TREASURY REGAN'S CALL FOR A NEW BRETTON WOODS CONFERENCE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. KEMP. Mr. Speaker, I applaud the suggestion by Treasury Secretary Donald Regan for an international monetary conference along the lines of the Bretton Woods Conference of 1944. While the Secretary is not proposing a specific kind of monetary system established at that conference, it is clearly time for us to reexamine the part played by the breakdown of Bretton Woods in our economic decline over the past 15 years or so.

I am convinced that the prosperity and the vast expansion of world trade which we enjoyed from 1945 to 1971, were in large part made possible by the stability of the Bretton Woods system which was based on a common international money, the gold backed U.S. dollar. The "use" of this common money made possible a system in which exchange rates were substantially stable over time, so that people could trade their goods internationally without fear of suffering windfall losses. The system of often wildly fluctuating national paper currencies which began in 1973 has greatly increased the risk of trade, diminished its volume, and contributed directly to the growing move for trade protectionism.

A number of House Members have cosponsored the Balanced Monetary Policy and Price Stability Act, which would require the administration "to request a conference of the Board of Governors of the International Monetary Fund for the purpose of considering reforms of the international monetary system which would promote price stability, financial confidence, and expanded world trade." As a coauthor of the bill, together with House Republican Whip Trent Lott, I wholeheartedly welcome Secretary Regan's initiative.

In the hope that my colleagues will become more aware of the pressing need to reform the international monetary system, I would like to insert

into the RECORD at this point articles from today's New York Times, Washington Post, and Wall Street Journal concerning Secretary Regan's suggestions.

The articles follow:

[From the New York Times, Dec. 7, 1982]

U.S. ASKS INTERNATIONAL MONETARY CONFERENCE

(By Clyde H. Farnsworth)

WASHINGTON, December 6.—The Reagan Administration disclosed today that it wants to convene an international conference similar to Bretton Woods in 1944 to improve the world's monetary system and to deal with the mounting debt of developing countries and rising worldwide unemployment.

Treasury Secretary Donald T. Regan said at a meeting with reporters that he would take the initiative in discussing such a conference with finance ministers from Britain, France, West Germany and Japan at a meeting in Frankfurt on Thursday. Mr. Regan said the world's economic problems were being handled on an ad hoc basis as emergencies arose, such as the debt repayment crisis in Mexico.

"What I'm suggesting is that we have to have some better way of operating," he said. His objectives for the proposed monetary conference, he said, would include exploring ways to control inflation, change monetary practices and deal with currency problems. He said he was seeking to achieve "viscosity," or less fluctuation in the value of the world's major currencies. This, he said, could be achieved through a convergence of international economic policies, especially those dealing with taxation and money supply. Both play key roles in the health of the economy of every nation.

"I am suggesting that we concentrate on the problems," he said. "If I knew a specific solution, I would offer it. We need thought and formal discussion."

Mr. Regan described his call for a conference as a "personal" initiative, but he said he had taken it up with other members of the Reagan Cabinet. He returned over the weekend from a trip with the President to Latin America where that region's debt problems were discussed.

The Treasury Secretary explained that he was not calling for a return to fixed exchange rates for currencies, which grew out of the conference at Bretton Woods, N.H., and lasted until 1973. Since then the major currencies have floated freely in relation to each other.

Mr. Regan also said the Administration had not changed its views against intervening in the foreign-exchange markets unless conditions become chaotic.

Up to now the Administration has avoided any talk of a new Bretton Woods. That conference established postwar monetary order by creating the International Monetary Fund and the International Bank for Reconstruction and Development, popularly known as the World Bank. Both of these institutions lend to countries in financial trouble and have come to be regarded as the pillars of international cooperation on economic issues.

The Administration's position has been that monetary conditions would improve on their own. Until recent months, for example, the Administration had opposed an increase in the $66 billion pool of lendable resources that the I.M.F. uses to help countries in trouble. The Administration is now supporting an increase between 40 and 50 percent in addition to enlargement of a special crisis fund for the I.M.F. to $20 billion from $6.8 billion.

Mr. Regan said today that the problems had become more serious with world disinflation causing a squeeze on financial resources and blocking trade. And there are "enormous risks," he said, because debt problems of the third world could cause confusion in the huge overseas Euro-dollar market, where dollars are lent and relent with no overall controls.

"The groundwork has to be laid for some kind of international meeting," Mr. Regan insisted, "but it will take a long time."

Just a few days ago the major trading nations of the world wound up a ministerial meeting called to discuss trade issues. After some fierce fighting between the United States and Europe, the meeting ended with a consensus that protectionist measures should be resisted.

Mr. Regan said the proposed monetary conference would complement the Geneva trade conference. He was asked how countries that disagreed so widely on trade could agree on monetary issues. "I think the pressure of recent events indicates even more the necessity for such stability," he said. "I think also that most nations are groping for a solution to these problems."

While the President and Mr. Regan were in Brazil, it was announced that the United States was lending Brazil $1.2 billion in an emergency "bridge" loan to help Brazil out until it starts receiving funds from a $6 billion drawing from the International Monetary Fund that it has just applied for. Mr. Regan said this typified the ad hoc approach that could be improved with refinements in the workings of the monetary system.

The coming Frankfurt meeting will be an informal gathering of finance ministers of the five leading Western industrial countries. Such meetings of the so-called Group of Five are generally held in great secrecy. Usually the site is not even announced.

Mr. Regan's decision to go public with what he wants to discuss was seen as an indication of the importance he attaches to the initiative.

The first reaction from other governments was generally favorable. "I am a bit astonished to see this initiative from the United States," said Wolfgang Glomb, financial counselor at the West German Embassy in Washington. "Until now this sort of talk has been coming mainly from Europe. There is certainly a need for greater cooperation.

A British official here, who asked not to be identified, said, "It sounds fascinating, and I'll be anxious to hear more."

[From the Washington Post, Dec. 7, 1982]

REGAN SEEKS MONETARY OVERHAUL

(By Hobart Rowen)

Treasury Secretary Donald T. Regan yesterday called for an overhaul of the international monetary system because the global problems caused by recession "continue to grow more serious."

Regan said he will ask finance ministers of the major industrial nations to consider ways to ensure a faster and more coordinated response by governments and lending agencies to cope with critical credit shortages in the Third World.

His unexpected announcement appeared to be one more reflection of an increasingly grim assessment by the Reagan administration of the world economic outlook since the annual meetings of the World Bank and the International Monetary Fund in Toronto in September.

Regan said he would bring up his proposal for the first time Thursday at a dinner meeting in Frankfurt, West Germany, with his fellow finance ministers from West Germany, Britain, France and Japan.

To achieve the end result he favors, Regan said a worldwide conference might have to be called to set it on track. But he stressed that "we are not yet ready for another Bretton Woods"—site of the 1944 conference setting up the IMF and World Bank. "We are still groping toward a solution," Regan said.

In answers to questions, Regan said that one purpose of a reorganized system would be to introduce more stability in the exchange rate system, although he denied he was advocating a move from present fluctuating rates back to the old pattern of fixed rates.

Since the World Bank and IMF meetings in September unemployment has increased almost everywhere, and pressures have accelerated for emergency measures to prevent defaults in the Third World that might also threaten the commercial banking system in the richer nations.

The Reagan administration has already approved, in principle, a major increase in funding for the IMF, whereas in Toronto, its insistence on merely a minor increase created a stalemate.

But yesterday, Regan told reporters that the present "ad hoc" basis of relations among the IMF, the Bank for international settlements in Basel, and the major nations' central banks that help finance Third World problems must be abandoned so there can be "a faster response" to the needs of less fortunate nations.

The "Group of five" session of the leading finance ministers and central bank heads to take place in Frankfurt Thursday is one of a regular series. This one is expected to make a final decision on the extent to which IMF quotas—deposits paid into the IMF by members—should be boosted as one way of enlarging the IMF's lending potential for the rest of the 1980s.

Third World nations have accumulated an estimated $500 billion to $600 billion in debt to the industrial nations and their commercial banks. Without additional loans from the IMF and the commercial banks, some defaults are possible: already, much of this debt has had to be "rescheduled," a euphemism for postponement and softer terms.

Regan made his announcement at a media briefing on his trip planned for this week to Frankfurt, and to Brussels for trade discussions with the European Community. His ideas are not committed to paper, he said, and will be presented to the five finance ministers "on an informal basis."

Regan said that his initiative was a personal one, not yet adopted by the Reagan administration. But he said he had discussed it informally with his Cabinet colleagues.

Pressed for details, Regan responded repeatedly that "I'm just trying to get the thinking started on this issue. . . . The groundwork has to be laid for some kind of financial meeting, it will take a lot of time."

Regan also officially confirmed that the United States seeks a meeting of the IMF's policy board, the Interim Committee, in late January or early February, 1983, instead of the planned April date, to settle on the quota issue.

As a companion measure, it is expected that the Group of Ten richest industrial na-

tions will also increase the funds they make available through the IMF. The quota and the Group of Ten moves together would boost IMF hard-currency resources by nearly $30 billion.

But Regan's proposal yesterday for a revamping and reorganization of the international monetary system—although still preliminary—went far beyond the immediate problem of boosting IMF resources.

He appeared to have been influenced by his trip to South America last week with President Reagan, where he said they observed that the impact of the recession, which stimulates the forces of protectionism, "is even more pronounced" than it is here or in Europe.

"The less developed countries who have to go to the IMF for help are all told one thing by the IMF, which is that conditions require that they export more and import less.

"But that creates a puzzle, because the industrialized nations are trying to export more and import less. How can every nation do this simultaneously and still maintain an international trading system?" he asked rhetorically.

He responded that "the only thing that can be done is for all of us to share the misery, and not try to insulate ourselves from it."

Regan said that the pressures brought about "in this period of disinflation" result in a series of uncoordinated moves—consideration of the IMF quota increases, and "bridging" [temporary] loans by the BIS. "There is a lot of ad hoc to this, like our own loans to Brazil and Mexico," he said.

"There's no overall symmetry—I'm not knocking the IMF, but we don't get the [needy] nations to the IMF soon enough."

[From the Wall Street Journal, Dec. 7, 1982]

U.S. SAYS IT IS READY TO HELP STABILIZE ECONOMY OF WORLD

WASHINGTON—The Reagan administration signaled it is worried enough about growing world economic strains to go along with expanded international efforts to cope with the problem, but it still isn't backing any sweeping new proposals.

Treasury Secretary Donald Regan told reporters at a briefing yesterday that he thinks the major industrial powers should consider various approaches to stabilize the troubled global financial system. He said these include creation of a faster loan-disbursing agency to help debt ridden countries keep afloat while waiting for International Monetary Fund loans to be approved; reduction of protectionist trade barriers, and closer coordination of broad economic policies to help minimize volatility in the foreign-exchange markets.

At the same time, however, Mr. Regan rejected any more sweeping proposals, such as abandoning the current system of floating exchange rates in an effort to limit the range within which currency values may fluctuate. He again turned thumbs down on suggestions that the U.S. increase its intervention in the international currency markets to keep exchange rates from getting out of line, as some European officials have proposed.

Finance ministers of the U.S., West Germany, Britain, France and Japan are scheduled to meet in Frankfurt Thursday to complete work on a plan to expand the IMF's lending resources.

Mr. Regan said U.S. officials were becoming more concerned because "the situation" internationally "continues to grow more serious and the potential is out there for an even more serious situation. We've got to try to head that off," he said.

The secretary said the finance ministers ought to begin laying the groundwork in Frankfurt for a meeting to consider the whole financial and economic issue. But he asserted it probably shouldn't come too soon because policymakers aren't sure yet what ought to be on the agenda. Asked about a second Bretton Woods conference, such as the one in 1944 that established the IMF and World Bank, he replied: "We're not ready for that yet."

The U.S. already has broached most of the proposals Mr. Regan listed in earlier international economic meetings.●

ILLINOIS AND MICHIGAN CANAL NATIONAL HERITAGE CORRIDOR

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CORCORAN. Mr. Speaker, I am the sponsor of H.R. 5665, legislation to create a new national park system designation for an area in Illinois stretching from Chicago to LaSalle-Peru, part of which will run through my congressional district. This new designation, called a National Heritage Corridor, seeks to create a partnership among Federal, State, local, and private organizations by the formation of a National Commission. Although no Federal land acquisition is required, cooperation is needed among these groups to effectively create a recreational and historical site suitable for the Federal title. Strictly on a voluntary basis, these groups will seek to improve and promote the corridor area. Conservation, business, State, and grassroots organizations, among others, have already begun that cooperative effort in the formation of the legislation, and I look forward to the continuation of this effort when the legislation receives congressional consideration, perhaps as early as next spring.

Meanwhile, I would like to include in the RECORD a brief report on the historical, scenic, ecological, and recreational significance of the proposed corridor area. This well written and informative report, "Illinois May Get A National Heritage Corridor," was authored by a constituent of mine, Marjorie Elvin, of Elgin, Ill. I urge my fellow Members to take some time to read this excellent report, which provides an Illinoisan's justification for a National Heritage Corridor designation in this unique area.

ILLINOIS MAY GET A NATIONAL HERITAGE CORRIDOR

(By Marjorie Elvin)

Illinois may get its first nationally designated area for recreation. A new concept of protecting areas of historic, scenic, ecological, and recreational value can be used in places where growing populations are putting increasing pressure on valuable resources.

Three members of the Illinois congressional delegation, Rep. Tom Corcoran and Senators Charles Percy and Alan Dixon, have introduced legislation that would establish the Illinois and Michigan Canal National Heritage Corridor. In April the Illinois General Assembly approved a joint resolution urging Congress to support establishment of the corridor proposed in Senate Bill 2157 and H.R. 5665.

The Illinois and Michigan Canal, opened in 1848, was the connecting link between the Great Lakes and the Mississippi River systems. It is credited with making Chicago the most important inland port of North America. Originally the canal was 60 feet wide at water level, had a 15-foot towpath, and a 90-foot reserve along both sides. The canal was 90 miles long, and this corridor of open land will provide a setting for a recreational trail of the same length.

Toward the end of the 19th century, as more railroads were built, traffic in the canal decreased. In 1933 the Illinois Waterway, the modern counterpart of the I&M Canal, opened, and the old canal was abandoned for navigation. In 1974 all that remained of the canal was taken over by the Illinois Department of Conservation, although the Federal Government still holds rights to the title of property along the canal.

A National Park Service report was released in December on the proposed 90-mile recreational trail along the canal which parallels the Des Plaines and Illinois Rivers. The report calls for a partnership of Federal, State, and local entities, and private interests to develop the recreational potential of the corridor.

The proposed coordinated regional plan would establish a 15-member Corridor Commission with one member from the National Park Service and the other 14 appointed by the governor of Illinois to represent business, preservation and conservation interests. The National Park Service and the Illinois Department of Conservation would lend technical assistance and staff.

The National Park Service report states that a majority of the canal towpath is suitable for trail development, and there are more than 200 historic structures centered in 17 canal towns. Illinois & Michigan Canal structures still existing include 14 of the 15 original locks, three locktender houses, two nineteenth century bridges, one mule barn and tavern, and three grain warehouses.

In accord with the goals of the report, bicycle and hiking trails and canoe routes would be developed, mostly on public land and waterways, providing for a continuous recreational trail from Summit to La Salle. Canal structures would be stabilized or renovated, and a program to increase public awareness of the unique geological and historical value of the area would be introduced.

Most of the I&M property winds through wooded countryside, paralleling the Des Plaines and Illinois Rivers. In the 1950s, however, some of the canal right-of-way was taken over for construction of Interstate Highway 55, and the canal was paved over near Chicago. In the half-century since it was abandoned, some of the historic canal has been obliterated by civilization and some is hidden in undergrowth. In places where the canal passes through cities, Illinois officials are studying where the hiking and biking paths could be rerouted or sepa-

rated by a fence from areas such as train tracks and industries.

In 1782, the land that was to become Illinois came into American political control, and thereafter waterways brought people to Illinois. Early settlement in the future state of Illinois traveled on a network of bordering and interior rivers. The great Mississippi, flowing on the western border, transported settlers from New Orleans, the landing place for many arrivals from European countries. The broad Illinois River, a tributary of the Mississippi, could be navigated by sizable boats as far as Peru.

Lake Michigan became the thoroughfare used by sailing vessels and steamers. The opening of the Erie Canal in 1825 created an all-water route that brought Illinois closer to the eastern and foreign markets than the route up the Mississippi.

In Illinois, there was confidence that Chicago would become important because of its location. The legislature talked encouragingly about a canal from the Illinois River to Lake Michigan as a major water transportation link between the two great water systems. Abraham Lincoln, as a state legislator, played a major role in the establishment of the I&M Canal.

It took twelve years to complete the canal because of financial and engineering problems. Needing manpower, the contractors made a major contribution to the population of the state by attracting Irish, German, and other European laborers who, with a steady stream of their countrymen, helped build the towns that sprang up along the canal.

Today the first old canal structures can be seen at Lockport, where the Will County Historical Society operates the I&M Canal Musuem. The 10-room museum is housed in the original canal headquarters, built in 1837. The building overlooks the canal and what was once the public landing. Several of the limestone block buildings that once served as warehouses and mills still stand along the banks of the canal. The crumbling remains of Lock 1 lie eight blocks south of the museum.

In the museum may be seen a model of a canal boat. Long and blunt ended, the canal boats carried about 90 passengers. The regular or line boats offered narrow shelves for bunks and also sold deck space to immigrating families.

The first part of the trip from Chicago was the fastest. Small steamers towed packets and freight boats on the Chicago River. Once the actual canal was reached, the boat was powered by a team of two to five mules or horses hitched to it by towlines 70 to 90 yards long. The long towline led forward until it reached the towpath, which followed the canal its full length. A driver either walked along behind the team on the towpath or rode the rear animal.

The canal opened in April, 1848, and it served well in the interval before the railroads arrived. Grain grown along the Illinois and upper Mississippi Rivers could be shipped to market by way of the canal and Great Lakes at less cost than by way of New Orleans. The canal was the most convenient way to travel, especially in the deep mud of the prairie in the rainy season. Canal packets and the connecting river steamers proved more reliable and comfortable than stagecoaches.

Some of the best preserved canal relics can be found in Channahon Parkway State Park. Locks 6 and 7, built of large stone blocks, a control dam on the Des Plaines River, and the 130-year-old lockmaster's house are in good condition. The Illinois & Michigan Canal State Trail, a 15-mile stretch of improved trail on the old canal towpath, is open for hiking and cycling from Channahon Parkway State Park to Gebhard Woods State Park at Morris.

In Gebhard Woods the water of the canal is carried in a stone aqueduct over the stream of Nettle Creek. The canal boats originally also passed over the Fox River, Little Vermillion River, and Aux Sable Creek by aqueduct.

The wide vistas of the prairies of the Illinois country had astonished the white men who came as explorers. The Illinois tallgrass prairie was a vast sea of head-high grasses waving away to a flat horizon, broken only by occasional trees in island-like groves or dense borders along streams. Six miles from Morris, the traveler today may walk through a remnant of tallgrass prairie in Goose Lake Prairie State Park.

In Illinois there are few places where the bedrock which underlies the state is visible above the deep topsoil. Near Ottawa, three state parks offer exploration into formations of sandstone—Starved Rock, Matthiessen, and Buffalo Rock.

In Starved Rock State Park formations are primarily of St. Peter's Sandstone, which was laid down by a shallow sea 440 million years ago. In this region the sandstone was brought to the surface as a result of a huge upfold known as the La Salle Anticline. Later the glacial melt-water from old Lake Chicago roared through to cut the future Illinois River Valley. Now the water-contoured sandstone of Starved Rock rises vertically 125 feet and juts out over the Illinois River on the south bank.

Starved Rock offers rugged beauty and unusual views to hikers on its 12 miles of marked trails. Today a wooden stairway leads up to the top of the rock, and offers a scenic view of the Illinois River Valley. Upstream, the waters of the river are seen rushing through the Starved Rock Dam. To the left of the dam is the lock. Towboats, jumbo barges, and pleasure craft are raised or lowered in the 600-foot long electrically controlled lock of the Illinois Waterway.

Near Utica, the Illinois Waterway Visitor Center is open seven days a week, and provides an observation area for close-up viewing of the locking through process of boats and barges. The U.S. Army Corps of Engineering maintains and operates the Illinois Waterway which extends from Lake Michigan to the Mississippi River.

In Utica is a two-story warehouse, built in 1848, which served the needs of the traffic along the Illinois-Michigan Canal. Its massive oak beams and native stone walls have been preserved, and it now houses the La Salle County Historical Museum. In the museum is the carriage which conveyed Lincoln to the scene of the first Lincoln-Douglas debate in Ottawa.

Matthiessen State Park is an area of dells and stone formations, waterfalls, caves, and cliffs. Glacial meltwaters helped erode the valley of the tributary Vermillion River and its canyons. On damp walls in the cool canyons are thick carpets of mosses, ferns grow in areas of moisture, and Virginia Creeper hangs 30 feet from canyon walls.

At Buffalo Rock State Park, a fortress-like sandstone bluff on the north bank of the river, an improved trail for hikers and cyclists on the old I&M towpath continues to La Salle. Canoeists will find a 5.5-mile stretch of the I&M Canal is navigable from Utica to La Salle, and there are three portages along the way.

A canal boat turning basin was between Locks 14 and 15 in La Salle. West of Lock 15, in the neighboring city of Peru, was the steamboat basin where steamers from the Mississippi River could pull in, and cargoes and passengers could be exchanged with the canal boats.

The enthusiasm of the people along the corridor for national recognition and a unified plan for preserving the open lands of the canal has been persistent. Canal legislation has been introduced before by Rep. Tom Corcoran of Ottawa. In 1977 he sought to make the canal a national scenic trail, in 1978 a national historic park, and in 1979 either a scenic trail or a historic park. This time, however, the introduced legislation follows the National Park Service report, and proposals generally stand a better chance of enactment when they appear on their list.●

HON. JOHN H. ROUSSELOT

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ZABLOCKI. Mr. Speaker, I welcome this opportunity to pay tribute to a senior member of the California delegation, Mr. ROUSSELOT, who has played a major and significant role in this body for well over a decade.

It is sometimes said that Members of Congress, like great artists and playwrights, only receive the recognition they deserve when they are gone from our midst, and I suspect this principle applies most particularly to the gentleman from California. Very little legislation which has been brought to the House floor in recent years has escaped his watchful scrutiny, and in retrospect I must confess that he served a useful purpose in making us explain and justify our respective programs and official actions. Since all legislation reported out of the Committee on Foreign Affairs is invariably justifiable and reasonable, we were, of course, equal to the challenge.

In all seriousness, I commend the gentleman for his contribution to legislative debate, for his steadfastness of purpose and dedication in carrying out his responsibilities, and for his consistent adherence to the causes which he espoused with such obvious conviction.

While he is best known, perhaps, for his participation in floor debates, I should point out, as chairman of the Foreign Affairs Committee, that JOHN ROUSSELOT has been an active and conscientious member of the U.S. delegation to the annual Mexico-United States Interparliamentary Conferences over a period of some 7 years. In this capacity he has made an important contribution to bilateral discussions between legislators from our two countries on a wide variety of issues of mutual concern, not only to Mexico and the United States, but also to the

State of California, which he had ably represented for eight terms.

It is difficult to imagine life in this body without the gentleman, and I join his many colleagues and friends in wishing him, his wife Vyonne, and his family all possible success in future endeavors. I say this with a sense of confidence that the articulate and compelling voice of JOHN ROUSSELOT will continue to be heard in the years ahead.●

CLINCH RIVER—A COST AND PROLIFERATION MONSTROSITY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. OTTINGER. Mr. Speaker, recently the enormous economic cost of proceeding with the Clinch River breeder reactor (CRBR) has become more clear than at any previous time. This week the General Accounting Office provided information to Congress that not only confirms that Clinch River will cost more than $8 billion to build, but also shows that it would cost an additional $3.3 billion in taxpayer dollars to operate CRBR over its proposed 30-year life. These figures are truly staggering and provide an overwhelming strong justification for terminating the CRBR project once and for all.

However, we must not lose sight of another problem which unavoidably comes with plutonium-fueled reactors like Clinch River. These reactors could contribute to the spread of nuclear weapons. We do not need to generate our electricity from a fuel that could be made into nuclear bombs.

This grave consideration was raised in a timely editorial which appeared recently in the Washington Post. I am also inserting an excellent article, entitled "Breeders, Plutonium, and Nuclear Weapons." The work prepared by Nuclear Control: Citizens to Stop the Spread of Nuclear Weapons, a nonprofit educational organization working exclusively on the nuclear weapons proliferation problem.

I commend both of these pieces to my colleagues as they prepare to decide whether CRBR should be terminated.

[From the Washington Post, Dec. 2, 1982]

A CHANCE TO KILL THE BREEDER

As the case for building the Clinch River breeder reactor grows steadily worse, the costs of building it go steadily higher, The appropriations bill containing Clinch River's money is about to come to the floor of the House of Representatives. That gives the House an opportunity to kill, at last, this wasteful and highly dangerous venture.

The debate is currently fixed on money, since the thing can best be reached through the fiscal legislation, and the costs are large. The Energy Department's current cost estimate is $3.6 billion, and the General Accounting Office's reviews suggest even higher figures. But there are further and larger questions here.

The breeder technology is risky, but its purpose is to extract perhaps 100 times as much electricity from the uranium as the present generation of light water reactors can. Are the risks worth it? This project first took shape in the late 1960s, when the government expected a huge expansion of nuclear power that would create a severe shortage of uranium. A decade ago, the GAO pointed out recently, the government expected 800 to 1,500 reactors in operation by the end of the century, its estimate currently is 145 to 185. Meanwhile, there have been huge discoveries of high-grade uranium ore around the world, and, far from facing a shortage, the American uranium industry is frantically urging Congress to pass legislation to protect it from imports.

There's a far better reason than money for killing the Clinch River reactor. Technology places a solid wall between the present power reactors, on one side, and the plutonium technologies, on the other. The present reactors run on a uranium fuel that cannot be made into bombs. Although its wastes contain plutonium, that plutonium can be extracted only by an extremely difficult and expensive process. But the breeder reactor requires plutonium as a fuel. Once recaptured to feed the breeder, it can easily be fabricated into weapons. The breeder demolishes that wall between nuclear power and nuclear weapons. The reprocessing plants that supply breeders have military implications, and the fuel has to be handled under military security—not least to keep it out of the hands of terrorists.

If you support the principle of nuclear power as a clean and relatively safe way of generating electricity, you would do well to oppose adamantly the construction of the Clinch River breeder reactor. Building this reactor would give substance to all of the most extreme fears about nuclear power and to the accusation that it inevitably puts the ready ingredients of weapons into everyday commerce. Plutonium would place on the nuclear industry and the utilities a burden that they cannot carry. Even if the reactor were less expensive and even if it promised cheaper power—as it manifestly does not—the breeder technology can bring only harm to the civilian economy.

BREEDERS, PLUTONIUM, AND NUCLEAR WEAPONS

(By Bill Adler)

There is no way that we will be able to provide assurances that thousands of tons of plutonium are being devoted to peaceful purposes.—Senior International Atomic Energy Agency Official[1]

BACKGROUND

The plutonium breeder reactor is being actively promoted by the governments of several advanced industrialized states and Third World countries as the next generation of nuclear power plant. Breeder reactors are favored by their proponents in government and industry on the basis of being able to produce more nuclear fuel than they consume. Tremendously high costs, however, are jeopardizing breeder programs in this country and abroad. For example, the most recent cost estimates for the Clinch River Breeder Reactor, a prototype commercial breeder, range from $3.2 to more than $8.8 billion.[2] But even if breeders were economical, the threat to international security posed by the fast amounts of plutonium they would produce and use as a fuel makes them too dangerous ever to operate. Plutonium is a key ingredient of atomic bombs.[3]

HOW BREEDERS WORK

Plutonium-breeder reactors, like conventional nuclear power reactors, generate electricity by heating water to operate steam turbines. heat and plutonium are byproducts of nearly all nuclear-fission reactors.

A major difference between breeder and other power reactors is that breeders must use plutonium (or weapons-grade uranium) as fuel. Most conventional power reactors are fueled with natural or low-grade uranium unusable in nuclear weapons. The plutonium they produce can remain "locked" in highly radioactive spent fuel, where it is inaccessible and is in a dilute form unsuitable for nuclear weapons. This spent fuel can be disposed of in unaltered form. Breeders, however, require large quantities of pure plutonium to be reprocessed from spent fuel. This separated plutonium is then combined with uranium and "recycled" as breeder fuel. The separated plutonium also can be fashioned into nuclear weapons.

Nuclear fission occurs in the breeder reactor's core and in a surrounding "blanket". A typical 1,000 megawatt breeder is designed with a core of over 30,000 pounds of uranium and more than 5,800 pounds of plutonium.[4] The blanket is comprised of some 22,000 pounds of uranium, primarily consisting of the fertile isotope (non-weapons usable) U-238. Neutrons are produced by the fissioning of plutonium in the core and are absorbed by uranium in the core and in the blanket, generating both heat and more plutonium. More than 5,800 pounds of plutonium can be retrieved from the core and more than 760 pounds from the blanket each year of reactor operation. Over 6,500 pounds of plutonium are discharged from a breeder reactor every year.[5] Since less than 15 pounds of plutonium are needed to make an atomic weapon, each breeder reactor discharges enough plutonium to fashion at least 400 bombs a year.

PLUTONIUM AND THE BOMB

The principal obstacle to building an atomic bomb is obtaining plutonium or highly enriched uranium. The requisite technical information, including critical mass summaries and how to fabricate neutron reflectors and other components, is found in the public literature and is, therefore, readily available to individuals, groups and nations.

According to Dr. Theodore Taylor, a former nuclear weapons designer and former Deputy Director of the Defense Atomic Support Agency, a single, well-educated and determined individual could make a crude, but effective fission bomb.[6] A well-designed bomb could possibly fit into a small van or the trunk of a car. The Congressional Office of Technology Assessment reports:

A small group of people, none of whom have ever had access to the classified literature, could possibly design and build a crude nuclear explosive device. They would not necessarily require a great deal of technical equipment or have to undertake any experiments. Only modest machine-shop facilities that could be contracted for without arousing suspicion would be required.[7]

Similarly, any country with a nuclear power or research program, or with access

Footnotes at end of article.

to plutonium or highly enriched uranium, can manufacture nuclear devices with an explosive yield likely to equal or to surpass the power of the bombs which destroyed Hiroshima and Nagasaki. According to the Office of Technology Assessment:

The level of technological effort put forth in the minimal national program can be called low technology. Low technology encompasses the sort of nuclear device designs that would likely be produced for a first use or first test. This requires techniques which allow high confidence without prior nuclear test experience. This could be characterized as 1945 U.S. technology.[8]

SAFEGUARDING PLUTONIUM

Safeguarding large quantities of separated plutonium from misuse for destructive purposes is virtually impossible. Two processes are involved in "safeguarding" this material: (1) measurement and accounting procedures to verify the amounts of plutonium in a reprocessing plant at various points of the fuel cycle, and (2) guards, barriers, cameras, alarms and other physical-security and containment measures to ensure that plutonium is not stolen.

Safeguards must be effectively applied [9] to all elements of the breeder fuel cycle that are subject to diversion or theft of plutonium: the reactor, reprocessing plant, fuel fabrication facility, fuel storage facility and along the transportation routes between and among these facilities.

Since commercial breeders are not yet operated routinely, there is no demonstrated experience for assuring effective safeguards against diversion or theft of fresh fuels containing plutonium for refueling the reactors.

There is a limited amount of safeguards experience for commercial reprocessing plants, the key component of the breeder fuel cycle, and two major problems have become manifest:

First, existing methods of measuring the large amounts of plutonium contained in spent reactor fuel are imprecise: it is possible to estimate the quantity of plutonium contained in the spent fuel of light water reactors only to within plus or minus 10 percent.

Second, current systems can account for the amount of weapons-useable material undergoing reprocessing only to within 5 percent.[10] According to the General Accounting Office, "Uncertainties resulting from these measurements are so large that diversions of significant quantities of plutonium might not be detectable in large operating plants." [11]

Similar problems are encountered in fuel fabrication plants and in other facilities that handle plutonium in bulk.

Little commercial reprocessing has taken place in the United States, but a substantial amount of non-commercial plutonium is unaccounted for in U.S. defense and other government nuclear facilities. This material, known as Material Unaccounted For, or "MUF," can result from numerous circumstances including accounting errors, measurement uncertainties, accumulated small losses in pipes, and deliberate diversion. Between 1947 and 1981, over 4,000 pounds of plutonium were unaccounted for in this country. One facility, the Savannah River Reprocessing Plant, a weapons facility operated by the government, had a net shortage of 320 pounds of plutonium during its operating lifetime from 1955 to 1972.[12]

Although the precision of material accountability for each part of the breeder fuel cycle remains difficult to ascertain, the total amount of unaccounted-for plutonium in the fuel-cycle would be large—certainly large enough to permit undetected diversion of weapons-useable plutonium.

STEALING PLUTONIUM

Two major dangers will persist: diversion of plutonium by states and theft by terrorists and gangsters.

The potential for clandestine diversion by governments raises grave dangers. Plutonium, once separated from highly radioactive spent fuel, is readily handled at all stages of the fuel cycle. The ability of the International Atomic Energy Agency to safeguard this material against diversions by states is subject to severe political and technical constraints. Its role is limited to verifying material balances reported by states. It has no authority to seek out clandestine activities. Its role is akin to an auditor, not a policemen.

Uncertainty of materials accounting is so large that the IAEA is unlikely to know for sure whether missing plutonium was, in fact, diverted or stolen. A nation's good faith and cooperation are required for international safeguards procedures and equipment to function properly. As pointed out in a published but still officially classified report by a former IAEA inspector to the Nuclear Regulatory Commission: "* * * the representatives of state systems and the operators of the installations know exactly how effective international safeguards are and how the international safeguards system can be defeated." [13]

In a recent letter, Nuclear Regulatory Commission Chairman Nunzio Palladino pointed out that because plutonium and highly enriched uranium (HEU) "can be transformed readily into weapons, we cannot count reliably on inspection alone to provide timely warning of diversion of HEU and separated plutonium in time to prevent weapons assembly if the necessary preparatory work has been done." [14] NRC Commissioner, Victor Gilinsky, recently wrote, "* * * the IAEA system does not (and cannot!) protect plutonium in national hands * * *. In the process of separation, the plutonium loses its national identity and effective control by any one fuel supplier becomes impossible." [15]

Monitoring tons of plutonium being transported around the world in hundreds of different vehicles, and maintaining accurate accounting for the hundreds of facilities in which plutonium is handled would be an arduous enough task. Operating an intelligence system that could provide quick warning of a diversion of plutonium might be impossible to accomplish.

Sober advice to the President has been offered by the Department of Defense regarding the ability of the International Atomic Energy Agency to safeguard plutonium and other dangerous materials:

"The Department of Defense wishes to express its reservations about the effectiveness of IAEA safeguards, the weakness of the IAEA as an international institution, its susceptibility to Third World and East Bloc politics, its lack of an intelligence capability, and the limits of its scope and jurisdiction, in order to guard against undue reliance on the IAEA by those responsible for national security within the United States Government." [16]

Given the known uncertainties and errors in materials accounting, and the technical and human limitations for dealing with them, there is no basis for believing that it is safe to proceed with commercial development of breeder reactors and related fuel facilities. There is no evidence for assuming that science will eventually achieve near-perfect plutonium accounting. With tons—and eventually thousands of tons—of plutonium circulating annually in various facilities and being transported around the globe, nations desiring nuclear-weapons material would be able to obtain it.

NUCLEAR THEFTS AND THREATS

At the same time, overt seizure of plutonium, or sneak thefts within the margins of accounting error, also would be difficult to prevent. With dozens or more breeder reactors operating world-wide, hundreds of tons of plutonium would be transported within and among countries by rail, sea, truck and possibly air, presenting numerous opportunities for theft.

The principle presently used to prevent the theft of plutonium used in military facilities—containment—could not effectively be employed to keep plutonium secure once it becomes an item of international commerce. Keeping track of and guarding the hundreds of vehicles carrying plutonium will be an arduous task; preventing thefts of small quantities, enough for a few atomic bombs, could be impossible over the long run.

The Office of Technology Assessment reports, "If plutonium becomes a commonly traded commodity, minimal intermittent black market transactions seem plausible, simply because the large amounts of material that could be circulating would be difficult to safeguard perfectly." [17]

Many unauthorized intrusions of nuclear facilities already hav occurred. For example, in March 1971, five uranium rods were stolen from the Springfield fuel fabrication plant in the United Kingdom "perhaps in transit or at the Wylfa reactor in Anglessy." [18] In 1975, in a demonstration of security inadequacy, a West German Member of Perliament carried a bazooka into the Biblis reactor plant and presented it to the Director. In 1976, an intruder successfully scaled a security fence and entered a protected area at the Three Mile Island Reactor. he was not apprehended.[19]

There are a number of recent reports of a disturbing phenomenon—nuclear threats: "* * * in the seven years ending in November 1977, forty-nine threats were received in the United States "in which adversaries claimed to possess nuclear material of a nuclear device and threatened to wreak severe damage with it." By mid-1981, the count was sixty-five and rising. * * * At least four threats were deemed sufficiently credible to evoke intensive research by a specially instrumented team * * *." [20]

Nuclear terrorist threats would become far more credible once plutonium becomes widely available. In the absence of foolproof methods for keeping even small amounts of this weapons material out of irresponsible hands, the likelihood of genuine nuclear blackmail and of nuclear violence will increase over time if breeders are developed and deployed.

MOVING TOWARD A WORLDWIDE BREEDER ECONOMY

Elaborate plans are being made to protect a single commercial breeder reactor at Clinch River, Tennessee, and its accompanying facilities from sneak thefts and attack. For example, an extensive network of alarms, guards, fences, vaults and other devices, as well as specially equipped plutonium-carrying trucks with armed couriers in constant communication with law enforcement agencies, are being developed. Some of

the ancillary fuel-cycle facilities will be located in high-security nuclear-weapons compounds operated by the Department of Energy. The Nuclear Regulatory Commission staff assessment of Clinch River safeguards maintains that "the probability of a successful act of sabotage or theft is low,"[21] for this one reactor, but it also points out that "the proposed DOE facility design is conceptual in nature; hence the safeguards system is also conceptual."[22]

Despite the stringent safeguards required for Clinch River and its fuel cycle, and the present conceptual state of those safeguards, the impact of proceeding with Clinch River on the global spread of nuclear weapons is not formally being considered. According to the NRC assessment, "The staff has not evaluated the relative proliferation resistance of the various fuel cycles or the likelihood that development of the Clinch River Breeder Reactor Project will lead eventually to the further proliferation of nuclear weapons."[23]

Breeder proponents look ahead to a world in which there are hundreds, and eventually thousands, of breeder reactors despite the impracticality, if not the impossibility, that the military-like security and safeguards procedures planned for the Clinch River project can be uniformly applied throughout the world.

The International Nuclear Fuel Cycle Evaluation report estimates that there could be some 50 breeder reactors operating by the year 2000;[24] a recent Scientific American article projects that in 50 years about 1,500 breeders could be producing 1,000 megawatts of electricity each, supported by 60 large plutonium reprocessing plants and similar number of fuel fabrication facilities.[25]

Dr. Theodore B. Taylor, the former nuclear weapons designer, describes this breeder-supported world:

"The total annual quantity of plutonium shipped between the projected nuclear power plants and fuel reprocessing and fabrication plants would be in the vicinity of 2 million kilograms. It takes less than 10 kilograms of plutonium to make a fission bomb that is now old fashioned. Diversion of less than 1% of this annual flow of plutonium would be enough for more than 1,000 nuclear weapons per year."[26]

He points out that a "single fast breeder fuel reprocessing plant would discharge enough plutonium for more than 10,000 nuclear weapons per year."[27] Depending on how many breeders are producing electricity, there could be hundreds or thousands of bombs worth of material unaccounted for each year.

Plutonium, once separated from spent fuel, remains weapons useable for over 100,000 years; in fact, it then decays into another weapons material, uranium-235. Because of its exceedingly long active life, plutonium must be guarded with absolute assurance for a period of time equal to the millennia between the last ice age and the present.

THE GLOBAL IMPLICATIONS OF CLINCH RIVER

Given the inherent danger of separated plutonium, a material produced by the ton that can be used by the pound to make nuclear weapons, the implications of proceeding with the Clinch River plutonium breeder go far beyond the energy interests of the United States. Clinch River would further legitimize plutonium as a civilian fuel and would encourage breeder development and plutonium commerce around the world at the very time these programs are encountering serious difficulties in every country pursuing them.[28]

There is no human experience in commerce in a material as dangerous as plutonium. However, the inability of governments to control trafficking in heroin, portable anti-aircraft missiles and high explosives suggests that we cannot be sanguine about their ability to control trafficking in plutonium. The widespread use of plutonium as a civilian fuel would pose an unprecedented threat to human civilization, even to survival. Neither the political nor the technical skills have been developed to assure the safe and secure handling of plutonium in commerce. Unless they are, Clinch River and other commercial breeder reactors are too dangerous to bring into the world.

FOOTNOTES

[1] Judith Miller, "Trying Harder to Block the Bomb," New York Times Magazine, September 12, 1982.

[2] The Department of Energy's most recent cost estimate for Clinch River, made in 1980, is $3.2 billion, an eight-fold increase since the original 1971 projection of $400 million. An interim report by the General Accounting Office states that the cost of the project could exceed $8.8 billion (September 23, 1982). Neither the DOE nor GAO included in their calculations the cost of all the ancillary facilities such as reprocessing, fuel storage and fabrication plants. Breeder programs in France, Great Britain, Japan and West Germany are experiencing major cost escalations as well.

[3] The vast amounts of weapons plutonium in the United States and other nuclear-weapons states are also of deep concern but beyond the scope of this report on the impact of commercial plutonium on the spread of nuclear weapons.

[4] All figures, unless otherwise stated, are for a 1000 ME(e) breeder reactor. Breeder input and output information is derived from the International Nuclear Fuel Cycle Evaluation, Report of Working Group 5, Chapter 3, "The Fast Breeder Fuel Cycle," pp. 83-91, International Atomic Energy Agency, Austria, January 1980.

[5] The isotopic content of the plutonium produced in the blanket is about 97% plutonium 239, which is considered ideal weapons material. Plutonium in the core has a higher concentration of plutonium 240, but still can be readily used in nuclear bombs.

[6] Statement made at a forum on nuclear terrorism at a meeting of the Nuclear Nonproliferation Task Force, U.S. Congress, August 12, 1982.

[7] "Nuclear Proliferation and Safeguards," U.S. Congress, Office of Technology Assessment, 1977, p. 140.

[8] Ibid., p. 140

[9] By "effectively applied" we mean safeguards that can provide prompt warning of a diversion of, or can prevent theft of, a weapons quantity of plutonium—that is, less than 15 pounds.

[10] An accounting error of 5 percent of the plutonium going through a large commercial reprocessing plant amounts to 1,650 pounds, or the equivalent of more than 100 atomic bombs a year. Even if the margin could be reduced to one percent, which is regarded as highly unlikely, the amount of plutonium unaccounted for still would be equivalent to more than 20 bombs a year.

HELSINKI COMMISSION ISSUES REPORT ON HUMAN RIGHTS DAY

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. FASCELL. Mr. Speaker, 34 years ago today, on December 10, 1948, the Universal Declaration of Human Rights was adopted unanimously by the General Assembly of the United Nations. Every year, at the United Nations and throughout the world, this anniversary is commemorated as Human Rights Day.

Born after the bloodshed of a bitter war and the most terrible violation of human rights that mankind has ever known, the Universal Declaration established international standards for the achievement and protection of human rights, standards by which the conduct of nations is still judged today. This international "Bill of Rights," while it does not have the force of law, has inspired national constitutions and international conventions on various specific rights since its adoption. On its 30th anniversary, President Carter called the historic document "a beacon, a guide to a future of personal security, political freedom and social justice." Tragically, however, that beacon does not yet shine brightly in many parts of the world. In a report released today, the Commission on Security and Cooperation in Europe, which I chair, finds that abuses of basic human rights and deprivation of fundamental freedoms occur with alarming frequency—indeed, regularity—in the Soviet Union and some East European countries.

The report, entitled "Implementation of the Final Act of the Conference on Security and Cooperation in Europe: Findings and Recommendations Seven Years After Helsinki,"

documents in voluminous detail the Soviet and East European record of compliance in the last 2 years with the 1975 Helsinki agreement. It is with deep regret that I note that, for the most part, that record has deteriorated steadily since the Commission undertook its monitoring responsibilities in 1976. The soviet invasion and continued occupation of Afghanistan, the brutal imposition of martial law in Poland and the subsequent curtailment of human rights there, and the intensified campaign of repression against all forms of dissent in the Soviet Union vividly demonstrate the contempt with which the Soviet Union holds both the Helsinki Final Act and the universal Declaration of Human Rights. The Commission's latest report provides ample evidence of the dismal state of human rights in the U.S.S.R. and Eastern Europe. It is available through the Commission offices and I commend it to our colleagues.

Mr. Speaker, the premise on which the Universal Declaration is based—and the rationale for America's active pursuit of its aims—is simple. The Declaration states that "the inherent dignity and . . . the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world." The Helsinki Final Act also recognized the vital link between respect for human rights and the development and maintenance of genuine, lasting peace. As we commemorate Human Rights Day, let us reaffirm our commitment to promoting the noble principles embodied in both these international documents. The Helsinki Commission report released today is issued in this spirit and, I hope, will contribute toward the achievement of that goal.●

DESIGNATION OF HARRY S TRUMAN NATIONAL HISTORIC SITE

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. BAILEY of Missouri. Mr. Speaker, many have been concerned in recent days about the plight of the home of the late President and Mrs. Harry S Truman. One big step to permanent protection for this historical site is the designation by Secretary Watt of the home as the Harry S Truman Historical Site. For the RECORD, I insert Secretary Watt's designation:

DESIGNATION OF HARRY S TRUMAN NATIONAL HISTORIC SITE

SEC. 1. *Purpose.* The Congress has declared it to be a national policy to preserve for the public use historic sites, buildings, and objects of national significance for the inspiration and benefit of the people of the United States. The former home of Harry S Truman, thirty-third President of the United States, in Independence, Missouri, was on November 11, 1971, designated a national landmark, in furtherance of that policy, and is listed on the National Register of Historic Places as being nationally significant. The home is left to the United States of America under the will of Bess Wallace Truman. It is, therefore, the purpose of this Order to establish the former home of Harry S Truman as a national historic site, to be administered by the National Park Service.

SEC. 2. *Authority.* This Order is issued under the authority of section 2 of the Act of August 21, 1935 (49 Stat. 666).

SEC. 3. *Designation.* The real property know as 219 North Delaware Street, in the city of Independence, Missouri, including such of the personal property therein as passed to the United States under the will of Bess Wallace Truman, is hereby designated as the Harry S Truman National Historic Site.

SEC. 4. *Administration.* For so long as this national historic site shall remain in private ownership, it shall be administered and protected by the Secretary of the Interior in accordance with the terms of a cooperative agreement to be entered into between the United States of America and the legal representative of the Estate of Bess Wallace Truman under authority of the Act of August 21, 1935 (49 Stat. 666), as amended and supplemented. Upon conveyance of this national historic site to Federal ownership, it shall be administered and protected by the National Park Service in accordance with the Act of August 21, 1939 (49 stat. 666), as amended and supplemented, and other applicable law, subject to necessary jurisdictional actions under the terms of the conveyance.

SEC. 5. *Expenditure of Funds for Development.* No funds appropriated to the Department of the Interior may be expended for the development of this national historic site, unless and until such funds are authorized by Act of Congress. All Federal expenditures under the terms of the cooperative agreement described in section 4 of this Order are subject to the availability of appropriated funds.

SEC. 6. *Effective Date.* This Order is effective immediately and will remain in effect until it is amended, superceded, or revoked, whichever occurs first.●

NUCLEAR FREEZE: ENOUGH IS ENOUGH

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. MARKEY. Mr. Speaker, I would like to commend to my colleagues a column written by C. Maxwell Stanley, president of the Stanley Foundation. It concerns the meaning of the freeze referenda passed on November 2. Mr. Stanley correctly notes that the American public overwhelmingly supported an end to the nuclear arms race, which only increases the threat of a nuclear war. As representatives of the American public we would do well to remember this ground swell of opinion against nuclear war.

The article follows:

NUCLEAR FREEZE: ENOUGH IS ENOUGH

(By C. Maxwell Stanley)

What is the meaning of the voters' response to a mutual nuclear freeze? On November 2, millions of Americans trooped to the polls in nine states and many cities and voted "yes" to freeze testing, production, and deployment of nuclear weapons. Only in Arizona was the measure defeated. The referendums carried, despite the strong opposition of President Ronald Reagan and his administration, who hammered on the themes that the nucelar freeze would benefit the Soviet Union and that some of those favoring it "want the weakening of America, and so are manipulating many honest and sincere people."

The amazing political phenomena which began with the marshaling of some 750,000 freeze supports in New York at the opening of the abortive United Nations General Assembly's Second Special Session on Disarmament in June is not going to fade away. Who are the nuclear freeze supporters? Are they only flaming liberals? Hardly, their numbers are too great. Are they soft on Communism? No, Communist ideology and tyranny remain abhorrent to the rank and file of Americans. Are they led naively by the subversive influence of external forces? Never, nuclear freeze supporters are part of the mainstream of this country's population; according to recent polls, some three out of four Amercians support the freeze.

Enough is enough is the belief at the heart of the growing antinuclear protests. Realization is developing that expanded nuclear capability does not assure greater national security. The public that has long supported the concept of nuclear deterrence is beginning to question the Reagan administration's moves to further expand the already multiple overkill of our nuclear arsenals, to trade deterrence for a capability to fight a prolonged nuclear war, and to stall on bilateral and multilateral arms control and disarmament efforts until our defense establishment is expanded.

Mounting Pentagon appropriations compound the economic woes of this country. The possibility of balancing the federal budget recedes further into the future unless the growth of military expenditures is curtailed. Furthermore, dollars for weapons tend to mean fewer dollars for essential social programs. Hence, the growing realization that a nuclear freeze would strengthen the US economy.

Moral and humanitarian considerations also support the freeze as an essential step to halting and reversing the worldwide arms races, particularly the nuclear weapons race. Belief is mounting that this country should be a leader in starting the process of serious arms reduction before the current arms races end, as all previous ones have, in major war, perhaps even a nuclear holocaust.

What does the freeze vote mean? It means that a substantial number of Americans don't want to stay a course marked for disaster. They want a mutual halt, followed by substantial reductions of nuclear arsenals. They want America to commit herself to action rather than rhetoric to reduce the likelihood of nuclear war. President Reagan would do well to listen to what the people are saying.

(C. Maxwell Stanley is a professional engineer, business executive, author, civic leader, and world citizen. He is founder and now chairman of the board of both Stanley

Consultants, Inc., and HON Industries. Mr. Stanley is president and founder of the Stanley Foundation which for more than 25 years has encouraged study, research, and education in the field of international policy. These are Mr. Stanley's personal views and do not necessarily reflect the opinions of the Stanley Foundation.)●

OPTIONS FOR SOCIAL SECURITY REFORM—PART II

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. BIAGGI. Mr. Speaker, I wish to bring to the attention of my colleagues the second installment of recommendations for social security reform put forth by the Community Council of Greater New York's Ad Hoc Committee on Social Security. On Monday, I placed the first installment of these proposals into the CONGRESSIONAL RECORD which I hope will provide some insight for Members as we grapple with the question of social security.

I also wish to hail the efforts of the Community Council in putting this report together. The Community Council is an umbrella organization which represents a number of human service organizations for New Yorkers of all ages. The Council has a vested interest in this issue because it serves not only current social security beneficiaries but future ones as well. It is a thought-provoking report and I commend it to your attention.

AN APPROACH TO THE SOCIAL SECURITY SYSTEM: CONFIDENCE NOT CRISIS, PART II

c. *Age of retirement.*—No increase should be made in the retirement age for full benefits and there should be no reduction in the present benefits for early retirement.

Studies have found no relationship between longevity and the ability to work longer periods of time.

It has been suggested that providing incentives to employers and employees is an alternative approach to encourage persons to work longer.

Persons who continue working after age 65 could cease making contributions to the Social Security Fund. Employers would continue to contribute their share but continue to receive a tax credit.

Since persons who work longer have a shorter period of retirement, their Social Security pensions could be correspondingly increased. At the present time this increase is 3 percent. In actuarial terms, this could be raised to approximately 7 percent.

d. *Reinstitution of minimum benefits.*—Persons at age 65, at least who have not paid into the System enough funds to qualify for $122 per month of retirement benefits should again be provided with a minimum benefit of that amount. This should not entail a means-test.

Persons who became eligible for minimum benefits after January 1982, should receive the $122 minimum.

The group that should be covered is usually composed of: women who spent many working years at home not covered by Social Security; farmers, members of minority groups or persons with problems of illness.

Many of these persons, (e.g. domestic workers or farmers), were only permitted to enter the System fairly recently, and could not amass enough equity to qualify for adequate benefits. These people warrant special economic protection.

PRESERVING CONFIDENCE IN THE SOCIAL SECURITY SYSTEM RECOMMENDATIONS FOR IMMEDIATE ACTION

1. Educational campaign

There is an immediate need for a factual, educational and highly visable campaign by government and the private sector to reassure retirees and working people that Social Security is sound and is the "best buy" available for Retirement, Survivors, Disability and Health Insurance (Medicare).

This ongoing campaign should include use of the media, flyers, explanatory brochures, factual presentations. The effort should begin with the educational system, and extend to our entire society, including unions, employer groups, community organizations and others.

The campaign would explain that a sizable percentage of beneficiaries (49 percent) are not retired workers. They receive benefits as dependents or Disability or Survivors benefits. (See Community Council Research Note No. 47, September, 1982.)

The campaign should also indicate the independent relationship between Social Security and private retirement benefits.

2. "Welcome to social security" letter

Every new Social Security registrant should receive a letter accompanying his or her Social Security card in which he or she is welcomed to the System, advised of its comprehensive coverage, including the various payments available, and told of its importance.

3. First steps toward periodic reporting

All participants should be assured that their covered earnings are appropriately credited to their account.

To this end:

a. All available means should be developed and utilized to encourage Social Security participants to request, on some periodic basis, an update on their accounts. (Note: presently only two million requests are received each year out of almost 200 million accounts extant.)

b. Priority should be given by the Social Security Administration to the updating of equipment and systems so that wage credits are posted more promptly to participants' accounts.

4. Social Security Advisory Council

The Social Security Advisory Council should be appointed by the President of the United States, instead of by the Secretary of Health & Human Services. Its report should be sent to the President as well as to the Speaker of the House, the President of the Senate and to the Trustees of Social Security. This body should be convened by the President more frequently than every four years, if he or Congress deems this to be necessary. It should be bi-partisan. The composition of the Advisory Council should remain intact: a Chair, equal number of representatives of the self-employed and the public.

LONG TERM RECOMMENDATIONS FOR FUTURE STUDY AND ACTION

The social and the economic impacts of any long-term changes in Social Security must be carefully studied and not acted upon until the end of this century. This would provide sufficient time to fully consider the impact of all options.

Social Security is an integral part of the overall economy. Both the benefits paid out and revenues collected by the System have a direct effect on consumer spending and the Gross National Product. Changes in the System would influence the well-being of individual recipients as well as many of our major social and economic institutions. Public service programs and private pension plans in particular would be affected.

No proposal should increase the number of persons below the poverty line. Projected changes should be based on a realistic standard, e.g. the Replacement Rate, the Poverty Index or the Bureau of Labor Statistics Lower Living Standard.[1]

1. The following recommendations are suggested for study:

a. *Include the employer's share in an individual's taxable income at the time social security benefits are received.*—Social Security benefits for those whose income is below the median level, including Social Security benefits, should not be taxed.

The employer's share of an individual's Social Security benefit (1/2 of the benefit level) should be subject to income tax at the time benefits are received. Revenues generated by this tax should be credited to the Social Security Trust Funds. This provision should be phased in. Also included in taxable income should be any portion of the Social Security benefit that resulted from an employee's payroll taxes on which an income tax credit had been received.

b. *Study required of medicare financing.*—While emphasis is centered here on financing of health care for the aging, the entire matter of planning for health care for young and old must be studied.

Continued increases in health care costs will pose major financing problems for the Medicare program in the near future. Action needs to be taken to ensure the ongoing stability of this Program which is essential to the health of older Americans.

Medicare now covers only about 44 percent of the health care expenses of older people. Solutions which entail reductions in Medicare benefits would merely shift a greater burden of health care cost onto the elderly.

Unlike retirement benefits, the amount of Medicare benefits received by a recipient is not related to past earnings.

In planning for the future of Medicare, it has been suggested that the financing be shifted to General Revenues. A visible income tax surcharge dedicated to Medicare could be enacted to pay for this. The payroll tax revenues freed up by this change should be used to support the OASDI Trust Funds.

Special concern is expressed about the impact on medical coverage of any postponement of retirement benefits. At the present time, Medicare benefits have been coupled with eligibility for retirement benefits. Persons above the age of 65 are in special need of adequate health insurance.

c. *Study needed of the relationship between retirement benefits and disability benefits.*—Persons laid off work after age 50 or 55 because of health reasons, who do not qualify for Disability benefits, and whose unemployment benefits run out, may have to lose all of their savings until such time as

[1] The Bureau of Labor Statistics standards are no longer being updated by the government. Others will have to undertake this task.

Social Security benefits are available. It is necessary to establish a series of new definitions and levels of Disability to protect these people from economic hardship.

d. *Regular periodic reporting to future beneficiaries as an aid in preserving confidence in the system.*—A study must be undertaken to ascertain the most cost effective method by which the Social Security Administration could assume the initiative in communicating the status of their accounts to all participants. As a first step, automatic notification should be provided to all persons who reach age 55.

Current law renders errors in credited wages applicable to Social Security accounts virtually impossible of correction after passage of three years (except for fraud Social Service Administration error.)

Automatic reporting will provide clear updated information on the status of their accounts to future beneficiaries. As important, it will be a means of assuring persons not yet receiving benefits that the System is prepared for the individual's future welfare. This will help to provide the confidence needed by the System.

A FINAL WORD

This Ad Hoc Committee on Social Security is composed of a group of concerned New York citizens. We recognize that Social Security is a national program. However, it also affects us deeply as New Yorkers. We are in constant touch with the system as business people, as union members, as social workers, planners and as beneficiaries.

When Congress meets on Social Security legislation, we will stand ready to comment and to speak for our recommendations. In addition, we pledge to cooperate in a partnership between the public and private sectors to publicize to all parts of our community, the benefits of Social Security and our confidence in this workable and important System.●

THE CAUCUS ASSAULT ON DEMOCRATIC PROCEDURE

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. LOTT. Mr. Speaker, the Democratic Caucus has once again proven adept at subverting majority rule in the House. At this point I insert a House Republican leadership statement on the House rules changes recommended this week by the caucus:

STATEMENT BY THE HOUSE REPUBLICAN LEADERSHIP

The proposed changes in House rules adopted by the Democratic Caucus this week are an exercise in political expediency that will concentrate more power in the hands of the Speaker and further erode the democratic process in the House.

These new rules extend years of steady and systematic assaults on free and open debate and the rights of the minority in the House.

To deny Members of either party their right to influence the expenditure of public funds or vote on the merits of proposed Constitutional amendments or be alerted to and informed of critical legislative issues before the House is inexcusable and indefensible.

There is a clear distinction between rules changes designed to streamline and expedite legislative proceedings and those intended to subvert the process. The Democratic rules changes make no major contribution to the improved management of the House or the flow of legislation, but they do make major assaults on the Members' abilities and rights to influence the legislative process.

Making the House of Representatives more effective and more productive cannot be the ultimate goal of rules that muzzle the Membership.

Specifically, the amendment to Rule XXI, clause 2, restricting riders to appropriation bills in order to limit use of public funds, deprives Members of all political persuasions of their ability to exercise full oversight responsibility. Denying that right is a mockery.

The advent of omnibus appropriation bills and budget resolutions makes the need for limiting amendments even more critical. These rules changes virtually disenfranchise anyone who disagrees with spending levels reported from Committee unless, of course, the Democratic Leadership itself sanctions an amendment to reduce spending.

The new rule requiring a two-thirds majority vote on the discharge of a Constitutional amendment is an outrageous attempt to prevent any consideration of Constitutional change that does not conform with the will of the Democratic Leadership. The House must be given the opportunity to consider, debate and vote on the merits of Constitutional change in accordance with the intent of the founding fathers, who saw the need for such deliberation.

The intent of the Constitution is also thwarted by rules changes which prevent the call of a quorum to the floor prior to consideration of legislation.

The Constitution's Article I, Section 5, specifically instructs the Congress to have a quorum present to conduct business. Postponement of votes on the Journal and eliminating votes on consideration of bills would allow the Democratic Leadership to conduct legislative business without the Constitutionally-required majority quorum. These new rules merely perpetuate "phantom legislating," and enable the Speaker to stampede the House into actions it may regret.

Rules such as these do an injustice to the House and thwart the legislative process. They must not be adopted.

SUMMARY OF DEMOCRATIC CAUCUS HOUSE RULES CHANGE PROPOSALS 98TH CONGRESS

(1) Appropriations Riders Restrictions: Clause 2, Rule XXI would be amended to prevent the offering of limitation amendments on the Floor unless already authorized by law for the period covered by the bill or if the House votes down a motion that the Committee rise after other amendments have been disposed of. Limitation amendments could still be reported by the Appropriations Committee. The amendment also confines "retrenchment" amendments (e.g., those reducing salaries and personnel) to reductions in amounts of money covered by a bill, and to those recommended by the Appropriations, thus precluding authorizing committees from offering retrenchment amendments on the Floor.

(2) Resolutions of Inquiry: Clause 5, Rule XXII would be amended to permit committees 14 legislative days to report back to the House after referral of such a resolution requesting information from the heads of executive departments, and permits a committee, by majority vote, to extend the period for reporting by an additional 14 legislative days. The current rule permits only 7 legislative days for reporting back to the House, after which a motion to discharge the committee is in order.

(3) Closed Hearings: Clause 2(g)(2)(B), Rule XI, would be amended to permit the Committees on Appropriations, Armed Services and the Select Committee on Intelligence to vote in open session to close hearings for up to seven consecutive days. Current House Rules permit all committees to vote to close hearings for two consecutive days.

(4) Resolving into the Committee of the Whole House: Clause 1, Rule XXIII would be amended to permit the Speaker to declare that the House is resolved into the Committee of the Whole House on the State of the Union at any time after the House had adopted a resolution from the Rules Committee providing for the consideration of a measure. Under present rules, the motion is subject to a vote by the House.

(5) Approval of the Journal: Clause 5(b)(1), Rule I would be amended to permit the Speaker to postpone a vote on the approval of the Journal until later in the same legislative day. Under present rules, approval of the journal is the second order of business in a legislative day and a vote may be demanded immediately.

(6) Committee Membership: Clause 6, Rule X would be amended to make removal from committee membership automatic once a Member ceases to be a member of his party caucus or conference. Members would still be elected to committees by vote of the House on nominations from the party caucuses. Under the interpretation of present rules, it would take a vote of the House to remove a Member from a committee.

(7) Tax Legislation: Clause 5, Rule XXI would be amended to prohibit non-tax committees from reporting any measure containing tax or tariff matters and the House from considering any amendment in the House or proposed by the Senate on a bill reported by a committee not having jurisdiction over tax matters.

(8) Constitutional Amendments: Clause 4, Rule XXVII would be amended to require that a discharge motion for an amendment to the Constitution, or a resolution referred to the Committee on Rules providing for the consideraiton of a constitutional amendment, must contain the signatures of two-thirds of the membership of the House in order to be called up in the House.●

MR. RANGEL WISHES THE SPEAKER A HAPPY 70th BIRTHDAY

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. RANGEL. Mr. Speaker, in the 12 years since I was first elected to the House of Representatives, it has been not only an honor to serve under you, but a deep personal pleasure as well.

Yesterday, on your 70th birthday, your hometown paper the Boston Globe printed the following article. Well, all of us in the House know exactly how sentimental the press is about politicians, which is not senti-

mental at all. And the more powerful a politician gets, the more cynical, the more demanding and the more unfeeling the press gets. So when a paper says such warm things about a politician as powerful as the Speaker of the House of Representatives of the United States, well that is a true testament to the strength of character of the man.

Mr. Speaker, happy 70th, and I look forward to the honor and the pleasure of serving with you as long as we both remain in the House.

HAPPY 70TH, MR. SPEAKER, YOU'VE ALWAYS BEEN TRUE

(By David Nyhan)

Not the least reason to marvel at Tip O'Neill is the simple fact that he hasn't made much money, when he's had vast opportunity to do so.

In 46 scandal-free years of winning elections, 30 in Congress, six as Speaker of the House, he's proved almost totally inept at padding his own income and salting something away on the side.

Politicians with far less potential for self than he have become millionaires on the sly, by O'Neill's net worth is embarrassingly meager. He's got about what a public school teacher would have, if his kids were grown and his wife worked. Not much, but something.

His wealth is in coin of a different realm. He is much loved by those who know him. When he threw a party for his campaign workers, what was astonishing about the crowd in the old Cambridge Hotel was that so many were of his generation. The man, whose highest accolade is "Old Pal," kept the friends he began with.

When Tip got up in front of the band, singled out his Millie, and knocked out a better-then-passable rendition of "Apple Blossom Time," you couldn't picture any New Wave Democrats doing likewise.

O'Neill is a living political monument for a lot of reasons, but some of them are: He's kept the same wife, the same friends, the same lifestyle, the same values and the same philosophy he began with in the Thirties.

His mother died of TB before he was a year old, and he was raised by a father who was a city councilor and superintendent of sewers in Cambridge. "He taught me loyalty," O'Neill said years ago, "to live a good, ethical, honest life; that I'm truly my brother's keeper; and to always remember from whence I came."

In a lifetime of political horse trading, O'Neill could be accused of many things, but none can say he forgot his roots. The Irish yield to no one when it comes to badmouthing a social climber. Those who moved out of the three-deckers risked being labeled "two-toilet Irish," "lace curtain Irish," and most spiteful of all, "cut-glass Irish."

O'Neill never went high-hat, either in lifestyle or in his politics. The hardest thing he's said of Ronald Reagan was that the President had forgotten where he'd come from, the Depression-era poverty of working-class Illinois, where most people needed a government handout to get by.

When Reagan blew into Washington, scattering demoralized Democrats like fallen leaves, the middle class was beguiled by the sonorous siren-song of tax cuts. O'Neill warned it would be open season on the poor.

"People seem to hate the poor, that's the kind of thing that got us into deep trouble in the 1930s."

The O'Neill losses of 1981 have become the O'Neill victories of 1982, and the incoming Congress will line up much more behind the Speaker than the President, a fact that bodes well for the 12 million unemployed.

The right wing still hates Tip O'Neill and all he stands for. They see him as the symbol of the bloated government that forces some redistribution of wealth in this country, a process Reagan has managed to reverse.

There is not a man alive today who had done more good for more people, in trying to impose a semblance of fairness and sharing-the-wealth on Congress, than this man who turns 70 today.

A pillar of his party, a model to his profession, he's a testament to the best the Irish brought to this country's politics.

James Michael Curley taught him to give the crowd some words to remember. John F. Kennedy taught him that when it comes to raising dough, running for President was no different than running for alderman. And it is an old Irish legend that teaches us the central fact of democratic congressional rule today: "Where the O'Neill sits, that is the head of the table."●

A MAN ON THE RUN COVERS A COUNTRY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. ADDABBO. Mr. Speaker, I would like to take this opportunity to share the following newspaper article with my colleagues. My constituent, Tarak Kauff of Jamaica, recently concluded an 8,807-mile running tour of this country, believed to be a record for miles run in one swing through America. Tarak undertook this monumental task to express his faith and patriotism in America, and the philosophy of "always moving forward, of transcending limits." I trust my colleagues will be moved by this inspirational story.

[From the New York Times, Dec. 7, 1982]

A MAN ON THE RUN COVERS A COUNTRY

(By George Vecsey)

Tarak Kauff started running south during the last basketball season. He ran across the Delta States before the Stanley Cup playoffs and the Indy 500. While Conquistador Cielo was winning the Belmont, Tarak Kauff was conquering the Pacific Northwest.

When Italy won the World Cup, Tarak Kauff was running the endless breadth of Montana, and when the World Series was held in the Middle West, Tarak Kauff was climbing the hills of Pennsylvania. The football players went on strike, but Kauff never stopped pounding through New England.

Tarak Kauff discovered America through the soles of his feet. He ran 8,807 miles in all 50 states this year, his runner's elation tempered only by the realization that he'd better fly to Hawaii and Alaska rather than try to run across the waves or through Canada.

"Why did I do it?" Kauff says. "I love running. I'm also very patriotic about America, and I wanted to see it all again. Also, I wanted to express the philosophy of always moving forward, of transcending limits."

The distance is believed to be the record for miles run on one swing through America. The 41-year-old waiter from the Jamaica section of Queens missed five weeks this summer because of a chest injury and pneumonia, but he began running again as soon as the doctors let him. He arrived home at Battery Park two days before Thanksgiving and was met by a Marine Corps band and whistles from a Fire Department boat.

Behind him are 10 months of impressions of a vast and diverse country that he saw as perhaps no other American has ever seen it. He ran between 25 and 50 miles a day, followed by a friend in a van, Sahishnu Szcsesiul, who kept the log and fixed the meals.

Tarak Kauff ran through snowbanks in the Rockies, was ferried across the flood level of the Mississippi and spent most of his hours alone with his feelings.

But Kauff did not consider himself deprived in his isolation. For the last 12 years he has been a disciple of Sri Chinmoy, the Indian teacher who stresses running, bicycling and tennis as paths to self-transcendence. Kauff was also running as a tribute to his teacher, who, he says, changed his life.

"I was very involved in the antiwar movement in the 60's," Kauff says. "I was also very much into the drug world, looking for shortcuts, which, of course, never work. I was in a health-food store one day, and I heard about these meditations, and once I saw Sri Chinmoy I kept going back."

The 51-year-old Sri Chinmoy, a former hurdler in India, runs in long-distance races and plays a good game of tennis on courts near his center in Jamaica. He also sponsors races and running teams. During the Bicentennial, Kauff organized a relay team that covered America.

"Ever since 1976, I kept wanting to go back to America," Kauff says. "Look, the people in New York are good, too, but the intensity of the city hides the goodness. I felt the longing for simplicity, the friendliness, of the Midwest. Let's face it, sophistication is a pain in the neck."

Kauff saved his salary from waiting on tables at the Russian Tea Room, received donations from friends and left New York last Jan. 31. He covered the southern tier in the cold months and came back across the northern tier in the summer.

"Most of the miles were solitary," he recalls. "You're pretty much alone out there. After a while, you run out of mundane things to think about. It's pretty much like meditating. The whole idea of meditating is to let go of the garbagey thoughts like, 'How much money do I have in the bank?'

"Once your mind is empty, the good feelings come in. For me, the best feeling was gratitude. I felt grateful to God, to the Supreme and also to Sri Chinmoy for inspiring me. People think of athletics as antithetical to spirituality, but they aren't at all."

The good moments outnumbered the bad. Kauff can recall running 57 miles over 10-foot snowbanks in Yosemite National Park in early summer, the first day the road had been cleared for foot traffic. His friend, Sahishnu, had to detour 300 miles with the van.

He remembers the flights to the two distant states, where he stayed just long enough to run up Diamond Head in Hawaii and along Mendenhall Glacier in Alaska before returning to the lower 48.

He is 5 feet 8½ inches tall and weighs about 142 pounds, but he was down to 135 while on the road. He has run marathons in as little as 2 hours 45 minutes but settled on a pace of 9 to 10 minutes a mile during his odyssey.

A highlight of the trip? He stops to think for a moment, then says:

"In South Dakota, on a lonely road, where it's 30 miles between towns and not even any farmhouse, I saw this bicyclist coming toward me. I knew he was not on an ordinary bike ride, so we stopped and talked. His name is David Lorig, from Colorado, and he was covering the 48 states by bicycle.

"I was so inspired by him because he had nobody with him, just his bike and his pack. We stopped and talked for 15, 20 minutes. I know I'll see him again some time."

The low point of the trip came in the hills of eastern Ohio when Kauff stumbled for the first time on his trip and hurt a chest muscle. Unable to breathe comfortably, he says, he developed pneumonia and had to return to Chicago to recuperate for five weeks. Then he started right back with a 30-mile run.

He delayed his arrival in New York until Nov. 23, when Sri Chinmoy returned from a visit to Europe. The last few hundred miles "were the most comfortable of the trip," Kauff says, "I just breezed along, didn't even have a blister." The ceremony at the Battery was "inspiring," he says. On Thanksgiving, Tarak Kauff gave thanks for his mission in the best way he knew: He went for a run.●

THE PLUTONIUM CONNECTION

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. MARKEY. Mr. Speaker, as we approach debate on the Clinch River fast breeder reactor, I would like to once more bring up the grave threat of nuclear weapons proliferation that would inevitably follow construction of breeder reactors. The Washington-based Nuclear Control Institute this month released a special report on the dangers of proliferation associated with breeders. The report by Bill Adler warns that Clinch River would encourage breeder development and plutonium commerce around the world and that widespread use of plutonium as a civilian fuel would pose an unprecedented threat to civilization.

Because of the seriousness of the problem, I submit the report to the RECORD and recommend it to my colleagues.

BREEDERS, PLUTONIUM AND NUCLEAR WEAPONS

(By Bill Adler*)

There is no way that we will be able to provide assurances that thousands of tons of plutonium are being devoted to peaceful purposes.—Senior International Atomic Energy Agency Official.[1]

BACKGROUND

The plutonium breeder reactor is being actively promoted by the governments of several advanced industrialized states and Third World countries as the next generation of nuclear power plant. Breeder reactors are favored by their proponents in government and industry on the basis of being able to produce more nuclear fuel than they consume. Tremendously high costs, however, are jeopardizing breeder programs in this country and abroad. For example, the most recent cost estimates for the Clinch River Breeder reactor, a prototype commercial breeder, range from $3.2 to more than $8.8 billion.[2] But even if breeders were economical, the threat to international security posed by the vast amounts of plutonium they would produce and use as a fuel makes them too dangerous ever to operate. Plutonium is a key ingredient of atomic bombs.[3]

HOW BREEDERS WORK

Plutonium-breeder reactors, like conventional nuclear power reactors, generate electricity by heating water to operate steam turbines. Heat and plutonium are byproducts of nearly all nuclear-fission reactors.

A major difference between breeder and other power reactors is that breeders must use plutonium (or weapons-grade uranium) as fuel. Most conventional power reactors are fueled with natural or low-grade uranium unusable in nuclear weapons. The plutonium they produce can remain "locked" in highly radioactive spent fuel, where it is inaccessible and is in a dilute form unsuitable for nuclear weapons. This spent fuel can be disposed of in unaltered form. Breeders, however, require large quantities of pure plutonium to be reprocessed from spent fuel. This separated plutonium is then combined with uranium and "recycled" as breeder fuel. The separated plutonium also can be fashioned into nuclear weapons.

Nuclear fission occurs in the breeder reactor's core and in a surrounding "blanket". A typical 1,000 megawatt breeder is designed with a core of over 30,000 pounds of uranium and more than 5,800 pounds of plutonium.[4] The blanket is comprised of some 22,000 pounds of uranium, primarily consisting of the fertile isotope (non-weapons usable) U-238. Neutrons are produced by the fissioning of plutonium in the core and are absorbed by uranium in the core and in the blanket, generating both heat and more plutonium. More than 5,800 pounds of plutonium can be retrieved from the core and more than 760 pounds from the blanket each year of reactor operation. Over 6,500 pounds of plutonium are discharged from a breeder reactor every year.[5] Since less than 15 pounds of plutonium are needed to make an atomic weapon, each breeder reactor discharges enough plutonium to fashion at least 400 bombs a year.

PLUTONIUM AND THE BOMB

The principal obstacle to building an atomic bomb is obtaining plutonium or highly enriched uranium. The requisite technical information, including critical mass summaries and how to fabricate neutron reflectors and other components, is found in the public literature and is, therefore, readily available to individuals, groups and nations.

According to Dr. Theodore Taylor, a former nuclear weapons designer and former Depty Director of the Defense Atomic Support Agency, a single, well-educated and determined individual could make a crude, but effective fission bomb.[6] A well-designed bomb could possibly fit into a small van or the trunk of a car. The Congressional Office of Technology assessment reports:

"A small group of people, none of whom have ever had access to the classified literature, could possibly design and build a crude nuclear explosive device. They would not necessarily require a great deal of technical equipment or have to undertake any experiments. Only modest machine-shop facilities that could be contracted for without arousing suspicion would be required."[7]

Similarly, any country with a nuclear power or research program, or with access to plutonium or highly enriched uranium, can manufacture nuclear devices with an explosive yield likely to equal or to surpass the power of the bombs which destroyed Hiroshima and Nagasaki. According to the Office of Technology Assessment:

"The level of technological effort put forth in the minimal national program can be called low technology. Low technology encompasses the sort of nuclear device designs that would likely be produced for a first use or first test. This required techniques which allow high confidence without prior nuclear test experience. This could be characterized as 1945 U.S. technology."[8]

SAFEGUARDING PLUTONIUM

Safeguarding large quantities of separated plutonium from misuse for destructive purposes is virtually impossible. Two processes are involved in "safeguarding" this material: (1) measurement and accounting procedures to verify the amounts of plutonium in a reprocessing plant and in other facilities at various points of the fuel cycle, and (2) guards, barriers, cameras, alarms and other physical-security and containment measures to ensure that plutonium is not stolen.

Safeguards must be effectively applied [9] to all elements of the breeder fuel cycle that are subject to diversion or theft of plutonium: the reactor, reprocessing plant, fuel fabrication, facility, fuel storage facility and along the transportation routes between and among these facilities.

Since commercial breeders are not yet operated routinely, there is no demonstrated experience for assuring effective safeguards against diversion or theft of fresh fuels containing plutonium for refueling the reactors.

There is a limited amount of safeguards experience for commercial reprocessing plants, the key component of the breeder fuel cycle, and two major problems have become manifest:

First, existing methods of measuring the large amounts of plutonium contained in spent reactor fuel are imprecise: it is possible to estimate the quantity of plutonium contained in the spent fuel of light water reactors only to within plus or minus 10 percent.

Second, current systems can account for the amount of weapons-useable material undergoing reprocessing only to within 5 percent.[10]

According to the General Accounting Office,

"Uncertainties resulting these measurements are so large that diversions of significant quantities of plutonium might not be detectable in large operating plants."[11]

* Bill Adler is Director of Nuclear Control: Citizens to Stop the Spread of Nuclear Weapons, a project of Nuclear Control Institute.

[1] Footnotes at end of article.

Similar problems are encountered in fuel fabrication plants and in other facilities that handle plutonium in bulk.

Little commercial reprocessing has taken place in the United States, but a substantial amount of non-commercial plutonium is unaccounted for in U.S. defense and other government nuclear facilities. This material, known as Material Unaccounted For, or "MUF," can result from numerous circumstances including accounting errors, measurement uncertainties, accumulated small losses in pipes, and deliberate diversion. Between 1947 and 1981, over 4,000 pounds of plutonium were unaccounted for in this country. One facility, the Savannah River Reprocessing Plant, a weapons facility operated by the government, had a net shortage of 320 pounds of plutonium during its operating lifetime from 1955 to 1972.[12]

Although the precision of material accountability for each part of the breeder fuel cycle remains difficult to ascertain, the total amount of unaccounted-for plutonium in the fuel-cycle would be large—certainly large enough to permit undetected diversion of weapons-useable plutonium.

STEALING PLUTONIUM

Two major dangers will persist: diversion of plutonium by states and theft by terrorists and gangsters.

The potential for clandestine diversion by governments raises grave dangers. Plutonium, once separated from highly radioactive spent fuel, is readily handled at all stages of the fuel cycle. The ability of the International Atomic Energy Agency to safeguard this material against diversions by states is subject to severe political and technical constraints. Its role is limited to verifying material balances reported by states. It has no authority to seek out clandestine activities. Its role is akin to an auditor, not a policeman.

Uncertainty of materials accounting is so large that the IAEA is unlikely to know for sure whether missing plutonium was, in fact, diverted or stolen. A nation's good faith and cooperation are required for international safeguards procedures and equipment to function properly. As pointed out in a published but still officially classified report by a former IAEA inspector to the Nuclear Regulatory Commission: ". . .the representatives of state systems and the operators of the installations know exactly how effective international safeguards are and how the international safeguards system can be defeated."[13]

In a recent letter, Nuclear Regulatory Commission Chairman Nunzio Palladino pointed out that because plutonium and highly enriched uranium (HEU)

". . .can be transformed readily into weapons, we cannot count reliably on inspection alone to provide timely warning of diversion of HEU and separated plutonium in time to prevent weapons assembly if the necessary preparatory work has been done."[14]

NRC Commissioner, Victor Gilinsky, recently wrote, ". . .the IAEA system does not (and cannot!) protect plutonium in national hands. . . . In the process of separation, the plutonium loses its national identity and effective control by any one fuel supplier becomes impossible."[15]

Monitoring tons of plutonium being transported around the world in hundreds of different vehicles, and maintaining accurate accounting for the hundreds of facilities in which plutonium is handled would be an arduous enough task. Operating an intelligence system that could provide quick warning of a diversion of plutonium might be impossible to accomplish.

Sober advice to the President has been offered by the Department of Defense regarding the ability of the International Atomic Energy Agency to safeguard plutonium and other dangerous materials:

"The Department of Defense wishes to express its reservations about the effectiveness of IAEA safeguards, the weakness of the IAEA as an international institution, its susceptibility to Third World and East Bloc politics, its lack of an intelligence capability, and the limits of its scope and jurisdiction, in order to guard against undue reliance on the IAEA by those responsible for national security within the United States Government."[16]

Given the known uncertainties and errors in materials accounting, and the technical and human limitations for dealing with them, there is no basis for believing that it is safe to proceed with commercial development of breeder reactors and related fuel facilities. There is no evidence for assuming that science will eventually achieve near-perfect plutonium accounting. With tons—and eventually thousands of tons—of plutonium circulating annually in various facilities and being transported around the globe, nations desiring nuclear-weapons material would be able to obtain it.

NUCLEAR THEFTS AND THREATS

At the same time, overt seizure of plutonium, or sneak thefts within the margins of accounting error, also would be difficult to prevent. With dozens or more breeder reactors operating world-wide, hundreds of tons of plutonium would be transported within and among counties by rail, sea, truck and possibly air, presenting numerous opportunities for theft.

The principle presently used to prevent the theft of plutonium used in military facilities—containment—could not effectively be employed to keep plutonium secure once it becomes an item of international commerce. Keeping track of and guarding the hundreds of vehicles carrying plutonium will be an arduous task; preventing thefts of small quantities, enough for a few atomic bombs, could be impossible over the long run.

The Office of Technology Assessment reports, "If plutonium becomes a commonly traded commodity, minimal intermittent black market transactions seem plausible, simply because the large amounts of material that could be circulating would be difficult to safeguard perfectly."[17]

Many unauthorized intrusions of nuclear facilities already have occurred. For example, in March 1971, five uranium rods were stolen from the Springfield fuel fabrication plant in the United Kingdom "perhaps in transit or at the Wylfa reactor in Anglessy."[18] In 1975, in a demonstration of security inadequacy, a West German Member of Parliament carried a bazooka into the Biblis reactor plant and presented it to the Director. In 1976, an intruder successfully scaled a security fence and entered a protected area at the Three Mile Island reactor. He was not apprehended.[19]

There are a number of recent reports of a disturbing phenomenon—nuclear threats:

. . . in the seven years ending in November 1977, forty-nine threats were received in the United States "in which adversaries claimed to possess nuclear material of a nuclear device and threatened to wreak severe damage with it." By mid-1981, the count was sixty-five and rising . . . At least four threats were deemed sufficiently credible to evoke intensive research by a specially instrumented team . . .[20]

Nuclear terrorist threats would become far more credible once plutonium becomes widely available. In the absence of foolproof methods for keeping even small amounts of this weapons material out of irresponsible hands, the likelihood of genuine nuclear blackmail and of nuclear violence will increase over time if breeders are developed and deployed.

MOVING TOWARD A WORLDWIDE BREEDER ECONOMY

Elaborate plans are being made to protect a single commercial breeder reactor at Clinch River, Tennessee, and its accompanying facilities from sneak thefts and attack. For example, an extensive network of alarms, guards, fences, vaults and other devices, as well as specially equipped plutonium-carrying trucks with armed couriers in constant communication with law enforcement agencies, are being developed. Some of the ancillary fuel-cycle facilities will be located in high-security nuclear-weapons compounds operated by the Department of Energy. The Nuclear Regulatory Commission staff assessment of Clinch River safeguards maintains that "the probability of a successful act of sabotage or theft is low,"[21] for this one reactor, but it also points out that "the proposed DOE facility design is conceptual in nature; hence the safeguards system is also conceptual."[22]

Despite the stringent safeguards required for Clinch River and its fuel cycle, and the present conceptual state of those safeguards, the impact of proceeding with Clinch River on the global spread of nuclear weapons is not formally being considered. According to the NRC assessment, "The staff has not evaluated the relative proliferation resistance of the various fuel cycles or the likelihood that development of the Clinch River Breeder Reactor Project will lead eventually to the further proliferation of nuclear weapons."[23]

Breeder proponents look ahead to a world in which there are hundreds, and eventually thousands, of breeder reactors despite the impracticality, if not the impossibility, that the military-like security and safeguards procedures planned for the Clinch River project can be uniformly applied throughout the world.

The International Nuclear Fuel Cycle Evaluation report estimates that there could be some 50 breeder reactors operating by the year 2000;[24] a recent Scientific American article projects that in 50 years about 1,500 breeders could be producing 1,000 megawatts of electricity each, supported by 60 large plutonium reprocessing plants and similar number of fuel fabrication facilities.[25]

Dr. Theodore B. Taylor, the former nuclear weapons designer, describes this breeder-supported world:

"The total annual quantity of plutonium shipped between the projected nuclear power plants and fuel reprocessing and fabrication plants would be in the vicinity of 2 million kilograms. It takes less than 10 kilograms of plutonium to make a fission bomb that is now old fashioned. Diversion of less than 1% of this annual flow of plutonium would be enough for more than 1,000 nuclear weapons per year."[26]

He points out that a "single fast breeder fuel reprocessing plant would discharge enough plutonium for more than 10,000 nuclear weapons per year."[27] Depending on how many breeders are producing electrici-

ty, there could be hundreds or thousands of bombs worth of material unaccounted for each year.

Plutonium, once separated from spent fuel, remains weapons useable for over 100,000 years; in fact, it then decays into another weapons material, uranium-235. Because of its exceedingly long active life, plutonium must be guarded with absolute assurance for a period of time equal to the millennia between the last ice age and the present.

THE GLOBAL IMPLICATIONS OF CLINCH RIVER

Given the inherent danger of separated plutonium, a material produced by the ton that can be used by the pound to make nuclear weapons, the implications of proceeding with the Clinch River plutonium breeder go far beyond the energy interests of the United States. Clinch River would further legitimize plutonium as a civilian fuel and would encourage breeder development and plutonium commerce around the world at the very time these programs are encountering serious difficulties in every country pursuing them.[28]

There is no human experience in commerce in a material as dangerous as plutonium. However, the inability of governments to control trafficking in heroin, portable anti-aircraft missiles and high explosives suggests that we cannot be sanguine about their ability to control trafficking plutonium. The widespread use of plutonium as a civilian fuel would pose an unprecedented threat to human civilization, even to survival. Neither the political nor the technical skills have been developed to assure the safe and secure handling of plutonium in commerce. Unless they are, Clinch River and other commercial breeder reactors are too dangerous to bring into the world.

FOOTNOTES

[1] Judith Miller, "Trying Harder to Block the Bomb," New York Times Magazine, September 12, 1982.

[2] The Department of Energy's most recent cost estimate for Clinch River, made in 1980, is $3.2 billion, an eight-fold increase since the original 1971 projection of $400 million. An interim report by the General Accounting Office states that the cost of the project could exceed $8.8 billion (September 23, 1982). Neither the DOE nor GAO include in their calculations the cost of all the ancillary facilities such as reprocessing, fuel storage and fabrication plants. Breeder programs in France, Great Britain, Japan and West Germany are experiencing major cost escalations as well.

[3] The vast amounts of weapons plutonium in the United States and other nuclear-weapons states are also of deep concern but beyond the scope of this report on the impact of commercial plutonium on the spread of nuclear weapons.

[4] All figures, unless otherwise stated, are for a 1000 ME(e) breeder reactor. Breeder input and output information is derived from the International Nuclear Fuel Cycle Evaluation, Report of Working Group 5, Chapter 3, "The Fast Breeder Fuel Cycle," pp. 83-91, International Atomic Energy Agency, Austria, January 1980.

[5] The isotopic content of the plutonium produced in the blanket is about 97 percent plutonium 239, which is considered ideal weapons material. Plutonium in the core has a higher concentration of plutonium 240, but still can be readily used in nuclear bombs.

[6] Statement made at a forum on nuclear terrorism at a meeting of the Nuclear Nonproliferation Task Force, U.S. Congress, August 12, 1982.

[7] "Nuclear Proliferation and Safeguards," U.S. Congress, Office of Technology Assessment, 1977, p. 140.

[8] Ibid., p. 140.

[9] By "effectively applied" we mean safeguards that can provide prompt warning of a diversion of, or can prevent theft of, a weapons-quantity of plutonium—that is, less than 15 pounds.

[10] An accounting error of 5 percent of the plutonium going through a large commercial reprocessing plant amounts to 1,650 pounds, or the equivalent of more than 100 atomic bombs a year. Even if the margin could be reduced to one percent, which is regarded as highly unlikely, the amount of plutonium unaccounted for still would be equivalent to more than 20 bombs a year.

HONORING REPRESENTATIVE SHIRLEY CHISHOLM

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tnursday, December 9, 1982

● Mr. WINN. Mr. Speaker, SHIRLEY CHISHOLM always represented the interests of people who have not enjoyed the prosperity most Americans have. She firmly believes in speaking for the less fortunate and in the 14 years she has served in the House of Representatives, has been a source of compassion and eloquence.

I do not agree with Congresswoman CHISHOLM on many issues, yet there are very few people in Congress whom I respect and admire more. She has always been fair and consistent in her point of view and that reflects in her voting record.

SHIRLEY CHISHOLM has visited my part of the country and was named an honorary citizen of Kansas City a few years back. She has quite a few admirers back in the Midwest—people who understand her tenacity and hard-working nature. No matter the political persuasion. SHIRLEY CHISHOLM is a Member of Congress who believes in hard work while representing the people. Her efforts on the Rules Committee—a very demanding committee—are well known and she is one of the reasons that committee carries as much prestige as it does.

SHIRLEY CHISHOLM is an effective legislator and fine lady. We will miss her here in the House. I wish her well.●

HON. RON MOTTL

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CHAPPELL. Mr. Speaker, I rise today to pay a special tribute to my dear friend and distinguished colleague, RON MOTTL.

It is hard for me to imagine anyone in Congress who will miss RON more than I. For the past 8 years he has pitched an outstanding game for the Democratic baseball team—leading us to victory over the Republicans. We will sorely miss RON—whose superb pitching and fielding abilities have enabled the Democrats to keep the opposition at bay. While my good friend, Mr. CONTE, is certainly saddened at the loss of such an able colleague as we have in RON, he is, no doubt, relieved that his team will not have to face the fierce fast pitch of RON MOTTL. There is certainly no one who can take his place on the Democratic team, and we will all be forced to go an extra round or two to compensate for the loss of our fine friend and teammate.

Aside from his remarkable athletic record, RON has served this Chamber with great distinction since 1974. As the chairman of the Veteran Affairs' Subcommittee on Hospitals and Health Care, he has taken careful consideration of the special needs of our veteran population. I know firsthand of RON's great service to our veterans through his able chairmanship of this important subcommittee.

Last June, I appeared before his subcommittee to again argue the case for the establishment of a VA outpatient clinic in Daytona Beach, Fla. Although Congress had instructed the Veterans' Administration to provide an outpatient clinic in this area in three separate appropriations measures, no action had been taken. Needless to say, through the efforts of our esteemed colleague, that much needed clinic will soon be operating. RON, the Veterans in the Fourth Congressional District of Florida who will utilize that facility certainly owe you a lot and I am most grateful for your fine work and effort on their behalf.

Along with his service on the Veterans' Affairs Committee, RON has also served on the House Energy and Commerce Committee. His work on that committee has been of great benefit to this Chamber and I am sure we will all miss his input there. He has been a studious lawmaker, carefully weighing all points of view before reaching a final analysis.

I am sure that I speak for many of our colleagues when I say you will be missed. Your good judgment and wisdom have been assets which cannot be replaced. You have served your country well and I am sure that you will continue to work for the betterment of our Nation.●

H.R. 7360

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. BEDELL. Mr. Speaker, on Monday, December 6, the House approved H.R. 7360, the Surface Transportation Act of 1982. This comprehensive transportation package was desperately needed to address the deterioration of our Nation's transportation infrastructure. The extent of this deterioration has been clearly portrayed in dozens of magazines and newspapers as well as trade publications and television and radio reports.

This legislation—as passed by the House of Representatives—is by no means a perfect bill. I spent a great deal of time studying the different provisions of this legislation and meeting with my constituents from northern Iowa about how this bill would change their businesses and lives. From the beginning I had a number of misgivings about the ramifications of this legislative package.

My major objection centered on the revenue title and the number of increases in existing taxes which will place a substantial burden upon the trucking industry. I recognize that several recent studies have recommended a greater user fee be charged to the heavy trucks to meet their responsibility for the transportation system. However, in its present form I feel that the total increase in taxes on the trucking industry is unacceptable.

The package as adopted by the House would increase the heavy user fee for large trucks on a graduating scale up to a maximum of $2,000 per truck. In addition to the increased tire, tread rubber, and fuel taxes this heavy user tax will have a devastating impact on the trucking industry. Considering that the trucking industry is already financially ailing, does it seem prudent to impose these excessive additional tax burdens? And, considering the ripple effect on agriculture and other troubled industries that rely on trucks, does it seem wise to further strain their economic welfare? I think not.

Mr. Speaker, I was disappointed that the rule granted for the debate of this legislation did not permit amendments to the revenue title. Considering the impact of these taxes on the trucking industry I believe it was important to allow an open debate and permit amendments to improve this title. I regret that in a close vote of 197 to 194 the rule that did not permit amendments to this title was adopted.

Having lost in the attempt to amend this part of the bill, I was faced with the decision to vote for or against the revenue title which had to be adopted before the entire surface transportation legislation could be approved. While recognizing the deficiencies of this revenue title, I reluctantly voted for this package with two considerations in mind.

First, it is my hope that the Senate will make sufficient changes in the heavy user tax so that a House-Senate conference committee can agree on a more reasonable heavy user tax. If the conference committee fails to make sufficient changes in the heavy user tax I can always vote against the whole surface transportation bill at that time.

Second, since the heavy user tax does not become effective until January 1, 1984, there is still time to approve changes in this provision that would address the truck industries' responsibility for the transportation system without crippling or destroying it.

The trucking industry is cognizant of its responsibility to our roads and has been very supportive of the need to address our transportation infrastructure. Hundreds of people in this important industry have called or telegramed my office in the last week to express their concern about the needs of our transportation system. They recognize their responsbility to help pay for the construction and repair of our roads and bridges and realize that a safe and improved highway system is in their best interest as well as the best interest of our country. These individuals only request that the taxes assessed to their industry be reasonable and fair. I regret that in its present form the total taxes assessed to the trucking industry are not reasonable and are not fair.

Mr. Speaker, it is my understanding that the Senate will consider this legislation today and I hope that some changes will be made to the heavy user tax. Furthermore, I would urge my colleagues to again look at this provision if a conference committee returns this bill to the House for final approval. Finally, if changes regarding the heavy user fee are not made before the President signs this legislation into law, I would urge the Ways and Means and Public Works and Transportation Committees to consider legislation in the next year to address this tax before January 1, 1984, the effective date of this provision.●

MARIO BIAGGI: A CHAMPION OF STUDENT AID

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. FORD of Michigan. Mr. Speaker, I am proud to pay tribute to one of my fellow senior members on the House Education and Labor Committee, the Honorable MARIO BIAGGI.

He has distinguished himself on that committee and particularly on the Subcommittee on Postsecondary Education with his knowledge of student aid programs, his sensitivity to the needs of the handicapped, and his dedication to adult nontraditional students.

During the consideration of the Higher Education Amendments of 1980 and the Middle Income Student Assistance Act of 1978, when I was honored to serve as the chairman of the Subcommittee on Postsecondary Education, I depended a great deal on Congressman BIAGGI's knowledge and expertise. It therefore came as no surprise to me when Fordham University on October 8 awarded him its highest nonacademic honor, its Presidential Medal. I wanted to share with my colleagues the article on this event which appeared in Inside Fordham, Fordham University's journal of events and ideas.

The article follows:

CONGRESSMAN BIAGGI RECEIVES PRESIDENTIAL MEDAL

Congressman Mario Biaggi was awarded Fordham University's Presidential Medal on October 8 as the highlight of the University's observance of National Higher Education Week. The medal, the University's highest non-academic honor, was presented by Rev. James C. Finlay, S.J., at a dinner honoring Biaggi in the McGinley Center.

In bestowing the medal, Father Finlay described Biaggi as an "indefatigable and dedicated representative of his constituents." Father Finlay said that as a member of the House Education and Labor Committee, the Congressman "has valiantly fought for the preservation of Federal support of higher education and he has sought as well to safeguard and underwrite the independent sector."

Noting that Biaggi is also a member of the House Select Committee on Aging and chairman of its Subcommittee on Human Services, Father Finlay said that he "continually has espoused and championed the concerns of senior citizens." He added that the Congressman had been a key figure in assisting Fordham to obtain a $6.5 million federal grant to build 115 units of housing for elderly and handicapped persons on an abandoned parcel of City-owned property

adjacent to Fordham's Rose Hill campus in the Bronx.

Father Finlay concluded, "The medal is an acknowledgement of the Congressman's major contribution to the commonweal, and precious token of gratitude and esteem on the part of the University for a very dear friend and neighbor."●

SHIRLEY CHISHOLM

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. FROST. Mr. Speaker, when we adjourn sine die and the 97th Congress ends, an illustrious career in the U.S. House of Representatives will end with it. When SHIRLEY CHISHOLM takes her leave of the House, we will lose a Member of intelligence, independence, and courage. This House will lose a voice that has spoken loudly and forcefully for those whose voices are all too often not heard and those voices to which not many will listen. In short, Mr. Speaker, we will all be the poorer for her absence.

SHIRLEY CHISHOLM has dedicated her life and her career to the people who are so often left behind when this country advances. She has made it her job to look out for those Americans and to ask why they are not part of the great strides this country has made in this century. Her voice has often been an irritant to the strong, the powerful, and the wealthy, but I submit that it has been her voice that has protected the powerless from the powerful. She is an advocate of a fair America, a just America, and a moral America. She is a woman of dignity, grace, and purpose and those qualities will be missed.

But, knowing of her sense of purpose, I feel sure that just because she is leaving the Halls of the House of Representatives does not mean that she will remove herself from those causes which she has so forcefully championed. I know she will continue to speak out and demand equality and justice for all Americans. I am proud to have known her and I am proud to call her my friend.●

COMMON CAUSE SUPPORTS CONGRESSIONAL PAY INCREASE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. PORTER. Mr. Speaker, I submit without comment a letter received today from Common Cause regarding remuneration of Members of Congress:

Dear Representative: The House and Senate will soon once again be faced with the extremely important but politically difficult question of what to do about congressional pay. Common Cause strongly supports appropriate pay increases for Members of Congress as well as for officials in the Executive and Judicial branches.

We recognize that this is a particularly difficult issue at this time because of the severe economic conditions in the country. Unfortunately, however, there never seems to be a right time for increasing congressional pay.

Since 1969, according to the Joint Economic Committee, the Consumer Price Index (CPI) has risen 168 percent. Pay for Members of Congress during this same period has risen 43 percent (from $42,500 to $60,662). This has resulted in congressional pay over the last thirteen years running 125 percent behind inflation. Since 1977 the CPI has increased 62 percent while Members of Congress have received only one raise of 5.5 percent—in 1979. The report of the Commission on Executive, Legislative and Judicial Salaries pointed out in 1980 that "in 1969 dollars, the purchasing power of salaries for Members of Congress has declined to $25,800."

Because congressional pay winds up linked with other government salaries, the inability to deal rationally with this issue has had a negative impact on the Executive and Judicial branches as well.

As an organization Common Cause has opposed backdoor means of enhancing congressional salaries that increase conflicts of interest and inequitably use the tax code. Common Cause worked against lifting the limits of honoraria and other outside income and for repeal of the special congressional tax break. But we also strongly believe that Members should be appropriately compensated through their congressional salaries.

Obviously $60,662 does not represent a marginal annual income. But it is far below the salaries of those in top level positions in major corporations and law firms and many other enterprises in the private sector. In addition, a study conducted for the 1980 Pay Commission showed that between 1969 and 1980 private sector executives with "responsibilities roughly comparable to those of top federal executives" received salary increases of more than 116 percent.

There are clearly other rewards in congressional service that are not monetary in nature and certainly no one expects that government salaries will or should be directly comparable with the private sector. But Members of Congress have been chosen by the people as our national leaders to make the public policy decisions that will affect the direction of our country and the lives of all Americans. It is essential that they be adequately and fairly compensated. Members should not be expected to see congressional pay in real dollars decline year after year.

Many Members have independent wealth or other major sources of additional income while others—a majority in the House of Representatives—basically live on their congressional salaries. We urge those Members who have independent financial resources to think long and hard about denying their colleagues pay increases to which they are clearly entitled and which are in the public's best interest.

We understand this is a very difficult issue politically and that the temptation is there to reject any efforts at increasing congressional pay. We strongly urge you, however, to resist this temptation and to support an appropriate pay raise for Members of Congress.

Sincerely,

FRED WERTHEIMER,
President.●

PLAN TO CALL UP H.R. 6519

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday December 10, 1982

● Mrs. SCHROEDER. Mr. Speaker, this is the text of a bill I plan to call up on suspension next week:

H.R. 6519

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3111(c) of title 5, United States Code, is amended—

(1) by striking out "(c) Any" and inserting in lieu thereof "(c)(1) Except as provided in paragraph (2), any"; and

(2) by adding at the end thereof the following new paragraph:

"(2) In addition to being considered a Federal employee for the purposes specified in paragraph (1), any student who provides voluntary service as part of a program established under subsection (b) of this section in the Internal Revenue Service, Department of the Treasury, shall be considered an employee of the Department of the Treasury for purposes of—

"(A) section 552a of this title (relating to disclosure of records);

"(B) subsections (a) (1), (h) (1), (k) (6) and (1) (4) of section 6103 of title 26 (relating to confidentiality and disclosure of returns and return information);

"(C) section 7213(a)(1) and 7431 of title 26 (relating to unauthorized disclosures of returns and return information by Federal employees and other persons); and

"(D) section 7423 of title 26 (relating to suits against employees of the United States);

except that returns and return information (as defined in section 6103(b) of title 26) shall be made available to students under such program only to the extent that the Secretary of the Treasury or his designee determines that the duties assigned to such students so require.".

Amend the title so as to read: "A bill to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties.".●

TRIBUTE TO CONGRESSWOMAN SHIRLEY CHISHOLM

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CLAY. Mr. Speaker, it is my privilege to join my colleagues today in tribute to the distinguished Congresswoman from New York City, the Honorable SHIRLEY CHISHOLM, on the occasion of her retirement from the U.S. Congress.

Representative CHISHOLM and I are congressional classmates. We both joined the House of Representatives in 1969. In the last 14 years, SHIRLEY CHISHOLM has given outstanding and devoted service to the people of the 12th District of New York and all the citizens of the Nation. It has been my pleasure to serve with Mrs. CHISHOLM on the Education and Labor Committee and I have been moved by her deep commitment to improving the educational systems in our society. She is a vigorous, enthusiastic, and courageous fighter. Everyone of us fortunate enough to have worked with SHIRLEY CHISHOLM has been enriched and rewarded by the association.

SHIRLEY CHISHOLM is a unique and remarkable human being who has dedicated her life to helping her brothers and sisters. Congresswoman CHISHOLM is leaving a meaningful legacy of service to her Nation and she will be greatly missed by all the Members of this body. As she retires, I extend to SHIRLEY CHISHOLM and her family, my best wishes for a long and happy future.●

THE LESSONS OF ABSCAM

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. HUBBARD. Mr. Speaker, I received an excellent and thought-provoking letter with regard to the report prepared by the American Civil Liberties Union from professor of law, Robert L. Stenger, University of Louisville, Louisville, Ky. I believe my colleagues will be interested in Professor Stenger's comments concerning the need that "we have a high degree of confidence in the fairness and integrity of the criminal system." However, as he also states, "it is most disturbing to read of FBI activities which intrude into the lives of citizens and Members of Congress with no prior showing of probable cause before an objective magistrate."

The letter follows:

KENTUCKY CIVIL LIBERTIES UNION,
Louisville, Ky., November 5, 1982.

Representative CARROLL HUBBARD,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN HUBBARD: I am sending you a copy of the ACLU Public Policy Report "The Lessons of ABSCAM" in my own name and in the name of the Board of Directors of the Kentucky Civil Liberties Union. As a law professor, a lawyer and a citizen, I find the contents of this report quite disturbing.

Surely, as a member of Congress, you are aware of the existence, implications and results of the ABSCAM investigation. The ACLU report is, in fact, drawn almost entirely from evidence which was developed before Senate and House committees. The persons who suffered most as a result of ABSCAM were your own colleagues.

I would direct your attention to two significant aspects of an ABSCAM-type investigation: privacy and the integrity of the criminal justice system. With respect to privacy, it is acknowledged in our constitutional system that an individual cannot raise a privacy defense to a criminal charge. The lawbreaker loses his privacy, among other things, by the very fact of breaking the law. The offense and its legal consequences become matters of public record and public knowledge. But unless and until there is probable cause for believing some illegal activity has occurred or is about to occur, the individual should be protected from unwanted and intrusive governmental penetration into his personal life. As I write this letter, I sit in the building outside of which Justice Brandeis lies buried; it was he who wrote so eloquently of a person's "right to be left alone." It is most disturbing to read of FBI activities which intrude into the lives of citizens and members of Congress with no prior showing of probable cause before an objective magistrate.

For the continuation of our common life as a nation under law, it is necessary that our criminal laws effectively punish lawbreakers and deter would-be lawbreakers. But to achieve these results, it is also necessary that we have a high degree of confidence in the fairness and integrity of the criminal justice system. Perceived unfairness may be as detrimental to the system as actual unfairness with respect to public confidence. Most of us saw on the national news programs the various tapes of allegedly illegal activities by members of Congress. Many of us were embarrassed at the manner in which such tapes were made and the sequence of events leading up thereto. No citizen would wish to continue any practices which condone lawbreaking, certainly not by those holding the responsibility of elected public officials. But also no citizen can watch reports of an ABSCAM-type investigation without some real fear that any one of us may be too close to a similar investigation. "There . . . go I."

I encourage you to read and study the report compiled by the American Civil Liberties Union and to discuss in with your colleagues. I hope that such study will lead you to support effect in Congress to draft appropriate laws, rules and guidelines for law enforcement agencies. Committees in both houses of Congress have already held hearings on this matter. We hope you will be able to develop legislation under which effective detection and prosecution of criminal activity can be combined with adequate protection of individual liberties, personal privacy, and collective respect for the fairness of our justice system.

Sincerely,

ROBERT L. STENGER,
Professor of Law,
University of Louisville.●

KEN HOLLAND

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CAMPBELL. Mr. Speaker, it is with mixed emotions that I take the floor today to pay tribute to my colleague from South Carolina, KEN HOLLAND. While it was KEN's choice to continue his career in the private sector, the fact is that this House is going to miss him sorely. The Nation and certainly the State of South Carolina is losing a fine legislator and a good man.

During his 8 years in the House, KEN came to be a leader on the Ways and Means Committee, speaking with a moderate voice that was respected on both sides of the aisle. As chairman of the Congressional Textile Caucus, he grappled with Democratic and Republican administrations alike for a fair deal for the industry which is the lifeblood of the South. And through it all, KEN's dry wit and honest convictions won him the admiration even of those who disagreed with him.

KEN is known for his musical ability and his love of good old, down home country music. I can well imagine that during his decisionmaking process, Willie Nelson's "Stay a Little Longer" might well have warred with Johnny Paycheck's "Take This Job and Shove It"—I am only sorry that Willie did not prevail.

I know that KEN and Diane will enjoy their new life, for they are the kind of people who find satisfaction in whatever goals they are pursuing. I wish them only the best.●

CONGRESSWOMAN SHIRLEY CHISHOLM

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Ms. MIKULSKI. Mr. Speaker, it is a privilege for me to rise today and honor my distinguished colleague, SHIRLEY CHISHOLM. Ms. CHISHOLM has been the heart of the women in Congress. She has provided tremendous leadership and has been an inspiration to us all. Her campaign for the Presidency of the United States was a lightening rod for people who had felt on the outside of the political process.

Congresswoman CHISHOLM stands for the best of the ideals that have made this country great: democracy, equality, and concern for others. She is truly unbought and unbossed.

She has been a dedicated public servant. Her constituents are not the only ones who have benefited from her great leadership. We in Congress have been challenged and inspired by her, as has the whole country. To me she has been a friend, adviser, and valued cocampaigner on the Kennedy campaign. I will miss her presence.

I wish her well in her future endeavors, and Godspeed.●

ITALIAN AID FOR POLES SHOWS BROTHERHOOD ALIVE IN BROOME COUNTY

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. McHUGH. Mr. Speaker, I would like to take this opportunity to share with my colleagues news of a heartwarming event that recently took place in upstate New York's Broome County, which I am privileged to represent.

On November 12, a wonderfully festive dinner-dance was sponsored by the Italian community in Broome County to raise funds for relief assistance for the people of Poland, who at that time had been under martial law and suffering from severe economic hardships for almost a year.

Numerous Italian organizations participated in sponsoring the event at the Fountains Pavilion in Johnson City, N.Y.—the men's and women's Abruzzi Clubs, and both the Endicott and Binghamton men's and women's lodges of the Sons of Italy.

Shortly after Thanksgiving, in a beautiful expression of the spirit of the season, representatives of Broome County's Italian organizations presented a check for over $1,000 to the Kopernik Society. That money will go to alleviate the plight of the Polish people, just as money collected almost 2 years earlier by Polish organizations in Broome County had gone to provide assistance to Italian earthquake victims.

Mr. Speaker, I wish to commend the organizations involved for the spirit of solidarity and brotherhood they have shown, and to share with my colleagues the power of their example. In a world that sometimes seems heartless and cruel, the Italian and Polish communities of Broome County have given us a beautiful example of the power of love made effective of which Francis of Assissi spoke: "the ability we have to be, for each other, channels of peace—bringing hope where there is despair, faith where there is doubt, and joy where there is sadness."●

WHAT PRICE DEFENSE? NO CHANGE IN THE SOVIET UNION IN 63 YEARS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. McDONALD. Mr. Speaker, both at the conclusion of this 97th Congress and the beginning of the 98th, we shall be called on again and again to fulfill the constitutionally mandated responsibility for the defense of these United States. I have, and I will continue to raise the question to my colleagues as to how they can vote for American money to sustain the communist world and especially the Soviet Union—and not vote for defending this country.

We have witnessed factory workers making Soviet machineguns to perpetrate the massacre of the Israeli athletes at Munich and being fed with U.S. wheat. We have seen American technology given to the Soviet Union kill our men in both Korea and Vietnam as well as perpetrating massacres against Hungarians and Poles.

I shared some mementos from Igor Gouzenko, who defected to Canada back in 1945, in another part of this RECORD. He could not be part in conscience on spying on Canada, the United States and Great Britain after seeing the reality of living in a free land. And yet there are still those who believe that we must continue to negotiate and simultaneously stop spending for defense against the Soviet Union.

If I may I would like to share some more brief passages from Igor Gouzenko's book, "The Iron Curtain," on subjects of interest on life in the Soviet Union versus the free world. Please weigh the alternatives in conscience and see whether we should arm—or disarm. Excerpts on different subjects follow:

This Christmas season no doubt, there will be many mothers in America about to bring pride and joy to future citizens in a free land. Please ponder the alternative in the Soviet Union:

Then came the day that Anna told me she was pregnant.

At first I was elated with the news because I have always loved children, but my joy gave way to sober thought of what this meant. The food situation had become very much worse. I knew that the meals at the Architectural Institute were not substantial enough to meet the new demands on Anna's bodily strength. The thin soup she received there was like muddy water. There were no fats or oils. Within a short time she began to lose her teeth.

The only way I could devise to supplement her diet was by surreptitiously bringing half of my dinner home to her. When I was served a cutlet or meat ball for dinner, I would slice it in two. One half I ate; the other I put in my pocket and took home. I did the same with the bread, which was of better quality than could be obtained in civilian stores. Many other fellow officers were doing the same for their wives.

Eventually I worked out a scheme whereby I smuggled a saucepan into the mess. The waitresses sympathized with me and furtively passed me extra soup, glancing over their shoulders at the mess managers as they did so.

As Anna's condition failed to improve I stopped eating lunch and put everything I received in the way of food into the saucepan. There were guards at the door but they, too, were married men and pretended they didn't notice my bulging coat.

Anna was suspicious.

"Igor," she would ask, "are you sure you had some lunch?"

I would wave away her question and sit there trying to seem unconcerned while she ate. In those days I can never recall going to bed without thinking how grand it would be to have something to eat. I would toss in my sleep, dreaming of hot bowls of soup and wake up in the middle of the night imagining I could smell it cooking in the room. It never occurred to me that there were ordinary people in other countries any better off than us. My whole aim, at that time, was to improve my station at Headquarters so that higher rank would bring more rations.

One night Anna's sister visited us and brought with her a salt herring that had been over-cured. The two girls made a pot of soup with the herring and offered me some, but the smell sickened me. I had to refuse it and they ate my share.

Anna did not have a single bite of fruit during those trying months. In fact, I had not seen fruit for more than five years. I had forgotten what a good cut of meat looked like.

Is it any wonder that Anna and I still walk as if into a paradise when we enter our neighborhood butcher shop or fruit store and see steaks, oranges, pears, bananas, lemons, berries . . . ?

Yes, of course we take such things for granted as curtains on our windows here in America. Could one imagine such conveniences not being readily available to the populace? Now look through the "Iron Curtain" window of reality in the Soviet Union:

During my year at the foundry's "adult school," I achieved little. It was not for lack of trying. The school was nothing but a farce. However, the year I spent there did give me an opportunity to get to know the workers.

Frequently I was invited by the handful of men who stuck at the course to visit the community boarding-house. Invariably their poverty astounded me. None of the workers had any belongings except what was stored in the trunk under each bed.

About one hundred men occupied each dormitory, and half of the beds were occupied almost continually by either the night or the day shift. Those waiting to go on shifts were invariably a noisy lot. There was much laughing and smoking. Some played on balalaikas. Frequently girls were there, visiting men. Nobody paid the least attention to the sleepers.

On one such visit, as a guest of a young student-worker, I was looking around and mentally deploring such living conditions for such hard-working men. My escort touched my arm and pointed proudly to some windows on which were some cheap muslin curtains, rarely seen in a workers' house.

"Pretty cultured, isn't it?" he said proudly. "We are in competition with a neighboring community boarding-house," he continued, "and this month we beat them, largely due, the judges said, to the cultural touch given by such things as these curtains."

The young worker actually blushed with pleasure.

"Yes, it was all my idea," he boasted.

Years later I was to remember those curtains, during my first train ride in Canada. Even the windows of the train were curtained. There were curtains on the windows of every house, not because of factory com-

petition, but because they were the ordinary things of life.

As we approached Winnipeg on the train, I saw from the window a factory, outside of which automobiles were parked, filling a vast yard.

I pointed them out in some excitement to a Canadian soldier whom I had met.

"Look at those automobiles! The government must be making a big inspection." Of course I immediately thought of the government, because who else in the Soviet State can be responsible for any assembling of men or machines.

The soldier looked at me queerly for a moment.

"Hell!" he roared, "those cars belong to the factory workers!" It was absolutely unbelievable. I was convinced that the soldier was deliberately attempting some lying propaganda, and I did not speak to him again during the remaining two nights and a day of the trip to Ottawa.

After all, what workers could ever earn enough to afford an autombile? Even if they did manage to save such a stupendous sum of money, how could they ever secure permission to buy what belongs only to the government?

In another entry in this RECORD I made available information dealing with American paratroopers of World War II going to the Soviet Union in 1982. I am quite sure there were no souvenirs worthy of bringing back to the United States. On the other hand what would the average citizen like to have in the Soviet Union? Gouzenko gives us the answer:

Moscow sent an exhaustive list of items which could not be brought back to the Soviet Union by working citizens returning from foreign assignments. One banned item was "knitting literature." That night I asked Anna what she thought was behind that particular ban.

"That's fairly easy to figure out," she replied. "The innocent knitting-book would tell people back home that there is wool in foreign countries and that women there may knit sweaters, socks and such. All that . . ." Anna's tone became unusually bitter, "might tend to make Russians suspect they are being fooled by the official lies about democratic countries."

I almost jumped from my chair. Unconsciously, I looked over both shoulders in sudden consternation lest somebody be listening. But there was nobody else in the apartment. This was our own little castle boasting its own sacred privacy. Anna had spoken in the free, outright fashion of people living in such a home in a democratic country.

All this rushed into my mind as if a dam had broken with Anna's comment. The thoughts so surprised me that I simply sat in silence, forgetting even to voice the warning I had intended to give her. Anna was right, undeniably so. But the comment voices in our home had been a whole world apart from the retrained, ominous severity of atmosphere in the Soviet colony. Abruptly, I conceded a growing detestation for my work and fellow-workers.

Next morning I removed the new Soviet Custom regulations from the secret file and studied them more closely. Yes, they were designed toward the very end Anna had mentioned.

Ordinary publications such as *Life* and *Time* were strictly prohibited. Aside from what the pictures and words contained therein might do to the Soviet mind, I could see that the mere quality of the paper would tend to cause admiring comment.

It was forbidden to bring back such household appliances as a vacuum cleaner. Again the reason was apparent. Russian housewives in nearby houses would certainly marvel at such a wonder from the democratic land and be impressed on hearing that most homes have one there. It was permitted to bring back a bicycle as long as it was absolutely plain with no "fancy decorations." Obviously, a fancy bicycle would cause other envious bicycle owners to wonder why they couldn't obtain such things.

Yes, it is the Christmas season. If the following concluding passage, and final one that I offer from Gouzenko does not effect some of my colleagues to vote for defense, then nothing will. It is Christmas, 1945:

With Communists the world over, there is no basic loyalty except to Soviet Russia. That was proven in the Spy Probe in Canada when I showed that even an elected Member of the Canadian Parliament, Fred Rose, was a Soviet agent.

For that reason, I feel that any sacrifice I may have made or may have to make—even at the cost of my life—would be well worthwhile if it helps the world realize that even in a democracy the Communist Party cannot be treated in a broad-minded manner. They are enemies, working for a flag different from the one waving above them. They work under no code of ethics. They work without any humanitarian ideology to cramp their style. The end justifies the means in everything they do and the end for Communists everywhere is advancement of the Soviet ideology.

To believe otherwise is to be an international dupe.

Our first Christmas in Canada, following my disclosure of the Soviet espionage ring, was unforgettable. The Royal Canadian Mounted Police guards erected a Christmas tree and wrapped up gifts in pretty parcels for Anna, the children and me.

This was a new experience. Never before in our pagan Soviet existence had we known the sweet, joyous thrill of a Christmas morning. These simple gifts bought from modest police pay loomed as presents of wondrous magnitude, immeasurably sweet and thrilling and heart-warming.

Never before had we known what it meant to stand around a little fir-tree and look into smiling, kindly faces of friends—in this case, the faces of men who had become more than protectors. There will be no end to our gratitude to these men.

We who had been schooled to look with atheistic scorn on the Story of Bethlehem, to regard the Yuletide season's Gospel of Love as impractical, religious drivel, found our hearts too full of strange new emotions to say so many things we should have said.

Anna and I wept like children but the constables pretended they didn't notice. They hurriedly wished us a "Merry Christmas" and turned to opening boxes for the children. Several of the boxes contained toys.

Finally, Anna spoke in Russian in a voice so low I could hardly discern the words.

"Remember that little girl in Moscow?" she asked. "The one who ran to her mother so excited at galoshes being on sale at the Serpovka, and my saying she should be thinking of her toys?"

I nodded, knowing what she meant.

Anna hurried to the kitchen to see what she could prepare in the way of a very special breakfast. I opened a cupboard and poured glasses of wine. The lump was still in my throat as I raised my glass. But one of the Mounties spoke the toast for me:

"To many happy Christmases in Canada!" he said.

Mr. Speaker, a final word. It was back on October 14, 1919, that Milwaukee, Wis., businessman and philanthropist, Mr. Jacob H. Rubin, arrived in the Soviet Union from the United States. In 1921 he would testify before the Senate Committee on Foreign Relations in the 66th Congress. That is a long way from the present 97th Congress.

In these past few days on reflecting on the status of our Nation's defenses, I have submitted evidence ranging from this year, and going back now to 1919, that in effect the Communist Moscow leadership has not changed one iota in its intent to enslave us. As we move from this 97th Congress on to the 98th and consider whether this Nation will have the defense to survive, let these words of Jacob Rubin, his final before that Senate Committee serve to hauntingly remind us, that in fact, there has been no change in 63 years:

Senator HITCHCOCK. Are they keeping the army organized for the perpetuation of the government?

Mr. RUBIN. Absolutely.

Senator HITCHCOCK. That makes a scarcity of food.

Mr. RUBIN. To a certain extent it does, but the main factor that causes shortage of food and the shortage of clothes and everything else is because the people in Russia are not producing. They are in a state of mind that it is immaterial to them what will happen in the future. They are underfed, underclothed, held by a strong discipline of despotism, ruled with an iron hand. The extraordinary commission is the dread of every person in Russia. Each one is living under a strain of fear, of uncertainty, of something dreadful that may happen. This is the greatest reason why Russia is suffering from the lack of commodities which are essential to life and happiness. So long as the Soviet Government exists, the Russian people will be slaves to a system which holds its people in submission, destroying the energy and incentive, destroying the very hope that is in the heart of every human being which makes life worth living. Communism instead of making a progress, instead of being the solution to cure the economic and political ailments of society, is a step backward, bringing us back to chattel slavery.

(Thereupon, at 5:15 o'clock p.m., the committee adjourned.)●

RECONSIDERING H.R. 7357

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. GARCIA. Mr. Speaker, on Wednesday, December 8, I testified before the House Rules Committee on

H.R. 7357. I would like to submit my testimony for the RECORD.

TESTIMONY BEFORE THE HOUSE RULES COMMITTEE ON H.R. 7357

(By Congressman Robert Garcia)

Mr. Chairman, I want to thank you for this opportunity to testify before this committee on H.R. 7357, the Immigration Reform and Control Act of 1982.

I request an open rule on this bill so that there will be ample opportunity to debate it on the House floor. This bill is one of the most significant pieces of legislation to be considered by the 97th Congress.

Its implications go beyond this Congress, or the next, or the next. Reforming our immigration law has far-reaching and long-lasting consequences. That is why I would prefer that this bill not even be considered during a lame duck session.

I also want to mention that I do not think this is a bad piece of legislation, but I am convinced that it could be made better. H.R. 7357 is a start; it needs to be fine tuned and refocused to better serve the needs of our Nation and all of its communities.

A primary objection I have with the bill centers around employer sanctions. These sanctions are designed to discourage employers from hiring undocumented workers. A fine, or sanction, would be imposed on employers who hire individuals who are not citizens or legal residents of the United States.

This provision looks good on paper. I'm afraid in practice it would allow employers to act as judge and jury with prospective employees who speak with an accent or have an hispanic surname. Employers could refuse to hire these individuals claiming that they are afraid of being fined.

During Governor Malcolm Wilson's brief tenure as governor of the State of New York, he vetoed a bill on employer sanctions. As a state senator, I worked hard to see that the bill was defeated. I feel now, as I did then, that sanctions are wrong.

Instead of employer sanctions, there should be target enforcement of existing labor laws. This would upgrade working conditions and wages so that U.S. citizens could take jobs that are now unattractive because of substandard pay or an adverse working environment.

The bill suggests a national I.D. card to be used to prove citizenship or residency in order to obtain employment. Not only would this program be expensive to implement, it is an infringement on civil liberties. It sets the stage for a more sophisticated and expensive black market for the new I.D. cards. Further, it is another stumbling block in the way of America's poor and indigent from seeking employment. The chronically unemployed don't need to become more alienated from participating in the mainstream of society.

The legalization or amnesty provision is in danger of being stricken from the bill. Articles in the December 2 editions of the New York Times and Wall Street Journal aptly point out this threat.

Legalization is more than a trade off to the Hispanic community. It is an opportunity for the United States to wipe the slate clean and to begin handling its immigration problems from a fresh start. Without a legalization program the underclass of undocumented persons in the U.S. will continue to become more and more alienated and exploited. We do not need to expand our Nation's underclass. We need all people living in and working in this country to join together and build for the future.

It has been inferred that the consideration and passage of H.R. 7357 would help heal America's unemployment problems. I find this ironic. One, because I firmly believe that blaming undocumented immigrants for unemployment problems is scapegoating. Two, because an expanded H-2 program—that is a program that invites workers from the Caribbean and Latin America to work in this country on a temporary basis—has been included in H.R. 6514. This seems to be another version of the now abolished Bracero program, which was instituted as a result of labor shortage.

The only cure for unemployment is to get the economy moving. The primary cause of this problem is not immigration but faulty economic policies. Further, the AFL-CIO has said it will not support H.R. 6514 unless the H-2 provision is tightened up. I agree with their position. I also support Congressman GEORGE MILLER'S amendment on the H-2 program.

There is another important point to be considered when discussing a new immigration policy, that is, the root cause of immigration. People come to the United States searching for opportunity, as many of our parents did. In order to control immigration, the U.S. should help developing countries with labor intensive industries what would keep potential immigrants at home.

Immigration must be stopped at the source. Agricultural and labor intensive industrial development programs in prime sending nations are two key proposals for achieving this. Bolstering developing nations' economies, particularly in Latin America and the Caribbean, also provides the dual benefits of stabilizing the region politically and building potential markets for U.S. goods and services.

It is to the advantage of those countries sending the most immigrants to cooperate, not only because it would increase their prosperity, but because it also cuts off the so-called "brain-drain" of their most intelligent and industrious workers.

Admittedly, it is not an easy task to integrate immigration policy and foreign aid. This is a radical approach to immigration, but, nonetheless, it reflects a profound understanding of the complexity of U.S. Government attempts to control the borders. H.R. 7357 does not take into account foreign policy concerns. It attempts to deal with immigration, not at the border, or before the border where the problem begins, but over the border, in the United States, where fair enforcement is much more difficult and much less permanent.

The recent economic difficulties in Mexico and the immediate increase in attempted crossings at the U.S.-Mexican border is an excellent example of the magnitude of the problem the U.S. will continue to face unless it integrates its immigration and foreign policies.

The U.S. is a wealthy country. The nations south of our border are very poor. The attraction for the people of these nations to come to the U.S. is obvious and strong. What a new immigration policy must do is assist prime sending nations in making it equally attractive for potential immigrants to stay home.

Also, the immigration and naturalization service should be given more funding to enable them to increase their efficiency. This is a serious issue, and the INS needs adequate support in handling it.

I am in favor of a new immigration policy. The U.S. has to protect its borders. We have the right to control the number of people we allow into our country. But any immigration policy must be realistic and fair if it is to properly reflect American principles of justice. As I said, H.R. 7357 is a start, but it should be refocused and fine tuned before it becomes law.●

PERSONAL EXPLANATION

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. CLINGER. Mr. Speaker, on December 9, 1982, I was absent from the floor of the House for a vote. Had I been present, I would have voted in the following fashion:

Rollcall No. 432: H.R. 5133, automotive products practices, the House agreed to the rule (H. Res. 622) providing for the consideration of the measure to establish domestic content requirements for motor vehicles sold in the United States, "yea."●

HONORING REPRESENTATIVE RONALD MOTTL

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. WINN. Mr. Speaker, a respected colleague and good friend is leaving the House of Representatives. I wish Congressman RON MOTTL the best of luck and Godspeed.

RON MOTTL represented Ohio's 23d District with distinction for 8 years. He always displayed a strong loyalty to his constituents while, at the same time, understanding and considering the Nation as a whole. I will remember RON as a clear-thinking, independent legislator who was not afraid to buck his party's leadership if he felt strongly enough about an issue.

RON served with integrity on the House Energy and Commerce Committee and the House Veterans' Affairs Committee. He chaired the Hospitals and Health Care Subcommittee on the Veterans' Affairs panel, dealing with the difficult issue of wounded fighting men. It takes a special kind of person to understand what wounded veterans go through and I believe RON MOTTL was that kind of person.

I believe RON has always had a strong conscience. He demonstrated this when he pursued legislation addressing the increasing amount of violence in professional sports. I worked with RON on this legislation and I can testify to his hard work and perseverance.

RON MOTTL has made a strong contribution in the 8 years he served in the House and I wish him well.

JOHN NAPIER AND KEN HOLLAND

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. MONTGOMERY. Mr. Speaker, I want to join the list of my colleagues who have already paid tribute to two distinguished Congressmen from South Carolina who will not be returning to Congress in 1983, Representatives JOHN NAPIER and KEN HOLLAND.

JOHN NAPIER has worked hard in preparation for his election as Representative from the Sixth District of South Carolina. He had a great deal of Capitol Hill experience, after having worked for Senator STROM THURMOND as a legislative assistant. He later worked on the minority staff of the Senate Subcommittee on Administrative Practices and Procedures, as well as on the staff of the Senate Veterans' Affairs Committee.

Also, JOHN was chief counsel for the minority on the Senate Special Committee on Official Conduct. As you can see, JOHN knew the process here in Washington well, and it has been a great asset to him.

I consider him a good friend and will certainly miss him when the 98th Congress convenes. We will all miss his strong and forceful voice on the issues.

JOHN also made contributions as a very active member of the Agriculture Committee during his service in this Chamber. He is a man of high integrity and dedication. His efforts for his district and his strong stand on the issues has earned the respect of House Members on both sides of the aisle. We will miss him.

KEN HOLLAND'S retirement as Congressman from South Carolina's Fifth District means that the district and the State have lost a hard working and very effective lawmaker. KEN has served with distinction on both the Ways and Means Committee and the Standards of Official Conduct Committee.

He has been a most diligent worker for his constituents since being elected to the 94th Congress in 1974. I know they will miss his voice here in Washington. KEN can truly be proud of his accomplishments in this Chamber, as can the people of South Carolina.

I know my colleagues will join with me in wishing the very best for KEN and his family in the future.●

JOHN NAPIER

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CAMPBELL. Mr. Speaker, I am proud to take the floor today in honoring our distinguished colleague, and a close personal friend of mine, JOHN NAPIER.

As a fellow South Carolinian, JOHN and I have worked closely on numerous issues and problems, and I have always sought his opinions and views, especially in his area of expertise—agriculture. Ask any farmer in South Carolina, and he will tell you what many of us already know, that JOHN'S knowledge of agricultural issues and understanding of farm problems is second to none in the State.

During his 2 years in Congress, JOHN has represented his constituents loyally, just as he promised he would. He stood firmly by his principles that the size of the Federal Government must be reduced and that free enterprise is a great hope for the development of human potential.

His life from day to day in this body and in the Sixth Congressional District exemplified an honorable and hard-working determination of spirit. His study of the issues in order to most fully represent those who elected him to serve overshadowed any effort to put his personal position in the forefront through legislative or committee efforts. Of course, we all know of JOHN'S diligence, commitment, and integrity.

As a friend of JOHN'S for many years, I have observed him serve the public in several capacities, and he has excelled in every instance. For my part, I am proud to call JOHN NAPIER a good friend. I wish JOHN and his wife, Pam, the best of everything in the years ahead, and I am sure that we will see John serving the public once again in the future.●

RETIREMENT OF DON H. CLAUSEN, JOHN H. ROUSSELOT, AND CLAIR BURGENER

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. CONTE. Mr. Speaker, I am sincerely pleased to be able to take part in a tribute for my three good friends and colleagues from California—DON CLAUSEN, JOHN ROUSSELOT, and CLAIR BURGENER. These fine individuals have all distinguished themselves in important respects as Members of Congress, and their presence here will be sorely missed.

It is always difficult to capture an individual's true character in the space of a few sentences. To do this adequately, one must take many factors into consideration. In political circles, though, we are fortunate to have at least one revealing character measurement; that is, dedication to public service. If there is one thing that can be said about each of these three outstanding individuals, it is that they all have long and noteworthy careers of dedicated public service, both to their Nation and to their districts.

DON has the distinction of being one of California's most senior House Members, having been elected to represent the Second District back in 1963. JOHN first worked for the Federal Housing Administration before being elected to Congress for one term in 1961. And since 1970, the people of JOHN'S 26th District have reelected him consistently. The San Diego area has been equally well served by CLAIR'S efforts at both the State and National levels. Prior to his election to Congress in 1972, CLAIR served as a city counselor, vice mayor, State assemblyman, and State senator.

Additionally, DON and CLAIR served their Nation proudly during World War II. And while in Washington, they have done no less for their districts. DON has risen to the position of ranking minority member on the Public Works and Transportation Committee as well as having become the most senior Republican on Interior and Insular Affairs. From these positions of high rank, DON has been able to effect great results for his constituents—particularly those of the lumber industry.

CLAIR and I have had the opportunity to work more closely as we are both members of the House Appropriations Committee. It is within the ranks of this committee that CLAIR has steadily risen. Moreover, CLAIR and I share a deep-seated concern for the environment and its proper management. In a time when much of the beauty of our surroundings and the quality of the air and water is threatened, such concern is refreshing.

As for JOHN, he too has proven himself a most respected and highly capable Representative. There is little question that JOHN'S district was in good hands with JOHN sitting on both the prestigious Ways and Means and Joint Economic Committees. What has impressed me most about JOHN, however, is his iron constitution and willingness to work for that which he believes in.

A tremendous amount of political talent will be lost on the Hill when these men leave. Additionally, the retirement of DON and JOHN will create a void in the House Republican baseball team which will be very difficult for me to fill—for not only do I have to replace my designated hitter, but I have to find a new coach too.

Truly, working and playing with each of these men has been a pleasure and a privilege I will never forget. I join all House Members in extending my thanks to them for their friendship and wish each my very best in the future.●

IGOR GOUZENKO—FROM THE PAST A LESSON TO BE LEARNED

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. McDONALD. Mr. Speaker, in another set of remarks to Members of this body, I made reference to a group of American paratroopers who in October of this year visited the Soviet Union. Their testimony definitely showed with reason and observation how conditions actually are in the Soviet Union not as some wishful thinking individuals in this country would have us believe.

Forty years before, another person lived in the Soviet Union. His name was Igor Gouzenko. Trained as a code expert by the Soviet Government, he was sent to Canada, ostensibly to be a Soviet Embassy staffer. But his actual mission was to perform espionage against the country of Canada.

However, Gouzenko became a disappointment to the Soviets as he could not fathom how his Government who had been treated so well by Canada, the United States, and Great Britain, could spy on these nations and steal their highest national secrets. His story was later put into a book called simply, "The Iron Curtain."

Has there been any difference in that space of 40 years between the observation of the American paratrooper in 1982 to the actuality of Gouzenko in 1942. I do not think so. Yet, for the benefit of my colleagues who choose still to scuttle the Nation's defenses, there must be the stark reality of the animals we deal with.

Therefore I would like to share some excerpts with my colleagues from Igor Gouzenko's book. I shall simply begin with the notation by the editor of his book, and then for my colleagues a word or two introducing each subject of Gouzenko's passages. If after reading these passages, one can still vote to sustain the Soviet Union to the detriment of our Nation's defense posture then we are in deep trouble.

EXCERPTS FROM "THE IRON CURTAIN" BY IGOR GOUZENKO

Introduction by the editor of Gouzenko's book:

If any passages, especially the ones dealing with his experiences in wartime Russia and the inner sanctums of the Soviet's most secret Intelligence organizations, seem utterly fantastic to the Western mind, the reader must remember that this is no "I was told" story. Nor is it an impressionist document from the typewriter of a "press party" observer. This man was there. He lived through the years he describes. He has seen the Red drama unfold on the stage and backstage. His testimony before some of the world's best trained legal figures has been characterized by a remarkable respect for detail, a tendency to speak only of what he could prove.

If, by way of introduction, one lone editorial comment may be permitted, it lies in the profound, unusual and daring tribute paid our free way of life by Igor Gouzenko. He deliberately risked his life to espouse what we so casually accept as our birthright. By this very act he helped to safeguard our great heritage of freedom.

Negotiate at the expense of the defense of these United States? Gouzenko states what Moscow is really after:

During the summer of 1945, I found myself restraining my tongue with difficulty when laughing comment would be made around the Soviet Embassy about some Canadian or American development. I felt like shrieking: "You fools! You miserable fools! Don't you realize these people have practically everything that the people seek and need? Why not grasp their extended hand of friendship as friends and work to our mutual benefit instead of trying to ruin them?"

But I knew, as one long associated with the spy ring, how useless it would be to plead. There is no use treating these Communists merely as members of another political party. They live and lurk in the shelter of your hospitality as enemies of everything you hold sacred. Your generous attitude toward them is treated with scorn. The extending of privileges equivalent to that of citizens is regarded as evidence of weakness. Your Red guests appreciate only the stern hand. Any attempt to compromise with the Kremlin is not only useless but harmful to the democratic world.

Recently, Earl G. Cox, Jr., of the Department of Agriculture in response to a query concerning sale of grain to the Soviet Union wrote: "Yes, history indicates that peace is more likely to be achieved between nations where there is a strong bond of trade." Mr. Cox for the benefit of his naivete should read the following from Gouzenko:

These people, the great masses of modern Russia, must stand in queues for the merest pittance of bread. Clothing means rags to the overwhelming majority. But what is worse, they have no hope of ever being able to live better. And while this condition exists, the bureaucrats bring finery from abroad for their wives.

On one occasion in Moscow there was considerable merriment caused in official circles over a long sweeping gown worn by an important secretary's wife at a large banquet. He had brought it back with him after a flying mission to London. It had obviously cost a lot of money and was certainly very beautiful but, to the chagrin of the secretary and his wife, they found during the party that it was a nightgown!

During the war all kinds of groceries were sent to Russia from the United States, but the ordinary Russian people saw very few of these. Mainly they were allocated to the innumerable stratas of bureaucrats. Thus American generosity helped this "authority" to live without hardship during the most severe period of the war.

At a dinner arranged by a general shortly after Stalingrad, I saw a table loaded with American canned goods, vodka and delicatessen products. What would have fed ten Russian families for a month was eaten there by a small group of well-fed guests. But the most unhappy aspect of it was that this group ate with complete conviction that they had a right to it. Their consciences were absolutely clear. The sufferings of the people were not their concern.

Therein lies the iron hold of the Soviet system.

The vast horde of big bureaucrats and little bureaucrats are vigorously loyal because of what it means in food, drink, homes and parties. The vast army is loyal for the same reason it stayed loyal during Russia's grimmest war years—you eat well in the army. Even when conditions were at their worst, the shrewd Soviet organization kept rations at peak-best in the front lines, so much so that troops in the rear lines continually asked to be sent up front. There used to be a saying among front-line troops:

"While you live you eat well."

The control of food is a power you people in democracies have never had to think about very seriously. But you would, if the state punished a critical public utterance or failure to pay some taxation by decreasing the food ration for your family.

Is freedom of religion worth the cost of defending America? Billy Graham could take a lesson in reality from Gouzenko:

"PROHIBITED ZONE."

There would be the outside fence. Beyond this was another fence immediately surrounding the barracks which housed the gray shadows. These camps weren't visible from the road because of the thick forest.

As for the human shadows inside the concentration camps their existence then—and today—depends solely on whether or not they are needed for work. Starvation, hunger and cold are used as handy means for disposing of those unneeded or unfit for work.

Describing these concentration camps makes me wonder if there will be readers who will shake their heads and say cynically:

"Such things cannot be in Russia. This man is exaggerating or lying."

There were undoubtedly people who said the same when the first descriptions of Nazi Germany's concentration camps were published.

Many former priests were to be found among the prisoners. These were specially assigned to wash the gilt off icons, crosses, candelabra, censers and other church articles. I saw them working in churches and they were invariably conspicuous. These former priests always seemed thinner and more emaciated than any other workers. In the solemn atmosphere of the old churches they moved like ghosts of martyrs; like living skeletons against the glimmering gold on which they worked, always in silent resignation.

On one occasion in Moscow, a group of us Komosomols was granted the "honor" of seeing how Soviet justice had dealt with these priestly dispensers of religion, "opiate of the people." We were escorted to a church which had been sealed up for some time. In fact, only a small door had been opened as an entrance for the laborers.

The atmosphere inside was positively rank. Even the NKVD overseer, smartly uniformed, had to step outside at frequent intervals for a breath of fresh air. But the workers stayed there for ten or twelve hours daily.

A member of our touring group commented on the "inferior" appearance of the ex-priests and asked if this was due to their "useless habits" of the pre-Soviet era.

"That may have had something to do with it but . . ." the NKVD overseer's hard face twisted into a leer, "most of them have contracted poison from working on the apparatus they used to employ in poisoning the people's minds. Fair enough, isn't it?"

He laughed.

"You see, the acid which they are forced to use in washing off the gilt gives off fumes which, in time, reaches their lungs. Still more of the acid works its way into their bodies through the hands."

Somebody asked if this poison resulted in a speedy death.

"No," replied the overseer, "a nice, long, slow death!"

Again he laughed.

So encouraged, our guide went into even grimmer details. Many a priestly worker sent to a high scaffold would faint from the fumes and fall varying heights to the hard stone floor. Those who were fortunate enough to die were immediately buried in the cemetery near the church. The overseer merely had to report the incident and a replacement was sent from the concentration camps.

Two things about that tour now strike me as symbolic of the devilish ingenuity behind Soviet methods. First of all, there was the fact that this "special"technique for punishing former priests was employed in secret fashion, with the poor wretches being taken after dark to a central collecting point, then moved to a church for all-night labor. In the early morning, while the residents still slept, they would be moved back to their concentration camps. In that way the Soviet prevented any embarrassing expression of public sympathy by people who still might be "suffering from the religious germ." Yet, and this is the second point, we young *Komsomols* were shown the "secret."

The reason was obvious. We had not been infected by the "germ," and seeing such "just retribution" would make us all the more appreciative of the stern way enemies of the people are handled in the Soviet.

Yet, suddenly and inexplicably during the tour I experienced an intense sensation of shame and unhappiness at this brutal desecration of a religious setting. Just why I should feel that way bothered me at the time, but roots extending back to my grandmother's peaceful little church in the village of Semeon obviously hadn't been uprooted by the constant and clever anti-religion Soviet propaganda. Automatically, however, my training as a Young Communist suppressed any sentiments not in line with the established order. I was unwittingly schooling myself, even during that mental conflict in the church, for the day when a reputation for "silent loyalty" would place me in a position of such high trust that through my hands would pass most secret communications between the chief of Military Intelligence in the Soviet Embassy at Ottawa and Intelligence Headquarters in Moscow.

But the human mind cannot be completely controlled. Despite all efforts to efface the memory, a mental picture drawn during the church tour persisted—a picture worthy of a great artist's effort for incorporation in some famed collection of "Christian Martyrs." It rises from the grim answer given by the NKVD overseer when asked if these priests showed any signs of regretting their "foolishness"?

"Regret their foolishness?" he repeated. "These miserable creatures never learn. I often catch one praying over an icon from which he is washing the gilt. You'd think the knowledge that he is poisoning himself to death would give him more practical things to think about than mouthing rot over one of the images that brought him to this end!"

Thus these courageous men of God worked—and are likely still working in nonshowplace spots of Russia—at washing off gold from sacred church articles, gold later melted and sent abroad to pay agents, to purchase machinery, to be used for the building of a "happy and joyful life" in Soviet Russia.

At another time, Mr. Speaker, I shall want to say more about Igor Gouzenko. But at least here we have a sampling of what the alternative could be if the voting continues for more bailing out of the Communist world and less support for the defensive and offensive capability of the United States.●

TRIBUTE TO HON. JACK BRINKLEY AND HON. BO GINN

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. FOUNTAIN. Mr. Speaker, I would like to take a moment to pay appropriate tribute to two distinguished Members of of this legislative body, JACK BRINKLEY and BO GINN of the State of Georgia.

Being a resident of the State of North Carolina, a State which shares more than a common border with the State of Georgia, I have had the opportunity to work closely with both of these distinguished and dedicated public servants on a number of important issues. Indeed, I have often benefited from JACK'S and BO'S wisdom and knowledge of the broader national and international issues which we in the Congress must address.

JACK BRINKLEY has been an outstanding member of the House Armed Services Committee; and in that capacity, he has served with great ability as the chairman of that committee's vital Military Installations and Facilities Subcommittee.

When you couple his work there with his active role on the Veterans' Affairs Committee, it becomes obvious that JACK has been a key member in efforts to preserve and strengthen our defenses and our Nation as a whole. I have often gained needed insight into these and other issues through JACK'S wise counsel and advice.

BO GINN has also bestowed great honor upon his State and Nation through his diligent work on the crucial House Appropriations Committee, especially through his chairmanship of the important Military Construction Subcommittee.

Clearly, his experience and expertise in these and other areas will be sorely missed in the U.S. House of Representatives.

Mr. Speaker, I, along with our entire Nation, have benefited immensely from the admirable service rendered to America by both of these fine sons of Georgia. And I am especially honored and proud to be able to call both JACK and BO my friends.

Although both are leaving the Congress at the conclusion of the 97th session, I sincerely hope and trust that JACK and BO will continue to be active in public service. The Nation still needs their invaluable experience, dedication, ability, and integrity.●

REAGANOMICS

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. MOORHEAD. Mr. Speaker, I strongly believe in our Nation's future and that the problems we have can be solved. Ronald Reagan is doing an excellent job in attacking the problems that have led us to this point. The following letter is from an unemployed worker from my district, Mr. Raymond Roy Marshall, of Glendale, Calif.:

To the EDITOR:

There are some of you who, like a sick, wounded animal, bites and tears at a hand that tries to help. So you think you have the ultimate authority on passing negative judgment upon a President, just because you may be unemployed, had to sell belongings, and perhaps a house among other things? Well, Friend, I have been without a job for 13 months now, I've sold just about every saleable belonging, I am 44 years old and have never owned a house. So now you listen to my earned and merited judgment—"God Bless Ronald Reagan!"

America was like the Titanic II, heading inexorably to the iceberg of doom, and President Reagan had the guts, courage, and statesmanship to do the only thing that might deflect the ship in time, he had to detonate a violent, destructive, calculative-risk explosion to deflect our doomed ship. Yes, much of the forward section has been destroyed. Yes, the human carnage is high (myself included). Yes, water is coming into other areas of the ship. Yes, the ship may yet sink despite the President's valiant and courageous efforts to save us—repairwork that may take years, but work severely hampered by Americans who are selfish, greedy politicians, and/or those who are suffering from the intellectual disease, "Quick-fix Syndrome". God help us all.●

CAREER CRIMINAL LEGISLATION ADVANCES

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. WYDEN. Mr. Speaker, I would like to let my colleagues know that the House Judiciary Subcommittee on Crime yesterday marked up and re-

ported out a bill I introduced earlier this year, the Armed Robbery and Burglary Prevention Act of 1982 (H.R. 6386).

This legislation is almost identical to a Senate bill sponsored by Senator ARLEN SPECTER of Pennsylvania (S. 1688), a bill that passed the Senate by a vote of 93-1 just before the October recess.

Both bills would extend Federal criminal jurisdiction in a limited and carefully targeted manner by permitting Federal prosecution of an individual who has at least two prior felony robbery or burglary convictions and is then arrested and charged with a third robbery or burglary involving the use of a firearm. Conviction in Federal court would trigger a mandatory sentence of at least 15 years in a Federal penitentiary.

This legislation is designed to allow the Federal Government to lend a hand to beleagured local criminal justice officials by dealing swiftly and effectively with some of the very worst perpetrators of violent street crime. These career criminals are rational calculating professionals who know that local law enforcement resources are stretched to the limit and beyond.

If this legislation is enacted, these habitual offenders—a tiny percentage of the criminal population who commit an incredibly high percentage of the total number of crimes—will no longer be able to continue to thumb their noses at local officials and will no longer be able to rely on the revolving door of an overloaded local criminal justice system.

Instead, they will be put on notice that—if they insist on continuing a life of preying on innocent victims—they will face the very real possibility of spending 15 years in Federal prison.

Mr. Speaker, I would like to express my deepest respect and admiration for the assistance and cooperation provided by Congressman BILL HUGHES of New Jersey, who very ably guided this legislation through his Crime Subcommitte yesterday.

I feel that there is still a good chance to pass this legislation during the 97th Congress and I urge my colleagues to support it when the opportunity arises.

I think it is equally important for the Congress to pass the Justice Assistance Act before we adjourn. This legislation, which—under the able leadership of BILL HUGHES—passed the House by an overwhelming majority last February, will provide the financial assistance to local criminal justice systems that is so desperately needed.

This Congress still has an opportunity to do more than talk about the problem of violent crime. We should take advantage of that opportunity by making sure we don't go home until the career criminal bill and the justice assistance bill are both enacted into law.●

SHELL GAME ON SALARIES

HON. E. CLAY SHAW, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. SHAW. Mr. Speaker, I recently introduced legislation that would require a recorded vote each and every time we consider the issue of compensation for Members of Congress. In these days of budgetary crisis, the American public deserves no less from us. My own hometown newspaper, the Fort Lauderdale News and Sun Sentinel, has stated the case for putting the Congress on the record on this issue very clearly and succinctly. I urge all my colleagues to consider this editorial carefully as we debate the issue of pay raises during this "lame-duck" session of Congress.

CONGRESS READY TO PLAY SHELL GAME ON SALARIES

The shell game goes on. This time the Congressional pay raise pea has been hidden inside a resolution, passed when efforts to approve a final budget failed last October, that provides interim financing of government operations.

"Technical language" added to the money measure set a pay cap on federal salaries. A responsible move in difficult economic times, right? Not exactly. The resolution will expire on Dec. 17. Unless Congress votes otherwise the pay cap will expire with it, giving its members and all other federal employees a 4 percent cost-of-living raise.

That in itself might not be unreasonable but some experts in legalese believe the technical language in the resolution could produce unconscionable windfalls for judges and members of Congress.

They say expiration of the cap could mean implementation of several pay increases proposed over the last five years but never approved. Those abortive efforts add up to $16,638, a generous sum that would increase Congressional and judicial salaries to $77,300.

The best thing the taxpayers have going for them in this case is the established fact that the eagerness of federal legislators to raise their standard of living is almost matched by their reluctance to let their constituents know they voted themselves a higher wage. Whenever a salary scenario is met with a blast of public outrage those who put it together tend to back off.

Conveniently, the interim funding resolution expires six weeks after election day. Anybody voting for a salary increase wouldn't have to explain the move for at least two years.

The mere suggestion that anyone in Congress is contemplating a $16,000 present for those already at the top of the federal pay scale, however, should assure a broadside of protest heavy enough to rout the slickest of shell shifters.

There are signs, fortunately, that some of the more forthright members of Congress think it's time to quit playing games with the pay raise issue and thrash it out in open debate.

Leaders in both the House and Senate feel that previous attempts to slip salary increases through with "finesse" have harmed the image of Congress.

That's putting it delicately. With fringe benefits ranging from lucrative outside speaking fees to subsidized lunches, Congressmen should be able to stand up, state their pay raise case, and let the matter pass or fail on its merits.●

TRIBUTE TO CONGRESSMAN DON H. CLAUSEN

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ANNUNZIO. Mr. Speaker, it is a pleasure for me to join with my colleagues in paying tribute to the Honorable DON H. CLAUSEN, who has ably represented the people of the Second District of California in the U.S. House of Representatives for the last 20 years. His tireless efforts on behalf of his constituency, and on behalf of all of the citizens of this Nation, are both respected and admired, and are most worthy of recognition.

Before coming to the Congress, DON was a U.S. Navy pilot in World War II, and built a business career in banking, insurance, and professional aviation. He also distinguished himself in his 7 years of public service as a county supervisor and past-president of Del Norte County, Calif., and was very active in civic and community affairs.

Elected to the 88th Congress in a special election held on January 9, 1963, DON CLAUSEN has served in the Congress with diligence and distinction as the ranking minority member of the House Public Works and Transportation Committee, and as a member of the House Interior and Insular Affairs Committee. He also has compiled a record of outstanding achievement as the congressional adviser to the World Forestry Congress in Madrid, Spain, in 1966, and to the Pan-American Highway Congresses of 1967 and 1971 in Uruguay and Ecuador.

DON is a fine legislator, and a Congressman of compassion, courage, and patriotism, who has provided exemplary service to our beloved country. He will me missed by those of us in the House of Representatives who have had the pleasure of working with him.

I extend to DON CLAUSEN my best wishes for continued success in all of his future endeavors.●

A SPIRIT OF INTERNATIONAL FRIENDSHIP

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. STARK. Mr. Speaker, I would like my colleagues to take notice of the exemplary behavior of a young 13-year-old woman from my district, Helena Ann Weiss, a member of Temple Beth Shalom. In her own way Helena has promoted both a spirit of international friendship and an awareness for human rights, by sharing her Bat Mitzvah with 13-year-old Leah Lukatsky of the Soviet Union on December 4, 1982.

Leah and her family are like thousands of Soviet Jews, who have been refused permission to emigrate from the Soviet Union. It is even more disheartening to know that Leah was unable to have her own Bat Mitzvah, because the study of religion is not permitted in the Soviet Union.

In the United States, we often take for granted the many freedoms we enjoy everyday. However, the commendable actions of Helena Ann Weiss make us aware that not all people are blessed with this same fortune, and thus, America must stand firm in its commitment for the advancement of human rights in the world. Thank you Helena Ann Weiss and Leah Lukatsky. I wish you both the best of luck.●

HON. SHIRLEY CHISHOLM

HON. SAMUEL S. STRATTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. STRATTON. Mr. Speaker, because of the lateness of the hour when the House adjourned last evening, I found it impossible to remain on hand to participate, personally, as I had planned, with the gentlewoman from New York, Ms. FERRARO, and the gentleman from New York, Mr. RANGEL, to pay my tribute to our esteemed colleague from New York, SHIRLEY CHISHOLM, who will—unfortunately for this House—be retiring from Congress at the end of this 97th Congress.

In the 14 years that Congresswoman CHISHOLM has served as a Member of this House she has indeed made a profound change, not only in the Congress of the United States, but also in the country as a whole. Rarely, if ever, has a single Member of the House had such a profound impact on her Nation.

I can clearly remember the shock that fell over the House when SHIRLEY CHISHOLM rose in early 1969 to repudiate the decision of the Democratic Committee on Committees to place her, a Representative of an inner city district in Brooklyn with a myriad of desperate social problems to solve, on the Agriculture Committee.

This was something no other woman, or any man for that matter, had ever dared to do. But SHIRLEY, with her eloquence and the strength of her arguments won the day. And within 24 hours she was moved to the Veterans Committee—and over the past decade has been a senior member of the all-important Committee on Rules—where her vigorous and often firey defense of her beliefs is still visible, as I myself can attest when a month or so ago I had occasion to testify before the Rules Committee on a bill relating to the disposal of nuclear wastes.

But SHIRLEY was far more than a Congresswoman here, excellent as she was. She was destined to be a national leader, and in pursuit of her ideals she traveled the length and breadth of this Nation in response to requests for her to speak. I can remember running into SHIRLEY in the Albany airport in my home district on several occasions where she had come to make a speech or receive an honorary degree. And I had not even known about it.

With that national appeal of hers it was of course very natural indeed that she should have become a candidate for President of the United States in 1972. Not only was she the first woman to seek the Presidency in a major party; but she was also the first black person to run for President in a major party. And, as those of us who knew her, and worked with her during that long and exciting year, she was most certainly a deadly serious candidate.

She did not win the nomination; but her candidacy helped to transform the Nation which had never before seen or heard such an intelligent, self-confident, articulate, and dedicated person—man or woman, black or white. SHIRLEY CHISHOLM had become a national institution. In a very real sense she belonged to the Nation.

Yet she came back home again to the House of Representatives. She became a leader in the House, and her dynamism transformed the House as the Black Caucus, which she helped to found, made an increasing impact on the programs and performance of the House.

It was almost like living with a political hurricane, for those of us who served with SHIRLEY and we in New York were proud to have her as a part of our delegation.

Even though she is stepping down now from the responsibilities of a Member of Congress she will be continuing work for what she has always believed in.

We in this House, Mr. Speaker, will certainly miss SHIRLEY CHISHOLM, but we will always be proud to have served with her. We will remember her brilliance, and her very warm courtesy and generosity. All of us wish SHIRLEY a continued opportunity to continue the historic transformation she has brought about in her country. She has done much, but I know she still hopes to be able to do even more. And we know she will.●

ESTABLISH A NATIONAL LOTTERY

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mrs. COLLINS of Illinois. Mr. Speaker, the social security system is about to go broke. Congress must produce the minimum amount needed to insure that an estimated 32 million beneficiaries will receive retirement checks after next July. Consequently, in an effort to provide one new source of revenue for the system, I am today introducing legislation establishing a national lottery to assist in financing the old age, survivors, and disability insurance program.

At a time when it is incumbent upon Congress to present innovative ways to produce additional funds for the social security system, a national lottery can help to assure the continued solvency of the system.

Under my bill, a National Lottery Commission would administer an annual lottery. Sales would be through lottery tickets in States permitting this within their borders. A State's own lottery would not be overridden by the enactment of a Federal lottery. At least 40 percent of revenues received from the operation of the lottery would be placed in OASI and DI funds. The total amount of prizes paid to winners would be not less than 40 percent of lottery revenues and prizes would be tax free.

I choose to introduce this measure after looking at the operation of some 15 State lotteries presently operating, including my own State of Illinois, which generated $334 million in total sales in fiscal year 1982. It is highly conceivable then, with 153 million people over age 21 in the United States contributing to a national lottery system, this source of revenue could become a prime factor in rescuing this fund. In addition, such a national operation would be honest, supervised, and bring about reduction in illegal gambling.

In this time of desperately short revenues, I believe this measure should receive the support of my colleagues and welcome their cosponsorship.●

COMMEMORATING INTERNATIONAL HUMAN RIGHTS DAY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. BONKER. Mr. Speaker, December 10 marks the 34th anniversary of the U.N. General Assembly's unanimous adoption of the Universal declaration of Human Rights. The preamble of the universal declaration states: "Recognition of the inherent dignity of the equal and inalienable rights of all members of the human family is the foundation of freedom justice, and peace in the world." The declaration recognizes that "it is essential, if man is not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law." The observance of International Human Rights Day is an appropriate time for Americans to reflect on whether the high standards the world community adopted in 1948 are reflected in this country's foreign policy.

The Congress, in a series of amendments to the Foreign Assistance Act, formulated a human rights policy because past administrations have not exercised sufficient influence to encourage the promotion of human rights. This support of human rights in the Congress is bipartisan. Human rights is a valuable foreign policy asset and is compatible with this country's long tradition of and commitment to individual rights. Time and time again, the Congress has insisted that human rights ought to be an integral part of this country's foreign policy.

Regrettably, the facts are that this administration's record is one of selective emphasis of human rights standards and circumventing, if not downgrading, human rights laws at every opportunity. It has consistently violated section 502B of the Foreign Assistance Act, which prohibits U.S. military assistance to governments which violate human rights, by sending such governments millions of dollars of security assistance. Congress enacted section 701 of the International Financial Institutions Act in order to direct the executive branch to oppose loans in the multilateral development banks to governments which are guilty of a consistent pattern of gross violations of human rights. But the Reagan administration has only voted against a handful of these loans. Ignoring serious human rights problems all over the globe, the United States has supported multilateral development bank loans to such violators as Korea, Argentina, Chile, the Philippines, Uruguay, Paraguay, Zaire, Indonesia, Uganda, and Pakistan. Just recently, the State Department announced its intention to vote for an $18 million Inter-American Development Bank loan to the Government of Guatemala, which has been charged with the massacre of thousands of helpless Indian men, women, and children.

In these and other cases, the administration has bolstered corrupt and repressive governments in Asia, Latin America, and Africa through increased diplomatic contacts and foreign assistance.

Juxtapose the Reagan administration's record on human rights in the non-Communist world with its record toward Communist countries, an obvious double standard evolves. Under the able leadership of Max Kampelman, strong U.S. concern has been demonstrated about continuing Soviet violations of the Helsinki accords. Recently, Elliott Abrams, the State Department's Assistant Secretary for Human Rights and Humanitarian Affairs, led a mission to Romania where he firmly conveyed to the Romanian authorities American concerns about continued restrictions on emigration. U.S. Ambassador to the United Nations, Jeanne Kirkpatrick has consistently criticized human rights violations in Cuba and Nicaragua.

The Reagan administration should be praised for these initiatives. But, to be credible our human rights policy must be consistent. Violations by Communist and non-Communist countries must be equally condemned. Violations of human rights in Guatemala, Taiwan, the Philippines, Chile, China, Kampuchea, West Bank, and Gaza Strip, and in South Africa should be condemned as forcefully as this administration condemns repression in Poland. If it were "inadmissible to acquire territory by war" in the Falklands or in Afghanistan, then the same standard must be applied to acquisition of territory by war in Lebanon and acquisition of territory by war in Iran.

The Reagan administration's human rights policy is not without some accomplishments. The Bureau of Human Rights and Humanitarian Affairs has been revitalized and staffed with conscientious and able officers.

They have confronted other State Department bureaus on the issues of military assistance and U.S. votes in the multilateral development banks, and have on occasion opposed the Commerce Department on the question of exporting crime control equipment to repressive regimes. Top administration officials have strongly stressed human rights concerns in Romania, El Salvador, South Korea, and the Soviet Union.

Members of Congress and the executive branch may disagree on specific human rights policies and tactics. However, all people of good will should work together for the common goal that is explicit in the Universal Declaration of Human Rights: The elimination of torture, extralegal executions, imprisonment without trial, and repression of basic civil and political rights.

The Reagan administration should use every political and diplomatic opportunity—public and private—to incorporate human rights concerns into the conduct of U.S. foreign policy. We in the Congress will continue to insure that the State Department complies fully with human rights laws. It is my hope and expectation that we will see increased cooperation between the executive and legislative branches in supporting international standards of human rights, as well as the brave people who promote them around the world.●

SHIRLEY CHISHOLM

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. RUSSO. Mr. Speaker, I have the greatest respect and admiration for Representative SHIRLEY CHISHOLM. With her retirement the Congress is losing one of its finest Members. She is wise, she is good and she has always spoken with the conviction and the honesty and the clarity that come from being honest with yourself and courageous in your beliefs.

There is a thoroughness, a sort of completion to Mrs. CHISHOLM that you feel is reflected in her work. She is always prepared, she always knows what she is about. Her district has been well represented. But it is also the nation that has been well-served, that has had the most eloquent of people speaking in behalf of those of its citizens unable to speak for themselves—the poor, the disadvantaged, the undereducated. She has been the most inspirational of leaders in articulating the human values of this country, reminding us of our consciences.

I can think of no greater teacher than Mrs. CHISHOLM, and if we must lose her talents here, we can take comfort in the fact that young people are going to be learning from a most wise master. She is a lady possessed of a loving heart and, as Dickens said, that is surely the truest wisdom.●

MR. KINGDON HARVEY

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mrs. SNOWE. Mr. Speaker, I want to take this opportunity to pay tribute to Mr. Kingdon Harvey, a retired editor of the Maine weekly, the Fort

Fairfield Review. Mr. Harvey's distinguished career of 52 years has been and continues to be dedicated to creative and forthright journalism.

It gives me great pleasure to share with my colleagues this article written about Mr. Harvey and recently printed in the University of Maine Alumnus magazine recognizing him for his great contribution to Maine journalism.

[From the Maine Alumnus]

MR. KINGDON HARVEY

(By Richard W. Sprague '51)

The weekly newspaper may be diminished from what it was in American journalism, but it's still a powerful force in shaping public opinion and influencing the source of events in thousands of American small towns. There are surely more exciting areas of journalism, but none, perhaps, where an editor can better savor the direct relationship between what he does every week and its impact on the communty.

The Maine weekly has changed considerable in the past 25 years from sovereign, one-editor shops to large operations often owned by larger interests. That's not to say that things have changed for the worse; there's a new professionalism in the modern weekly and a competence that may have been missing in the old days. But the Maine weekly of 1982 seems somehow to lack the color and character of, say, John Gould's Lisbon Falls Enterprise, or the fire of Jerry White's Eastport Sentinel.

There are still a few people who know the traditional art of personal weekly journalism. They stand like old pines towering above the skyline, often battered by the elements, but sturdy enough to endure the punishment. Aroostook County has its own resident curmudgeon and gadfly in Kingdon Harvey '30, former editor of the Fort Fairfield Review, a weekly.

Harvey retired in 1980 and turned the editorship over to his son, Tom, who graduated from UMO in 1964.

Not even his close friends would describe Kingdon Harvey as a benevolent man. A quality of personal warmth notwithstanding, the 52 years he spent behind the huge rolltop desk as editor, printer, office manager, linotype operator, pressman and general factotum have endowed him with the friendly disposition of a grizzly bear.

He is firmly dedicated to the belief that anything that can happen, will happen and that if you expect it, you won't be surprised or unhappy. It's a philosophy that's made him a crackerjack newspaperman. It has made him a host of enemies among bureaucrats, politicians, corporate types and not a few of his colleagues. But it has also gotten him a few close friends and earned him the respect of a lot of people far removed from the Review's circulation area.

In fact, the Review, with a circulation of only 2,300, occupies a position in Maine journalism far out of proportion to its size. The prestige is the direct result of generations of blunt honesty, a propensity to hurl darts at the powerful, the corrupt and the officious and Harvey's total indifference to any opinion anyone might hold of him.

In appearance, Kingdon Harvey fits his image. His towering forehead and fierce eyes give the impression that he has been well-named. He worked in an incredibly cluttered office dominated by the rolltop desk used by his father, Chandler Cushman Harvey, when he was editor, a battered leather couch and dozens of photographs. Tom has the deadlines now, so Kingdon Harvey can talk leisurely about his career. He comes across as a witty and urbane man of great personal warmth.

His particular delight is politics and politicians and if he can ever be said to become expansive, it's when he speaks of them. If there's anything that pleased him more than to catch a government agency with its soiled laundry exposed, it was a good political battle.

His prominent targets, often dismissed his pen because of the relative insignificance of the Review, or gave battle. Either course was a mistake. The Review was Kingdon Harvey and had clout out of proportion to its size. Doing battle with the Terror of Fort Fairfield was a lot like hand-to-hand combat with a porcupine.

"I guess the most fun I ever had," he muses, wreathed in the smoke of the rank cigars he favors, "was in the primary fight the year Fred Payne ran against Owen Brewster for the Senate. The Bangor Commercial, the Eastport Sentinel and the Review helped tip the scales a little in that election. I guess I've known every governor personally since Brewster in 1925. Burt Cross threatened to sue me for libel once."

The principal vehicle for his arrows is the TOM E. ROTT column he still writes which is the feature most Review readers turn to first. It's a composite of his sharp wit, folksy news and frequent backhanders at his adversaries. That list currently includes certain of Fort Fairfield's town council who have excluded him from parts of their sessions, the U.S. Weather Service (the "Whether" Bureau, in the Harvey vernacular), the Postal Service and, occasionally, the telephone company and the railroad.

In the halcyon days of railroad monopoly and Populism, the railroad once sued Harvey's father for libel—an action, happily, railroad officials lost.

In his column, Harvey has tilted with such adversaries as former Senator Margaret Chase Smith and the Bangor Daily News. He once wrote that "it has been reported that Senator Brewster owns a substantial share of stock in the News," a paragraph that brought an indignant denial from the publisher threatening a libel suit if that paper lost circulation as a result of the report. Delighted, Harvey promptly shot off a letter to the publisher explaining that he understood why the paper might lose circulation from such a report, "but," he wrote, "don't you think you ought to cut me in for a share of any increase that results from your denial?"

He can also get a chuckle out of the times the adversary has drawn blood in exchange. After an editorial appeared about Gov. Burton Cross, Harvey met the Governor at a social function. Never a man to be uncivilized, he went out of his way to shake hands with the official.

To make conversation, Harvey added with a grin, "I was by your place the other day but I couldn't stop."

The Governor faced him with a cold eye and replied: "Thanks."

Harvey doesn't exactly treasure the memory, but he can laugh about it.

He'll go to the wall for a cause he believes in, no matter what it costs him or anyone else. He was loudly critical of the handling of the Cyrus Everett and Donna Mauch murders in Fort Fairfield in 1967. He published the names and death date of the victims each week for two years (the killings are still listed as unsolved).

His detractors have suggested that his pen is more vitriolic than just. Some label his paper the Fort Fairfield Revenge, and it's probably accurate to say that no one could describe his crusading as restrained. But even his enemies accord him a grudging respect for his blunt, lay-it-on-the-line honesty and his willingness to give anyone a chance to reply in the columns of the Review.

Harvey got into the newspaper business after studying journalism at the University of Maine, when he went to work for his father.

"1930 was a big year for me," he says chuckling, "I graduated from the University, married Erm and went to work for Dad."

It was a different world that Kingdon Harvey entered from what confronts his son today. There was little radio, no television; in short, no competition for either the advertising dollar or the news story.

"You could sit on a story for six days if you had to," he says. "We had as many as ten people working here and put out a 12-page paper every week."

When his father died in 1940, Harvey became editor and worked for his mother until her death in 1957. Only once, he remembers, did his mother ever question one of her son's decisions. During the time that he had turned his editorial needle on Senator Smith, Maine's senator cancelled her subscription "for economy reasons." Mrs. Harvey, an admirer of the Senator, asked that Smith continue to receive the paper, a request that Harvey continued until his mother's death.

During lean years and in the times when printers, the most nomadic of artisans, would leave at awkward times. Harvey spent as much time on the linotype machine and the press as he did writing for his paper. Once, he recalls, he spent 33 consecutive hours in the shop without leaving. but when urban renewal came to downtown Fort Fairfield and claimed his plant in 1971, Harvey sold the machinery on which he'd spent so much of his life and paid a modern offset plant in Presque Isle to print his newspaper.

"The only machinery I had left was a typewriter," he laughs, "Sometimes I looked at my hands and said to myslef, 'Harvey, you can't be working with hands clean as that.' But after working with letterpress for 41 years, offset was sheer magic to me."

When his wife, a gentle woman of intelligence and wit, died in 1974, some of the Harvey fire went out. For a lifetime, Erm Harvey's grace and beauty had taken much of the sting from her husband's blunt ways.

A lesser man (". . . . marrying Ern was the best thing that ever happened to me . . . ") might not have been straightened his back after such a blow. But Harvey, with bulldog determination, began to pick up the pieces of his life doing the only thing he loved . . . newspapering.

At 74, weathered slightly and battle-scarred, but still spare and straight, Kingdon Harvey looks back without regrets on a career in weekly journalism that spans 52 years. He had been a columnist for a daily newspaper as well as a radio announcer. He cannot remember the last time he had a vacation. It's a good thing, as he points out, it's so much fun because it's such damned hard work.

Is this crusty and proud man a latterday Don Quixote tilting at windmills? Is it all sound and fury and drudgery—as some regard weekly journalism—without much meaning? Or is this really where what's important and enduring in our country is happening?

A man who lives far from Aroostook County and who has never met Harvey answered the question this way: "I don't know the fella. I read his paper. I didn't always agree with him but he had guts. I wish there were a whole lot more like him."

Kingdon Harvey is an individualist in an age that gives lip service to the notion, but hates it in practice; even the rebels wear uniforms of depressingly similar cut and speak the same lines.

He is a splendid anachronism in an era of structured knowledge and stylized behavior. If he were younger, his survival odds would be a little lower than those of a saber-toothed tiger. But society senses a fading in the fierce, green eyes and is willing to indulge the aging warrior. We should cherish the Kingdon Harveys of the world. They add character and zest to our lives.

And there are never enough of them.●

RON MOTTL

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. YATRON. Mr. Speaker, I would like to take this opportunity to pay tribute to a good friend and fine Member of Congress, RON MOTTL.

Since RON MOTTL arrived in Congress 8 years ago, he has distinguished himself as a very effective, capable, and talented legislator. He is widely known and respected in the House for his outstanding service to his district, State, and country.

As chairman of the House Veterans Affairs Subcommittee on Hospitals and Health Care, RON MOTTL demonstrated a unique capacity for compassion for those who served this Nation in the Armed Forces. He has not forgotten the men and women who sacrificed for their country and answered the call of duty.

Congressman MOTTL was also deeply concerned about the energy problems of the United States, as was evidenced by his activity on the Committee on Energy and Commerce. He was very involved in developing long-range energy policies so that our country would not be vulnerable to another oil boycott. Providing an abundant and affordable supply of energy for the consumer was an overriding concern to him.

Indeed, RON MOTTL is a sincere and dedicated public servant who always gives his very best, whether it is on the athletic field or in service to his country.

We will truly miss RON MOTTL in the House; but his leadership and devotion to public service will long be remembered by those who served with him. I want to wish him the very best in all of his future endeavors.●

EXPERIMENTAL GROUP YOUNG PEOPLE'S THEATRE

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. DELLUMS. Mr. Speaker, I take this opportunity to commend an organization located within the Eighth California Congressional District for providing an extraordinary cultural service to the local community. This group is known affectionately in our community as EGYPT—an acronym for Experimental Group Young People's Theatre. EGYPT is a community based, nonprofit organization which is dedicated to developing the creative talents of our young people, and to enhancing the cultural lives of East Bay residents through innovative programs in the performing arts. The activities are offered to the community at a nominal fee, thereby providing opportunities in an area and to a community which has largely lacked effective access to cultural experience.

In past years, EGYPT was sustained through the generous support of private foundations, including the San Francisco Foundation, the W. A. Gerbode Foundation, the East Bay Community Foundation, the Alameda County Neighborhood Arts program, and the Oakland Parks and Recreation program. Additionally, it received very valuable assistance from the CETA title VI program.

The founding director of EGYPT is Ms. Minnie Gibson, herself a talented performing artist, and above all, a person who has demonstrated a remarkable commitment to the cultural health and viability of the Oakland community. Ms. Gibson has expressed the aim of EGYPT as being "a forum for expression in the performing arts and an effort to provide a continuing service to those who wish to become professionals in this field." With so great a reservoir of generally undirected talent in our urban communities, and with so great a need for the cultural enrichment that improves immeasurably the quality of all our lives, we can only commend Ms. Gibson and EGYPT, and wish them outstanding future success.●

AIRBORNE GOES TO RUSSIA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. McDONALD. Mr. Speaker, it is high time that this body takes a very serious look at the full implication in not supporting a very necessary update of the defensive and offensive posture of these United States.

Is it strange or is it a coincidence that the same Members of this body that vote for extending credit of our hard-earned dollars to the Soviet Union and other slave labor bodies of land are the same ones who will not vote for the defense of this Nation? And with that vote goes the technology, the food, and all else that ultimately leads to the death of free peoples all over the world. Proof? Was it a PLO machinegun that perpetrated the massacre at Munich a few years back? No, it came from the Soviet Union and was made by workers who were and still are being fed with U.S. wheat.

Go a step further and you will find the trucks, tanks, and computer technology from the United States to the Soviet Union that bled Americans to death in Korea and Vietnam, and it is this same technology that shot down our airmen, now missing still from both Korea and Vietnam.

Those Members of this body who support the American labor movement are the same who vote to continue this aid behind the Soviet and Bamboo Iron Curtains. Why do not these same Members tell their labor following that it is slave labor that competes and puts them out of a job.

For the benefit of this body, I have gathered some very hardcore and irrefutable facts that should convince fellow Members that if the adage holds true that charity begins at home, we had better start looking at reality.

I realize that many multinational companies benefit most from the stability and profit from slave-labor economies. David Rockefeller has as much as admitted that fact. But let us ask a realistic question. Could we not afford an adequate defense and much more, and take care of our own, if we cut off this spigot to the Soviet Empire? There is no such thing as Soviet technology, it is totally free world technology.

And that brings me down to the reality of the Soviet Union. Is all the chatter from whatever quarter ever going to result in peace in the world? For the answer to that, and for the benefit of my colleagues I would like to begin by calling on very current testimony of what is going on in the Soviet Union.

In September of 1982, former paratroopers from World War II went to the Soviet Union. These men truly know the significance of the inscription found in green beret camps and other areas of Southeast Asia: "You have never lived, 'till you've almost died; for those who fight for it, life has a flavor—the protected will never know." These men of the airborne who went to Russia once considered the Russians their allies. They had fought in such famous places as Bas-

togne. German soldiers called them: "Devils in baggy pants."

So let me now introduce their observations on reality in the Soviet Union, and I shall present more to convince my colleagues that our defense posture update is a must. The Static Line—airborne monthly newspaper—issue of November 1982 follows:

AIRBORNE GOES TO RUSSIA

(By Jack Kennelly)

Sept. 18, 1982 was a redletter day for 87 friends, families, and members of Airborne divisions who headed for Moscow, Leningrad and Volgograd, (formerly Stalingrad). Airborne units represented were the 11th, 17th, 82nd, and 101st divisions; 517, 551 & 555 P.I.R.'s and Canada.

In order for this writer to effectively relate the experiences, emotions and vignettes of this most memorable trip, we must bear in mind: "It is in the eye of the beholder." Each member of the group most probably saw these events, a little differently; however, I will do my best to depict and convey to you the general "over-all" feelings of the group.

Russia can best be described as very large, exciting—exasperating, dynamic, dull, entertaining, boring, informative and yet completely removed. If this sounds contradictory, then that is exactly correct.

From the moment we were met by Lt. Gen. Lesof, commander of Russian Airborne Units, until we left Leningrad, we were indoctrinated with the theme: "Peace and Trust." At each meeting, the speakers, each and everyone, told us of the heroic deeds of the Russian military and civilians and how their quest for peace and trust with America is their top priority. Listening to all of these speakers, one quickly realized the Russians won the war and America was very tardy in their involvement. If any of our group swallowed this line, then I have a bridge to sell them.

Speakers ranged from a Col Gen (3 star) to women WW II veterans and each and every speech was the same. "We want peace with America and what can we do to gain their trust?" I said Russia was contradictory; let me explain. They say they want peace; yet, 12 year olds on up are in uniform. Streets are named for war victories or other military events; cities are designated "Hero" cities; all points of interest they showed us were war monuments, war cemeteries, tombs of unknown soldiers and shrines, showing the glory of war, its struggles and hardships; such as the Kremlin, Red Square, the "great battle" Planetarium In Volgograd. Not once did they mention "Lend Lease," for without the tanks, guns and equipment the U.S. sent them, the Germans would have eliminated the Russians as a world power. They downgraded and expressed contempt for Reagan, Carter and Truman, while praising Roosevelt for the Yalta Treaty. They showed us the Russian Armed Forces museum, yet conveniently and purposely did not show us the room containing the remnants of Gary Powers U-2 plane. Sam Calhoun of the 17th found this room and showed it to some of the other members of our group. Can you imagine the story they are telling Communist Bloc tourists when they show this room? You can bet they aren't saying we had one of their spies, Coabel, in the Atlanta penitentiary at the time of the "Powers Incident."

Contradictory even in religion. The Russians have preserved the great churches since the 12th century. They are gorgeous, depicting the resurrection and many more historic Biblical scenes, yet Russia today is basically a nation of non-believers. You are allowed to bring in your personal possessions, one and one only religious picture, and no religious literature.

Contradictory in Education and Communications, yes, to a very great degree. Their education system is free and excellent for the knowledge they (the committee) decides is good for the people. The only education and communication outside the Commie block is negative information. Any strikes, failures, crime or recession are force fed to the populace; all of the magnificent benefits of a democracy are not mentioned.

Contradictory in their way of life, absolutely! No homes in the cities, only large apartment complexes. The apartments the Russians consider "modern" is archaic by our standards. Automobiles for the common man is unheard of. As your "station" in the system is upgraded, you then can apply for an auto. Again the committee must decide if you are eligible. At some future date, from one to two years, they will inform you your car is ready. You must pay cash. No credit in Russia. The ruble is only valid in Russia. The average good salary is 180 Rubles a month, equal to approx. $300.00 American dollars. Generally, there are two working in the family, so $600.00 is the normal good pay for a family. Education, medical, dental and schooling are free; housing, including utilities, costs between 4 to 5 percent of your salaries. Transportation from 5 to 10¢ American money for each trip, with unlimited transfers. Moscow has excellent transportation, subways, busses, trains, street cars and trackless trolleys. Very few cars, taxies, bicycles and motorcycles. Food and clothing are very expensive. Televisions and other like equipment are also very expensive. A very crude 19" set $1,000.00 American dollars. Vodka is twice the price we pay in America. There is very little paper products, so the bread, pastries, meats, cheeses and all food are unwrapped. If you don't have your own bag (generally a mesh material), you carry the food in your hands or under your arms. Food and drug laws are non-existant. Very little, if any refrigeration. It equals America in the early 1900's.

Our trip was so orchestrated and so contribed that no matter which museum or monument we were visiting, we always traveled the same streets. They have a valid reason for this; because if you venture one or two blocks off of these streets, you will see the real Russia. Extreme poverty, the tiny apartments with clotheslines strung across the living room, the absence of air-conditioning units, the frustrated faces and a real insight into a nation that had to build a wall, not to keep people out, but to keep people in! No visitation allowed from East to West. All communications eliminated or strictly censored; you must be 60 or over and unable to walk to receive permission to go from East to West. Yes, fellow Troopers, a complete society in modern day Slavery.

Let me tell you about some of our group, the greatest and easiest to handle touring group ever. You just can't beat Airborne people. Over 50 of the group were members or family of the 17th. Joe Quade, was the Coordinator, along with Bernie Larkin of Galaxy Tours. Bernie is Airborne and a Trooper. A large bouquet is due these two gentlemen for a job exceedingly well done. Joe Beyrle of the 101st was the most honored trooper in the group. As he escaped from a German prison camp and fought with the Russians. Young John Beyrle also was in the group and John was our un-official interpreter as he works for Voice of America. Adam Broussard became sick in West Berlin and stayed a few days in the hospital, but is now home and doing well awaiting an operation.

Beverly Calhoun, wife 17th Abn. Pres. Sam was nicknamed BBC, Beverly "Badges" Calhoun because of all the badges, medals and pins worn on her jacket. The melodic tenor of Phil Carney was enjoyed by all. Mike Epstein of the 82nd was our "Platoon Leader" and "Drill Instructor" at the various military functions. Who will forget Bob Friborg called the "Battlinig Judge" from Oakland, CA. Two hoodlums could not knock him off his feet in a "mug attempt" despite 22 stitches in his head. Bob was 69 at the time and a Municipal Judge in Oakland. Bob is a member of the 17th and ex Aide-de-Camp to Gen. Ridgway. Katie Friborg effectively represented the Airborne women, while seated on the dais or at the head table. Everett Jackson of the 82nd showing his contempt for the propaganda dispelled meeting after meeting. Correctly so, as Everett was a prisoner in Communist Cuba for 12 years. Jack & Jane Kennelly, celebrating their 38th wedding anniversary in Volvograd. Joe Sequim 17th, guarding and finally getting home his "Brass Tuba." Clyde Sponanberg remembered for his quick wit and humor to keep everyone loose. Jim Bain, 517th, the Ambassador of Goodwill and should be a member of the State Dept. Dirk Strikwerda and family, a play on words, but a most striking family. Jesse Mayes, 555st showing a dislike for python snakes at the circus. Erwin Story, 555th, from W. Berlin, spending $2,000.00 extra to get home because of the disgraceful behavior of the Custom Agent in East Germany. Ed & Mary Siergiej, 17th Abn, just delightful traveling companions. Tom Waller, 551st, deadringer for Roy Acuff. Yes, Tom is from Nashville. Charles Worrilow, 17th Abn, bad leg and all, always cheerful and a source of energy for the rest of us. The group, what a marvelous party to be with. Troopers, wives, widow, children and friends, a tremendous and revealing experience.

In closing, let me sum up my feelings of Russia by quoting a line from a Sunday Radio Show in 1940. I have never forgotten this because at the time it was debatable whether the US should be an Ally of Russia. Monseignor Sheen ended his program on that Sunday with these words: Beware of Russia, she walks like a bear, but crawls like a snake.

These are still valid words in 1982.●

UNFAIR ADVANTAGES OF SUBSIDIZED TRADE

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. BEREUTER. Mr. Speaker, while congressional delegate to the recent GATT Ministerial Conference in Europe, it become even more clear to me that the European Community is in the process of making a major trade policy shift. No longer does it just have high barriers to protect its farmers, it has now begun to aggres-

sively expand its agricultural production specifically for export. While our American producers can certainly compete for international sales in even a relatively free market, they cannot compete with European producers who enjoy the unfair advantages of grossly subsidized trade.

Nowhere has the European Community subsidy policy had a more devastating effect than upon our domestic egg and broiler industry. I recently learned of an American egg producer who had lost a customer in Japan because he could not compete with a French producer who was being subsidized at the rate of 16 cents per pound of frozen egg yolk by the French Government. The standard subsidy on eggs from the European Community is 11½ cents per dozen. And the European Community has clearly signaled its intention to continue to expand production and unfairly subsidize its exports. Chick placement in France was increased by 50 percent in just 2 months recently.

Mr. Speaker, I cannot overemphasize the impact of these policies upon our domestic producers, and had we been permitted 1-minute speeches today I would have urged my colleagues to take note of the rally planned for 1:30 this afternoon, on the west steps of the Capitol, to address this topic.●

KAUAI IS THE PLACE TO BE

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. AKAKA. Mr. Speaker, as you know, the island of Kauai lies in my district. Known as the Garden Isle, Kauai is one of the most beautiful places in the world. The north shore is sprinkled with a host of perfect beaches, sugar and pineapple fields and a variety of unusual churches. On the south shore of the island lies majestic Waimea Canyon—Kauai's own Grand Canyon of the Pacific. The view from the Na Pali Coast is truly breathtaking—this is a spot where emerald cliffs plunge over 4,000 feet to meet the crashing surf below. Indeed, the Garden Isle is a lost world of breathtaking beauty.

On November 24, 1982, Hurricane Iwa smashed into the island of Kauai with winds of over 100 miles an hour, causing millions of dollars of damage. As you know from the news reports, Hurricane Iwa was not kind to our island.

In the wake of Iwa, many people decided to change their holiday plans and cancel their scheduled trip to Kauai. I just want to let my colleagues know that our tourist industry remains unaffected by the hurricane * * * on Kauai, all hotels and facilities are operating normally, the beaches are in fine shape and the climate is still one of the best in the world, with warm sunny days and clear balmy evenings. Kauai is still a jewel of the Pacific, and her people still carry that world famous spirit of aloha in their hearts. In fact, Hurricane Iwa has brought the people of Kauai closer together, as they work to clear farmland of debris and rebuild fences.

With the arrival of winter weather in Washington, I urge my colleagues to spread the word that Kauai is the place to be * * * now and in 1983.●

PENSION BUILDING CENTENNIAL

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. CLINGER. Mr. Speaker, I rise to call the attention of my colleagues to a significant anniversary and a significant new beginning. On November 18, 1982 hundreds of well-wishers gathered in the Great Hall of the old Pension Building to celebrate the 100th anniversary of the groundbreaking of that historic landmark and to mark its rebirth as the home of the National Building Museum. A joint Federal/private organization mandated by an act of Congress in 1980, the museum is the Nation's first institution to be devoted solely to celebrating the past achievements of our Nation's building industry as well as providing a central focus where all segments of the industry may come, to try together to solve the problems of creating a fit and just built environment for all of our citizens.

In the unique arrangement under which the new institution operates, the old Pension Building is made available free of charge by the Government which also assumes the cost of its repair, renovation, and maintenance. In turn the private not-for-profit corporation operating the museum raises the money for its staff salaries and program costs from the private sector.

The Pension Building is a historic Washington landmark built in 1882 by Gen. Montgomery C. Meigs of the Army Corps of Engineers to house the then rapidly expanding clerical staff needed to process veterans' benefits. Meigs created what was in its time a revolutionary office building by introducing energy efficient design elements that filled its interior rooms with natural light and fresh air. He wanted, he said, "no dark corners in the building and no ill ventilated rooms." In so doing Meigs also created a vast courtyard that has been called the most impressive interior space in America.

Hailing the inception of the museum at the celebration were representatives of the two most intimately related governmental departments, the General Services Administration and the Department of the Interior. Gerald P. Carmen expressed the "delight and honor of GSA in making the historic Federal building available for what we feel to be an appropriate purpose as an exciting new national museum." As a symbol of the change of mission of the building, the sign denoting the historic structure as the Pension Building was transferred by the Administrator to David M. Childs, president of NBM's board of directors. In response, Mr. Childs unveiled a new sign for the building identifying it as the National Building Museum.

Following Mr. Carmen's remarks, Manus J. Fish, representing the Secretary of the Interior spoke. As the third party to the tripartite agreement called for by the 1980 legislation, the Interior Department is called upon to support the museum with up to $500,000 per year for its contributions to the area of architectural preservation. As a part of his remarks, Mr. Fish delivered the following message from Secretary Watt saying:

> We are pleased to be a part of this federal/private partnership that enables us to both preserve the magnificant and historic Pension Building and provide a national showcase for all that is excellent in America's building industry.

In a proclamation citing the past significance of the building as a landmark and its emergence now as a new museum for the citizens of the District of Columbia, Mayor Marion S. Barry, Jr., declared November 18, 1982, as "National Building Museum Day."

Citing NEA's past and present support of NBM, Frank S. M. Hodsoll, Chairman of the National Endowment for the Arts, stated that:

> We at NEA are pleased to begin to reap the benefits of the seed money which enabled NBM to be born.

Roger Kennedy, director of the Smithsonian's National Museum of American History, welcomed this new addition to America's impressive array of national cultural institutions and John Agresto, Assistant Chariman for the National Endowment for the Humanities brought greetings from NEH.

In conclusion the museum's director, Bates Lowry, thanked all those whose faith, support, and help have enabled NBM to come so far so quickly and introduced Cynthia R. Field whose enthusiasm and determination were crucial for effecting the congressional action mandating the museum. Dr. Field made the first cut into the 100-pound birthday cake which, along with the wine and the music of the Hot Mustard Jazz Band, launched the Pension Building into its second century and its brand new mission.

Already the National Building Museum is producing a nationally dis-

tributed publication, Blueprints; mounting a traveling exhibition program being seen by audiences in Portland, Oreg.; Houston, New Orleans, St. Louis, and Washington, D.C.; and developing a major exhibition "America Builds Abroad: Diplomacy and Architecture." In Washington, weekly tours are held of the museum's home in the old Pension Building, and daylong visits to architecturally significant sites have begun with a trip to the spectacular Frank Lloyd Wright house "Fallingwater." With the National Preservation Institute the museum is offering this fall and spring courses dealing with various preservation issues.

In addition an active intern program brings students from universities and colleges across the country to take part in all aspects of the museum's programs. An archival collection is being formed including historic construction photographs as well as actual building artifacts. Finally, a center for the entire building industry has been begun that is currently conducting a research program on the desired formats for presenting building information, developing an indexing structure for the building field, establishing a national network of building information centers and initiating a building literature database.●

STUDENT LOANS MUST BE REPAID

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. PORTER. Mr. Speaker, the student loan program aspires toward a lofty goal, that of allowing many students an education they otherwise would not be able to afford. However, this worthwhile program is threatened by $2.7 billion in outstanding loans. For each delinquent loan there is a college student somewhere who was denied financial help. Several positive steps have been taken to rid the loan programs of this abuse.

On October 25 the Debt Collection Act of 1982 became law. The act allows the Government to dock wages and pensions from current and retired Government employees who never repaid their student loans. There are 47,000 Government employees in this category and their debt is $68 million. In my opinion every one of them currently employed ought to be fired. But, of course, this would make the loan even more difficult to collect.

Mr. Speaker, if all student loans were repaid on time, the only cost of the program would be the administrative overhead and interest subsidies. It is time to make clear to the deadbeats—in the Government and out—that these are loans, not grants, and every cent must be repaid.●

A RESPONSE TO A CALLOUS AND CONDESCENDING EDITORIAL

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. FORD of Tennessee. Mr. Speaker, yesterday one of the local newspapers in my district of Memphis, Tenn., printed an editorial that was highly insulting to the black community which comprises over 50 percent of the city's population. I would like to take this opportunity to share with my colleagues my response to this callous and condescending editorial.

During the past 8 years, I have represented all Memphians in the Congress of the United States. Not only have I represented blacks in a congressional district which is over 50 percent black, but I have represented white Memphis equally as well.

In fact, it has come to be expected that I represent black and white Memphis not only in Congress, but in my work at the State, county, and local levels as well.

It is with regret that I must bring up the issue of racism. For indeed, it seems that every time we pick up the paper, turn on our radio or television, or talk about various political, social, and economic affairs, that ugly word surfaces—it is almost as if it has become a way of life in Memphis which we cannot ignore.

Recently, hundreds of Memphians called me in reaction to the editorial published by the Memphis Press Scimitar in which the paper accused me of machine politics, and stated the black community is tired of this type of politics. It also implied the black community was divided. Throughout the primary election, the November election, and the mayoral runoff, we have constantly been told about a divided black community by the Press Scimitar.

Based on the calls I have received, and my conversations with both black and white citizens, I feel that I must speak out. Blacks are tired of the Press Scimitar editorial board telling us about how divided we are, and how we should conduct our lives. How does a white editorial writer who lives in the white community, socializes in the white community, sleeps in the white community, and wakes up white each morning in the white community have the authority to talk about a divided black community. What proof does he have?

Everytime one or two prominent blacks disagree, politically it gets top billing in the Press Scimitar as being indicative of a divided black community, and frankly speaking, we are fed up with this type of "yellow journalism" which attempts to divide a black community.

In the last election, despite what the Press Scimitar constantly wrote about the divided black community, the blacks of this city gave me 98 percent of the vote, and Mr. Patterson 98 percent. That hardly seems to reflect a divided community.

Yet, nothing was or has been printed about the white community being divided despite the fact that Mike Cody and Dick Hackett split the white vote in a race which had a dozen white candidates.

Additionally, when blacks vote as a bloc, the Press Scimitar's editorial board called it machine politics but totally ignored the impact of bloc voting by the white community.

We are tired of the Press Scimitar telling us how divided the black community is while overlooking how white public officials and white businesses ignore the needs of a community which comprises nearly half of the population of this town. We are tired of having our housing needs ignored and our transportation needs ignored. We are tired of policies which result in nice little communities in east Memphis, and rat-and-roach-infested communities with no running water or streetlights in Boxtown. We are tired of not having jobs. Yet these are the needs and concerns of the black community which are overlooked by the Press Scimitar editorial board.

With the election of another conservative mayor, it is only fair that black citizens demand that they have a black city council chairman. We certainly do not need a conservative council chairman and a conservative mayor in a town that is half black and half white.

Given the current political environment, we will accept nothing less than a black council chairman, and it does not have to be a Ford.

In a recent newspaper article depicting the makeup of the directors of city hall, it was shown that all 11 are white males. Imagine, a city 50 percent black, and 50 percent female, and not a single black director or female director.

Mayor Hackett said he has a commitment from a single black to serve on his personal staff. We do not want tokenism in a city which is 50 percent black.

The next time, the financial power brokers of Memphis sit down to raise $150,000 for a mayoral candidate to run, we want blacks sitting at that table, and we want a black candidate considered as well.

We are also serving notice that we are going to conduct a series of workshops designed to develop a plan which will result in adequate black

representation in city government, and economic development programs.

Again, we hate to bring up the issue of racism, but since the Press Scimitar keeps bringing it up, it is our moral responsibility to respond.

To the Press Scimitar, we are saying do not stand in the way of the black community. We are not going to let misleading editorial headlines dictate what the black community is all about. We ask you to respect the black community of Memphis.

We ask that you stop on your own or we will stop you because we are fed up with this type of inflammatory, condescending and insulting editorial reporting on the black community.

You are not serving the city which supports you, and if we do not sense your commitment to change, we will change things for you. Memphis must remain united, strong and dedicated to end all bigotry, and we will not stand for the editorial board of the Press Scimitar perpetuating racism, or giving misleading and negative perspectives of the black community in Memphis.

Finally, let me add that this is an issue that the black community is not divided on, that is that the Press Scimitar does not represent, or speak for the black community.●

THE AGE OF SOCIAL INSECURITY

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. CLAY. Mr. Speaker, our social security system must be saved from bankruptcy. Opponents of the program support additional cuts in benefits, extensions of the retirement age, and increased reduction in disability payments.

These proposed cuts continue to impose additional burdens on our aged. They do not address the need to keep our moral obligation made almost 50 years ago to improve the quality of life and to provide our citizens a measure of dignity and support after their working years.

Despite assurances by the President that he would preserve and protect social security, the President and his congressional allies have cut social security benefits by $18 billion over the next 5 years and medicare benefits by $13.3 billion over the next 3 years. These cuts are certain to result in additional hardships for the elderly of our Nation. Social security is not a charity program. It was created in 1935 in an effort to forestall poverty and dependency by having workers contribute to a system which would ultimately provide them "real security" upon retirement.

I would like to share with my colleagues an article by Art Buchwald entitled "The Age of Social Insecurity," which provides a perspective of the "real reason" the social security system is in a lot of trouble. While taking a humorous slant, Buchwald notes that when Roosevelt created the program, recipients were not expected to live to a ripe old age.

THE AGE OF SOCIAL INSECURITY

(By Art Buchwald)

The Secret is out. Social Security is in a lot of trouble. The politicians will tell you that the system is going broke because: (A) Cost of Living Indexing is too high, (B) The work force is not contributing enough money to pay for the retired. (C) The payout for people is three times what they and their companies put in. (D) All of the above.

But no one will dare mention the real reason. I found it out by talking to a man who said he was 83 years old.

"You don't look it," I told him.

"I am. And that's what's killing Social Security," he chuckled. "When Roosevelt started the thing in the '30s he expected me to die when I hit 67. That's what the whole damn program was based on. People were supposed to die a few years after they collected their money. Now we're all hanging around in our 70s and 80s and the government doesn't know what to do about us."

"I don't believe anyone wants you to die before your time," I said. "America reveres its old people."

"They do and they don't," he said. "They're not about to kill us, but at the same time, they're getting pretty darned mad they have to pay for us for being alive."

"Well, it is burden on the working class," I admitted.

"Somebody should have thought of that when they started the system. The smart alecks in the New Deal drew up these fancy graphs and said, 'If Dooley, that's my name, dies at 67 and Mrs. Dooley dies at 70, we should have enough in the pot to take care of them.' Well, Mrs. Dooley and I are doing quite well, thank you, and now the pot is empty."

"I guess they're going to have to come up with dire measures to replenish the pot."

"They haven't come up with any good ones yet. The thinking behind Social Security was they wanted us to all get out of the work force by 65 to open up the job market for the young folks. If they change it and say you can't collect your Social Security until you're 70, that means the younger folks are going to get furious because they can't have our jobs. If the politicians cut back on our benefits they got a tiger by the tail because the senior citizen vote is the most powerful in the country. And if they raise Social Security taxes for the people who are now working, nobody is going to be able to go out and buy the things that's supposed to get us out of the recession. You don't have to be an Alan Greenspan to figure that out."

"What's the solution?"

"There ain't one, son. That's what I keep telling you. The longer we live the worse it's going to be for everybody. Every time the medical profession finds a cure for a disease, there is someone over in the Social Security Fund hitting his head against his computer."

"But we're a rich country. Surely we can take care of our old people in their September years."

"It isn't September, son, it's our December years. We're two months farther down the road than their actuarial tables. Look, don't think I'm cold-hearted about the problem. Mrs. Dooley and I were talking it over the other night and I said, 'Mama, do you want to die to save the Social Security system?' And she said, 'Not on your life! Do you?' I said, 'Nope. I'm just hitting my prime.' "

"I think you both made the right decision," I said.

"We didn't have too many choices. But I'll tell you something, son. When that trust fund goes bust there's going to be a lot of people in this country who aren't going to look kindly on us for hanging around."

"As far as I'm concerned, you and Mrs. Dooley can live as long as you want to."

"That's mighty kind of you to say that, son. Well, I guess I better start my daily walk. My doctor says it adds years to your life."

"Where do you walk?"

"Past the White House, the Capitol and the Social Security building. Every time they see me strutting by it drives them up the wall."●

WHAT THE U.S. CONGRESS SAYS ABOUT THE IRISH NATIONAL CAUCUS, INC.

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 10, 1982

● Mr. HOLLENBECK. Mr. Speaker, I submit the following statements concerning the Irish National Caucus to the RECORD for the benefit of my colleagues in Congress:

WHAT THE U.S. CONGRESS SAYS ABOUT THE IRISH NATIONAL CAUCUS, INC.

U.S. Senator Bill Bradley (D-N.J.): "Please extend my greetings to the members of the Irish National Caucus and all the Irish-American community. I am proud to join in celebrating your efforts to end all violence and terrorism in Northern Ireland.

I believe that a peaceful solution to this political situation will come only when Britain sets a timetable for withdrawal. Then the prospect of unity with Ireland will be real.

I look forward to working with you in the continuing effort to advance the protection of human rights in Ireland."

U.S. Senator Howard W. Cannon (D-NV): "The cause of unity, freedom and peace in Ireland is a worthy one and the Irish National Caucus is to be congratulated for its support of that cause. I believe in non-violent action on behalf of a peaceful solution in Ireland and am gratified that the Caucus works tirelessly toward that end."

U.S. Senator Al D'Amato (R-N.Y.): "It is the voice of the Irish National Caucus that continues to provide a loud clarion call in bringing to the attention of this country the plight of Northern Ireland. Their efforts should be supported and commended."

U.S. Senator Dennis DeConcini (D-AZ): "As a strong supporter of the search for unity, peace, and freedom in Ireland, I greatly appreciate the work of the Irish Na-

tional Caucus' nonviolent approach to achieving those goals."

U.S. Senator Daniel K. Inouye, (D-Hawaii): "I applaud the peaceful efforts to bring a just and lasting solution to Northern Ireland. We must continue these efforts until this problem is solved. I look forward to working with you in this endeavor."

U.S. Senator Howard M. Metzenbaum, (D-Ohio): ". . . For as long as I can remember, I have been deeply sympathetic to the Irish struggle for peace, justice and national reconciliation

I warmly applaud the efforts of the Irish National Caucus and the other groups that seek a peaceful, democratic and non-violent solution to Ireland's problems. You may be sure these objectives will continue to have my strong support . . ."

U.S. Senator Strom Thurmond, (R-S.C.): "It is my sincere hope, and prayer, that peace and unity will soon come to Ireland, and that a mutally beneficial agreement may be reached for the good of all its citizens. I commend the Irish National Caucus for its unceasing efforts to make this dream a reality."

U.S. Senator Lowell Weicker, (R-Conn.): ". . . The continuing tragedy of sectarian violence in Northern Ireland is deeply felt by all who cherish individual rights and freedom of conscience. The citizens and government of the United States can play a constructive role in bringing about the reunification of Ireland. The Irish National Caucus is an organization which provides the context and communications network through which this can be accomplished. Forswearing violent solutions and inflammatory rhetoric, we, who are Friends of Ireland, can begin that difficult task . . ."

U.S. Rep. Mario Biaggi (D-N.Y.) (Chairman, Congressional Comm. for Irish Affairs): "It has been my distinct privilege and honor to have worked with the Irish National Caucus since their inception in 1974. In the five years since I founded and became Chairman of the Ad Hoc Congressional Committee for Irish Affairs—no group has done more to promote the goal of peace, justice and freedom for Ireland than the Irish National Caucus."

U.S. Rep. Joseph R. Addabbo, (D-N.Y.): "Please be assured that I would be happy to add my name to the many supporters of the Irish National Caucus. I would like to pledge my continuing support for the I.N.C. for its tireless efforts on behalf of a peaceful resolution to the current situation in Ireland."

U.S. Rep. Don Albosta (D-Mi.): "I wish to congratulate the Irish National Caucus on its magnificent and non-violent work for a peaceful solution in Ireland. The Caucus shares my goals of unity, freedom and peace in Ireland."

U.S. Rep. Frank Annunzio (D-Ill.): ". . . Peace and justice must be a goal to which our great Nation remains forever committed, in both words and action, and the human rights and peace of Ireland must become a vital part of United States foreign policy . . ."

U.S. Rep. Edward P. Boland (D-Ma.): "I am committed to the goal of Irish unity as the best means of achieving a lasting peace in Ireland. Those groups and individuals which seek to promote Irish unity by encouraging a peaceful resolution of the conflict in Northern Ireland have my support."

U.S. Rep. David E. Bonior (D-Mi.): "Work like that done by the Irish National Caucus is vital to the continuing search for a peaceful, non-violent solution in Ireland. I commend you and your organization."

U.S. Rep. William Carney (R-N.Y.): "The need for peace and freedom for all of Ireland is stronger than ever today. The only way to secure a lasting peace is to end the division of the Irish people. I have a strong personal feeling for this cause, and I salute Father Sean McManus and the Irish National Caucus for their commitment to seeking a peaceful solution in Ireland."

U.S. Rep. James Collins (D-Texas): ". . . There is no greater need in the world than that of peace and cooperation. Although that important goal has been elusive in Ireland, the Irish National Caucus has been particularly tireless in its pursuit and deserves the gratitude and respect of all Americans who want to see tumult and discord in that part of the world to come to an end . . . "

U.S. Rep. Baltazar Corrada (D-Puerto Rico): "I want to take this opportunity to commend the Irish National Caucus and its work. Your organization's dedicated efforts on behalf of the unity, freedom and peace in Ireland are to be encouraged."

U.S. Rep. Lawrence Coughlin (R-Pa.): "I commend the Irish National Caucus for its untiring efforts in working for a peaceful, non-violent solution to the problems in Ireland. No cause is more just than that of bringing peace and economic justice to all the Irish peoples."

U.S. Rep. William J. Coyne (D-Pa.): ". . . The Irish National Caucus, and other groups committed to peace and unity in Ireland are to be commended for undertaking the task of informing the American public about the situation in Northern Ireland . . ."

U.S Rep. Ronald V. Dellums (D-Ca.): "There must be peace, freedom and unity in Ireland. I congratulate the Irish National Caucus for its unstinting efforts for a non-violent and peaceful solution in Ireland."

U.S. Rep. Brian J. Donnelly (D-Ma.): "I share the prayers of the Irish National Caucus' membership for an end to sectarian violence in Northern Ireland, and I look forward to the day when a new spirit of unity and peace rekindles the Irish Nation."

U.S. Rep. Bob Edgar (D-Pa.): "The Caucus' work toward peace, freedom and unity in Ireland is to be praised for its tenaciousness and reason."

U.S. Rep. Dave Evans (D-Indiana): "... I hope that some day soon the people of Ireland will be able to find a non-violent solution to their problems and achieve the lasting peace they deserve ..."

U.S. Del. Walter E. Fauntroy (D-Wash., D.C.): "... I am pleased to lend my support to the Irish National Caucus and to assist in its non-violent struggle for freedom and justice in Ireland ..."

U.S. Rep. Geraldine Ferraro (D-N.Y.): "I hope and pray that the time will come when all the Irish people can live in peace and unity. I wish to commend the Irish National Caucus for its peaceful work towards that end."

U.S. Rep. Hamilton Fish, Jr. (N.Y.): "I strongly support peace in Ireland, and congratulate the Irish National Caucus on its magnificent and non-violent work for a peaceful solution in Ireland."

U.S. Rep. Thomas M. Foglietta (Pa.): "Congratulations to the Irish National Caucus for your unfailing efforts to promote peace, freedom and unity in Ireland. I pledge to continue my support for your efforts until these goals are achieved."

U.S. Rep. Benjamin Gilman (N.Y.): "The work of the Irish National Caucus has been invaluable to me as a Member of Congress who is deeply dedicated to the cause of peace and freedom in Ireland. Working with the Caucus, the Congressional Ad Hoc Committee on Northern Ireland has been able to explore the issues of human rights in Ireland, discrimination against the minority population in Ireland and the banning of the plastic bullet. The work of the Caucus has been first-rate."

U.S. Rep. Frank Guarini (N.J.): "The Irish National Caucus represents the most dedicated organization in the United States for bringing the truth about the situation in Ireland to the American people. Your steadfast work on behalf of resolving the present divisiveness in Ireland through peaceful means should be applauded by all."

U.S. Rep. Thomas F. Hartnett (S.C.): "I am honored to be a member of the Irish National Caucus. The Caucus has made tremendous strides in promoting unity, freedom and peace in Ireland through non-violent means."

U.S. Rep. Harold C. Hollenbeck (N.J.): "I am proud to have my name associated with the fine work the Irish National Caucus is undertaking to put an end to the human rights violations occurring throughout Northern Ireland on a daily basis."

U.S. Rep. William J. Hughes (N.J.): "I strongly support peace, justice and freedom in Ireland. I congratulate the Irish National Caucus for its work which complements the efforts of the Ad Hoc Congressional Committee for Irish Affairs."

U.S. Rep. Henry J. Hyde (Ill.): "I commend the Irish National Caucus for its diligence in pursuing a non-violent and peaceful solution to the problems besetting Ireland. I join you in your dedication to this task, and pray that we will soon see an end to the fighting and violence, and the blessings of unity, freedom and peace on this great country."

U.S. Rep. James M. Jeffords (Vt.): ". . . I deeply appreciate and commend the efforts of the Irish National Caucus to promote a peaceful resolution to the strife in Ulster. After centuries of bloodshed, a solution can surely be found. Your good work is a tremendous contribution . . ."

U.S. Rep. Jack F. Kemp (N.Y.): "To Fr. Sean McManus: With best wishes and friendship to you and 'the cause'."

U.S. Rep. John LeBoutillier (N.Y.): "I congratulate the Irish National Caucus for its admirable work to make Ireland free and united."

U.S. Rep. Norman F. Lent (R-N.Y.): ". . . As a long time member of Congressman Mario Biaggi's Ad Hoc Committee for Irish Affairs, I salute the Irish National Caucus for its tireless efforts in working for peace and unity in Ireland. I am convinced that our shared goal for peace and respect for human rights will eventually carry the day! . . ."

U.S. Rep. Thomas A. Luken (D-Oh.): "I am a strong supporter of unity, justice, freedom, and peace in Ireland. I commend the Irish National Caucus for its outstanding and non-violent work for a peaceful solution in Ireland."

U.S. Rep. Nicholas Mavroules (D-Ma.): "The Irish National Caucus has been an important resource in providing information to the Congress on how we may work together to bring peace to all of Ireland."

U.S. Rep. Ray McGrath (R-N.Y.): "I support the work of the Irish National Caucus in its efforts to bring peace to Ireland. Your goals of peace and justice for all the people of Ireland are most important to me person-

ally, and to many of my constituents. I wish you every success in your endeavors."

U.S. Rep. Joseph G. Minish (D-N.J.): "As you know from my record and membership in the House group, the "Friends of Ireland", I am strongly committed to the cause of peace and freedom in Ireland. I am grieved by the violence and bloodshed which mars life in that beautiful country. However, we must continue to work towards peace and I applaud the efforts of the Irish National Caucus for their outstanding work in this area.

U.S. Rep. J. Joseph Moakley (Mass.): "I am a strong supporter of the Irish National Caucus. I applaud their efforts on behalf of peace and social justice in Ireland."

U.S. Rep. Toby Moffett (Conn.): ". . . As a strong supporter of human rights and nonviolence in Northern Ireland, and as one who looks forward to the eventual unification of Ireland, I applaud and endorse the excellent work of the Irish National Caucus to promote peace and justice in that troubled land . . ."

U.S. Rep. Guy V. Molinari (N.Y.): "At a time when unreasoning cruelty, violence, fear and bloodshed are considered the norm, the Irish National Caucus represents the larger hope of a solution to the serious problems in Ireland.

I salute you in your search for a peaceful answer to the terrible problem that threatens Catholic and Protestant alike. You nonviolent stance serves as a constant reminder that man has never bettered his role in life by abrogating the rights of others. Please count on my support, whenever you feel that it might help in your mission of peace."

U.S. Rep. Mary Rose Oakar (Ohio): "The tragic conflict in Northern Ireland must be resolved for the good of the people of Ireland and for the cause of justice. I commend the Irish National Caucus for its work providing information and leadership on this issue. I pray that people of good will can exert their best efforts for the cause of peace, unity and justice in Ireland."

U.S. Rep. Richard L. Ottinger (N.Y.): ". . . The Irish National Caucus has been an important voice in Washington, striving for peaceful and enduring settlement to the conflict that has gripped Northern Ireland. As one who is gravely concerned for the economic and human rights conditions of the people of Northern Ireland, I commend the Irish National Caucus for its magnificient efforts . . ."

U.S. Rep. Peter A. Peyser (D-N.Y.): "it is my fervent hope that peace will someday come to Ireland and its people. Together, all nations will find a peaceful and final solution to this conflict. I will continue to be strongly committed to working with the Irish National Caucus in the future to achieve this goal."

U.S. Rep. Charles B. Rangel (D-N.Y.): "The continuing violence and terrorism in Northern Ireland is a tragedy to all mankind. We in Congress cannot rest until peace and social justice come to pass."

U.S. Rep. William R. Ratchford (D-Conn.): "I support the efforts of the Irish National Caucus to seek a non-violent settlement there, and will continue to lend my backing to efforts in Congress to bring peace and freedom to a unified Ireland."

U.S. Rep. Pete Rodino (D-N.J.): "It is my goal to continue to work with the Irish National Caucus to sound a voice for reason and non-violence."

U.S. Rep. Robert A. Roe (D-N.J.): "I would like to express my strong support for the work being accomplished by the Irish National Caucus in its efforts to secure a long lasting peace in Ireland. The Irish National Caucus' determination to find that peace through non-violent methods must be applauded and supported by all."

U.S. Rep. Edward R. Roybal (D-Cal.): ". . . I greatly respect and support the Irish National Caucus' non-violent efforts to secure a free and peaceful Ireland. As a long time friend of the Irish National Caucus, I look forward to continuing my efforts on their behalf and join with them in their hope of one day seeing a united and peaceful Ireland . . ."

U.S. Rep. Marty Russo (D-Ill.): "I admire the Irish National Caucus' dedication to the goal of the reunification of Ireland. Peace among the Irish people should be given the highest priority as should peace throughout the world."

U.S. Rep. Gus Savage (D-Ill.): ". . . I always have and always will—as a journalist for 26 years and now as a Member of Congress—support national unity and liberation for all the world's oppressed peoples. At this juncture in history, the struggle of the Irish especially fits this category. I vow always to place my commitment to freedom, justice and peace above my affiliation with any political party—and I strongly believe that peace is not possible or proper in the absence of freedom and justice . . ."

U.S. Rep. Patricia Schroeder (D-Colo.): ". . . It has been a pleasure working with the Irish National Caucus this Congress. I congratulate its impressive spirit to the promotion of unity, peace and freedom in Ireland . . ."

U.S. Rep. Clay Shaw, Jr. (R-Fla.): ". . . I am most honored to be affiliated with the Irish National Caucus and applaud its members for their dedication in seeking a nonviolent solution to the problems in Ireland . . ."

U.S. Rep. Charles E. Schumer (N.Y.): "Having worked with Father McManus and the Irish National Caucus, I know that they are furthering the cause of peace, unity and freedom in Ireland. I am looking forward to working with them in the future."

U.S. Rep. Gerald B. Solomon (N.Y.): ". . . My desire for an end to the violence in Ireland is second to none. I support all organizations, both in the United States and in Ireland, that strive for peace in that troubled land. Throughout the centuries, history has taught us that violence only begets more violence. True peace will only arrive with love and justice . . ."

U.S. Rep. Louis Stokes (Ohio): ". . . I strongly support the causes of unity and peace in Ireland. The Irish National Caucus is to be commended in its unceasing efforts towards the achievement of these goals in a non-violent manner . . ."

U.S. Rep. Al Swift (Wash.): "I strongly support the work of the Irish National Caucus in its efforts to end the violence and bring peace to all the people of Ireland."

U.S. Rep. Bruce Vento (Minn.): ". . . I commend the Irish National Caucus and I am pleased to share in your prayers for peace in Ireland. It is only within the spirit of unity and non-violence advocated by the Irish National Caucus that economic justice and peace can be achieved in this most troubled but peaceful land . . ."

U.S. Rep. Doug Walgren (D-Pa.): "As a strong supporter of the Irish National Caucus, I want to congratulate each of its members for the hard work given in the name of peace and freedom in Ireland. I pledge my full support in the years ahead."

U.S. Rep. Ted Weiss (D-N.Y.): "I strongly support the efforts of the Irish National Caucus in its efforts to help achieve a peaceful resolution to this conflict."

U.S. Rep. Antonio B. Won Pat (D-Guam): "In my strong support for unity, peace and freedom for the people of Ireland, I congratulate and commend the Irish National Caucus for its outstanding efforts to seek a peaceful resolution to the turmoil in Ireland."

U.S. Rep. Gus Yatron (D-Pa.): "I strongly support unity, freedom and peace in Ireland and I congratulate the Irish National Caucus on its magnificent and non-violent work for a peaceful solution in Ireland."

U.S. Rep. Leo Zeferetti (D-N.Y.): "I have worked closely with the Irish National Caucus to achieve a peaceful solution in Ireland. Only through our joint efforts will we be able to obtain unity, freedom and peace in Ireland. I congratulate the Irish National Caucus on its tremendous work and look forward to continuing our work."●

SENATE—*Monday, December 13, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Praise ye the Lord. Sing unto the Lord a new song, and His praise in the assembly of the faithful. Let Israel rejoice in his Maker; let the children of Zion be joyful in their King.—Psalm 149: 1, 2.

*Fear not, for behold, I bring you good tidings of great joy, which shall be to all people. For unto you is born this day in the city of David a Saviour which is Christ the Lord * * * Glory to God in the highest, and on earth peace, good will toward men.*—Luke 2: 10, 11, 14.

Lord God Almighty, as we celebrate Hanukkah and Christmas, may the profound fact of a God of righteousness, justice, and love be a reality for each of us. May His presence in our hearts and homes fill us with good will toward each other. Grant that these celebrations will not be perfunctory while we close our hearts against Thy grace, compassion, and truth. Help us to be vulnerable to the Holy Spirit, sensitive to others' need and especially thoughtful to our families. Let the light and love of God fill this place. We pray this in the name of the gift of Love, Thy son, Jesus Christ the Lord. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

YEA!!!

Mr. BAKER. Mr. President, Paul Garver was 17 years old when he authored this week's poem "Yea!!!." He wrote it 1 month after major surgery to remove a malignant lymphoma, and after intensive chemotherapy as a followup to his operation. Paul battled the cancer which had invaded his body for 10 months after the operation, and died in the fall of 1981.

After learning of our Monday morning custom of including poetry in the RECORD at the beginning of each weekly session of the Senate, Paul's mother, Susan Garver sent me a copy of Paul's work.

I am most grateful to Susan for sharing this poem with us. Susan, her husband John, and daughter Julia, have been through the most painful of ordeals. They have emerged as a strong and compassionate family, and I am proud to have come to know them.

I ask unanimous consent, Mr. President, that Paul's poem be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

YEA!!!

Well, here I am! Seventeen years old today,
boy the years are going by too quick!
Birthdays are very special to me,
a day to celebrate your existence,
and a day to look back.

Well, here I am! Seventeen years old today,
boy the clock's ticking fast.
Birthdays are a special time,
a day to celebrate your existence
and cherish the ones around you.

Life is so full,
abounding with wonders to be seen
and emotions to be experienced.
If we all just open our eyes and gaze
upon the subtleties and finer shadings of life
greater worlds unfold.
Worlds we rarely find time to look at.
But they're here and always will be
when we choose to find them.

I'm grateful to be a leaf
in the ever growing tree of life
and this leaf's not falling off
for nothing.

—PAUL COWAN GARVER,
January 7, 1964–September 10, 1981.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order, there is a special order in favor of the distinguished Senator from Michigan (Mr. LEVIN). I ask unanimous consent that, after the execution of the special order, there be a period for the transaction of routine morning business to extend not past the hour of 1 p.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE AGENDA

CLOTURE MOTION—H.R. 6211

Mr. BAKER. Mr. President, the motion to proceed to the consideration of H.R. 6211 will become the pending business at the close of the time for the transaction of routine morning business. There is a cloture motion on file which matures, according to the rules, at 1 p.m. today. After the establishment of a quorum, a rollcall vote will occur in connection with that matter. If cloture is invoked, then, according to the rules, we will continue to debate the motion for the time prescribed. It is hoped that we can reach the bill itself sometime during the day today and the earlier the better.

THE HIGHWAY BILL, DEFENSE APPROPRIATIONS, AND THE CONTINUING RESOLUTION

The matters that must be disposed of, Mr. President, continue to be the highway bill, the Defense appropriations matter, and the continuing resolution. There are other appropriation bills which are available and which may become available and which should be dealt with in order to diminish the size of the continuing resolution. There are still other matters on the calendar and others which may become available which ought to be dealt with and which many Members would like to deal with.

LATE SESSIONS THIS WEEK

But, in order to take care of those must items, I urge Senators to consider that the Senate may be in session late every night this week. The target date for adjournment sine die is still the 17th of December. It is still barely possible to do that. If we do not do that, then, after consulting with the minority leader, with the Speaker, and with the minority leader of the House other arrangements will be made to continue the 2d session of the 97th Congress either before Christmas or after Christmas. But it is my fervent wish that we may avoid that. So I urge all Senators to be as brief as possible and to facilitate the transaction of business as it is required.

HONORARIUM LIMITATION—PROPOSED RULES CHANGE

Mr. President, sometime during this week, perhaps tomorrow or the next day, it will be the intention of the leadership on this side to proceed to the consideration of a resolution reported by the Rules Committee, specifically Calendar Order No. 994, Senate Resolution 512, which is a resolution to repeal rule XXXVI of the Standing Rules of the Senate. The reason I bring that up is this: Sometime ago, the limit on honorariums that might be earned as outside income by Members was repealed as it

appeared in the statute law, but we never got around to conforming the Senate's rules to that change in the statute. The Rules Committee has reported such a change and it is now on the calendar. So that Members may not be caught by surprise, I wish to advise them that at some point this week it is the intention of the leadership to proceed to the consideration of that matter, most likely tomorrow or Wednesday.

Mr. President, I anticipate that this will be a very, very busy week. I urge Senators to arrange their schedules to be on the floor as much as possible.

Mr. President, I believe that concludes my remarks for the beginning of this day. I see the minority leader on the floor, and I expect he will wish to seek recognition at this point. I yield the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. ABDNOR). The minority leader is recognized.

REALLOCATION OF TIME

Mr. ROBERT C. BYRD. Mr. President, I understand Mr. LEVIN does not wish to use his special order and Mr. PROXMIRE would like to have the order transferred to him, or at least a portion of it, if the majority leader would do that. I have no other requests for time.

Mr. President, I yield back my time.

Mr. BAKER. Mr. President, I ask unanimous consent that the time allocated to the Senator from Michigan (Mr. LEVIN) be transferred to the Senator from Wisconsin (Mr. PROXMIRE).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I assume, then, that morning business would automatically commence after the execution of the order now in favor of Senator PROXMIRE.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I yield back the remainder of my time.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. The Senator from Wisconsin is recognized

Mr. PROXMIRE. Mr. President, I wish to thank the minority leader for so graciously arranging for me to be able to use part of the time of the distinguished Senator from Michigan.

NUCLEAR FREE ZONE FOR EUROPE?

Mr. PROXMIRE. Mr. President, the Prime Minister of Sweden, Olof Palme, has announced that he will push forward with a plan to create a nuclear free zone in Europe. He has said that his Government intends to contact members of the NATO and Warsaw Pact alliances as well as neutral nations in Europe to explore this issue.

Mr. Palme draws his specifics from the recommendations of the Independent Commission on Disarmament and Security Issues of the United Nations. That body has suggested that a nuclear free zone could be created in an area 93 miles on each side of the Warsaw Pact-NATO border. In that zone, tactical nuclear weapons of all types would be prohibited.

Mr. President, while this plan has some obvious flaws, it is timely to consider the utility of nuclear free zones such as proposed by Prime Minister Palme. NATO countries, of course, must take into consideration the geographic reality of having Soviet missiles targeted at Europe from well outside a 93-mile zone thereby giving the Russians a free nuclear advantage. And the NATO countries must understand the need for some kind of U.S. nuclear umbrella in Europe given the conventional force advantages of Warsaw Pact forces.

But even given these serious reservations, the concept, the idea itself, deserves serious and long-term study. There are applications of the nuclear free zone concept that could reduce tensions and restrict the hazards of accidental nuclear warfare.

Mr. President, I ask unanimous consent that an article in the New York Times of December 9, 1982, about the Palme proposal be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 9, 1982]

SWEDEN IS URGING ATOM-FREE REGION

PRESSES NATO AND SOVIET-BLOC NATIONS TO CREATE A ZONE IN CENTRAL EUROPE

STOCKHOLM, Dec. 8 (AP)—Prime Minister Olof Palme's Government, in its first major foreign policy move since taking office two months ago, announced a drive today to create a nuclear-free zone in Europe.

At a news conference, Foreign Minister Lennart Bodstrom said Sweden was approaching various governments to determine the possibilities of establishing "a zone free from tactical nuclear weapons in Europe."

He said governments of the two military blocs, NATO and the Warsaw pact, were being approached as well as such nations as Finland, Ireland, Yugoslavia, Switzerland and Austria that are neutral or consider themselves non-aligned. Sweden is neutral.

PROPOSAL PRESENTED TO U.N.

The initiative is based on a proposal presented to the United Nations last summer by the Independent Commission on Disarmament and Security Issues. It and other ideas are to be considered by the General Assembly starting Thursday. The proposal suggested that a 186-mile-wide nuclear-free corridor be set up on the border separating West Germany and East Germany.

The commission, led by Mr. Palme, had 18 members, including delegates from both superpowers.

Asked why Sweden was raising the issue now, Mr. Bodstrom said. "It is natural that the chairman of the commission takes the initiative now that he is Prime Minister again."

Mr. Palme's Social Democrats ousted a coalition Government led by the Center Party in September and took office in early October.

"In an initial phase," Mr. Bodstrom said of the proposal, "a zone of this kind would be established in central Europe and thereafter stretched out along the southern and northern flanks of both the power blocs."

He said such a zone would cover 93 miles on each side of the borders between the power blocs, although its "exact geographical extent" should be negotiated.

Nuclear warheads would not be allowed within such a corridor, nor would storage space for nuclear weapons.

Mr. Bodstrom said the zone would be "an important contribution to efforts for promoting détente and greater confidence between the two military alliances."

"The risks of nuclear weapons being used at an early stage of an armed conflict could thereby be counteracted," he said, reading from a Foreign Ministry statement.

DECEMBER 10—34TH ANNIVERSARY OF THE ADOPTION OF THE UNIVERSAL DECLARATION ON HUMAN RIGHTS

Mr. PROXMIRE. Mr. President, Friday was the 34th observance of the adoption by the United Nations General Assembly of the universal declaration of human rights. This declaration, adopted on December 10, 1948, was the first step taken by the United Nations to implement one of its primary missions set forth in the charter to "reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small."

The intent of the Economic and Social Council and its Commission on Human Rights was that this document would not be legally binding, but enforced solely by collective moral persuasion. They envisioned a series of human rights treaties and covenants, of which the Genocide Convention was the first, to implement the lofty principles outlined in the declaration.

Today, as we commemorate the 34th anniversary of the human rights declaration, there are three observations I would like to make.

First, the United Nations declaration on human rights owes a great debt to the concepts of individual and collective freedom that the United States has pioneered through our Declaration of Independence, Constitution, and its subsequent interpretations by Congress and the Supreme Court. The freedoms recognized by the United Nations declaration are no strangers to Americans. They include the right to life, liberty and security of the person,

and to equal protection of the laws; freedom of religion, opinion, press, expression, and assembly; freedom from slavery and torture; the right to a fair trial, including a presumption of innocence; freedom from arbitrary arrest and so forth.

Second, this declaration, although it does not carry the force of law itself, has had a tremendous and powerful influence on the development of contemporary international law. Its principles have been incorporated in the national constitutions of many newly emergent nations and has had a significant indirect influence on municipal and national laws in many countries. In addition, international agreements and international conferences continue to refer to the declaration as "an authoritative interpretation of the charter of the highest order, (which) has over the years become a customary part of international law."

Mr. President, it is very instructive for us to reflect on this when we hear so many criticisms of declarations of this kind as being just empty rhetoric, just words that mean nothing.

As I say, they have been translated into action in a number of countries, not just idle words, but words that have inspired specific, concrete, constructive action to preserve or to extend, to establish, human rights in many countries where those rights were not possible.

Third, Human Rights Day is a time for reflection on what the universal declaration on human rights has not done. While it has resulted in an increasing public awareness of human rights, all too often the concern by nations has been cosmetic, all too concerned with the public relations aspects of human rights, rather than the substance. As the Secretary General of the United Nations has noted in his statement commemorating this day:

> I am acutely aware that we are far from achieving a universal respect for the fundamental freedoms and dignity of the human person. . . . the current international situation, which is characterized by a remorseless arms race, tension among nations and continuing economic inequities, creates an environment of insecurity further undermining human rights.

The Secretary General is all too right in pointing out that we have a very large job ahead of us if the promise and hope of the human rights declaration are to become a reality.

But, Mr. President, we must try in every way we can, both large and small.

As I have pointed out time and again, there is one small step that we here in the Senate can take to further this cause—the ratification of the Genocide Convention, the first of the human rights treaties drafted to implement the principles contained in the declaration of human rights. The time has long since passed when the protection of human rights is merely a matter of local concern. Today, the promotion of human rights is an essential element of the security of our Nation, and that of all nations, and I urge my colleagues to give careful attention to the Secretary General's statement and join me in seeking ratification of the Genocide Convention in the 98th Congress.

Mr. President, I ask unanimous consent that the text of the Secretary General's remarks on Human Rights Day be reprinted in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

MESSAGE OF THE SECRETARY-GENERAL ON HUMAN RIGHTS DAY, DECEMBER 10, 1982

The observance of Human Rights Day requires all of us to rededicate ourselves to a goal essential to the social order envisaged in the Charter of the United Nations, in which the peoples of the world reaffirm their faith in fundamental human rights, these rights were clearly defined in the Universal Declaration of Human Rights and the subsequent conventions and covenants. We should not allow this Day's observance to become merely a ritual. It must convey a message of hope to those millions throughout the world who are deprived of their basic rights.

I am acutely aware that we are far from achieving a universal respect for the fundamental freedoms and dignity of the human person. For vast numbers of human beings, many of the rights set forth in the Universal Declaration remain only distant objectives, as they are denied the right to life, liberty and security of person, the right to a standard of living adequate for health and well being, including food, clothing, housing and medical care and necessary social services, the right to education and the right to work, the right to equality before the law, the right to freedom of thought, conscience and religion and the right to be free from torture and cruel, inhuman or degrading treatment. Moreover, the current international situation, which is characterized by a remorseless arms race, tension among nations and continuing economic inequities, creates an environment of insecurity further undermining human rights.

To overcome this crisis will not be an easy task. We have to bear in mind that the United Nations is an inter-governmental organization of sovereign states. We are only too conscious of the sensitivities this entails. I would add here that an area of special concern to me is the right of our own international civil service to security, safety and independence. This is a problem to which I attach great importance, and that I am addressing separately on this Human Rights Day.

The effectiveness of our Organization in the field of human rights lies in the power of persuasion and the exercise of moral authority. This power must be used to the maximum when matters of principle are at stake. Our aim must be to create a climate of opinion in which all those in authority will come to perceive that they have much more to lose than to gain by disregarding or violating basic human rights. We must strengthen the institutions, procedures and mechanisms of the United Nations in this field. Our efforts must go beyond formalism or appearances. We must try to make sure that they have a practical impact in redressing violations of human rights. However difficult the task, we must persevere if we are not to fail the ideals of the Charter and the trust of those millions who look to the United Nations for assistance in securing respect for their human rights and fundamental freedoms.

The essence of Human Rights Day is to redeem the pledge that we in this Organization have made to all who are deprived of the rights to which they are unequivocally entitled. For my part, I intend to devote the highest priority to the promotion and protection of human rights throughut the world. I shall also ensure that the newly designated Centre for Human Rights responds effectively, courageously and impartially to its challenging mandate. I am deeply convinced that, while short term results are not always evident, every effort to meet our responsibilities in this vital area contributes to the eventual world-wide realization of human rights and to the recognition, in the words of the Declaration, "of the inherent dignity and equal and inalienable rights of all members of the human family."

FIVE-CENT GASOLINE TAX AND HIGHWAY CONSTRUCTION BILL

Mr. PROXMIRE. Mr. President, shortly we will have a vote on a motion to invoke cloture on the proposal to impose a 5-cent gasoline tax and to use the funds for highway construction, renovation, and repair. I think it is timely for us to ask ourselves, why not increase the gasoline tax by 5 cents so we can raise the billions necessary to improve our highways, our bridges, and at the same time put more than 300,000 people now out of work in the construction trades back to work?

Well, the answer is that we should not because it will not increase jobs significantly, and it imposes another regressive tax at a time when the Congress has cut by billions the taxes of those most able to pay.

We have more than $8 billion in the highway trust fund, raised by the present 4 cents gasoline tax ready, to go. Do we need the additional billions that a further 5-cent gasoline tax, a total of 9 cents Federal tax, would raise?

Of course, highway spending aficionados will always argue yes. But what documentation do we have that we need to raise the additional sum?

It is always easy under any circumstances to go out and say, "Well, you can find potholes here and there and a bridge here and there to repair." We can always do that. But what documentation do we have that we need the additional sum?

None of the money proposed would go to fill potholes, incidentally, or do the usual kind of repair. That has been and presumably would continue to be left to local, county, and State governments.

Actually, the 5-cent gasoline tax increase by the Federal Government would make it that much more diffi-

cult—perhaps impossible—for local governments to raise the funds they need from the same source from which they must raise it, that is, the gasoline tax. Rather than speed repairs on the roads we drive on, this action on the gas tax might prevent it.

Does this mean that if we go ahead with this bill the highways will be in worse shape than they are in now? Well, it depends in part on what highways we are talking about. City streets? They will be in worse shape. County highways? Worse shape. State highways? Worse shape. The interstate highways? Better shape.

Do most of us spend most of our time driving on city streets and county and State highways? Yes. The average highway mileage on the noninterstate part of the highways greatly surpasses the mileage on the interstate.

So what is the hurry? What do we really accomplish? Where is the documentation to show that the Interstate Highway System is in worse shape than the rest of our highways? Have we had hearings to document the plight of our interstate compared to local, county, and State highways? If so, where is it? Should we insist on that documentation first? Why should the Congress go ahead without convincing, detailed documentation that this big, regressive tax will really do the job it is supposed to do, that is, provide the repair needed to the roads and bridges that need it the most?

Also, some of us live in States that will get back far less than our motorists contribute.

The bill has been sharply improved in this respect. The worst losers do not lose as much as they did before, but losers we are still.

Under the original House bill, Wisconsin would get back 70 cents for every dollar it contributed; Michigan, 67 cents.

Wisconsin has unemployment in excess of 11 percent, well above the national average, Michigan in excess of 15 percent. Both States have thousands of miles of highway and tens of thousands of unemployed construction workers and others who need jobs. Under the revised bill, we will get back 85 cents on this part of the gas tax dollar, but with all of our heavy unemployment, we shall still pay out more than we will get back. Why would both States not be better off without a Federal highway program financed by a 5-cent tax, when the 5-cent tax could be imposed by the State instead and all of the money raised could be kept home and spent on the highway system in Wisconsin or Michigan. Incidentally, the same point applies to Indiana, Ohio, and many other States which would be losers under the bill.

Finally, what is there to persuade us that this is the best way to put people to work or even that it will put people to work? A number of eminent economists agree that the net effect of this kind of tax and spending program will have what they call a negligible effect on jobs.

That is not just the chairman of the Council of Economic Advisers who says that, but a number of other economists who have joined him in recent weeks.

Oh, yes, indeed, if all of this gas tax revenue is spent promptly on highways—a big "if" when you recognize we have billions of dollars sitting in the highway fund now even before the tax—assuming all of this additional 5 cents goes to repair and reconstruct highways and bridges, does it not come out of the pockets of motorists who will, therefore, have less and who will tend to travel less, to buy less of other products and, therefore, fewer people will be employed in other areas of the economy, particularly in those States like mine, where the gas tax will take away much more than it will return in spending on Wisconsin highway repair?

Mr. President, this question has never been answered, for a very good reason. There is no answer. The bill will not increase the number of jobs net, certainly not in many of the States that will pay out far more than they get back.

The Governor-elect of our State was right when he suggested that we postpone the consideration of this bill until next year, when we shall have a better understanding of how it will affect both our highways and our unemployment problem.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ECONOMIC PROBLEMS IN FOREST PRODUCTS INDUSTRY

Mr. GORTON. Mr. President, on Wednesday, December 8, Senator BAUCUS and I cochaired a hearing of the Small Business Productivity and Competition Subcommittee. The purpose of the hearing was to focus attention on the economic problems facing small and independent businesses in the forest products industry. Although a great deal of data has been released on the depressed state of the forest products industry to date, I believe that the problems unique to small and independent businesses have not been adequately addressed in the information that has been presented to Congress up to this point.

It is a fact that our Nation's economic troubles have crippled the entire forest products industry. High interest rates have devastated the housing market creating economic distress for every aspect of the industry. As a result, businesses throughout the entire industry have been forced to close their doors. Operators who have contracted with the U.S. Forest Service for timber supplies now face the prospect of widespread defaults on their contracts. An unfortunate consequence of the depressed state of the industry is that these economic conditions have had a disproportionate impact on small and independent businesses.

As I believe the hearing record indicates, small businesses in the forest products industry are not going to survive unless some form of relief is forthcoming in the near future. One of the witnesses at the hearing—Gary Jones, vice president of Summit Timber Co. in Darrington, Wash.—is a constituent of mine. I believe that his testimony points out, in a succinct manner, the plight that most small businesses in the forest products industry are currently facing.

Mr. President, I ask unanimous consent to have printed in the RECORD the statement of Gary Jones so that other Members of Congress will have the opportunity to familiarize themselves with just how serious the problems are for small and independent businesses in the forest products industry.

There being no objections, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF GARY E. JONES

Mr. Chairman, my name is Gary E. Jones. I am vice president of Summit Timber Company in Darrington, Washington. Darrington is a small community of 1,000 people nestled in the Cascade Mountains 80 miles northeast of Seattle. Summit is a family-owned corporation founded 40 years ago.

I am here today not only representing Summit Timber management, but also our employees and the town of Darrington. Summit is not a large company, but we are the major employer in the Darrington area. We do not have any asset in our family that is not tied to the timber industry. To survive the past few years, we have exhausted all of our own cash and some of the bank's. Our concern here is the same as other mills in the northwest—Survival!

We favor the Hatfield-Jackson-McClure timber contract proposal. Summit is 95 per cent dependent on National Forest timber. We must buy federal timber to operate. During the decade of the 1970's we were forced to bid high timber prices because of two major factors: declining supply and inflation.

Supply became a factor because of uncertainty caused by wilderness additions, land use strictures and Forest Service budget problems. The second factor, inflation became a problem because we were bidding on timber to be removed two to seven years in the future. When bidding against the competition one had to use an inflation factor of from 8 to 12 per cent to have a chance to buy the sale. This was realistic at the time because we had seen our product

increase at or above the inflation rate during the 70's.

Some may say we took a gamble and lost, so why should we receive relief? My answer is: when we bid we were bidding under fiscal policy established by the past administrations, but we now are forced to harvest these sales under fiscal policies set by a new administration. We agree with what the President is doing and my hope is that we as an industry, and especially the small independent businesses, can survive to help strengthen our nation. We need a chance, however, to harvest timber sales that can be purchased under the conditions of this new fiscal policy. We feel that passing our industry bill will give us that chance. It will keep our timber supply from being tied up in the courts as a result of defaults and bankruptcies resulting from default damages.

We have 185 million board feet of Forest Service timber under contract at a delivered log cost of $360 per thousand board feet. On today's log market that same quality timber can be delivered at $250 per thousand board feet. The $110 difference would create a loss of over $20 million for Summit Timber Company. That, added to losses of more than $10 million in 1981 and 1982 would nearly equal Summit Timber Company's total net worth.

Our 450 union and salaried employees have done their part by taking a 25 per cent cut in pay. With this help, cash flow has stayed fairly stable and we have kept our employees working. But if we are forced to operate these contracts we have no choice but to default and close our doors, leaving the town of Darrington with 50 per cent unemployment.

We think it is to our country's benefit to keep the independent sawmill operator in business so we can continue to supply the jobs necessary to keep local communities strong.

Thank you for your time. I will try to answer any questions you may have.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

ORDER OF BUSINESS

Mr. HELMS. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. Would the Chair advise the Senator from North Carolina of his anticipation of what time a vote on cloture will occur?

The PRESIDING OFFICER. It will occur after a live quorum has been established, which will occur at 1 p.m.

Mr. HELMS. A cloture vote will occur on the motion to call up, is that correct?

The PRESIDING OFFICER. On the motion to proceed.

Mr. HELMS. Yes, motion to proceed or call up.

All right. Mr. President, I hope——

The PRESIDING OFFICER. The hour of 1 p.m. has arrived.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The period for morning business has expired.

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

CLOTURE MOTION

The PRESIDING OFFICER. Under rule XXII, the clerk will report the motion to invoke cloture.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard Baker, Jake Garn, Alphonse D'Amato, Nicholas Brady, Bob, Dole, Dan Quayle, S. I. Hayakawa, Robert Stafford, Ted Stevens, Mark Andrews, Strom Thurmond, David Durenberger, Warren B. Rudman, John H. Chafee, Pete Domenici, John Heinz, and Jennings Randolph.

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER WAIVING RULE FOR LIVE QUORUM—VOTE ON CLOTURE MOTION TO OCCUR AT 1:40 P.M. TODAY

Mr. STEVENS. Mr. President, I ask unanimous consent that the live quorum required by the rules be waived in this instance and that the rollcall on the cloture motion commence at 1:40 p.m. today.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Mr. President, reserving the right to object, and I shall not object, as the Senator knows there are some Senators at the White House and at least one coming in on a plane. Does the Senator propose to run this vote a little longer than 15 minutes?

Mr. STEVENS. For the convenience of those Senators who are downtown, as well as those scheduled to leave, it is the intention of the leadership to start the rollcall vote at 1:40 p.m. to continue if for at least 20 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. The rollcall would be at least 20 minutes.

If there is any objection, Mr. President, I change the request to make it a rollcall vote which will be 20 minutes in length.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECESS UNTIL 1:40 P.M. TODAY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until 1:40 p.m. today, at which time the rollcall vote will commence.

There being no objection, the Senate, at 1:15 p.m., recessed until 1:40 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. RUDMAN.)

SURFACE TRANSPORTATION ACT OF 1982

VOTE ON CLOTURE MOTION

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the motion to proceed to the consideration of H.R. 6211, the Highway Revenue Act of 1982, shall be brought to a close? The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), and the Senator from Idaho (Mr. SYMMS) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Hawaii (Mr. INOUYE), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The yeas and nays resulted—yeas 75, nays 13, as follows:

[Rollcall Vote No. 401 Leg.]

YEAS—75

Abdnor	Ford	Murkowski
Armstrong	Garn	Nunn
Baker	Glenn	Packwood
Baucus	Gorton	Pell
Bentsen	Grassley	Percy
Biden	Hart	Pressler
Boschwitz	Hatfield	Quayle
Brady	Hawkins	Randolph
Bumpers	Hayakawa	Riegle

Exon	Levin	Zorinsky
Hatch	Nickles	
Helms	Proxmire	

NOT VOTING—12

Andrews	Dodd	Mathias
Bradley	Goldwater	Matsunaga
Cannon	Heinz	Moynihan
Cranston	Inouye	Symms

The PRESIDING OFFICER. On this vote, the yeas are 75, the nays are 13. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

The majority leader.

Mr. BAKER. Mr. President, as I recall the provisions of rule XXII, certain time may be assigned by yielding from other Senators to the two leaders and to the two managers. Is that correct?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. Would the Chair please state, for the benefit of all Senators, how that operates under the provisions of rule XXII post cloture?

The PRESIDING OFFICER. Each of the two leaders and each of the managers may have 2 additional hours yielded to each of them and each of those four, in turn, may yield to other Senators.

Mr. BAKER. From the time aggregated by the leaders and managers?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair. Of course, the time we are utilizing now will charge against my hour; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, at what point may that time be yielded; at any point prior to the disposition of the motion?

The PRESIDING OFFICER. At any point prior to the disposition of the motion, time may be yielded.

Mr. BAKER. Is it necessary for me to designate the manager of the motion on this side?

The PRESIDING OFFICER. As is the normal course, the managers are to be designated by the leadership.

Mr. BAKER. Mr. President, I designate the distinguished chairman of the Finance Committee, the Senator from Kansas (Mr. DOLE) as the manager for the proponents.

Mr. President, how is the time charged in respect to a quorum?

The PESIDING OFFICER. It is charged against the 100-hour cap. It is not charged against the time of any individual Senator.

Mr. BAKER. I thank the Chair. The Senator from Kansas has been designated as the manager on this side.

I inquire of the minority leader if he is prepared to designate a manager on his side. The reason I am pressing this point is some way has to be found to accommodate the time requirement of Senators who are in opposition. While they have 1 hour each, I can assure them from our side that we will be glad to try to accommodate requirements within the time allocated to the leader and the manager so that they may go forward with their debate within the provisions of rule XXII.

Mr. ROBERT C. BYRD. Mr. President, the minority designates Mr. LONG to handle the time on this side.

Mr. BAKER. Now Mr. President, first I would like to yield to the distinguished Senator from Idaho for a unanimous-consent request.

The PRESIDING OFFICER. The Senator from Idaho.

(The remarks of Mr. MCCLURE given at this point are printed later in today's RECORD under authority for committee to meet.)

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I yield my hour to the majority leader.

Mr. BRADY. Mr. President, I yield my hour to the majority leader as well.

Mr. BAKER. I thank both Senators, Mr. President.

Now, Mr. President, could I inquire of the distinquished Senator from New Hampshire and the distinguished Senator from Oklahoma about how much time they think they might require in order to complete the debate before the Senate votes on the motion to proceed?

Mr. NICKLES. The Senator from Oklahoma would like to use his time to the maximum extent possible. As to a time for a vote, I really do not know, but I expect it would be some time from now.

Mr. BAKER. Mr. President, I spoke earlier of the fact that time under the rule may all be under the control of those who perhaps will support the motion. Therefore, in order to do equity in this circumstance, I yield 1 of my hours of the 3 aggregated to me under the rule to the Senator from Oklahoma and 1 of the hours to the Senator from New Hampshire, which leaves me with 1 hour under my control and will leave the Senator from Kansas (Mr. DOLE) with 3 hours.

Mr. GORTON. Mr. President, I yield my hour to the Senator from Kansas.

Mr. GARN. Mr. President, I yield my 1 hour to the Senator from Kansas.

Mr. BAKER. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, it is not my desire or wish to detain the Senat or to keep us here until Christmas. It would be my desire that the leaders of this bill or the administration would pull it down. I personally do not believe this bill is in the best interests of our country and certainly not in the best interests of my State of Oklahoma.

Mr. President, may we have order?

The PRESIDING OFFICER (Mr. COHEN). The Senate is not in order. Will Senators standing in the aisle please take their seats or remove themselves from the Chamber?

The Senate will not proceed until such time as Senators now standing in the aisle take their seats or remove themselves from the Chamber.

Mr. NICKLES. I thank the Chair.

Mr. President, I believe there are a lot of reasons to be opposed to this bill. One, probably first and foremost, is that the bill has been considered urgent. It has been rushed. I do not think there have been proper hearings held on either side. We are in a lame-duck session. We are in this session that is supposed to last 3 weeks but we find ourselves condsidering a major tax bill. When I say "major," we are talking about multibillions of dollars. We are talking about a tax bill that will affect every single taxpayer in the United States, every motorist in the United States, not to mention that it will heavily tax individuals who are involved in the trucking industry.

It has been rushed through. We have been in the lameduck session for 2 weeks. We have been in this session for 2 weeks and now we find a bill on our desk, and I think I may be correct—I am not sure the bill is on our desk yet. We certainly have not seen a committee report. What we are really trying to do is to steamroll this thing through before we have had adequate time to properly consider it on its merits.

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. NICKLES. A parliamentary inquiry. Does the Senator from Oklahoma have 1 hour or 2 hours?

The PRESIDING OFFICER. Two hours.

Mr. NICKLES. Mr. President, I believe there are a lot of reasons why we should be opposed to it. When we look a little closer at what is in the bill, since we have not had a lot of time to consider what is in the Senate portion of the bill one can look at what is in the bill on the House side, there are a lot of things which are detrimental. There have been numerous editorials that would kind of illustrate the fact that some of the things can be and are detrimental, I believe, to the taxpayers of this country.

To kind of highlight some of the things, before I go into detail, a lot of this bill has been proposed as a jobs bill. Actually, I think there are more economists who, if they looked at the real essence of the bill, would openly admit the fact that this bill will not actually add jobs but it actually will detract from the number of jobs. In fact, it will be taking billions of dollars out of the private sector and moving it into the construction industry. No doubt, it will be good for the construction industry, but it certainly will not be good for the rest of us, for the rest of the taxpayers.

People talk about a nickel a gallon. What is a nickel a gallon? A nickel a gallon happens to be $1 every time you fill up a 20-gallon tank. For most of us who fill up a tank, most of the time we know it costs $20, $25, $26, depending on whether or not you fill it up by yourself or have some assistance. That is a lot of money to fill up a gasoline tank. I do not know that many motorists want to see it increased another nickel a gallon, to have it increased another $1 every time you fill up your tank.

As a matter of fact, I think if you took this to a poll of the people throughout the country, you would find overwhelming support against this bill, that the people are opposed to it.

I will get into my comments somewhat later on the number of people who are opposed.

I think there are a lot of reasons. It is a redistribution of income, and a lot of States, my State included, happen to really come out very poorly in the distribution. Historically, we have received only 74 cents out of every dollar that has gone into this fund. Today we find in the bill, as it is presently, that we receive 85 percent out of the 8 cents. In my State of Oklahoma, to give an example, in the formula of last year, we would lose about 20-some million dollars. If we double the tax from 4 cents to 8 cents, then our State will lose something like $40 million. That is not counting the additional penny in mass transit on which our State would probably lose an additional $15 million to $20 million a year.

The net result of this bill will be for my State of Oklahoma, and I might add several other States throughout the country, instead of just donating 20-some million dollars a year to the general highway fund, will be talking about something on the order of $40 million to $60 million a year that will be leaving our State and going to the other States.

There are a lot of other reasons to be opposed to this bill. Just to highlight a few, Federal contracts cost considerably more than State contracts. It is estimated by our State Highway Department in Oklahoma that if you complied with a Federal contract in comparison to State contracts, it costs as much as 30 percent more because we have to abide and live by those Federal rules and regulations that the States oftentimes in their wisdom decide not to utilize just because it is Davis-Bacon. And now I know this bill has a buy-American clause, and several other similar clauses.

Mr. President, there are a number of other reasons to be opposed to this bill.

A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. NICKLES. If a quorum call is placed, is that time charged to the Senator's time or against the bill?

The PRESIDING OFFICER. It is charged against the overall cap of 100 hours, but not against any individual Senator's time.

Mr. NICKLES. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EAST. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objetion, it is so ordered.

Mr. EAST. Mr. President, I should like to take a few minutes of the time allotted each Senator in this postcloture period to address some initial remarks to this question of the proposed 5-cent gas tax. I do this reluctantly because I have great admiration for many people in this administration, including the President, the Secretary of Transportation, and also, I might add, for the head of the Federal Highway Administration. I appreciate that this is being submitted in good faith by these gentlemen, who look upon it as a sound contribution to tax policy, to jobs, and to roads.

So I oppose in the spirit of reluctance, more in a spirit of regret and sadness than I do any kind of personal animus toward many of the very fine people supporting this measure.

My opposition is based solely on the merit and the substance of the bill.

Obviously, the measure has gone through the House of Representatives. It seems to be moving through the Senate. Ultimately, I presume the momentum here would suggest that the American people will be paying in due course another 5 cents per gallon on their gasoline.

We are told by the proponents of this measure, and rightfully and understandably so from their perspective, that this would be a good thing for the American people and they should commend their legislators and Congress for having accommodated them.

I simply do not share the wisdom nor the enthusiasm that is being shown in the House of Representatives and here in the Senate for this measure, with all due respect for my many able colleagues on both sides of the aisle who are supporting this measure.

Mr. President, what I shall do is to state very briefly that and then I will come back at a later time for greater elaboration within the time assigned to me as to why I do not think this is a good idea.

There are many reasons. I shall offer some that I think are a bit more compelling than others.

First of all, the tax is a regressive tax. It hits the working people the hardest. We cannot contend this is a luxury now. We are not taxing something that people do not need. In contemporary American society the automobile, though it may be abused from time to time, is a necessity. People must have it to get to work and to return. To be a part of American society, the overwhelming majority of the people of this country have to have access to an automobile.

It is a regressive tax, as I say, because, of course, regardless of income level all must pay this tax, and it hits those in the middle and lower range of the economic scale the hardest. Of course, in a time of recession it would seem to be most unfortunate to burden the working people of this country with a tax not upon a luxury but upon a necessity; namely, their gasoline.

I might note I have not read of any economist of note on any part of the ideological economic spectrum or political party spectrum who commends taxation in time of recession. We are trying to encourage spending and as we take additional money out of the pockets of the working people of this country they will have less to spend on other things. Increasing taxes in time of recession is poor economics and then when we compound it with the fact that this is regressive tax, it is a double whammy, and again it hits hard right in the center of the Ameri-

can economy, the middle class, the working people, and those at the lower end of the economic scale.

I prefer not to be a part of the assault upon those dear souls who are the ones who make this country work and make it click. They are the ones who bear the burden of the function of this economy.

Mr. President, another objection I have to it, aside from it being regressive and coming about in a time of recession, we are told it is a user fee tax. Actually, it is not a user fee tax, because user fees are used to fund a particular thing that is being taxed.

To put it another way, we should not be diverting one-fifth of money into mass transit because by definition people who use mass transit are not using the highways, the biways, the roads, and the bridges. They are using mass transit. So it is not a user fee.

We are in an age of euphemisms. Instead of taxes, we talk about revenue enhancement and user fees. But I suspect that the good commonsense of the American working people know a rose when they see one, and a rose is a rose by any name, and this is a tax.

The thing from the user fee standpoint, which often can be a very commendable thing, is we are breaching that very fundamental notion of tax law that when we have a user fee, do not divert portions of it to other expenditure, and we are doing that here. We are doing it for mass transit. That I find objectionable.

It is also objectionable, Mr. President, on the idea that it creates jobs. At best, it is a jobs transfer program because, for example, in the State of North Carolina it is going to hurt tourism down there. We are a big State. We are a big donor State to the Federal Highway Fund, an agricultural State, that is rural, big, and the 10th largest State in the country. Historically, we have only gotten 74 cents of the dollar we have turned in.

It is hard to explain to the good people of North Carolina, particularly the working people, why they should want even more of this.

Tourism is big in North Carolina. It is big in the western part of the State. It is big in the Piedmont. Asheville is one of the great areas of resort activity in this country, and there is the whole beautiful mountain area of the western part of our State, the Piedmont area. Then down in the southern pines is, Pinehurst, a great golfing area, and then over on the eastern part of the State are Atlantic Beach, Morehead City, the Outer Banks, and Nagshead. People get there by automobile.

What this tax will do will be to discourage working people from going down there because of the cost.

So for every alleged job we might conceivably pick up in the construction industry, we are going to hurt in filling stations, tires, and restaurants. We are going to hurt people in North Carolina and, frankly, other parts of the country who are servicing tourism.

So at best this is a jobs transfer bill. And, of course, even if it produced all the jobs that some contend it would, it would be a mere drop in the bucket for the 11 million Americans who are unemployed.

The way we will get these people back to work and keep them at work all across the economic spectrum is to get interest rates down, get the Federal Reserve Board to appreciate the incredible damage they have done to this country by keeping the interest rates at abnormally high levels historically and also for Congress ultimately to get spending under control. That is what we should be doing. We should be getting control of the rate of growth of Federal spending here in Congress and the Federal Reserve Board should be getting interest rates down. That is where the action would be to revitalize the American economy, not a 5-cents gas tax on the working people of this country to put an alleged 300,000-and-some people to work where it is questionable whether we will even do that an even if we did we are going to displace jobs in other sectors of the economy.

Some people may think that all sounds good. I do not, and I respectfully dissent from it.

Also, Mr. President, I would note as a matter of opposition to this particular measure that at some point in trying to tax a commodity you kill the goose that laid the golden egg. We are going to eventually tax gasoline so much in this country people will quit using it, so you are going to have fewer funds, less money, available for highway construction, expansion, and maintenance. It is a risk we are running here.

There are many other reasons, Mr. President, why I think our colleagues here in the Senate ought to think very carefully before they move quickly and rapidly along the road of passing this incredible tax and, of course, there are all these sweeteners in this bill—a great burden on truckers—and this is very bad in North Carolina. It is very bad not only for the trucking industry, it is going to be bad because so many commodities in my State, which is rural and needs the use of trucks—and this is true of so many States in this Union—that it is going to increase the cost of products to consumers. It will take more to drive a big truck from Raleigh to Nags Head. Who is going to pay that? The consumer, who is ultimately going to pay it, will suffer, and so the trucking industry is going to suffer.

All in all, the 5-cent gas tax and all of the other ornaments which have been attached to this bill, I cannot in good conscience support in spite of the many distinguished colleagues here in this Chamber and in the House of Representatives who support it.

I would like to commend the leadership that is being shown here by, among others, of course, Senator NICKLES, Senator HUMPHREY, and Senator HELMS. It will probably turn out to be a very small group which will ultimately oppose this. The great majority, understandably so, in a representative democracy will finally work its will, and I understand that, and that is the way it ought to be. But I, as one Senator, want the record to show clearly and categorically, without equivocation, that I think it is a bad idea. It is going to hurt the American economy and, above all, it is going to hurt the working people in this country.

They are bearing enough burden right now in a period of recession without adding a regressive tax right at the depth of our economic uncertainty.

Mr. President, I look forward at a later time to coming back and examining some of these things with my colleagues in greater detail.

QUORUM CALL

I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. NICKLES. Objection.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Objection is heard.

The legislative clerk resumed the call of the roll and the following Senators entered the Chamber and answered to their names.

[Quorum No. 48 Leg.]

Baker	Garn	Quayle
Baucus	Hollings	Stevens
Cohen	Kassebaum	Wallop
Danforth	Long	
East	Nickles	

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of the absentees.

Mr. BAKER. Madam President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER). The yeas and nays were ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from Colorado

(Mr. ARMSTRONG), the Senator from New Jersey (Mr. BRADY), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), and the Senator from Idaho (Mr. SYMMS) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Colorado (Mr. HART), the Senator from Hawaii (Mr. INOUYE), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Maryland (Mr. SARBANES) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 79, nays 7, as follows:

[Rollcall Vote No. 402 Leg.]

YEAS—79

Abdnor	Gorton	Murkowski
Baker	Grassley	Nickles
Baucus	Hatch	Nunn
Bentsen	Hatfield	Packwood
Biden	Hawkins	Pell
Boschwitz	Hayakawa	Percy
Bumpers	Heflin	Pressler
Burdick	Helms	Pryor
Byrd, Robert C.	Hollings	Randolph
Chafee	Huddleston	Riegle
Chiles	Humphrey	Roth
Cochran	Jackson	Rudman
Cohen	Jepsen	Sasser
D'Amato	Johnston	Schmitt
Danforth	Kassebaum	Simpson
DeConcini	Kasten	Specter
Denton	Kennedy	Stafford
Dixon	Laxalt	Stennis
Dodd	Leahy	Stevens
Dole	Levin	Thurmond
Domenici	Lugar	Tower
Durenberger	Mattingly	Tsongas
Eagleton	McClure	Wallop
East	Melcher	Warner
Exon	Metzenbaum	Zorinsky
Ford	Mitchell	
Glenn	Moynihan	

NAYS—7

Boren	Garn	Quayle
Byrd, Harry F., Jr.	Long	Weicker
	Proxmire	

NOT VOTING—14

Andrews	Cranston	Mathias
Armstrong	Goldwater	Matsunaga
Bradley	Hart	Sarbanes
Brady	Heinz	Symms
Cannon	Inouye	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Madam President, how much time does the Senator from New Hampshire have?

The PRESIDING OFFICER. The Senator has 2 hours.

Mr. HUMPHREY. May we have order, Madam President?

The PRESIDING OFFICER. Senators wishing to talk should retire to the cloakroom.

Mr. HUMPHREY. Madam President, an article appeared in yesterday's Washington Post written by the Governor of Vermont, the Honorable Richard A. Snelling, who, in addition to holding that high office in the State of Vermont, was president of the National Governors Association during the year 1981-82.

In this article, which I shall read into the RECORD, Governor Snelling comes out in opposition to the pending gasoline tax. I find his article all the more credible inasmuch as his State of Vermont is a net donee; it would be a net beneficiary on a ratio of $1.68 in highway funds per $1 paid by the residents of Vermont. There are a few States that would benefit more in this respect than the State of Vermont, and yet the Governor of that State has written a highly informative opinion in opposition to the gasoline tax. It reads as follows:

No matter what combination of the three "quick nickel" highway bills now before Congress is ultimately passed as a result of the current steamroller in Washington, the bill will not do the things its backers have promised. Specifically, the quick nickel will not do anything about the current severe unemployment problem (except possibly make it worse) and it will not fill potholes.

The White House (correctly) denies that this is a jobs bill. Nevertheless, the Department of Transportation tells anybody who will listen that precisely 170,000 jobs will be created. The only reason the bill is being considered at all in the lame-duck session is the great need of Congress to appear to do something about the unemployment situation.

The bill is not going to create jobs. In its early years, it takes more money out of the economy than it puts back in. Neither a Keynesian nor a supply-side economist would claim that sending more money to Washington is a way to create jobs.

If we don't have to send that $5.5 billion a year to Washington, we will presumably spend it to buy something else. If we do send that money to Washington, we won't be able to use it to buy something else. Whoever makes that "something else" will lose his or her job. Eventually, some of the money will result in creating some new construction jobs while eliminating jobs elsewhere in the economy.

Since the money leaves our pockets well before it ever comes back from Washington, the short-term effect will be a loss of jobs and not a gain. To make things even worse as far as jobs are concerned, it is unlikely that all states will be able to spend all the money that will theoretically be available to them. This federal money must be matched by state money. Since many states are already having difficulty matching the federal funds they are now eligible for, it is unlikely that these states will be able to match any more federal funds—especially since the federal government is planning to preempt their ability to raise state gas taxes.

The bill is touted as a way to fill the nation's potholes. There are certainly plenty of potholes that need filling. However, this bill simply extends existing federal highway programs, and federal highway money is not available for filling potholes under these programs unless the whole road is repaved. As a matter of fact, the road also has to be "wide enough" and "straight enough" to meet federal standards in order to qualify for this repaving money.

There are roads that do need to be completely reconstructed. There are also other roads that simply need to have their potholes filled and their cracks sealed. It is because of a lack of pothole-filling and crack-sealing over the last decade that so many roads need to be completely repaved or reconstructed now. This bill continues the tradition of encouraging massive reconstruction rather than simple preventive maintenance.

Many states, including Vermont, already need to raise their own gas taxes this year to meet unmet maintenance requirements. It is unlikely that those states will want to impose any further "user charges" on top of a large federal increase. When states raise their own gasoline tax, they can use the money from that increase to meet their most urgent priorities—whether those priorities be pothole-filling or new construction. It has been known for a long time that state-only projects are cheaper and can be done more quickly than projects using federal money.

It is easy to understand why those who have been frustrated by Congress' inability to pass a multi-year highway bill are jumping aboard the quick-nickel steamroller. They are afraid that, if Congress does not pass this bill now, it will never address highway needs constructively. They are willing to accept any bill, even a bad bill, as long as there is some more money for highways.

Nevertheless, a bad five-year bill passed during the lame-duck session will be worse for the nation than no bill at all. It will neither create jobs nor fill potholes. It will frustrate the ability of the states to achieve these goals themselves.

Although many states will be winners from the quick nickel, others will be substantial losers. The Reagan administration dedicated itself to a restructured federalism, which recognized the diversity of needs and problems in the different states. It is ironic that this administration is pushing a bill that extends federal decision-making even further and cripples the ability of states to meet their individual highest priority needs.

This lame-duck Congress ought to go home. After the Christmas recess, a new Congress should come back and address the nation's transportation (and other) problems in a constructive way. The quick nickel ought to be allowed to die a quick death.

I repeat again, Madam President, that this article, published yesterday, was authored by Richard A. Snelling, the Governor of the State of Vermont, a State which would benefit substantially by the passage of this bill inasmuch as it would receive $1.68 for every $1 paid in gasoline taxes by that State.

Parliamentary inquiry, Madam Chairman. Is there a quorum present?

The PRESIDING OFFICER. After cloture, the Chair does have authority to count and see if a quorum is present. If, indeed, there is not a quorum present on that count, then a quorum call will ensue.

Is that what the Senator from New Hampshire is asking that the Chair do?

QUORUM CALL

Mr. HUMPHREY. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. NICKLES. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will call the roll.

The bill clerk resumed the call of the roll and the following Senators entered the Chamber and answered to their names.

[Quorum No. 49 Leg.]

Abdnor	Humphrey	Nickles
Baker	Jepsen	Nunn
Cochran	Kassebaum	Quayle
Denton	Kasten	Randolph
Domenici	Leahy	Schmitt
Grassley	Lugar	Thurmond
Helms	Melcher	
Huddleston	Moynihan	

The PRESIDING OFFICER. A quorum is not present.

Mr. BAKER. Madam President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators, and I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from New Jersey (Mr. BRADY), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), and the Senator from Idaho (Mr. SYMMS), are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Colorado (Mr. HART), the Senator from Hawaii (Mr. INOUYE), the Senator from Michigan (Mr. LEVIN), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Maryland (Mr. SARBANES) are necessarily absent.

The PRESIDING OFFICER (Mr. HAYAKAWA). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 81, nays 6, as follows:

[Rollcall Vote No. 403 Leg.]

YEAS—81

Abdnor	Exon	Moynihan
Armstrong	Ford	Murkowski
Baker	Glenn	Nickles
Baucus	Gorton	Nunn
Bentsen	Grassley	Packwood
Biden	Hatch	Pell
Boschwitz	Hatfield	Percy
Bradley	Hawkins	Pressler
Bumpers	Hayakawa	Pryor
Burdick	Heflin	Randolph
Byrd, Harry F., Jr.	Helms	Riegle
	Hollings	Roth
Byrd, Robert C.	Huddleston	Rudman
Chafee	Humphrey	Sasser
Chiles	Jackson	Schmitt
Cochran	Jepsen	Simpson
Cohen	Johnston	Specter
D'Amato	Kassebaum	Stafford
Danforth	Kasten	Stennis
DeConcini	Kennedy	Stevens
Denton	Laxalt	Thurmond
Dixon	Leahy	Tower
Dodd	Lugar	Tsongas
Dole	Mattingly	Wallop
Domenici	McClure	Warner
Durenberger	Melcher	Zorinsky
Eagleton	Metzenbaum	
East	Mitchell	

NAYS—6

Boren	Long	Quayle
Garn	Proxmire	Weicker

NOT VOTING—13

Andrews	Hart	Matsunaga
Brady	Heinz	Sarbanes
Cannon	Inouye	Symms
Cranston	Levin	
Goldwater	Mathias	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

Mr. HELMS. Mr. President, some of us have been discussing rule XXII and its implementation with respect to the rule prohibiting two speeches.

Just as a matter of record, let me share with Senators a colloquy that occurred on January 25, 1926, page 2686 of the RECORD:

Mr. SMITH. Mr. President, I rise to propound a parliamentary inquiry.

As I understand the operation of rule XXII a Senator may speak in all 1 hour but may divide his time as is convenient and as the time will permit until his hour is consumed. Am I correct in that?

The VICE PRESIDENT. That is my understanding.

Mr. HEFLIN. Mr. President, it is my understanding that a Senator can speak only once and not over an hour.

Mr. SMITH. My interpretation of the rule is that the Chair shall keep a record of the time consumed and that a Senator may divide his time.

The VICE PRESIDENT. The Senator from South Carolina is correct. The agreement provides that thereafter no Senator shall be entitled to speak in all more than 1 hour on the pending measure.

Mr. President, if the circumstances had developed with respect to the two-speech rule, I would have been loath to appeal the ruling of the Chair because I would not want a precedent to be made under the circumstances existing here today.

But I do wish for Senators to take note of what transpired on January 25, 1926, in this body.

Now there may be a later precedent of which I am not aware, but historically at least for the 10 years that I have been in the Senate, Senators may have been permitted to speak as often as they wish for so long as they did not consume more than the time alloted to them.

Mr. President, I thank the Chair.

Mr. BAKER. Mr. President, if I may have the attention of the Senate, I hope we can get on with the business at hand. The business at hand, of course, is to conclude the debate on the motion to proceed to the consideration of the highway bill. I asked the clerk to total the time that has been utilized so far. Really, even though we have been on this measure for most of the day, we have only burned up a little less than an hour in the aggregate. That leaves me with a terrible choice.

I can ask Senators to remain on the floor so we have a quorum and the Chair can observe as much, with the possibility of denying a request for the yeas and nays and the other rather harsh steps that may be taken in order to move us along.

Mr. STENNIS. If the Senator will yield to me, Mr. President, this is important. We cannot hear, cannot understand. Will the Chair get silence, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER, Mr. President, that is not my desire. I really do not want to do that. It is awkward and, at very best, it will cause a massive inconvenience for Senators.

Cloture on a motion to proceed, to tell you the truth is one of the few cloture motions that you could probably still do any good with in that the motion is not amendable. Therefore, you do not have the danger of a postcloture filibuster by amendment, but it still takes a long time to burn up the time that is available under rule XXII postcloture.

I understand that Members may have a great concern about when this measure is scheduled, assuming that we get to it, and that is a valid concern. I understand that. I am willing to take account of those concerns and the convenience of the maximum number of Senators, but we have to get to this bill.

May I inquire of the Senator from Oklahoma and the Senator from New Hampshire if they would perhaps be prepared to let us go ahead and dispose of the motion to proceed to the consideration of this measure if consent was granted and if I assure them that if that motion passes we would schedule this debate to start in earnest sometime during the day tomorrow?

There are other matters that we could take up I think to good effect today, so, if that would help ease their

burden and if that would help facilitate the action of the Senate, I would be perfectly willing to consider doing it.

Mr. HUMPHREY. Mr. President, will the majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. HUMPHREY. I think I can speak on behalf of the Senator from Oklahoma and the Senator from North Carolina. It is not our wish to hold up other important business. We are perfectly amenable to any reasonable agreement to expedite other items of business.

Mr. BAKER. I thank the Senator. Let me put this request then, Mr. President, with the hope that we might be able to liquidate this issue.

ORDER FOR DEBATE ON H.R. 6211 TO BEGIN AT 2 P.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, if the motion to proceed prevails, debate on this bill begin at 2 p.m. tomorrow.

Mr. DOLE. On the bill.

Mr. BAKER. On the bill. The motion will be disposed of today but debate will be postponed, this measure will be temporarily laid aside and would recur as the pending business and debate would begin tomorrow at 2 p.m.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, with that unanimous-consent agreement, I wonder if the Senators would consider yielding back their time so that we can put the question on the motion to proceed.

Mr. NICKLES. The Senator from Oklahoma would be happy to yield his time.

I believe neither Senator from North Carolina would wish to be heard. There may be other Senators who wish to be heard, but as far as my own time is concerned, I would be happy to yield it back.

Mr. BAKER. I thank the Senator.

Mr. HUMPHREY. The Senator from New Hampshire will yield back all of his remaining time.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. RANDOLPH. Mr. President, who has the floor?

Mr. BAKER. Mr. President, does the Senator from West Virginia wish me to yield to him at this point?

Mr. RANDOLPH. Yes, just for a moment.

Mr. BAKER. Yes, I yield to the Senator.

Mr. RANDOLPH. Mr. President, there are those of us in this Chamber who believe that it is important to rebuild the vital transportation network of the United States. We believe it is imperative that it be done properly. This would include, of course, highways, bridges, and other forms of transportation, perhaps portions of the transit system.

Will the able majority leader tell me how this Senate can come to grips with this priority and a vote on the issue?

Mr. BAKER. Mr. President, I thank the Senator. As he knows, I support this bill. I am going to try very hard to pass this bill, but, like everything else we do in the Senate, we have to do it a step at a time. I think, through the good cooperation of the Senators from New Hampshire, Oklahoma, and North Carolina, we are about to reach the place where we will actually have the merit of this bill before us at 2 o'clock tomorrow afternoon.

When that time comes, I assure the Senator from West Virginia that I will be with him in trying to pass this measure; it is my hope that we can do so.

Mr. RANDOLPH. Will the majority leader yield for further comment?

Mr. BAKER. Yes, I yield.

Mr. RANDOLPH. I respect my colleague from New Hampshire. I remind him that he has had a notable career in the field of air transportation. I recall that in Congress we passed in 1944 a program which brought into being a network of needed airports in this country. It was accomplished because the Congress took action. I worked diligently for the enactment of that necessary law. We established several hundreds of airports throughout the country for scheduled, chartered, and private flying facilities as well as for defense purposes.

We are at the time in the history of our transportation system when we have a decision to make. Shall we allow in the coming weeks and months a further deterioration of our national transportation system. There are attempts being made to keep the Senate from coming to a vote. I disagree with a delay. I do understand differences on how a Member votes—I hope, however, that the Senator will permit us to vote on this constructive measure.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to, will the majority leader be good enough to give us some indication as to what he intends to take up between now and 2 p.m. tomorrow?

Mr. BAKER. Yes. Mr. President, I say to the Senator from Ohio that it depends a lot on what we can clear on both sides of the aisle. However, as I have indicated earlier, it is my desire to take up whatever appropriation bills we can find. I hope that we would be able to clear next the Interior appropriations bill.

Mr. METZENBAUM. I thank the majority leader.

The PRESIDING OFFICER. The question is on agreeing to the motion to proceed.

The motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, under the order previously entered, the matter is automatically laid aside until 2 p.m., tomorrow is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, the Surface Transportation Assistance Act of 1982, or gas tax bill, although touted by some as a jobs-creation proposal to deal with current high unemployment, may not produce a net increase in the number of jobs, particularly in the crucial short run. In the long run, economic benefits—and thereby jobs as an indirect result—could be achieved by improving the Nation's transportation system. But, for several reasons, this program may instead destroy more jobs than it creates, especially in the crucial immediate future.

Public works projects are typically more capital than labor intensive, with highway construction and repair programs probably even less labor intensive than other possible targeted jobs programs. A November 30 Wall Street Journal article by Bruce Bartlett, the Deputy Director of the Joint Economic Committee, cites OMB figures revealing that only 22 percent of a typical public works project is spent directly on employment. Further, OMB has found that few—25 percent or less—of workers employed on these projects were unemployed before being hired for these programs. And as for helping the hard-core unskilled, unemployed worker, since half to three-quarters of public works projects jobs require skilled labor, these targets of concern are unlikely to benefit from such programs.

As well, the costs in these programs of any job creation are also high, particularly because compliance with Davis-Bacon regulations means that union, or near union, scale rates will have to be paid. The Bureau of Labor Statistics reports that one-third of all construction workers are represented by labor unions, a high percentage

compared to other industries. The Bureau also reports that construction work receives the highest average weekly earnings of all employed full-time union-represented wage and salary workers in their industry breakdown. (Bureau of Labor Statistics, "Earnings and Other Characteristics of Organized Workers," May 1980, Bulletin 2105.) As a result, the Davis-Bacon requirements would make the cost of each alternative job created by a highway construction and repair program the most expensive of any public works project. With each single alternative job costing more, fewer jobs could be created by this program, thereby enhancing the possibility that its net result could be an overall decrease in employment.

Also undermining the jobs-creation potential of public works programs are the factors of "job substitution" and "replacement spending." Experience with these programs has shown that Federal expenditures on them increasingly replaces comparable State and local expenditures, that Federal employment in such jobs replaces positions on State and local payrolls. As a result, there is little, if any, net job creation, only substitution.

Similarly, experience and commonsense tell us that the extra money spent by the taxpayer consumer to buy gasoline will thus not be available to be spent on other commodities, thereby reducing demand and, ultimately, jobs in competing industries. And, since the tax would be collected prior to the spending and new, alternative job creation, there well could be a net decrease in jobs in the short run.

Unfortunately, a highway construction and repair program might also have a detrimental effect on jobs in one of the currently most depressed segments of our economy—the automobile and related industries. For higher gas prices well might encourage even more American consumers to purchase smaller, more fuel efficient cars just as did the earlier OPEC-induced gas price rise.

In response to my inquiry of December 1, Dr. Alice Rivlin has confirmed this evaluation of several aspects of the bill's shortrun jobs-creation potential. In a responding letter she states:

But in the short run, the net employment effects . . . would be very small, and could be either positive or negative. Whether the net employment impact would be positive or negative would depend on four factors: timing, incidence of the tax, labor intensity of the projects, and the conduct of monetary policy . . . if the tax were imposed before actual outlays occur . . . the net effects would be to drain purchasing power from the economy. As a result, employment would probably decline in the short run, although the federal budget deficit would also be reduced somewhat. . . . To the extent that the tax lowers consumer incomes in the short run, it would result in lower consumption of other goods. On the other hand, if the tax were paid out of business profits, then it would lower subsequent business investment. . . . Highway construction and repair is generally thought to be less labor intensive than many other types of targeted programs. Thus, as a program to create jobs, highway construction may not compare well with other possible programs. . . . Any upward pressure on prices resulting from the gasoline tax would place similar upward pressure on interest rates and weaken the net effects of the program on the real economy. . . .

I ask unanimous consent that the full text of Dr. Rivlin's letter, as well as the Bartlett Wall Street Journal article, be printed at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HATCH. Mr. President, the Congress should undertake a careful review of the needs for highway and related construction and determine if or how much investment is required for any transportation initiative, and only then should this type of legislation be considered. Imposing this burden now, however, is precipitous action which most likely would destroy rather than create jobs for Americans.

I commend Congress concern for creating jobs. But jobs can be created only by eliminating the numerous formidable barriers to a healthy economy. These include an erratic monetary policy, excessive and costly regulations, and Federal spending which crowds out more efficient and effective programs and which constitutes too large a percentage of the gross national product. I encourage the Senate to concentrate on these barriers in its efforts to fight unemployment.

Therefore, since I am not convinced that there are benefits for the economy, and since Congress has failed to investigate this matter thoroughly and determine the merits of such a program, I am extremely concerned about whether or not to support this legislation.

EXHIBIT 1

[From the Wall Street Journal, Nov. 30, 1982]

PUBLIC WORKS PROGRAMS DON'T CREATE JOBS

(By Bruce Bartlett)

As Congress reconvenes for a lame-duck session, congressional leaders seem united on the need for a new public works jobs program to combat unemployment, financed by an increase in the gasoline tax. President Reagan has said he supports the proposal primarily because of the deteriorating state of the nation's highways. Unfortunately, it is highly unlikely that such a program will have any significant impact on reducing the unemployment rate. Indeed, it may even increase joblessness.

The principal problem is that business cycles can seldom—if ever—be identified until they have substantially run their course. Consequently, federal jobs programs invariably aren't enacted or implemented until the recession is virtually, or even entirely, over. This is particularly so because politicians are inclined to react to the unemployment rate, which lags behind the business cycle, rather than to changes in real GNP growth.

For example, the 1954 Economic Report of the President, submitted to Congress in January, asserted that the economic state of the nation was "marvelously prosperous," although a downturn had begun the previous July. Similarly, it was not until late in 1960 that it was recognized that a recession had begun in April. And the relatively brief 1969-70 recession was over almost before anyone realized it was taking place.

JOBS WON'T BE CREATED IN TIME

Consequently, counter-cyclical jobs programs could not even be enacted until well after a recession had begun. Although the 1960-61 recession ended in February 1961, anti-recessionary actions were still being taken in September 1962, when Congress adopted a $900 million accelerated public works program to combat the recession that ended 19 months earlier. The Public Works Impact Program was approved in 1972 to fight the recession that ended in 1970. And two public works programs were enacted in response to the 1973-75 recession: one in 1976 and another in 1977.

In addition, a public works program—even if enacted in a timely fashion—will require a significant period before coming on stream. According to a study by the Office of Management and Budget in 1979, less than 8 percent of public works projects can be completed in nine months or less, whereas 30 percent require two years or more. Hence, even if a public works program could be enacted at the beginning of a recession and construction begun within 90 days, the vast bulk of employment wouldn't be created until long after the average recession—which lasts about 12 months—had ended.

Another problem is the relatively low labor intensity of public works projects and the considerable mismatch between the job skills required for construction work and those of the unemployed.

According to OMB, the typical public works project expends only 22 percent of its cost on direct employment. The other 78 percent of expenditures have only indirect employment effects no different from a general increase in government expenditures. In addition, OMB found that very few workers employed in public works projects were unemployed prior to being hired—as few as 12 percent in one program studied and no more than 27 percent in another. And because 50 percent to 75 percent of jobs on public works projects are skilled, the chances of such a project helping unskilled, hard-core unemployed are almost nil.

Finally, OMB found that public works were a relatively high-cost method of creating employment—from $69,320 for each direct job created, assuming no substitution for existing employment, to as much as $198,059 per job with 65 percent substitution. The problem is twofold: First, federal public works projects must comply with Davis-Bacon regulations, which effectively force the payment of high, union wage rates on all projects.

Second, experience has shown that federal public works expenditures simply replace a large amount of state and local government expenditures for public works, meaning there is no net job creation. The amount of this substitution rises the longer a program is in place, reaching as much as 100 percent according to some estimates.

In addition to the problem of substitution, there is also the problem of job displace-

ment. The jobs program will destroy some jobs even as others are created. This is because the program will cause a reduction in spending for some other federal program, an increase in taxes, or the displacement of private expenditure due to "crowding out."

Putting all this together, consider the current proposal to increase federal expenditures for road and bridge repair funded by a five-cent increase in the gasoline tax. We are already 15 months into the recession, with many indicators showing it to be ending. It will take Congress several weeks to enact the proposal even if it works at high speed, with the possibility that final action cannot be completed before adjournment. It isn't such a simple thing for Congress to raise the gasoline tax without also opening up the bill to other tax issues, such as President Reagan's plan to speed next year's tax cut.

Nor will it be easy for Congress to devise a formula for allocating public works money that is fair to everyone. Thus there will probably be considerable debate on the form of the legislation even if there is consensus on the need for it. Assuming Mr. Reagan signs such legislation this year, moreover, it is doubtful that the first dollar can be spent until next spring at the earliest, with fall being a more reasonable starting time.

Also, it is highly unlikely that economic conditions won't have improved by next fall. This means the program will end up being pro-cyclical—increasing, rather than diminishing, business fluctuations. The program will take effect just when it will end up doing harm rather than good.

Perhaps most important, the gasoline tax boost will have negative effects on employment that no one has taken into account. It is certainly not going to do any good for the hard-hit U.S. auto industry. It may simply accelerate the purchase of smaller, more fuel-efficient foreign cars just as the OPEC oil price increase did.

And even if we assume that as many jobs are created as are destroyed—a very questionable assumption—the tax is likely to be implemented first, meaning that the job-destroying effect of the tax will occur before the job-creating effect of the public works spending. Even if the public works spending and the tax could be matched in the timing of dollar flows, the effect would simply be a trade-off between construction-related jobs and auto-related jobs.

QUICK FIX ISN'T THE ANSWER

There also will be regional impacts, since the jobs created are unlikely to be exactly where the unemployed currently are or where the additional job loss from the gasoline tax will be. We may end up creating more unemployment in Detroit while creating a labor shortage somewhere else. Congress also ought to consider that any gasoline tax increase will be permanent, whereas the public works will create jobs only temporarily. Thus there will almost certainly be more unemployment in the long run than if Congress does nothing.

The old-fashioned Keynesian remedy assumed that public works were paid for by deficits. Congress could adopt this method in lieu of enacting a new gasoline tax. But given a deficit already approaching $200 billion and the fact that it would require some $80 billion in public works expenditures to knock one percentage point off the national unemployment rate, this approach seems implausible.

Moreover, it is unlikely that politicians could argue today, as they did earlier, that there are no negative effects from federal deficits. Many people believe that they are primarily responsible for high interest rates. If this is the case, we would simply be trading jobs in construction for others in housing and other interest-rate-sensitive industries, not to mention the negative impact of higher interest rates throughout the country.

The human cost of 10.4 percent unemployment is unacceptable. But at some point we must admit to ourselves that quick-fix public works programs aren't the answer. Instead of reacting to the last recession we ought to be working to make sure that the recovery can be sustained.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 9, 1982.

Hon. ORRIN G. HATCH,
Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your letter of December 1, requesting information on the net employment effects of the proposed gasoline tax and highway spending program. In order to provide you a timely response, we have not done a complete, quantitative analysis of the employment effects of the proposed program. Instead, the analysis that follows is based upon the general characteristics of programs of this type.

In the long run, significant economic benefits would certainly be achieved by improving the nation's transportation system. An efficient, well maintained highway system would be a major factor in creating jobs throughout the economy. But in the short run, the net employment effects of raising the motor fuels tax by five cents and spending the resulting revenues on highway repair and construction would be very small, and could be either positive or negative. Whether the net employment impact would be positive or negative would depend on four factors: timing, incidence of the tax, labor intensity of the projects, and the conduct of monetary policy.

With regard to timing, if the tax were imposed before actual outlays occur in the highway program, the net effects would be to drain purchasing power from the economy. As a result, employment would probably decline in the short run, although the federal budget deficit would also be reduced somewhat as well. The Administration proposal would make the motor fuels tax increase effective this coming April. But the historical experience of the highway trust fund has been that only 50 percent of new contract authority is obligated in the first year that it is available, and actual expenditures are spread out over the next several years. Thus, it is likely that revenues would be raised before higher spending actually occurs. As a result, short-term employment might decline slightly, although this effect would be mitigated as expenditures rise. In addition, the Congress could avoid some of this early decline by phasing in the tax according to a schedule based on actual spending rates from the Highway Trust Fund.

The second factor concerns how much of the motor fuels tax would be paid out of consumer disposable income and how much from business profits. To the extent that the tax lowers consumer incomes in the short run, it would result in lower consumption of other goods. On the other hand, if the tax were paid out of business profits, then it would lower subsequent business investment—but this reduction would probably occur more slowly. About 30 percent of motor fuels taxes are currently paid by profit-making entities. Moreover, there is a substantial probability that some portion of the tax would be borne by oil refiners, who would be unable to pass the entire five cents forward to consumers. If this occurs, it would increase the portion of the tax paid for by businesses. Over the long run, a larger incidence of the tax on business profits would lower the rate of capital accumulation somewhat and reduce the productive potential of the economy.

The third point concerns the labor intensity of the highway construction and repair projects. Highway construction and repair is generally thought to be less labor intensive than many other types of targeted programs. Thus, as a program to create jobs, highway construction may not compare well with other possible programs. Nevertheless, this spending program would contribute to the nation's capital stock in a way that might prove beneficial to the economy and hence to employment over the longer run.

The final point to bear in mind is the impact of the program on inflation and interest rates. Any upward pressure on prices resulting from the gasoline tax would place similar upward pressure on interest rates and weaken the net effects of the program on the real economy.

Please do not hesitate to contact me if I can be of further assistance. With best wishes.

Sincerely,

ALICE M. RIVLIN,
Director.

THE SEARCH FOR A BETTER IDEA

Mr. PERCY. Mr. President, it is not news for me to say that the economic health and well-being of the United States is increasingly dependent on the strength of the world economy and visa versa. However, there is a paucity of creative ideas on how best to enhance the soundness of the international economic system. I was, therefore, particularly pleased that one of America's foremost industrialists—Henry Ford II—has been creating thinking about ways to improve economic cooperation among the NATO allies, Japan, and the United States.

At a recent meeting of the American Chamber of Commerce in London, Henry Ford II urged the United States, Japan, and the NATO allies to develop the equivalent of an "economic NATO." He makes a compelling argument that we should design a collective approach to economic matters just as we apply a common approach to security and defense matters.

When Henry Ford II speaks of the current "extraordinary international mishmash of trade barriers and tariffs and domestic content laws and custom regulations," we should pay attention. He states clearly that there is much talk about free trade in the Western world, but too much toleration of trade barriers. Ford argues that "protectionism in the long run can touch off a worldwide trading war in which nobody wins while the recession esca-

lates into a global depression of disastrous consequences for all nations."

I commend Henry Ford's speech to my colleagues and ask unanimous consent that it be inserted in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

[News From the World of Ford]

THE SEARCH FOR A BETTER IDEA

As some of you may know, I spend a great deal of time in Britain these days—especially in the spring and fall—so therefore I was most flattered and appreciative of your generous offer to talk to this distinguished audience in this international capital of government and commerce. As you well know, we in the United States have always felt something special—a kinship, if you will, with Britain. Nothing better exemplifies our mutual relationship and interdependence than the American Chamber of Commerce in London.

Since my retirement from executive duties as board chairman three years ago, I have enjoyed the chance to travel extensively throughout the world, particularly to visit various Ford operations—something that I did less often when I was tied to my desk in Detroit.

This unusual freedom has given me a unique opportunity as well. I have had time to add to my knowledge of governments and business and industry in many different places of the globe. And to do a lot of thinking—not merely about the auto industry, but about the subject of international cooperation.

It seems to me—traveling around the world these past several years—that we in the industrialized Free World have an opportunity for forging new and significant tools for strengthening our relationships—in mutual economic security and in trade. I called this an opportunity—and it is. But it may also be something else. It now may be an absolute requirement in today's world.

I am talking about the need to recognize the dovetailing relationship of foreign policy and international economics. Not just by the government of the United States, although that would be helpful. Not just by Britain, or France or the Federal Republic of Germany. Of course, we already have such broad-based organizations as the OECD and GATT. But I am suggesting here something quite different and I believe the time has come for the countries in the Western Alliance to sit down together and develop a strategy and a mechanism for enhancing our economic security in the same way we fashioned NATO in 1949 to enhance our military security.

Let me cite a few examples:

1. Who can make sense out of the world's exchange rates? When we took basic economics courses in school we were taught that, if one had an economy with low inflation and high employment and a favorable balance of payments, one would have a strong currency.

But as the recent history of the Japanese yen has shown, this is not always true. In fact, the undervaluation of the yen is seriously exacerbating Japan's relations with countries of Europe and the United States.

2. We talk a lot in the Western world about free trade, yet we tolerate an extraordinary international mishmash of trade barriers and tariffs, and domestic content laws and custom regulations.

Four days from now, a GATT ministerial meeting will convene, with an agenda covering protectionism, trade in agriculture and services—and trade between the so-called "have and have-not" nations. This is an important forum and there has never been a time when it is more important to tackle some of these knotty issues of trade.

But given the history of GATT, I am not optimistic that it is solely capable of stimulating economic recovery for the nations of the West, nor the best instrument we can devise to strengthen our economic security.

3. Until last week, the United States and many governments of Europe, including Britain, had been at loggerheads over the Siberian pipeline. No need to remind this audience that, as Foreign Secretary Francis Pym has put it, "transatlantic relations have had a difficult summer."

The pipeline affairs has been most unfortunate. It has wasted time and effort on both sides of the Atlantic. But more than anything else, the pipeline controversy has served to underscore a new precept that the nations of the world need to notice: There is more economics in foreign policy and more foreign policy in economics than ever before—much more than we ever used to believe.

In this respect, I am much heartened by the fact that George Shultz, the new American Secretary of State is, by profession, an economist. He is a distinguished one who has served not only in previous American administrations as Secretary of Labor and Secretary of the Treasury, but also in the world of business as the head of a major international company.

Secretary Shultz brings a keen interest in global economic issues to the U.S. Department of State. For the first time, with Secretary Shultz, the National Security Council—which advises the President in critical international issues—now has a respected economist in a key foreign policy role. And lest it go unnoticed, let me quote from a recent article in the Washington Post, a newspaper not known for its fondness for Republican Presidents and their Cabinet members.

Secretary Shultz, said the Post, "clearly sees the interlocking significance of economic and foreign policies, and, in his brief tour of duty so far as Secretary of State, he hasn't hesitated to stake out his interest." The Post, along with the Wall Street Journal, New York Times and other major American papers, says all this makes "good sense."

And for good reason. Because, increasingly for the United States and other countries, foreign strategic and diplomatic problems have become intertwined with trade and debt questions. And these questions affect not only our relations with each other, as the pipeline affair has demonstrated, but also with the West's principal adversaries.

Even Secretary Shultz has indicated his concern over what he calls "lightswitch diplomacy." Those are situations in which one country, for parochial foreign policy reasons, temporarily erects economic barriers in an attempt to register disapproval of another country, or to discipline it.

There may have been a time in the world when economic decision-making did not have to be given much weight in foreign policy considerations—and vice versa.

There certainly was a time in America when those who had a grasp of international economics did not give much thought to foreign policy issues. Just as there was a time when a secretary of state tended to think in military and diplomatic terms, but regarded economics as either an occasional source of trouble or, as the Wall Street Journal recently said, "a source of trinkets which he could pass out to appease the natives."

Economist Herbert Stein, who served as chairman of the Council of Economic Advisers under Presidents Nixon and Ford, has described that recent era. This is the way he put it: "The world economic order was to be universalist and private. We were floaters and free traders. In a strict sense, there would be no economic relations between countries. There would be economic relations between individuals who happened to live in different countries but who operated in a world market that didn't distinguish between friend and foe."

Dr. Stein sees it differently now. He has decided that is it impossible to conduct foreign policy with an instrument—the market—which doesn't distinguish between friend and foe.

Perhaps in a curious way, we are indebted to the pipeline controversy for bringing the economic security interests of the West into sharper focus than ever before. And I am not alone in thinking so.

Just recently, Mr. Francis Pym spoke to Ford Motor Company's European Advisory Council. It was his feeling that although the pipeline dispute has been an unsettling one, it has had at least two beneficial consequences:

First, it has forced the Atlantic Alliance to think more deeply about East-West trade and to address questions which we have been reluctant to tackle as energetically as perhaps we should have done.

And secondly, said Mr. Pym, the dispute has reminded all of us that consultation and discussion are at the very heart of the Alliance. It is when we fail to consult properly and act together, when we take one another for granted, that we find ourselves at odds.

Permit me to quote him exactly, because I share his sentiment: "If the pipeline dispute," he said, "forces us to make a fresh and more thorough appraisal of East-West trade, and how it should be integrated into an overall framework for East-West relations, it will have served a useful purpose."

My grandfather had another way of saying the same thing. "Don't find fault," the original Henry Ford jotted in his diary one day. "Find a remedy."

I believe we are doing just that.

It is in this spirit that I return to a comment made earlier in my remarks—that the time has come for members of the Western Alliance—including Japan—to develop a collective approach to economic matters that parallels what we most notably have done about defense matters.

In the three decades of NATO's existence, the emphasis on both sides of the Atlantic has been almost entirely on military security. Scarcely a thought has been given to the development of a companion strategy for economic security.

True, on the European side, in the last 30 years we have seen the creation of the European Economic Community, the EMS, and similar European communities for coal, steel, atomic energy and other cooperative undertakings.

However, we have not yet created what I would describe as "an economic NATO." We in the West have not yet fashioned an economic alliance capable of doing two things: first, to protect and enhance our collective well-being, and second, to enable us collectively to respond to the economic strategies of the East.

By this, I am not suggesting the creation of a supra-national agency to dictate to private enterprise. Nor am I suggesting that business permit itself to become primarily an instrument of foreign policy. But clearly there is an overriding need for thoughtful consultation and coordination among governments of economic policies, particularly those that so affect the international operations of private business.

The Siberian pipeline affair thus strikes me as a classic example of our failure. In effect, we permitted it to escalate into a serious dispute because, as Western allies, we never fashioned a common NATO-like position based on consultation and shared understandings of what the pipeline is—and what it is not.

Is the pipeline merely a normal business deal? Or is it fraught with security risk to the West? And, certainly there are those here in Europe who would pose the same questions about U.S. grain sales to the Soviet Union.

Even as the pipeline issue disappears as an irritant among the Western allies, a basic question still remains: What should be the bottom line in the West's economic relations with the Soviet Union and the Soviet bloc?

Until East-West economic relations are determined by European and American governmental leaders, commercial enterprises in the Free World will be uncertain as to whether, how or to what extent they can deal with Moscow and its satellites.

I am reminded of the popular saying in America that "if it ain't broke, don't fix it." The Atlantic Alliance is far from collapsing; indeed, consultation and discussion are so much a habit within the Alliance that a dispute like the pipeline case attracts public attention on both sides of the water precisely because it is a rare occurrence.

Still, one cannot afford to be a starry-eyed optimist when seemingly basic policy and philosophic differences surface between the United States and Europe. Perhaps, like a motorcar that needs protective maintenance to keep it from breaking down, our Alliance may profit from a bit of a tuneup.

As global economic issues become increasingly interwoven with foreign and military policy, what sorts of steps might usefully be taken to enhance Western economic security? Myer Rashish, the international economist who served until recently as U.S. Undersecretary of State for Economic Affairs, suggests four objectives for such an "economic NATO."

"1. The institution of cooperative strategies and measures to strengthen Alliance economic security by reducing dependence on markets or material sources in Eastern Europe that make members vulnerable to Soviet influence." One could say that this was the crux of the pipeline dispute.

"2. Establish guidelines governing economic relations with Eastern bloc countries so as to minimize competition among Alliance members on credits and trade."

This is a goal to which we all could subscribe. It makes little sense to me, as a Western businessman who believes in competition among companies, to witness competition between countries that results in economic advantage for Eastern bloc countries. And, on terms more favorable than between nations of our Alliance. Sauce for the Eastern goose should not be sweeter than sauce for a Western gander.

"3. Re-examination and eventual upgrading of existing NATO controls intended to deny the Soviet Union access to goods and technology that contribute to its military capabilities" such as suggested by the President of the United States last Friday.

In principle, we in the West always have been in agreement on the need to maintain technological leadership in order to keep the peace by deterring potential aggressors. But it is no secret that, increasingly in the last few years, members of the Western Alliance have had their differences over what constitutes "normal" trade with the Soviet Union and what should be avoided.

Rashish's fourth and final objective is this:

"Coordination of foreign policy reaction—including economic sanctions—in response to future Soviet actions as, for example, in Afghanistan and Poland."

The point that Rashish and other thoughtful analysts make here is a simple one: that whenever the Soviets employ military power or the threat of it to subjugate or to strengthen their grip over other countries, we in the West have a duty to respond as a house united and not as a house divided.

And since our countermoves preferably will be diplomatic and economic rather than military—depending on the gravity of the situation—it is all the more urgent that we act in concert. As Benjamin Franklin observed, unless we hang together on crucial matters, we risk hanging separately.

In laying all this before you, I do not hold myself up as an oracle, or as an expert economist, or as a government statesman—but simply as a businessman with some modest experience in international trade over many years.

It seems to me that all of us who are businessmen have a duty to point out to those who shape our destinies that international affairs and foreign policy are no longer simply matters of concern to governments or politicians or diplomats.

Foreign policy and economic policy have become inseparable; they have become the warp and woof of international security. East-West trade and North-South trade, fiscal and monetary policy, tariffs and exchange rate problems—no longer exist in separate boxes to be dealt with singly and in isolation from each other.

In my opinion, it is time for all men and women of commerce to concern themselves with the institutions and the ministries of government that shape our economic and foreign policies.

It is no accident that Japan has already moved in this direction. The most powerful instrument of the Japanese government is the Ministry of International Trade and Industry—MITI. MITI is recognized as the essential guardian of Japanese international affairs.

One of our urgent tasks, it seems to me, will be to develop a mechanism whereby Japan and other countries on the rim of the Pacific can become participants and partners with the Atlantic Alliance in the fashioning of an international economic security organization a la NATO.

I say this is urgent because already we are hearing too much in North and South America, here and elsewhere, about the allure of protectionism as a means of saving jobs, of protecting markets, of insulating companies and countries from the harsh effects of recession.

But we ought to know that protectionism in the long run can touch off a worldwide trading war in which nobody wins while the recession escalates into a global depression of disastrous consequences for all nations.

In conclusion, it may be worth recalling that this Chamber of Commerce was, after all, formed to create some common ground between executives and companies that often were trading rivals. The Chamber has survived and strengthened over the years because it managed to do precisely that.

In like manner, the history of the Atlantic Alliance over the last 30 years has shown what we can achieve in the realm of mutual defense and military security. And so I do not think it too much to ask that the leaders of the West, together with men and women involved in commerce and industry, now seek to create some new common ground for international economic security.

For only by cooperating can we hope to achieve a peaceful, prosperous and truly free world.

RESOLUTION AGAINST FEDERAL TAKEOVER OF NUCLEAR WASTE STORAGE FACILITIES (MORRIS, ILL.)

Mr. PERCY. Mr. President, I would like to share with my colleagues a resolution which was recently passed by the Illinois State Senate. The resolution urges Congress to reject provisions of the Senate nuclear waste bill (S. 1662) which pertain to the possible Federal takeover of facilities such as the General Electric facility in Morris, Ill., for use as interim nuclear waste storage facilities. The facility in Morris, Ill., as the facilities in South Carolina and New York, was not built with the expectation that it would become a federally operated facility for storage of spent fuel from across the entire Nation. The people in the community understandably fear becoming the "dumping ground" of the Nation.

I feel compelled to repeat for my colleagues what I have stated many times on the floor of this Chamber over the past few years. The temporary storage of spent fuel should remain the responsibility of the private sector, while the Federal Government gets on with the business of addressing the longer term nuclear waste disposal problem.

Soon the Senate will once again consider nuclear waste legislation. I urge my colleagues to seriously address the concerns expressed by the people of Illinois in this Senate resolution before final passage of any nuclear waste legislation.

I ask unanimous consent that the following Illinois Senate resolution, offered by Illinois Senator Jerome J. Joyce, be inserted in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SENATE RESOLUTION No. 677: OFFERED BY SENATOR JEROME J. JOYCE

Whereas, the governments and the citizens of the United States and of the Commonwealth of Illinois recognize there is a serious problem regarding the generation, transportation and storage of the fuel which provides power for nuclear generating stations in the commercial power industry; and

Whereas, this Body, along with the Illinois House of Representatives, has taken legislative action toward protecting the citizenry of this State from potential and life-threatening accidents which could result from transportation of these radioactive wastes; and

Whereas, Illinois is one of only three states in the Union which hosts a facility which could eventually house spent nuclear fuel from reactors in the nuclear power industry; and

Whereas, the Illinois facility, constructed at Morris, Illinois, is located 55 miles from one of the largest population centers in the United States; and

Whereas, it has been the official legislative position of the Illinois General Assembly, as evidenced by passage of legislation barring the importation for storage in Illinois of spent radioactive fuel from states outside Illinois by a reciprocal agreement; and

Whereas, the legislative action taken by the Illinois General Assembly clearly reflects the attitudes and concerns of the citizens of this sovereign State; and

Whereas, the legislative action was a fulfillment of this Assembly's Constitutional obligation to protect the health and welfare of the People of the State of Illinois; and

Whereas, there is currently pending in the U.S. House of Representatives legislation, entitled Senate Bill 1662, which would allow the government of the United States to provide interim storage facilities away from nuclear reactors, storage space for up to 2,800 metric tons of radioactive spent fuel; and

Whereas, under provisions of Senate Bill 1662, the General Electric Company facility located at Morris, Illinois, would be eligible for federal takeover and management as an away-from-reactor storage facility; and

Whereas, such a takeover and management of the Morris facility would be a clear violation of the concerns and attitudes of the people of the Commonwealth of Illinois and, further, would not provide a permanent nor long-term solution to the pressing problem of spent nuclear fuel storage in the United States; and

Whereas, such a federal takeover of the Morris facility would likely cause Illinois residents deep concern and fear for the safety of their families and their property; therefore, be it

Resolved, by the Senate of the Eighty-Second General Assembly of the State of Illinois, That this Chamber respectfully but urgently requests the Congress of the United States to reject provisions of Senate Bill 1662 as it pertains to the possible takeover and management as an away-from-reactor storage facility at Morris, Illinois; and be it further

Resolved, That further research be conducted to determine an appropriate means of disposal of spent nuclear reactor fuel in areas of this nation where lives and property would not be endangered by an accident in transportation or storage of spent nuclear fuel; and be it further.

Resolved, That suitable copies of this preamble be prepared and communicated to Senator Alan J. Dixon and Senator Charles Percy and to the 24 members of the Illinois Congressional delegation to serve as testimony of the concern by this Chamber and the people it represents that Senate Bill 1662 does not represent the best interests of the People of the State of Illinois.

SENATE CONCURRENT RESOLUTION 131—AMERICANS MISSING AND UNACCOUNTED FOR IN SOUTHEAST ASIA

Mr. PERCY. Mr. President, I rise in support of Senate Concurrent Resolution 131 which expresses the sense of Congress concerning Americans missing and unaccounted for as a result of the conflict in Indochina. I wish to commend my distinguished colleague from California (Mr. HAYAKAWA) for the timeliness of his initiative in encouraging the U.S. Government and the Lao Government to move forward in settling this tragic problem. I am privileged to join with Senator HAYAKAWA in sponsoring the resolution and thereby in emphasizing the importance I am sure we all attach to this issue—indeed, the importance which the American people attach to the absolute necessity of relieving the anguish and anxiety of hundreds of American families.

In my capacity as chairman of the Committee on Foreign Relations, I was consulted several times during the recent recess by the administration in their effort to move toward the resolution of this difficult problem. I am encouraged by the reception given by the Laos Government to the visiting delegation from the National League of Families of American Prisoners and Missing in Southeast Asia during their visit last September in Laos. I am also encouraged by the reception accorded Deputy Assistant Secretary of State O'Donohue in Vientiane in October. These are certainly steps in the right direction and they deserve our encouragement and support. But we must not overlook that up to this point the improvements observed are in the political environment surrounding the issue. This is certainly a precondition to real progress and we welcome it. But what we must achieve is real progress: the location and repatriation of the remains of the hundreds of Americans missing in Indochina. This is a humanitarian question, affecting literally thousands of our citizens, and we must have an answer. Our Government must be unrelentless in its pursuit of this goal and, I am sure, it will enjoy the full support of this body.

The Foreign Relations Committee considered Concurrent Resolution 131 and recommended without a dissenting voice the Senate's approval thereof. I urge my colleagues to support this statement of our concern for the hundreds of Americans missing in Laos.

SECRETARY OF STATE SHULTZ' OAS ADDRESS

Mr. PERCY. Mr. President, this year, 1982, has been a year of troubled relations in this hemisphere. First there was the crisis in Central America, then the tragic war between Argentina and Great Britan, and finally the difficult financial situations that now affect nearly all Latin American countries and the United States.

Throughout these difficulties, many of our Latin American friends have thought the United States did not listen to or understand the Latin American perspective.

Mr. President, I hope and I believe that those times are over. I believe that Secretary of State Shultz signaled that they were past when on November 16 he sat down at Blair House with the foreign ministers of most of the countries of the hemisphere who were in Washington for the ninth meeting of the Organization of American States General Assembly. Secretary Shultz said at Blair House, "Since I am the newest one in this group, I'd like to listen to you * * *.

Secretary Shultz continued that theme in his very important address to the OAS General Assembly on November 17. There he talked of the successes the nations of the hemisphere and the OAS in particular have had in working together in the past. General, if not total, freedom from war has been the great achievement of the inter-American system, and continuing the tradition is one of its most serious challenges.

The Secretary also noted that the way each of the countries in the hemisphere—and the world—manages its economy in the years to come is going to have an important effect on the others. The wave of protectionism that seems primed to burst forth in a number of countries would be devastating to the world economy—to developed and developing countries alike. Similarly, economic interdependence makes it necessary for debtor and creditor nations to work conscientiously to find mutual accommodations in the present financial crisis that affects so many countries.

Secretary Shultz also noted that the economic interdependence that has emerged over the past decade now makes it especially important now to address the remaining points of the Caribbean Basin Initiative, the trade and investment incentives. These initiatives are a key to long-term growth in the region. I am delighted to learn that my colleague from Illinois, Congressman DAN ROSTENKOWSKI, will be moving ahead with the trade portion of the bill shortly.

And finally, Secretary Shultz recalled something that many may have forgotten for the moment, and that is that the ideals of democracy have been the recurring ideal and goal of the nations in this hemisphere. There is no more urgent business than to find ways in which the gains already made for democracy can be protected and additional gains made, he said. I

cannot agree more strongly with this agenda.

Mr. President, I ask unanimous consent that Secretary Shultz' speech to the OAS General Assembly be included in the RECORD at this point.

There being no objection, the remarks where ordered to be printed in the RECORD, as follows:

REMARKS OF SECRETARY SHULTZ

Mr. Chairman, distinguished Foreign Ministers and heads of delegations, Mr. Secretary General, distinguished delegates, observers and guests, ladies and gentlemen:

It's a very great pleasure to join you.

I'm more here to listen than to talk. Moreover, though I have visited nearly all of the countries represented in our organization—so I feel at home in them—this is the first time I have participated in a meeting of the OAS. I'm the junior member of the crowd. I really should listen and not talk.

We often talk about our problems and that is what we focus on. But we have to recognize that there are also accomplishments. Sometimes we lose our sense of what these accomplishments are.

In that spirit, last February, in the speech before the OAS permanent council in which he announced the Caribbean Basin Initiative, President Reagan emphasized the major themes of his administration's Latin American policy: Democracy, self-determination, economic development, and collective security. "These two great land masses north and south," he said, "can show the world that our many nations can live in peace, each with its own customs and languages and culture but sharing a love for freedom and a determination to resist outside ideologies that would take us back to colonialism." Less than two weeks from now the President will begin a visit to Latin America that is a personal expression of this vision of a cooperative effort aimed at full development of the enormous human and economic potential concentrated in this hemisphere.

I come today before this General Assembly convinced that the inter-American system is vital to peace and security for the nations of this hemisphere. We have over the years formulated a juridical base for keeping the peace, for resolving disputes and even for the sovereignty of our nations. Independence, sovereignty, non-intervention are themes that run through our charter, the record of our meetings and our inter-American experience. We have advanced these ideas further than other collective bodies and we have been well served by them.

I don't propose and couldn't possibly make a formal speech or to try to cover every issue before this Assembly. So if I may, I would like to concentrate on a few of the main reflections that occur to me as I join this discussion among neighbors and friends.

I. WAR AND PEACE

First, let me speak on the subject of war and peace. One set of reflections is about the nature of the Inter-American system itself—of which this unique organization is the formal expression, and the OAS charter and RIO treaty the formal guarantees—but which also consists of a great network of bilateral and multilateral relationships among the American states.

Geography made us neighbors. History, religion, and the shared experience of the frontier made us friends. There is far more that unites us in this hemisphere than can ever divide us. That in itself is enough to explain why each of us participates in the system. But it is probably not what has made the system durable and valuable.

The striking thing to me, thinking over what has occurred in our lifetimes, is the success the American states have had in preventing war. True enough, there was the Chaco war in the thirties; then conflicts between Costa Rica and Nicaragua, Ecuador and Peru, and El Salvador and Honduras; most recently, the tragic South Atlantic crisis we tried so hard to prevent. Also, there have been violent insurgencies, often manipulated from outside.

But for all the territorial disputes that divide us, for all the internal struggles that threaten us, these are the only instances of war between states in a half century in which every other part of the world has been convulsed in war. In a climate of general security we each have been able to avoid the levels of military expenditures that countries in other less fortunate regions could not dispense with. The developing countries of the Americas have been able to limit defense spending to 1.4 percent of their GNP, a quarter of what the developing world as a whole spends on military preparations. And although our global responsibilities impose a heavy burden of military expenditures, the United States does not fortify borders with its neighbors.

One reason why the Inter-American system has proved so durable and valuable must be that in most cases it has kept the peace. Since 1948, the OAS has been called upon formally or informally on no less than 50 separate occasions involving the settlement of disputes. From the Cuban missile crisis to local border conflicts, the Inter-American system has contributed, often decisively, to keeping the peace.

But will it in the future? We know that war came to the South Atlantic despite our efforts. We know that turbulence in Central America, where local conflicts have been exploited from the outside, can threaten the peace. And despite a variety of agreements and even treaties, we are well aware that it has been a long time since one of the territorial disputes among us has been definitively settled.

Once actually confronted with crisis, I have no doubt that we will all react with good intentions, urging negotiations, offering good offices. But recent experience suggests that could be too late. Good intentions matter, but they are not enough.

Take Central America as an example. Everyone seems to be talking peace. Yet most states in this area are challenged by insurgency. They are threatened by economic and political strife. They have brought in foreign military advisers, in one country in very large numbers.

Clearly, no strategy for peace can succeed if those who take up arms against their fellow citizens and neighbors go unopposed. That principle applies in Central America as well as elsewhere. Peace is impossible without security. Our security assistance programs, for El Salvador and for our other threatened friends, stem from that basic consideration. Neither democracy, nor human rights, nor socio-economic equity are possible in a climate of insecurity, where hostile neighbors or violent internal minorities make war on society.

But if peace requires strength, strength in turn infuses an obligation to make peace. Fortunately, not all of the conditions for war are present in Central America. Most states still lack the major offensive weapons that would be needed for an attack on their neighbors. That may give us our opening. Why shouldn't we encourage the governments of Central America to agree. All of them, on a basis of reciprocity and strict verification, not to import major offensive weapons?

Clearly, that's only a part of the solution, but it would be a start. There will be danger to peace as long as foreign troops or military advisers are present. Why not go for agreement among Central American countries, again on a basis of reciprocity and verification, to reduce their numbers to some low agreed level, why not zero?

The same treatment—reciprocity and verification—could be applied to practical mutual undertakings to end any and all support for violent activity on the territory of others.

As you think about it, other steps would be necessary as well. Internal conflicts threaten to spill over borders, so each state should be encouraged to create processes by which internal adversaries can be reconciled, human rights respected, and political competition substituted for violent confrontation.

Reconciliation leads one to that fundamental value, democracy. We all know that in the end there is no enduring stability and legitimacy without it. We also know that democracies are far less likely to go to war than governments whose leaders need not obtain the consent of the people. In Central America the democratic transformation of all the states in the area is not only a desirable step that each may set for itself; it may well be a precondition for a durable peace.

A number of countries, meeting in San Jose recently, went through a similar thought-process, trying to identify the conditions for peace in the area. If the countries of Central America could all agree on these conditions, the next step would be to begin to discuss how they could be implemented. My point is simple. If you can identify the fundamental elements of a problem, you can have some chance of solving it. If you can't, no amount of negotiations or good offices will help.

And of course, should one Central American country attack another, the Rio Treaty is there to protect the victim and restore peace. If it is clear in advance that it will be invoked, the treaty will have a deterrent effect—as it has had in so many circumstances since it was signed.

Of course, the Central American situation is not the only threat to hemispheric peace. The South Atlantic war of this spring has reminded us of how many boundary and territorial disputes remain unsettled in our region, and the potential cost of leaving these unaddressed.

The United States, while traditionally neutral on the particular claims asserted in regional territorial and boundary disputes, is not neutral on the overriding principle of peaceful dispute settlement. This implies an obligation on both parties to a dispute to seek effective means of peaceful resolution, either by negotiations, perhaps with OAS assistance, or by recourse to the various means of judicial, arbitral, conciliation, and other third-party devices available under multilateral and regional agreements or ad hoc. International law provides a variety of means; the will to use these means has been too often lacking. The OAS pioneered development of international mechanisms for such purposes throughout this century; it

must now show leadership in promoting their use.

This is advice that the United States itself follows: We are currently in litigation with Canada, in a special chamber of the International Court of Justice, over the delineation of our important maritime boundary in the gulf of Maine. Whatever the decision of that court is, we will accept it.

Earlier this month we were pleased to support a balanced resolution on the Falklands/Malvinas question in the United Nations. We could support in this body a similar resolution. We hope that both actions will prove effective in promoting a peaceful solution to this dispute.

Finally, let me take one more case. Nuclear explosives. We are undertaking a new effort to persuade the Soviet Union that its security and that of the United States can be protected and enhanced by reducing the numbers of nuclear weapons. While that effort proceeds, there is a strategy open to us to avoid the introduction or creation of nuclear arms in those countries of the hemisphere which have so far been free of them. This is the strategy conceived and launched at Tlatelolco in 1967 to protect against the use or threat of nuclear weapons, and which led to a treaty already in effect for 22 Latin American and Caribbean countries. One of the most potentially serious sources of tension and war could be eliminated if the nuclear weapons free zone of the Tlatelolco treaty were to be ratified by all eligible states.

In sum, the inter-American system has helped produce a great achievement: a general if not total freedom from war. Preserving that achievement is a major challenge for the future.

II. ECONOMIC MANAGEMENT

Now I'd like to turn to another set of reflections concerning the management of our economies. Yesterday some friends were reminding me that I used to be Secretary of the Treasury. Well, I'm sure glad I'm not Secretary of the Treasury now.

We are all members of the world economy, and not dependent on the inter-American system for the management of our economies in the same way we are for the preservation of peace. Yet what each of us does—in the management or mismanagement of our domestic economies—can greatly affect others in the hemisphere—positively or negatively.

For the developing countries of the hemisphere, this last generation has been a period of soaring growth. The motors of that growth—savings and investment—have been largely fueled from within. For example, gross savings are now about 22 percent of GNP, among the highest in the world. But external factors—substantial expansion of markets in the United States for hemispheric exports, the opening up of trade within South America, within Central America, and within the Caribbean, the development of new markets in Europe and Japan, major increases in private investments, in borrowings from multilateral development banks, and above all in commercial bank loans—have contributed much too. U.S. imports from Latin America and the Caribbean have grown from four billion dollars in 1960 to 39 billion dollars in 1980—which averages out to a compound growth rate of more than 12 percent a year for the last 20 years. This is in nominal terms and includes the price escalation on petroleum, but even so it is impressive when compared to U.S. inflation, which averaged about five percent during this period.

The mix between internal and external factors has varied from country to country. In some cases favorable external conditions have compensated for domestic rigidities; in others, unfavorable external developments have undermined otherwise sound development plans. One point is evident: size has not been a determinant of success. You don't have to be large to succeed.

Until recently, the balance was positive: We were all enjoying the fruits of growth, the developing countries of the Hemisphere at the phenomenal rate of nearly six percent a year for 20 years. Put another way, the economic size of Latin America has tripled in absolute terms since 1960. And although much of the conventional wisdom emphasizes diversification of trade, western Hemisphere countries still matter enormously to each other. In 1980, trade within the Hemisphere as a whole—including Canada—came to 155 billion dollars, 42 percent of the Hemisphere's total trade with the world. That's a big number. Latin America taken as a whole is the United States' biggest customer.

Now we are all in a period of adjustment, including the U.S. many of us, including the U.S., must compress our budget deficits and control money supply if we are to master inflation and create the conditions for renewed growth. This is a process that begins at home, and we are doing it at home, where we must each accept primary responsibility for correcting the excesses of the recent past. But falling world trade volume, interest rates that though falling are still high, the threat of protectionism. The backlash of one country's cutback on another's trade, and the ripple effects of one country's financial difficulties on another—all complicate our individual adjustment.

Nothing would be more devastating than a wave of import protectionism now. Yet such a wave threatens to burst in a number of countries, including my own. As is often the case, the way to avoid going backward is to go forward. Our best collective tactic, it seems to me, is to build in new worldwide defenses through the GATT: Joint standstill in protectionist measures and a commitment to broaden and deepen the GATT in north-south trade and in trade in services. That is the task of the GATT ministerial that convenes next week. It is a task to which each and every one of us must contribute, for the inevitable alternative to keeping the world trading system mutually open is the kind of disaster that engulfed the world in the 1930's.

It would be equally devastating if debtors and creditors were to fail to find those mutual accomodations that will permit borrowing countries to have sustained access to the financial markets. Just as borrowers must cut their current account deficits, raise domestic interest rates, and keep exchange rates realistic, so lenders should in some cases be ready to restructure or in exceptional cases, reschedule. Borrowers must look realistically to their responsibilities. And lenders should recognize that stabilization problems will be more likely to succeed if accompanied by net flows of new money.

The international monetary fund can play and is playing an essential role in this process by providing new money on a selective basis while helping countries to define stabilization programs. And in some cases individual countries can appropriately facilitate the adjustment by providing short term credit to allow time to negotiate a fund agreement, as in the case of the credit arranged for Mexico in August.

This is a long chain of actions that must be taken in a mutually supportive way. It starts at home. It requires sacrifices. It involves both private entities and governments. And it will require a high order of mutual confidence to succeed. But we must succeed. It is quite clear that the penalities for failure could be enormous.

Beyond the adjustment, or course, will come the recovery. The U.S. economy is now poised for just that. As always it will succeed only if there is new investment and new savings. But it is not too early to begin thinking through the requirements for sustained new growth in the Hemisphere. Having a disproportionate share of the world's growth potential, this Hemisphere should provide a substantial impulse to the renewed momentum for global expansion.

III. THE BALANCE OF INTERDEPENDENCE

Now let me turn to what I have labeled the balance of our interdependence. No one doubts that we depend vitally on each other, for our prosperity, for our security, for peace. We can celebrate it—or we can deplore it—but it is a fact. This year's crises—in finance, in the South Atlantic, in Central America—have underscored it.

But it is also natural that we should each be concerned about the balance of mutual accomodation. Some of the most difficult and important questions in international relations revolve around relations among neighbors. If we have to adjust our economies, who should adjust more or most? If we must compromise to keep the peace, who would go the longest way? And how do you measure it?

I think we all agree that matters such as these must not be decided simply by might or size, but by principle and concept. I do not mean by that that we should attempt to write a book of codes anticipating every situation and dictating pre-agreed rules of the game. But we should always be prepared to examine together the justice and consistency of our actions, so that a balance acceptable to all can emerge.

One important way of extending the range of long-term options—at least for some of the most vulnerable states—is the Caribbean Basin Initiative. President Reagan's trade and investment proposals will be up for decision in the Congress perhaps later this month.

Let me point out that widely quoted remarks attributed to the Chairman of the House Ways and Means Committee, Dan Rostenkowski, that he wasn't going to consider these trade and investment incentives for the CBI are not correct. We checked it out and it was not correct. The chairman reiterated that his committee would take up these considerations in the upcoming sessions of Congress.

These trade and investment incentives exemplify the creative mutual adjustments needed to spur growth. They will help to unleash in behalf of long-term growth the drive of the private sector as an engine of development financing, technical innovation, and productive employment. The stimulus they will provide will go far to ensuring the productivity of the emergency assistance already being disbursed.

The breadth and originality of the Caribbean Basin Initiative have led to some interesting side effects. One is that we have decided to increase special funds to the OAS to provide training opportunities for the Caribbean Basin countries. Another is the realization that most of the peoples of the hemisphere now live in countries that have

attained relatively advanced levels of development. These so-called "middle-income" countries properly receive less traditional public assistance than do poorer countries—yet they are also, precisely because of their relative development, countries that are ready for new kinds of partnerships to accelerate balanced development. The issue here, it seems to me, is less one of money than of dynamism, creativity, and entrepreneurship. But it is an issue very much worth keeping in mind as we seek ways to develop greater balance within the hemisphere.

IV. DEMOCRACY

Finally, let me conclude with a word about democracy in the hemisphere. Our record is uneven. For some countries—Colombia, Costa Rica, Mexico, Venezuela, Barbados, Jamaica, Trinidad, indeed most of the Caribbean—democratic institutions have functioned without interruption for a generation and more. Other countries have faced instability despite long democratic periods. A few have experienced only interludes of democratic governance.

But what is most striking is that democracy is everywhere the hemisphere's recurring ideal and practical standard. In fact, our collective commitment is so strong that sometimes I think even the criticism of our failings is intensified by it. Certainly, the Inter-American Human Rights Commission has no equal in any other region of the world.

Am I not right in thinking that our practice of democracy is making progress? In the last few years, Ecuador, Honduras, and Peru have all fully reaffirmed their democratic traditions. The Dominican Republic has sustained its newer tradition. Brazil's "Abertura", so strikingly underscored by Monday's elections, has been underway for a decade. And today, Argentina's and Uruguay's commitment to a return to democratic politics, Bolivia's newly elected government, the democratic transformation in El Salvador—all offer genuine hope for the future.

I know that much remains to be accomplished, that sharp swings have taken place in the past, that gains already made have not in all cases been fully consolidated. But more than two thirds of our membership—twenty-one—now have governments chosen through open, competitive elections. And more will soon join that list.

One of the principal reasons for President Reagan's trip to several countries of Latin America beginning the end of this month is in fact to underscore this democratic momentum, to bolster it—and to emphasize our own firm commitment to that process.

If this trend holds, it will be the greatest achievement of the Americas. I can think of no more urgent business for this organization than to find ways in which the gains for democracy already made can be protected and additional gains made. For democracy strengths both the peace and the ability to cooperate.

Thank you.

OUR MAN IN BRASILIA

Mr. PERCY. Mr. President, every once in a while the political process in this country generates an absolutely remarkable individual who is able to represent his country in very special and intangible ways. I think one such individual is Mr. Langhorne Anthony "Tony" Motley, presently our Ambassador to Brazil.

Being U.S. Ambassador in Brazil today is an important responsibility. The United States and Brazil have grown independent over the past decades as we have each pursued our own necessary interests. Nevertheless, we continue to share a great many interests in common. Communicating those common interests is perhaps the most important task of our respective ambassadors in Brasilia and Washington.

Tony Motley had some special preparation for his job. He was born and raised in Rio de Janeiro and therefore is that most Brazilian of Brazilians, a carioca. He can call upon classmates from the American School in Rio for their thoughts on the recent elections or on trade issues. He has also demonstrated his business acumen in the real estate industry in Alaska and his political wisdom in working closely with our distinguished colleagues from Alaska, Senators TED STEVENS and FRANK MURKOWSKI. But perhaps Tony Motley's greatest achievements have been winning the unqualified support of the career Foreign Service and of the Brazilian press and diplomatic corps.

Mr. President, I believe there cannot be one of us who is not proud to have Tony Motley representing the United States in Brasilia, and I ask unanimous consent that a pertinent article from the New York Times of November 24, 1982, be inserted in the RECORD at this point.

There being no objection, the article was orderded to be printed in the RECORD, as follows:

[From the New York Times, Nov. 24, 1982]

OUR MAN FROM ALASKA GOES OVER BIG IN BRASILIA

(By Warren Hoge)

RIO DE JANEIRO, Nov. 23.—When Langhorne Anthony Motley was named the United States Ambassador to Brazil a year ago, a lot of people grumbled.

"I know, I was one of them," said Lowell C. Kilday, director of the State Department's Office of Brazilian Affairs in Washington. "A lot of eyebrows were raised. We looked at Brazil, the most important country in Latin America, and thought, 'What's going on around here sending a guy like that?' "

In Brasilia, the outgoing Ambassador, Robert M. Sayre, was asked by the Federal Reserve Board head, Paul A. Volcker, then visiting Brazil, who his successor would be.

"Some real estate agent from Alaska," was the acid response, according to two other people who participated in the conversation.

THE COMPLAINTS ARE QUALIFIED

A land developer, Republican Party stalwart and former Air Force officer, Mr. Motley came here from Anchorage as one of the host of political appointees with which the Reagan Administration has filled its ambassadorial ranks—to the distress of many career diplomats like Mr. Sayre. The American Foreign Service Association says that one of every three such appointments have been going to noncareer people under President Reagan after the Carter Administration had succeeded in reducing the number to one in every four.

But today the complaining in State Department corridors over the phenomenon carries a conversational asterisk exempting Mr. Motley. In a year he has gained extraordinary access to the highest levels of the Brazilian Government, earned the high regard of other ambassadors in Brasilia, won over the most traditional diplomats in his own embassy and gained the singular tribute of being hailed as "our" Ambassador by a major Brazilian newspaper.

He played a principal role in setting up President Reagan's coming trip here, dealing directly with Brazil's President, Jaoa Baptista Figueiredo, by White House telephone while the Brazilian leader was campaigning in interior cities for candidates in elections held Nov. 15. If the two Presidents follow the practice of their first meeting in Washington in May, Mr. Motley will be doing the translating when they get together in Brasília Dec. 1.

BRAZILIAN BACKGROUND A HELP

Mr. Motley has brought to his assignment one great advantage. Born and raised in Rio de Janeiro, he speaks fluent Portuguese down to the accompanying gestures and unprintable expressions. "A lot of Brazilian editors have told me they have to clean up his interviews," an embassy press officer said.

Secure knowledge of the local tongue impatience with diplomatic formalities, and a feel for gossip and barracks room humor can get you a long way with Brazil's ruling military, and that is where Mr. Motley has gone. He has driven his pickup out to Mr. Figueiredo's farm on a number of occasions for drinks with the President himself or barbecue lunches with the presidential palace "grupo" that runs the country.

State Department officials said the embassy reporting from Brazil had grown far more informed and other ambassadors in Brasilia have been making it their habit to drop in on Mr. Motley for briefings before they take their home-leave trips. "When Motley first came, I wasn't prepared to be impressed," said one. "Who is this Republican businessman, I thought. But I've grown to have a lot of respect for him."

TELLING IT LIKE IT IS

Mr. Motley has become a familiar figure in Brazilian public life because of his willingness to talk to the press and to be interviewed on television. He earned the admiring editorial in São Paulo's Journal da Tarde after making speeches to business and banking groups in the United States arguing that Brazil's economy was being unjustly compared to those of Mexico and Argentina. The newspaper complimented Mr. Motley for doing a job that it said should have been expected from Brazil's own Ambassador in Washington, Antonio Azeredo da Silveira, a former Foreign Minister with a history of feuding with the United States.

The son of a former head of the American Chamber of Commerce in Rio, Mr. Motley has gotten high marks from the sizable American business colony for his combative response to Brazilian charges that United States protectionism is crippling the economy here. "He really tells it like it is and we appreciate that," said Joseph W. O'Neill, president of the American Chamber of Commerce in São Paulo.

Mr. Motley commonly points out that millions of Americans wear Brazilian shoes and challenges critics to find any Brazilians in American footwear. He also notes that so many Bandeirante aircraft have been sold to American commuter airlines that there

are now more Americans than Brazilians flying in such planes.

Forty-four years old and boyish-looking, he dresses in loafers and loose-fitting suits and often walks around with his hands thrust into his trouser pockets. It has not been uncommon for people to ask him where the Ambassador is.

10 YEARS IN THE AIR FORCE

Known as Tony, he said that even his mother never called him Langhorne. She is half-Brazilian and half-British and still lives in Rio. His father, an executive with Atlantic Refining in Rio, died in 1950 in a plane crash in Pôrto Alegre.

Mr. Motley lived in Rio until leaving for college at the Citadel in Charleston, S.C., when he was 17. He spent the 10 years after graduation in the Air Force before retiring to civilian life and helping create the largest real estate company in Alaska.

He served for two years as the state's Secretary of Commerce and Economic Development and then spent four years lobbying in Washington against environmental groups in the Alaska lands debate. He has worked closely with the Alaskan Senators, Ted Stevens and Frank H. Murkowski, each a Republican. In 1978 he and Senator Stevens were the only survivors of a plane crash in Anchorage that took five lives. He is outgoing and informal and works a room like a politician. "I've never seen a political appointee who got to know so many people so fast," said Mr. Kilday.

He plays soccer with the handymen and gardeners and opens his residence pool on weekends to embassy staffers who live in Brasilia's faceless "superquadra" apartment buildings. For July 4 this year, he gave a party for more than 2,000 people at his house with American beer and baked beans, parachute jumps, square dancing and treasure hunts. "He had everyone there from Cabinet officers to janitors," an embassy staffer said.

ATLANTIC CONFERENCE

Mr. PERCY. Mr. President, during the congressional recess, I had the honor to participate in the 1982 Atlantic Conference meeting held November 4–7 in the U.S. Virgin Islands. Several colleagues from the Senate as well as the House of Representatives were in attendance with me: Senators DAVID DURENBERGER, GARY HART, and CHARLES MCC. MATHIAS, JR., and Representatives RICHARD B. CHENEY and THOMAS S. FOLEY. Also participating with us was the Honorable Kenneth Dam, Deputy Secretary of State. There were a number of senior leaders from North America, South America, and Western Europe among the 43 participants in the Conference. I am asking that a full list of those who came be entered into the CONGRESSIONAL RECORD.

The Atlantic Conference meets biennially with the goal of assembling approximately 50 leaders from the three main regions of North America, South America, and Western Europe for candid, off-the-record interchange on important, timely issues of joint interest. Since 1970, the Atlantic Conference has been supervised by an international steering committee chaired by two U.S. Senators—one Democrat and one Republican. The chairmen currently are Senators CHARLES MCC. MATHIAS and GARY HART. The Conference director is John E. Rielly, president of the Chicago Council on Foreign Relations, which organizes and adminsters the Conferences. American members of the steering committee, in addition to Senators HART, MATHIAS, and myself, are Roger E. Anderson, chairman and chief executive officer, Continental Illinois Bank; James Hoge, publisher of the Chicago Sun-Times; Martha T. Muse, chairman and president of the Tinker Foundation, and Joseph Slater, president of the Aspen Institute for Humanistic Studies. We are proud of the strong Chicago and Illinois links of the Conference series.

The 1982 meeting of the Atlantic Conference addressed the subject of "Looking Toward the East: How Does the West Respond to the Soviet Union?" Earlier Atlantic Conference meetings have dealt with such topics as "Western Europe: The Alliance in Transition," "Détente: The Consequences for Relations Between Western Europe, North America and Latin America," Resources and International Politics," and "International Economic Policy: Europe, North America, Latin America."

Four papers were prepared for the 1982 discussions, which is the normal practice. There were two authors from North America, one from Europe, and one from South America. They were William Hyland, senior fellow, Carnegie Endowment for International Peace in Washington, and a former senior official of the State Department and member of the National Security Council staff; Robert Hunter, senior fellow, Center for Strategic and International Studies, Washington, and a former senior staff member of the National Security Council; Armin Gutowski, president, HWWA-Institut fur Wirtschaftsforschung, in Hamburg, West Germany; and Ronaldo Mota Sardenberg, director, policy planning staff, ministry of External Relations, Brasilia, Brazil. Each of the authors made a formal presentation to the Conference, followed by discussion. The final versions of the papers, plus a brief summary of some of the comments made in discussion, will be published in a few months as a book. Conference sessions were chaired by Conference Director John Rielly and Karl Kaiser, director of the Forschunginstitut der Deutschen Geselleschaft fur Auswartige Politik, of West Germany.

As more recent events have shown, the subject chosen for the 1982 meeting was a relevant one. The changing relations between the U.S.S.R. and the United States and the other Atlantic nations is at the center of international relations. The continued growth in Soviet military capabilities for the past two decades has broadened the Soviet Union's international reach and extended its political involvement to include Central America, Africa, and the Persian Gulf region. The Reagan administration has responded to this challenge by increasing substantially American defense spending and defense capabilities.

A related set of frictions with the nations of Western Europe has developed, most recently focused on a disagreement over the wisdom of the Soviet-European gas pipeline deal. Many Europeans also have been critical of U.S. defense policies and the NATO decision to deploy 572 Pershing II and cruise missiles in Europe by the end of next year.

Not surprisingly, there were many disagreements among Conference participants on specific policy issues, but there were also points on which many found agreement. Most of those in attendance believe that current problems in the Western Alliance are severe compared with earlier frictions and crises. The antinuclear and nuclear freeze movements, as well as the "Green" movement in Germany were discussed at length and their importance underscored. Many participants suggested that the United States must emphasize clarity in policy and objectives and that we must take a long view of our interests and goals—at least into the 1990's. It was also noted that the problems we face do not all relate directly to the Soviet Union—for instance, two recent armed conflicts in the Falklands and Lebanon were not a direct result of Soviet activities and had no Soviet involvement. Likewise we must define our policies toward other parts of the world—China, South America, and certainly Europe—on the basis of concerns beyond simple anti-Soviet attitudes. These are only a few of the topics probed by the conferees.

There is no anticipation that these meetings will result in uniform conclusions. Many differences of opinion were expressed. Rather, they are designed to contribute to understanding of the issues, clarification of both issues, and understanding by the participants of their respective positions and views. All of these goals were admirably met by the 1982 meeting.

WITHDRAWAL OF FEDERAL COURT JURISDICTION: A MEANS OF PRESERVING THE INTEGRITY OF THE CONSTRUCTION

Mr. HELMS. Mr. President, students of constitutional law in 1982 do not have to look very far to see that the Constitution does not work today the way that it has worked for most of American history. In some cases this is

the result of amendments to the Constitution changing the document's original terms. In many cases, however, this is the result of Supreme Court rulings that have amended the Constitution by the simple expedient of judicial decree.

Constitutional amendment by judicial fiat is, tragically, far advanced and represents a severe long-term threat to the American Constitution and the rule of law itself. As I have pointed out on many occasions, however, Congress has authority under the Constitution to remedy judicial usurpations and to provide a check on the courts. One of the most effective tools available to Congress is its constitutional power to control and limit the jurisdiction of the Federal courts. By removing jurisdiction from the courts in areas where Federal judges have abused their authority, Congress will be acting to preserve the integrity of the Constitution.

Mr. President, in today's Washington Times there is an excellent article on this subject by Hermine Herta Meyer. Dr. Meyer explores the history of constitutional provisions concerning prayer and the authority of Congress to withdraw Federal court jurisdiction in this area. Dr. Meyer is a member of the New York, District of Columbia, and U.S. Supreme Court bars. She studied law and political science in Switzerland and the United States. Her legal experience was acquired as an attorney with the U.S. Department of Justice, as legal adviser to the Swiss Embassy in Washington, and in private law practice.

Mr. President, I commend to the public and to my colleagues Dr. Meyer's thoughtful article and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Dec. 13, 1982]

COURT STRIPPING OR CONSTITUTION STRIPPING: WHICH IS IT?

(By Hermine Herta Meyer)

Toward the end of the 97th Congress, the nation was treated to a spectacle in the U.S. Senate, where senators who call themselves "liberal" (I call them pseudo-liberal), filibustered to death a bill which had been drafted in the hope that it might give the people in the states, who wished to have their children say a little prayer in their public schools, some protection from interference by the federal courts.

The bill provided that the Supreme Court shall not have appellate jurisdiction, and the district courts shall not have jurisdiction, in state cases relating to voluntary prayers in public schools and public buildings, and it contained a definition that "voluntary prayer" shall not include any prayer composed by a state official.

Nevertheless, the filibustering senators said they objected to "stripping" the federal courts of their jurisdiction over "constitutional" issues. But what these senators really were doing was supporting the Supreme Court's stripping the Constitution of its most important features of self-government; namely, of the power of the people to make their own laws.

Even if the bill had not contained the word "voluntary" and the definition but had simply prohibited the federal courts from taking jurisdiction over cases relating to prayers in state public schools, it would have "stripped" the federal courts of nothing to which the U.S. Constitution has entitled them. It merely would have prevented them from taking jurisdiction in cases over which the U.S. Constitution has not granted any federal judicial power. No constitutional issue was involved, because the power to legislate respecting religion has been retained by the states. That means that it did not become part of the Constitution.

As a special protection of these powers retained by the states, the 10th Amendment was added to the Constitution. It declares: "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people," meaning, of course, to the people of the several states.

A power retained by the states can legally be made a part of the U.S. Constitution, and thereby subject to federal control, only by a constitutional amendment in accordance with Art. V of the Constitution; that is, with the consent of two-thirds of Congress and of the legislatures or conventions of three-fourths of the states.

Therefore, when the Supreme Court decided to take jurisdiction over religion in order to force its ideas of separation of state and church on the entire nation, it could not legally change the Constitution. But armed with contempt-of-court powers and helped by federal marshals and an inactive Congress, the Supreme Court could prevent the people in the states from making their own laws respecting religion and strip them of the protection of the 10th Amendment to the Constitution.

The school prayer situation offers a good example how the Supreme Court managed to do this in the guise of "constitutional interpretation."

In 1962 and 1963 the Supreme Court decreed for the first time that prayers and Bible reading in state public schools violated the "establishment of clause" of the First Amendment's religion clause, and that had been made applicable to the states by the due process clause of the 14th Amendment.

First: The Supreme Court declared that the First Amendment's religion clause required a complete separation of state and church, although there is no such requirement.

That clause reads: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

We know from the debates of the First Congress, which drafted the first 10 amendments, that the religion clause had been requested by several state conventions because they feared the new Congress might misuse a provision of the new Constitution to establish a nationwide church or religion to which everyone would be compelled to conform. "Establishment of religion" was the expression of the time for an official church. The states wanted to make sure they would remain free from federal interference in matters of religion. The religion clause was intended to be a special restriction on the federal government only, not to apply to the states.

Second: There were six attempts in Congress to initiate a constitutional amendment to make the First Amendment's religion clause applicable to the states. They all failed. But the Supreme Court, obviously determined to force the First Amendment on the states, decreed that the due process clause of the 14th Amendment had made it applicable to the states.

That clause provides that no state shall deprive any person of life (sentence him to death), or of his liberty (sentence him to imprisonment), or of his property (sentence him to forfeiture of property) without due process of law, that is without first having given him access to proof procedure, today called, trial, where he could defend himself against the charges. It cannot possibly have made the provisions of the First Amendment applicable to the states, and for almost 100 years the Supreme Court so held.

These decisions are absolutely incompatible with the decisions of the Supreme Court that the 14th Amendment's due process clause did make the First Amendment applicable to the States. And in Ferguson vs. Skrupa the Supreme Court itself practically has admitted that in such cases it did not really interpret the due process clause but used it as a constitutional cover-up, so to speak to transfer a power retained by the states into the 14th Amendment whenever the Court disagreed with a state law and decided to replace it with its own beliefs. In this way, the Supreme Court fabricated a constitutional issue to serve the court as a justification for taking jurisdiction and stripping the people in the states of their protection of the 10th Amendment.

This became painfully clear when, in 1981, the Supreme Court, without briefs on the merits and without oral arguments, declared unconstitutional a Kentucky statute requiring posting of a copy of the Ten Commandments, purchased with private contributions, on the wall of each public classroom in the state.

The statute had stressed the secular application of the Ten Commandments in its adoption as the fundamental legal code of Western civilization. But the Supreme Court found that the Ten Commandments were religious in nature and that their posted copies would have the effect "to induce the schoolchildren to read, meditate upon, perhaps venerate and obey, the Commandments."

It is a historical fact that after the suppression of prayers in public schools practically all values disappeared from them; discipline deteriorated, often to a point that teaching became impossible; vandalism and violence developed as well as sexual promiscuity and the use of drugs.

Why should anybody be surprised that many people attribute this to the disappearance of prayers in the public schools? These people cannot believe that a Constitution under whose protection school children had prayed in their classrooms for 174 years could suddenly have made this practice unconstitutional, and they have begun to ask: "Why can these judges make the laws for us? We have not elected them."

The people complained to Congress because they had learned that the Constitution had given Congress the authority to protect them from the usurpations of the federal courts by using its power over their jurisdiction. It was in response to such complaints that bills were introduced in the

97th Congress to protect school prayers from interference of the federal courts.

There is no controversy that Congress has complete control of the jurisdiction of the lower federal courts, because the Constitution has given Congress full discretion to create and abolish them.

The Supreme Court, however, was created by Art. III of the Constitution, which also has prescribed in what cases the Supreme Court shall have original jurisdiction. The same article provides that in all other cases to which federal power extends, the Supreme Court shall have appellate jurisdiction "with such Exceptions, and under such Regulations as the Congress shall make."

The power of Congress over the appellate jurisdiction of the Supreme Court is the most important check the Constitution has provided for control of the usurpations of the Supreme Court.

Alexander Hamilton, also one of the framers of the Constitution, mentioned it three times in Nos. 80 and 81 of the Federalist Papers. When fears were expressed that "the errors and usurpations of the Supreme Court will be uncontrollable and remediless," Hamilton tried to assuage those fears by pointing out that the Supreme Court would have original jurisdiction only in classes of cases that rarely come up. In all other cases of federal cognizance Congress had ample authority to use its power over the Supreme Court's appellate jurisdiction to obviate or remove any "partial inconveniences" which may occur.

What has been caused by the Supreme Court's usurpations and the congressional inaction, are not just "inconveniences," but a gradual replacement of a Constitution based on the democratic principles of sovereignty and self-government of unelected life-tenured judges who, in the guise of "constitutional interpretation," have arrogated to themselves the power to dictate to the people what laws they may or may not have.

It is ardently to be desired that the 98th Congress will introduce and pass a simple bill to prevent the U.S. district courts from taking jurisdiction, and the U.S. Supreme Court from taking appellate jurisdiction, in state cases relating to school prayers in order to free the people in the states from the Constitution stripping by the Supreme Court, so the people again will be able to make their own laws in matters of school prayers.

One such law might go far in encouraging the people in the states to again exercise their retained rights to legislate with respect to schools, family and religion, and might even discourage the federal courts from further Constitution stripping.

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

Mr. HATCH. Mr. President, we as a nation suffer tragedies each day on our highways and in our neighborhoods from drivers who misuse alcohol and drugs. In the last few years, a growing awareness of the carnage caused by drinking and driving has called forth a rapidly developing national consensus that the time is now to get tough on the drunk and drugged driver.

The problems posed have rightfully stirred national outrage among our citizens—and now Congress has enacted Senate Joint Resolution 241, sponsored by Senator GORDON HUMPHREY which designates this week of December 12–18, 1982, as "National Drunk and Drugged Driving Awareness Week." This week is intended to acknowledge the importance of citizens, business, and government activity that has been undertaken to deal with this national tragedy. A nationwide effort has evolved to take from drunk drivers the social acceptability they enjoy and give them instead an increased likelihood they will be caught, prosecuted, and punished.

Drunk and drugged driving is a national epidemic transcendent of State boundaries. For example, drunk and drugged drivers are the leading cause of death and injury on the road. Because the victims are often innocent drivers, passengers, and pedestrians, no one can count themselves immune to the effect of this carnage. In addition, misuse and abuse of alcohol and drugs poses a most serious threat to the economic, social, and emotional health of our society.

About 1.3 million of the 146 million licensed drivers in the United States are arrested annually for driving while intoxicated. But what can we as a nation do?

During "National Drunk and Drugged Driving Awareness Week" a number of educational activities will take place: All of our citizens will be urged to:

Buckle their seatbelts for every trip and insist their passengers do so. Safety belts are the greatest protection we have against the drunk and drugged drivers;

Report any suspicious driving to the police, especially on the weekends;

Place a light in their window during the Awareness Week;

Use headlights while driving during the week to remember the deaths from drunk and drugged drivers;

Send letters to various media encouraging the publication of articles related to this week; and

Petition local officials for the establishment of task forces to study driving while under the influence (DWI) problems and to recommend necessary local solutions.

We are all victims when a drunk gets behind the wheel of a car. The statistics alone offer a grave reminder of the magnitude of this serious problem. Each year 26,000 Americans die and 1.5 million are injured by drunk drivers. And this tragedy increases when you add the losses suffered as a result of drugged drivers. Society's loss in wages, productivity, medical, and legal costs caused by deaths and injuries in drunk driving crashes exceed $24 billion each year. More than 25 cents of every auto insurance dollar goes to pay for damage done by the drunk driver.

I would like to pose some long-range strategies to rid the roads of the driver who drinks:

First, I urge all States to legislate and enforce strict laws against drivers who drink. Statistics show that a large percentage of drunk drivers are or will be repeat driving-while-intoxicated (DWI) offenders. Too many DWI offenders still have their licenses because they were held under court probation or supervision, plea bargained to a lesser charge, or simply frustrated the process of law by continually postponing their trials.

Second, I support changes in existing drunk driving laws in all 50 States from "presumptive level" to "illegal per se statutes" under which it would be illegal to be in control of an auto with a 0.10 percent blood alcohol content (BAC) or higher. Illegal per se laws will make it easier and safer for the arresting officers to structure a drunk driving case. Accurate, scientific tests that measure the percentage of alcohol in a person's bloodstream have existed for many years. Through breath or blood tests scientists have proven that hazardous driver intoxification exists with a concentration of 0.10 percent or higher. Some 50 percent of all driver's killed each year have blood alcohol concentrations in excess of the illegal limit of 0.10 percent.

Third, prevention activities must begin in the home. Families must continue and intensify their efforts to educate their children on the various problems associated with overuse of alcohol and drugs. I would like to commend the successful grassroot parent's organizations that have developed to encourage parents to become role models for their children. They recognized that the key to preventing children's involvement with alcohol and drugs is communication.

Fourth, we must continue funding of research in alcohol and drug-related problems to tackle the problems of substance abuse in our country. President Reagan and the Congress has set forth an array of Federal programs to battle the tremendous problems of alcohol and drug misuse. Through continuation of support for the National Institute on Alcoholism and Alcohol Abuse and the National Institute on Drug Abuse, we can better understand the myriad of issues surrounding alcohol and drugs in our society.

While all States and communities must further develop and implement their own strategies, there is a logical, central partnership for the Federal Government through the National Highway Traffic Safety Administration (NHTSA), a division of the U.S. Department of Transportation. Among other things, NHTSA has been instrumental in coordinating the weekly activities of the Drunk and

Drugged Driving Awareness Week, and, therefore, is ideally positioned to work with States and communities on many of these issues. The goals of the NHTSA program are to provide the States and their communities with the latest technology in solving the drunk and drugged driver problem; to act as a catalyst to move States and communities into action in an organized and systematic manner; to educate members of society as to the magnitude of the problems and the possible solutions; and through these actions, ultimately to significantly reduce the toll of alcohol-related deaths, injuries, and property damage NHTSA officials stress that "even though drunk driving is a national problem, it can be solved only at the local level."

During this week of awareness of both drunk and drugged driving, let us as a nation briefly pause and remember the victims and their families. But after our solitude, let us then push ahead with renewed vigor to initiate and support any and all action that may end further suffering. It is best stated in a guide book entitled "How to Save Lives and Reduce Injuries—A Citizen Activist Guide to Effectively Fighting Drunk Driving" by Sandy Golden who writes "We have to get the word out that we will no longer tolerate drunk (and drugged) driving in our communities and mean it."

USE OF RESTRAINT

Mr. HARRY F. BYRD, JR. Mr. President, one definition of the word restraint is to hold back from going to extremes. U.S. District Court Judge D. Dortch Warriner, in dismissing a recent court case brought by an Henrico County, Va., woman whose son had been dismissed from a high school band, rightly asks that we use restraint when we turn to our judicial system.

His view, and it is a view that I share wholeheartedly, is that our court system is overburdened by the extremes to which citizens all too frequently go in seeking to have their wrongs, real or imagined, righted. The U.S. Constitution, he says, cannot and should not be called into play whenever and wherever a person is in disagreement with authority.

Certainly a dismissal from a school band as punishment, especially when the circumstances are reviewed by any number of impartial persons including the county school board, is not a Federal case. But, sadly, it is no more extreme in its frivolity than countless cases brought daily in courts around our Nation.

The main body of Judge Warriner's opinion, along with an editorial pointing out that such cases are largely responsible for the backlog that threatens to interfere with real justice in our land, appeared in the December 7 issue of the Richmond (Va.) Times Dispatch. I ask that the editorial, entitled "Unclogging the Courts," and the opinion, headlined "Warriner Swats Frivolity," be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

UNCLOGGING THE COURTS (II)

On Nov. 29, we printed on this page Chief Justice Warren Burger's ideas for structural changes in the nation's court system that might break up the serious logjam of cases and speed the process of justice. The proposals certainly were worthy of serious consideration.

On Dec. 1, in the U.S. District Court here, Judge D. Dortch Warriner demonstrated another way to unclog the courts. It is the route of judicial and citizen restraint and common sense. His decision in *William J. Bernstein, etc. vs. Jack Menard, et al.,* which we run on this page today, shows the value of those qualities.

In many cases, courts are overloaded because we the people have inundated them with our petty complaints. Accept a decision by someone in authority over us? Never! Hire a lawyer and make a federal case out of it.

As Judge Warriner pointed out in his order dismissing the complaint of a mother who refused to accept a disciplinary action taken against her son as a member of a Henrico County school band, all of us have rights under the U.S. Constitution, but that does not mean that the Constitution is "a god watching over us, counting the hairs on our head, or concerned when a sparrow falls from the heavens."

Were a school board acting in a totally arbitrary way that threatened a student's ability to gain an education, that would be a different matter, of course. But teachers, principals, bandmasters and others placed in authority have to be able to discipline their charges without being second-guessed by judges every time they act.

Do read the Warriner decision. It makes good sense—and great reading.

WARRINER SWATS FRIVOLITY

(Following is the main body of the opinion that U.S. District Court Judge D. Dortch Warriner issued last week in dismissing the complaint of a Henrico County mother against a public school band that had disciplined her son. The matter is discussed editorially today.)

This complaint is another example of a prevalent disposition by parties and lawyers to litigate over every source of unhappiness to which humankind may be subject. While it might be considered unfortunate that a boy be dismissed from the high school band, it is much more unfortunate that his mother saw fit to take the matter to court and that she was able to find a lawyer willing to do her bidding. (Here Judge Warriner referred to a footnote, which observed that: "This suit [as opposed to the incident] has received widespread notoriety through newspaper, radio and television coverage in Virginia."—Editor)

After an adversary hearing on a motion for a temporary restraining order, this Court found that the punishment prescribed for the boy as a result of his unpleasant encounter with the bandmaster was *de minimis.* The complaint and the supplemental complaint are themselves confirmatory of the Court's judgment.

The complaint and the supplemental complaint show that had the boy accepted the punishment meted out by the bandmaster, be it considered fair or unfair, wise or unwise, proportional or disproportional, he would have accepted a transitory embarrassment and humiliation which he might remember with distaste for the rest of his life or, more likely, which might have taught him to be more respectful of those placed in authority over him. Whatever the event, it is clear that the Constitution of the United States of America was not offended. No schoolchild has a constitutional right to be free from discipline. Indeed, discipline in school is a boon, not a curse.

Nor does the fact that the youngster has now been dismissed from the band for his refusal (or that of his mother) to go on the band trip to Florida alter the case. While all of us, including schoolchildren, have rights under the United States Constitution, the Constitution is not a god watching over us, counting the hairs on our head, or concerned when a sparrow falls from the heavens. If bandmasters must be concerned that their every disciplinary decision is subject to a constitutional standard to be judged in a federal court, harmony and rhythm will disappear from the musical scene Cacophony will prevail.

Indeed, if courts seriously entertain suits such as this, not only will the courts fall into disrepute, but much more gravely, the Constitution will become the subject of derision. It is a serious mistake to treat the Constitution as a brooding presence, ever present in time of need able to right any wrong, correct any evil, set straight that which has gone awry, feed the hungry, and clothe the naked. The Constitution is a law. It provides the framework of our government and sets forth certain restrictions upon the government's ability to interfere with fundamental rights of free men and women. Suits such as this trivialize our Constitution.

But if it be supposed that there exists a constitutional right to play a trumpet in a high school band, surely no one can argue that this boy was deprived of his "right" without due process of law. The complaint and the supplemental complaint show that the defendants went to ridiculous lengths to dignify the boy's complaint. According to the complaint and supplemental complaint, the child had an opportunity to be heard by the bandmaster, the high school principal, the superintendent of the Henrico County public schools, and even the School Board itself!

The opportunities given the boy to be heard exceed anything the Constitution would ever require for such a trivial matter. To have the Superintendent of Schools and the County School Board involved in such a spat is a waste of their time and of the taxpayers' money. One suspects that such waste, so evident here, exists for no other reason than the prevalence of frivolous and vexatious suits such as this.

SENATOR HARRY F. BYRD, JR.

Mr. NUNN. Mr. President, the Senate will lose one of its most consistent voices for fiscal responsibility and a strong national defense when Senator HARRY F. BYRD, Jr., retires at the end of this Congress.

Throughout his long and distinguished career of service to the people

of Virginia and the Nation, Senator HARRY BYRD has been a devoted proponent of a sane fiscal policy, an advocate of the Government's living within its means on a balanced budget.

During a time when the Federal Government has plunged deeper and deeper into the red ink, Senator HARRY BYRD has stood like a monument to reason and responsibility. Had the Senate paid more heed to his wise counsel, the country would not now be burdened with a national debt in excess of a $1 trillion dollars and deficits estimated at more than $150 billion a year for the foreseeable future.

The Senate's passage this year of a constitutional amendment requiring balanced Federal budgets must be considered a tribute to his long and persistent effort to alert the Nation to the dangers of deficit financing.

The strength and conviction with which he carried on this cause, so nobly pursued in this Chamber by his father for 30 years before him, has set a high and inspiring example for all of us who believe in rational fiscal policies. While his voice of reason will leave the Senate, his example will remain for years to come as a beacon, for both Democrats and Republicans, lighting the road to fiscal responsibility.

In addition to his devotion to fiscal sanity, Senator HARRY BYRD has always been a stalwart in support of a strong national defense and approached this area in a bipartisan spirit which is the true test of a statesman.

I worked closely with Senator BYRD over the years on the Armed Services Committee on a number of important issues, particularly military manpower and conventional forces, especially seapower. I always found his counsel to be studied with a keen insight into meeting military requirements in the appropriate fashion.

HARRY BYRD was always willing to dig into complex issues that many only dealt with on the surface. He worked equally hard on the so-called glamor issues of defense procurement as well as the less well known and complex issues such as the massive Defense Officer Personnel Management Act.

He was always an effective champion for Virginia when the interest of his State and our national security coincided, and he always worked diligently to insure that our defense dollars were expended in an efficient and effective manner.

His colleagues on the Armed Services Committee, and particularly myself since we sat next to each other for almost 10 years, will sorely miss his presence and guiding hand. His place of high esteem, integrity, and credibility will not be easily replaced.

I am confident that I express all our sentiments when I say that we will miss HARRY BYRD in the Senate and that we hope he will continue to counsel us on issues before the Nation.

It is comforting to know that such a wise and true friend will be only a short distance away, and we all wish both HARRY and Gretchen a long and happy retirement among their beloved apple orchards in the beautiful hills of Virginia.

SENATOR FRITZ HOLLINGS SPEAKS OUT ON THE ECONOMY

Mr. SASSER. Mr. President, I commend to my colleagues Senator FRITZ HOLLINGS' recent response to President Reagan's radio address of December 11 on the MX missile.

Characteristically, Senator HOLLINGS sets forth a commonsense agenda for our economic recovery. He does so with eloquence and uncommon conviction. And in doing so he tells the American people the plain truth about the condition of our economy today.

FRITZ HOLLINGS is a good Democrat. But he is a man who, more than all else, wants to see a bipartisan program of economic recovery for all Americans whatever their political views.

That goal, Mr. President, is the mark of a statesman. Therefore I commend FRITZ HOLLINGS for his candid and forthright response to the President's radio address, and I ask unanimous consent that his remarks be printed in full in the RECORD at this point.

There being no objection, the response was ordered to be printed in the RECORD, as follows:

RESPONSE OF SENATOR ERNEST F. HOLLINGS TO PRESIDENT REAGAN'S RADIO ADDRESS DECEMBER 11, 1982

When your Administration came to town, Mr. President, your avowed purpose was to reduce the size of government and increase the size of the economy. After two years, you have accomplished the exact opposite. Last year you told us if we passed your program there would be an immediate burst in economic activity. Instead there was negative growth. Then you told us to wait for the individual tax cuts to take effect. Still no growth. Now you say wait until interest rates come down. They are down—and still no growth. Everyone predicts a dismal 1983 because business investment and consumer confidence are frightened away by high government deficits. Under your program, deficits go from $180 billion this year to $200 billion next year to $250 billion the following year. It took this country 206 years to reach a trillion dollar debt, but just three years of your program will add half a trillion to the national debt.

As for that vaunted claim of cutting the size of government, in your two years government has grown from 22.5 percent of the Gross National Product to 24 percent, and by 1985 it will hit an all-time record of 24.6 percent. Yes, you cut nutrition for infants and expectant mothers, you slashed school lunches, and under your program a million students, instead of staying the course with student loans, have had to quit the course. While ripping those programs, you have launched a totally undisciplined program of weapons purchases that is busting the budget and breaking the economy upon which national security depends. You may prefer to buy MX missiles with red ink rather than school lunches with red ink—but the ink is just as red. And the military spree is even more unconscionable when defense contractors themselves tell you to slow down because they cannot absorb the money that fast. Three of the four military service chiefs tell you the $40 billion MX program is a bad idea, and still you plunge ahead. Tragically, it's all being done on the toil and sweat of the next generation—every dollar of it is borrowed money. I know you didn't set out to become the biggest spender of all time, Mr. President, but your blind stubbornness—trying to have it all at once—has brought you there. And, ironically, you have put three million Americans on welfare.

The problem for America isn't Social Security or gun control; it isn't abortion or prayer in the public schools or even nuclear freeze. These are important issues. But our overriding concern is economic survival. We need government controlling itself. We need a bipartisan approach of sacrifice across-the-board—with you leading the charge. To thaw the economy, we must freeze the budget. City and state governments, labor unions and business firms have had to freeze—what's the matter with Washington? Freeze discretionary spending. Freeze defense. Freeze entitlements. We can control increases in entitlements without cutting benefits. Finally, freeze further cuts, because we don't have the tax revenues to cut. In only means government borrowing billions more.

This is a program of shared sacrifice. It would mean that a Social Security recipient would not get an increase for one year; the Congressman would not get an increase in his pay or retirement; the rich would not get another tax cut; and defense would have to hold the line. The poor people in this country are already hurting bad. Now is the time for all to share in that hurt, for the good of America.

Mr. President, if you would appear tonight on television and tell the people that only a shared sacrifice can turn America around, if you would call for a freeze on spending for the next fiscal year, the word would go out over this land that Washington has finally turned the corner and set the tone for recovery and jobs and good times again. If you don't do something like this soon, we will just continue the meaningless political wrangle here in Washington, and every day there will be more unemployed, more bankruptcies, more loss of hope.

Only a bipartisan program of shared sacrifices can do the job. Lead us back to work, Mr. President. If not you, then who? If not now, then when?

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. BAKER. Madam President, there is one appropriation bill that it appears we might get to at this point and I hope finish before we take up the highway bill tomorrow at 2 p.m.

Madam President, I ask that the Senate now turn to the consideration of calendar order 986, H.R. 7356, the bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983.

Mr. ROBERT C. BYRD. Madam President, we have no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7356) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Appropriations, with amendments.

Mr. BAKER. Madam President, let me say that the leadership on this side would suggest that we conclude today's activities at about 6:30 p.m.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. BAKER. Madam President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, could I inquire if there are any requests for special orders that the Chair is aware of?

The PRESIDING OFFICER. There are none.

ORDER DESIGNATING PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Madam President, I ask unanimous consent that on tomorrow after the recognition of the two leaders under the standing order, there be a brief period for the transaction of routine morning business to extend not past the hour of 10 a.m. in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE ON TOMORROW

Mr. BAKER. Madam President, assuming that the Interior appropriations bill is not disposed of today, and I do not anticipate that it will be, at 10 a.m. tomorrow will the Interior appropriations bill recur as the pending business?

The PRESIDING OFFICER. It would.

Mr. BAKER. Madam President, on tomorrow, then, I expect that we will continue to debate the Interior appropriations bill. It is my hope that we can finish it before the hour of 12 noon. I urge Senators to consider the necessity to speed up, to expedite, the consideration of all measures between now and sine die adjournment. I think it is possible to finish the Interior appropriations bill by 12 noon tomorrow, and I strongly urge Senators to do so.

ORDER FOR RECESS ON TOMORROW FROM 12 NOON UNTIL 2 P.M.

Mr. BAKER. Madam President, I ask unanimous consent that at 12 noon tomorrow, in order to accommodate a requirement that Senators on both sides of the aisle may attend caucuses of their respective parties which will occur off the floor of the Senate, that the Senate stand in recess from that hour until the hour of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1983

The Senate continued with the consideration of the bill.

Mr. BAKER. Madam President, I thank all Senators. I urge that we dispose of as much debate on this measure between now and 6:30 p.m. as possible.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Madam President, I thank the majority leader for getting this matter to the floor today for debate.

Let me say to all Members who are present and who may be listening that I would hope we can dispose of some amendments tonight. If we wait until tomorrow morning to start the process of offering amendments, we will be very lucky to finish by noon. If there is anyone who really cares about getting this bill done so that we can get to conference to resolve the few remaining issues in conference, we have a very narrow window of time in which to do that, and I hope they will help us expedite that.

Madam President, I ask unanimous consent that the committee amendments to H.R. 7356 be considered and adopted en bloc and considered as original text for purposes of further amendment, provided that no point of order be considered as waived thereon.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, line 11, strike "$322,963,000", and insert "$331,716,000";

On page 2, line 20, strike "$95,520,000", and insert "$96,320,000";

On page 2, line 22, after "expenses", insert the following: ": *Provided*, That this appropriation may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients.".

On page 3, line 5, strike "$468,000", and insert "$311,000";

On page 3, line 21, strike "$46,883,000", and insert "$61,533,000";

On page 6, line 23, strike ": Provided,", through and including "permitee" on page 7, line 1, and insert the following: "*Provided further*, That the Secretary of the Interior shall develop criteria for extending, on a case-by-case basis, the period allowed for phased livestock reductions on public rangelands administered through the Bureau of Land Management up to five years. Such criteria shall take into account available agricultural assistance programs, the magnitude of projected livestock reductions, alternative pasturage available, and ability of such public rangelands to sustain such phasing in of livestock reductions without damage to rangelands productivity: *Provided further*, That an appeal of any reductions in grazing allotments on public rangelands must be taken within thirty days after receipt of a final grazing allotment decision or ninety days after the effective date of this Act in the case of reductions ordered during 1979, whichever occurs later. Reductions of up to 10 per centum in grazing allotments shall become effective when so designated by the Secertary of the Interior. Upon appeal any proposed reduction in excess of 10 per centum shall be suspended pending final action on the appeal, which shall be completed within two years after the appeal is filed."

On page 8, line 6, strike "$242,778,000", and insert "$227,279,000";

On page 8, line 8, after "expended", insert the following: "*: Provided*, That the only critical habitat to be designated under section 4(b)(2) of the Endangered Species Act of 1973 (Public Law 93-205), as amended, for the Northern Rocky Mountain Wolf in Idaho shall be coterminous with the boundaries of the Central Idaho Wilderness Areas, as established by Public Law 96-312.".

On page 8, line 21, strike "$23,149,000", and insert "$11,126,000";

On page 9, line 9, strike "$33,647,000", and insert "$19,048,000";

On page 10, line 18, strike ": Provided", through and including "Hatchery":" on line 23, and insert the following: *Provided further*, That the administrative/visitor facility at the Merritt Island NWR, Florida, for which funds were appropriated under the head "Construction and anadromous fish" in chapter VIII of Public Law 97-257 is hereby designated the Scott J. Manness-Beau W. Sauselein administrative/visitor facility and that the maintenance center not be named as provided in that account.".

On page 11, line 15, strike "$567,730,000", and insert "$537,170,000";

On page 11, line 17, strike "of which", through and including "1982" on line 20;

On page 12, line 4, after "States", insert the following: "*Provided further*, That $85,000 shall be available for the National Park Service to assist the town of Harpers Ferry, West Virginia, for police force use: *Provided further*, That not to exceed $1,000,000 shall be available for assistance to the Washington Opera, District of Columbia such assistance to be available only to the extent matched by the opera with a like amount of new or increased contributions or pledges derived from nongovernmental sources which have not previously been used for Federal matching purposes: *Provided further*, That notwithstanding any

other provision of law, the National Park Service shall establish or continue reasonable entry and recreation use fees for all units of the National Park System administered by the Department of the Interior, where practical, and that such fees may from time to time be revised: *Provided further,* That such fees less the cost of collection shall be deposited into the general fund of the Treasury: *Provided further,* That $160,000 shall be available for operation, including maintenance and protection, of the former home of Harry S Truman at 219 North Delaware Street, Independence, Missouri, upon assumption of administrative jurisdiction thereof by the National Park Service pursuant to specific legislation similar to S. 3077, Ninety-seventh Congress, or pursuant to the general authority of the Act of August 21, 1935 (49 Stat. 666), or otherwise.".

On page 13, line 8, strike "$10,087,000", and insert "$9,487,000";

On page 13, line 19, strike "$161,846,000", and insert "$147,017,000";

On page 14, line 1, strike ", and", through and including "Memorial" on line 2, and insert the following: "$1,400,000 for the Federal share of the construction and development costs for the Alaska Interagency Visitor Centers in Anchorage, Fairbanks, and Tok, Alaska, pursuant to section 1305 of the Alaska National Interest Lands Conservation Act (Public Law 96-487).".

On page 14, line 14, strike "$172,643,000", and insert "$129,400,000";

On page 14, line 18, strike "$8,995,000", and insert "$5,000,000";

On page 14, line 19, strike ", and", through and including "Area" on line 20;

On page 15, beginning on line 10, strike "I helicopter for replacement only";

On page 15, line 23, after "situations", insert "and conduct emergency search and rescue operations";

On page 16, line 8, strike ": *Provided*", through and including "commission" on line 24, and insert the following: "*Provided further,* That notwithstanding any other provision of law, the Secretary of the Interior is authorized to make available to the Smith River Fire Protection District, California, lands within the boundary of Redwood National Park for construction of a fire station.".

On page 17, line 19, strike "$365,525,000", and insert "$352,365,000";

On page 19, line 11, strike "$192,586,000", and insert "$196,506,000";

On page 19, line 13, strike ": *Provided*", through and including line 16:

On page 20, line 4, strike "$128,629,000", and insert "$142,162,000";

On page 20, line 4, strike "$88,346,000", and insert "$83,946,000";

On page 20, line 22, strike "$61,313,000", and insert "$63,819,000";

On page 21, strike "$126,609,000", and insert "$152,649,000";

SEC. 314. The titles conveyed by and the easements and restrictions heretofore reserved and imposed by the Secretary of the Interior pursuant to section 506(c) of Public Law 96-487 are hereby confirmed in all respects.

SEC. 315. Except as expressly provided for by law, none of the funds appropriated by this Act shall be obligated to dispose, except by exchange, of any Federal land tract until such time as the agency responsible for administering the disposal of the tract has specifically identified the tract as no longer being needed by the Federal Government; inventoried the tract as to its public benefit values; provided opportunity for public review and discussion of the tract proposed for disposal; and provided 30 days advance notice of the tract proposed for disposal and of the plans for carrying out such disposal to the congressional delegation of the State or States in which the tract proposed for sale is located and to the appropriate congressional committees for immediate printing in the Congressional Record: *Provided,* That neither the Act of July 31, 1958, as amended (72 Stat. 438, as amended; 7 U.S.C. 1012a; 16 U.S.C. 478a) nor the Act of June 14, 1926, as amended (49 U.S.C. 869 et seq.) shall be subject to the provisions of this section.

SEC. 316. Notwithstanding any other provision of law, title II and title III of the Powerplant and Industrial Fuel Use Act, Public Law 95-620, shall apply only to powerplants and installations situated in the contiguous 48 States, the District of Columbia, and, where applicable, Puerto Rico and the territories and possessions of the United States.

Mr. McCLURE. Madam President, the appropriations bill for the Department of the Interior and Related Agencies for fiscal year 1983 as reported to the Senate totals $7,391,607,000 which is an increase of $841,356,000 above the budget estimate.

While this bill is over the estimate for fiscal year 1983, it is $133,070,000 below the fiscal year 1982 level and $130 million below the budget allocation given to the subcommittee.

Madam President, it was only with the excellent cooperation of the members of the full Committee on Appropriations that we were able to bring this bill to the floor. In order to meet our budget authority ceiling, it was necessary to reduce the recommendations approved by the Interior Appropriations Subcommittee by $268,709,000 when we met in full committee.

I must ask that Members of the Senate exhibit the same restraint evidenced by those on the committee. It is quite likely that through the conference process, the total amount of the bill will increase above that provided by the Senate, bringing us within a hair's breadth of our budget ceiling. In order to have any flexibility in conference, it is essential that we maintain the small margin we now have between the Senate bill and the allocation ceiling. While $130 million may sound like a great deal, it represents only 1.6 percent of our total allocation.

Madam President, once again, the Interior bill has been burdened with a number of legislative provisions. While this is not the appropriate vehicle for such items, the nearness of the end of the Congress placed additional pressures on the committee to accept these

provisions. Some Members may well find some of the provisions too broad or too limiting for their particular liking. I would urge that we not get bogged down in long discussions of these issues as most of them are quite familiar to the interested parties. If we can move quickly to votes on any amendments which are offered, we greatly increase the likelihood that the Interior bill can pass the Senate and that conference can be completed prior to adjournment.

The problems that would be faced by the Department of the Interior and the 26 related agencies funded by this bill if they had to operate for fiscal year 1983 under the provisions of a continuing resolution, to my mind, far outweight the importance of the legislative provisions contained in the bill.

Madam President, as a full explanation of all of the items contained in the committee's recommendation along with supporting tables was printed in the CONGRESSIONAL RECORD of December 9, I will not now provide the usual summary.

I call to the attention of the Members who may have looked at the CONGRESSIONAL RECORD of December 9 for the explanation of the bill that the tables printed along with the explanatory matter were separated by other intervening material and the table was printed at the end of the extension of remarks for the Senate for that day. Those of my colleagues who want to look at the tables, if they refer to the RECORD of December 9, will find the tables at the end of the Senate matter, separated from the explanatory material. But it is all present in that RECORD and in that place.

Madam President, I shall be happy to yield the floor to the distinguished Senator from Louisiana, who is, as usual, so very helpful in resolving various matters that come before us, both in the authorizing committee and, again, in the Appropriations Committee on these subjects.

Mr. JOHNSTON. Madam President, I thank my distinguished colleague, the chairman of the subcommittee. The job this year was a very difficult one and I think the chairman did an excellent job of taking care of the disparate entities that make up this bill in a fair and equitable way and getting it passed through the subcommittee overwhelmingly.

The compromises that were made were tenuous and difficult to make. I guess I am saying that I hope we do not have to face a whole lot of amendments, because these difficult compromises could be blown apart and we could end up with no bill if we get mired in too many amendments.

Madam President, the fiscal year 1983 Department of the Interior and Related Agencies appropriation bill provides a total of nearly $7.7 billion in budget authority and $8.3 billion in budget outlays for Department of the Interior programs excluding the Bureau of Reclamation, for the U.S. Forest Service, many programs in the Department of Energy and other agencies including the Indian Health Service, the Smithsonian Institution, and the Endowments for the Arts and Humanities. The Interior bill is under the ceiling established in conformance with section 302(b) of the Budget Act. That this bill is "under budget" is a tribute to the diligence of the subcommittee chairman, the gentleman from Idaho.

Madam President, I wish to highlight a few of the items in this bill which are of special interest to the Members on this side of the aisle. The bill provides $128,876,000 for Federal land acquisition from the land and water conservation fund. Also from this fund, the bill provides $75,000,000 for assistance to State recreation programs. State grants for abandoned mine land reclamation are funded at $133.5 million and low-income weatherization grants are included at $114 million; $96 million in the Bureau of Land Management and nearly $6 million in the Fish and Wildlife Service for payments to local governments in lieu of taxes is recommended by the committee. This bill would also appropriate $2 billion and $74 million in off-budget funding for acquisition and delivery of crude oil for the strategic petroleum reserve.

Lest my colleagues be misled by the term "appropriation bill," I point out that the bill contains several legislative items. Among these items is a prohibition against exploration and leasing in designated wilderness areas or wilderness study areas. A similar prohibition is included with respect to exploration in a portion of the California Outer Continental Shelf. The committee bill also requires that certain procedures be completed before any parcel of surplus Federal land may be sold.

Outside of these, Madam President, and perhaps one or two other very small ones, it is a traditional bread-and-butter Interior appropriations bill.

With that as a preface, I hope that we can proceed to consider this Interior appropriation bill in an expeditious manner, and I urge my colleagues to come to the floor as quickly as possible to offer any amendments which they may have.

Madam President, again, I hope that, since we are in the very last stages of this session and since we do need the cooperation of all Senators in order to get any legislation through this session, I hope that we shall not have a whole barnyard full of amendments. If we do, it means we shall probably end up with no bill at all. This is a good bill and ought to be passed.

I thank the distinguished chairman of the committee for yielding to me.

UP AMENDMENT 1430

Mr. ARMSTRONG. Madam President, on behalf of myself and the Senator from Virginia (Mr. WARNER), I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG), for himself and Mr. WARNER, proposes an unprinted amendment numbered 1430.

Mr. ARMSTRONG. I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, add the following new section:

"SEC. ( ). Section 21 of the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920 (41 Stat. 437; 20 U.S.C. 241) (hereinafter referred to in this Act as the Mineral Leasing Act of 1920) is amended as follows:

Add the following new sections:

"(d)(1) The Secretary may lease to the holder of a Federal oil shale lease additional lands necessary for the disposal of oil shale wastes and the materials removed from mined lands, and for the building of plants reduction works, and other facilities connected with oil shale operations (which lease shall be referred to hereinafter as an "offsite lease"), except that within the State of Colorado the Secretary may only issue one offsite lease not to exceed six thousand four hundred acres, and one or more offsite leases, the aggregate of which does not exceed six thousand four hundred acres. An offsite lease may not serve more than one Federal oil shale lease and may not be transferred except in conjunction with the transfer of the Federal oil shale lease that it serves.

"(2) The Secretary may issue one offsite lease of not more than three hundred and twenty acres to any person, association or corporation which has the right to develop oil shale on non-Federal lands. An offsite lease serving non-Federal oil shale land may not serve more than one oil shale operation and may not be transferred except in conjunction with the transfer of the non-Federal oil shale land that it serves.

"(3) An offsite lease shall include no rights to any mineral deposits.

"(4) The Secretary may issue offsite leases after consideration of the need for such lands, impacts on the environment and other resource values, and upon a determination that the public interest will be served thereby.

"(5) An offsite lease for lands the surface of which is under the jurisdiction of a Federal agency other than the Department of the Interior shall be issued only with the consent of that other Federal agency and shall be subject to such terms and conditions as it may prescribe.

"(6) An offsite lease shall be for such periods of time and shall include such lands, subject to the acreage limitations contained in this subsection, as the Secretary determines to be necessary to achieve the purposes for which the lease is issued, and shall

contain such provisions as he determines are needed for protection of environmental and other resource values.

"(7) An offsite lease shall provide for the payment of an annual rental which shall reflect the fair market value of the rights granted and which shall be subject to such revisions as the Secretary, in his discretion, determines may be needed from time to time to continue to reflect the fair-market value. Any offsite lease may, at the option of the lessee, include provisions for payments in any year which payments shall be credited against any portion of the annual rental for a subsequent year to the extent that such payment is payable by the Secretary of the Treasury under section 35 of this Act to the State within the boundaries of which the leased lands are located. Such funds shall be paid by the Secretary of the Treasury to the appropriate State in accordance with section 35, and such funds shall be distributed by the State only to those counties, municipalities, or jurisdictional subdivisions impacted by oil shale development and/or where the lease is sited.

"(8) An offsite lease shall remain subject to leasing under the other provisions of this Act where such leasing would not be incompatible with the offsite lease.

"(c) Any action seeking judicial review of a decision of the Secretary to issue a lease pursuant to subsection (d) may only be brought within ninety days following the date the decision of the Secretary is announced and made public by publication in newspapers of general circulation in the areas affected. Any claim shall be barred unless a complaint is filed within the time specified. Any such complaint shall be filed in the United States district court for the district in which the lands to be leased are located. Notwithstanding the amount in controversy, such court shall have jurisdiction to determine such proceedings and to provide appropriate relief. Any such proceeding shall be expedited in every way by such court.

"(f) In recognition of the unique character of oil shale development:

"(1) In determining whether to offer or issue an offsite lease under subsection (d), the Secretary shall consult with the Governor and appropriate State, local, and tribal officials of the State where the lands to be leased are located, and of any additional State likely to be affected significantly by the social, economic, or environmental effects of development under such lease, in order to coordinate Federal and State planning processes, minimize duplication of permits, avoid delays, and anticipate and mitigate likely impacts of development.

"(2) The Secretary may issue an offsite lease under subsection (d) after consideration of (A) the need for leasing, (B) impacts on the environment and other resource values, (C) socioeconomic factors, and (D) information from consultations with the Governors of the affected States.

"(3) Before determining whether to offer or issue an offsite lease under subsection (d), the Secretary shall seek the recommendation of the Governor of the State in which the lands to be leased are located as to whether or not to lease such lands, what alternative actions are available, and what special conditions could be added to the proposed lease to mitigate impacts. The Secretary shall accept the recommendations of the Governor if he determines that they provide for a reasonable balance between the national interest and the State's interests. The Secretary shall communicate to the Governor, in writing, and publish in the Federal Register the reasons for his determination to accept or reject such Governor's recommendations. The Secretary's decision to accept or reject the Governor's recommendation shall not be subject to judicial review except insofar as that determination is found to be without observance of consultative actions required by this subsection.

"(g) The Secretary shall establish an "Oil Shale Advisory Council" to advise the Secretary on planning for oil shale development, leasing of Federal oil shale lands, development of oil shale resources on leased lands, and coordination of Federal and State oil shale activities. The Oil Shale Advisory Council ("Council") shall be made up of nine members, as follows: each of the State Directors of the Bureau of Land Management for the States of Colorado, Utah and Wyoming, or his designated representative; each of the Governors of the States of Colorado, Utah, and Wyoming, or his designated representative; and a local or county official who resides in a county where oil shale deposits are being developed, or in a contiguous county, from each of the States of Colorado, Utah and Wyoming, to be appointed by the Secretary from nominations made by the Governor of each of the States. The Secretary shall designate one of the State Directors of the Bureau of Land Management as Chairman of the Council. The Oil Shale Advisory Council shall operate in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. 1970 ed. Supp. II, App. I).".

Mr. ARMSTRONG. Madam President, this Nation has fantastically valuable and vast reserves of oil shale that lie waiting to play a decisive role in moving us toward energy independence. And yet, at this time, America's oil shale industry is limited to a handful of companies experimenting cautiously with several uncertain, risky, and terribly expensive technologies. Declining international oil prices and sluggish economies around the world have further decreased the likelihood of major advances in synthetic fuel technologies.

Added to all of this is the fact that Congress, after 4 years of study and deliberation, has failed to enact comprehensive oil shale leasing legislation. We have failed to establish a permanent Federal policy for the orderly and gradual development of this critical natural resource. In the 96th Congress, we nearly passed off-tract leasing legislation to solve the problem of off-site disposal for Federal lessees. That legislation died in the Senate at the end of the second session. Early in this Congress, I introduced S. 1073—the same legislative language that nearly became law in the previous Congress, where it passed the other body and was reported to the Senate by the Energy Committee, before languishing on the calendar. During the middle of last summer, however, when the other body passed a comprehensive oil shale leasing bill, attention shifted from off-tract legislation to this comprehensive package. Like the off-tract bill in the previous Congress, comprehensive leasing legislation passed the other body and was reported to the full Senate by the Energy Committee; and like that bill, this Congress comprehensive package has also languished on the calendar.

Now, as this Congress turns to the conclusion of its work, the time has come to enact an off-tract leasing policy to solve what is currently a pressing problem in western Colorado. At this point, I wish to outline this problem and the manner in which it would be resolved by enactment of this amendment.

The extent of this country's oil shale resources is nothing short of incredible. The total resource base is 1.8 trillion barrels, located in several major deposits scattered across some 17,000 square miles in Colorado, Utah, and Wyoming. Of this total, roughly 600 billion barrels are recoverable, using presently available technology. The 600-billion-barrel figure is equal to the entire world's proven reserves of conventional crude oil.

A 50,000-barrel-per-day retorting facility would need 270 years to recover just 5 billion barrels, the amount of recoverable oil contained in Colorado prototype oil shale lease C-a. A 400,000-barrel-per-day industry would require over 30 years to recover this same 5 billion barrels. But we are talking about 600 billion barrels—a resource that would take over 4,000 years to exhaust at the rate of 400,000 barrels per day.

The bulk of these resources, as well as richest deposits, are located in my own State of Colorado. For obvious reasons, I am concerned that these vast resources be developed in a responsible, orderly way that recognizes the danger of serious environmental, social and economic disruptions in my State and its neighbors.

Madam President, I believe we have tarried too long already, thereby increasing the danger that we may have to embark on a massive crash development program during another major energy crisis, brought on by an embargo, revolution, or war in the Middle East or elsewhere in the unstable world that supplies so much of our oil.

This amendment is designed to open the way for a prototype program that will work and tell us what we need to know about this new fuel and its cost-effective extraction and use. Specifically, it addresses the principal obstacle to the prototype program—an opinion by the Solicitor of the Department of the Interior that the Secretary of the Interior has no authority to issue off-tract leases.

As a result, Congress must now pass legislation which specifically grants the Interior Secretary authority to lease additional lands, off the oil shale lease. Without such authority, the prototype oil shale leasing program will not proceed.

89-059 O-86-20 (Pt. 22)

The administration, industry, and many in Congress recognize that this is an essential first step. The prototype oil shale testing program cannot proceed any further until this amendment or something similar is enacted into law. Let me explain why, using Colorado tract C-a as an example.

Tract C-a covers 5,120 acres and is estimated to contain some 9 billion barrels of shale oil. How much of this total is actually recovered, however, depends on the technology used; that, in turn, depends largely on whether Congress enacts off-tract leasing legislation.

The current lack of off-tract leasing authority effectively eliminates surface mining and modified in situ recovery methods as options, even though in some cases they may be the best alternatives from an economic and energy conservation viewpoint. They are eliminated because the law apparently requires that plant facilities and disposal sites be placed directly on top of the rich oil shale deposits, rendering much of the resource unavailable for extraction and seriously affecting recovery economics.

This leaves the in situ and room-and-pillar processes as options. However, in situ has been all but abandoned as an extraction method, at least for the two Federal leaseholds in Colorado. Room-and-pillar mining would recover only 1.2 billion barrels, or 12 percent, of the 9 billion barrels in tract C-a.

I believe we must insure that other options are available for mining this valuable resource. My amendment is intended to do this.

Modified in situ methods (in which part of the resource is mined out and retorted at the surface, and the rest is retorted in place) would raise the oil shale yield at tract C-a to around 2 billion barrels, or 30 percent of the total. Surface mining would recover 5 billion barrels or 58 percent of the total in-place resources.

Surface mining of tract C-a thus represents a potential savings of $133 billion over room-and-pillar methods, because it would increase the yield by 3.8 billion barrels at $35 per barrel. Savings like these could be repeated many times over the life of America's oil shale industry if off-tract leasing authority is enacted, and the modified in situ and surface mining options are available.

Environmental considerations also argue strongly for off-tract leasing. If more land is available for leasing, the least environmentally sensitive areas can be selected for surface facilities and disposal sites. Plant, wildlife, air and water resources can be better protected.

I turn now, Madam President, to the specific provisions of this amendment. Acknowledging the legislative skill and leadership provided by the Senate Energy Committee, and Senators McCLURE and WARNER in particular, I have taken all but the last of the following provisions from the bill that committee reported to the Senate, restricting them where appropriate to off-tract leasing issues:

The Secretary of the Interior is given express authority to lease off-tract lands to the holder of a Federal oil shale lease. Only two such leases may be offered in Colorado, neither of which may exceed 6,400 acres.

The Secretary may also issue off-tract leases, limited to 320 acres, to non-Federal oil shale developers. This is designed to solve the problem of small Federal inholdings in otherwise privately owned oil shale tracts; two shale developers, Chevron and Mobil, are currently experiencing this problem in Colorado.

Off-tract leases will not include any rights to any mineral deposits. Before issuing any off-tract lease, the Secretary must consider the need and environmental impact of the lease and determine that the public interest will be served.

Any off-tract lease must provide for an annual rental that reflects the fair market value of the rights granted. The rental fee may be prepaid, so the State's share of the fee can be used to mitigate front-end impacts of oil shale development.

Any suit against such leasing must be brought within 90 days of its announcement, and filed in the U.S. District Court for the district where the lands to be leased are located.

Before making a decision on any such lease, the Secretary must consult with State, tribal, and local officials, as agreed between Secretary Watt and Governors Matheson and Lamm.

The Secretary will in addition establish a permanent Oil Shale Advisory Council to advise him on all oil shale issues. Composed of Federal, State, and local officials, the Council is designed to streamline the current system of two oil shale advisory panels, formally include local government for the first time, and put the advisory body on a statutory foundation.

In conclusion, I strongly urge the adoption of these amendments. Off-tract leasing and these amendments are fully supported by the administration, and are essential to revive America's oil shale industry and the prototype program on which it depends. Until Congress is prepared at last to enact legislation setting up a comprehensive and permanent leasing policy, we must at the very least not construct new obstacles to those entities that are willing to lead the way to this valuable new fuel.

The package of amendments I am offering today is direct, uncomplicated, and familiar to my colleagues. I, for one, am prepared to go forward today with the comprehensive leasing package that the Energy Committee has reported to the Senate. Others, however, are not and it seems to me a great shame that the work of two Congresses should produce nothing of consequence in the field of oil shale leasing. It is therefore with a sense of urgency that I recommend this amendment to my colleagues and ask for its favorable consideration.

Let me take just a moment to repeat some provisions of this amendment, Madam President, which I hope and trust will not be controversial. It merely provides that the Secretary of the Interior may lease off-tract lands to the holder of a Federal oil shale lease.

Only two such leases may be offered in Colorado, neither of which may exceed 6,400 acres.

The Secretary may issue off-tract leases up to 320 acres to non-Federal oil shale developers to consolidate private holdings. No lease may include rights to mineral deposits, annual rent to be set at fair market value, and the Secretary must consider need, environmental impacts, and the public interest. Annual rental may be prepaid to mitigate front-end impacts of oil shale development on local communities.

The amendment includes consultation language to provide that the Secretary will deal with State, tribal, and local officials, language which has been approved by the two States affected, Utah and Colorado.

Under the amendment, any suit against such leasing must be brought in the local Federal court within 90 days. The Secretary will establish a permanent oil shale advisory council to advise him on all oil shale leases.

By way of explanation, Madam President, this amendment is needed because we are right at the point in the oil shale industry in Colorado where at least one promising project has actually been shut down because they do not have the authority to dispose of spent oil shale on an offsite location. In other words, they cannot go forward or, at least, are unwilling to go forward without this authority, which they have been seeking for nearly 7 years. After this length of time, one might suppose that a 7-year delay indicates some degree of controversy about the premise—that is, the idea of offsite disposal of shale. In fact, nothing could be further from the truth.

The 96th Congress nearly enacted offtract leasing legislation. The House passed something very similar in substance and content to what I have proposed. In addition, the jurisdictional committee—that is, the legislative committee of the Senate—has, both in this Congress and in the prior Congress, approved legislation which is essentially identical in its purpose to the amendment which I offer.

As a matter of fact—and I stress this—the proposal which I now offer consists, with one exception which I shall mention, entirely of provisions which are taken from the Energy Committee-recommended bill, S. 1484, and where appropriate, restricted to off-tract leases. The one exception has to do with consultation language which requires the Secretary of the Interior to consult with the Governors and with local officials.

I believe, therefore, there is no controversy about this. Yet, I stress it is of major importance to an industry which, itself, has great potential for our country and which is really critically important to the energy future of America.

Ordinarily, Madam President, I would not ask for such an amendment to be considered as part of an appropriation bill, but in view of the long history of delay on this matter and the fact that it is very timely from the standpoint of the development of the industry and, in fact, since August 1, at least one potential development has been on suspension pending the passage of such legislation, I do ask for its approval at this time.

Mr. RANDOLPH. Madam President, will my colleague from Colorado yield?

Mr. ARMSTRONG. Madam President, I shall be very pleased to yield to my colleague from West Virginia.

Mr. RANDOLPH. The able Senator from Colorado discusses a matter of continuing concern. There is a lack of understanding by many officials in the administration, the agencies involved, and the Congress on the basic need of undergirding the energy resources of the United States.

The Senator is a realist. It is not a fanciful but a factual development we should support of the oil shale program in the United States. This is true from the standpoint of a possible need, even quicker than we may think as we discuss this vital problem today. I speak of an alternative fuel supply.

I say this, and I hope understandably to the Senator and other colleagues, because of my 40 years of congressional knowledge of the subject alternative fuels. I recall, that the record may be complete, that in 1944 the President of the United States, Franklin Roosevelt, signed into law the Synthetic Liquid Fuels Act. It was my privilege to cosponsor this measure with Senator O'Mahoney from Wyoming.

In 1942, in the Subcommittee on Coal, I began hearings on synthetic liquid fuels in the House Mines and Mining Committee. During that period of time, I recall to the Senator, we had extensive hearings on the subject in Washington, D.C. We had extensive hearings in the field. We had the support of the Secretary of the Interior, Mr. Ickes. We had support generally, at that time, to bring this alternative fuels program into being.

We dealt then in dollar amounts which were less, much, much less than today. Then the program of synthetic liquid fuels was to cost approximately $85 million, a mere pittance of what we have been doing, and then withdrawing, in these latter year. During this long period of neglect a year or two ago we then found ourselves in this body, attempting to do a massive program.

Yet, after we had proved that it was feasible to convert oil shale into fuel in Rifle, Colo., as an alternative through the synthetic process, nothing was done. After we had proved that liquefaction and gasification of coal could turn into a fuel that was adaptable for motor and for aircraft transportation. All of this was proved. We were developing, and it was successful, forestry and agricultural products of America into fuels.

Then World War II came to an end, and everyone said, in a sense everyone perhaps that had something to do with the subject matter—I was not in Congress. I had been defeated in November of 1946. I was not here to make a legislative effort. I might have been unsuccessful. But $3 million of an amount running some $82 million in all was spent on pilot projects in proving that it could be done as the Germans were doing, not only with their ground mobile units but also as they struck at Great Britain from the skies.

Many people have misread the German attacks and why they failed. It was not that they ran out of fuels. Study and close analysis will prove that they ran out of aircraft because the decision had been made in the hierarchy of the German warmaking machine, under Hitler, that there be 50-50 attack planes and other varieties. Had it been 80 percent attack planes, without the Divine hand, we will say, that intervened, Great Britain would have been brought to its knees. It was a matter of days, or at least weeks, but it was the aircraft shot down by the British antiaircraft guns that changed that outcome.

Had we gone ahead, I ask the Senator from Colorado, with our program, would we have been on our knees to OPEC a few years ago? No, we would not have been on our knees, because we would have developed in a systematic, practical way the use of synthetic fuels in this country.

We are a nation on wheels and wings, with movement of people and products of the mine, the factory, and the field. Yes, that is our America. We are shortsighted, in my opinion, when we cut the substance of synthetic liquid fuels from the agenda on Capitol Hill or at the White House.

If I have talked too long, I ask forgiveness of my colleague. What I have said is based on fact and on a faith that I have in this type of fuel production in the United States. I fear that even now by actions within the Congress and the administration and business, and the oil industry, that we are making a mistake. We may have to pay dearly for our folly at a later date.

Mr. ARMSTRONG. Madam President, I believe that all Senators owe a debt of gratitude to the Senator from West Virginia for the valuable perspective which he has added to this discussion. It is sobering to realize, as he has pointed out, that actions which we take today may well have consequences 30, 40, 50 years from now. His reminder of how the actions of Congress in earlier decades have created the situation in which we now find ourselves I think puts into perspective not only my little amendment to this bill but much of the policymaking which occurs in this body. I thank the Senator for his important statement.

Mr. RANDOLPH. I thank the Senator.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Will the Senator from Colorado yield for a question?

Mr. ARMSTRONG. Yes, I will be happy to yield for a question.

Mr. METZENBAUM. Will the Senator from Colorado be good enough to advise the Senator from Ohio whether this measure that has been offered as an amendment to the Interior Department appropriations bill is identical or very similar to other pending legislation that is before the Senate?

Mr. ARMSTRONG. I beg the Senator's pardon. I did not clearly hear his question. Will he restate it?

Mr. METZENBAUM. I am sorry if I did not enunciate clearly.

Is this amendment similar to a pending piece of legislation that is before the Senate or is this an entirely new approach to the matter of oil shale leasing?

Mr. ARMSTRONG. Let me explain to the Senator that it is similar to several pieces of legislation. It is essentially identical to legislation which has twice passed the House, both in this session and in the last session. It is essentially identical to provision which is contained in a larger bill, that is, a bill of larger scope, which has been approved on two occasions by the Energy Committee of the Senate embodied in S. 1484.

S. 1484 goes far beyond the provision in this bill and deals in a much more comprehensive way with the question of oil shale leasing.

The purpose of this amendment is to address itself to a single, very limited, and I believe not controversial, aspect

of oil shale leasing which arises as a very timely matter for this reason.

On August 1 of this year, one of the few remaining oil shale operations in Colorado, which is to say in America, suspended its operations because it had not yet received permission to dispose of its shale from its leased tract offsite, and it did not feel it was practical to continue until it had that authority, which it has been seeking for some time, actually for 7 years.

As I say, the reason why it has been so long in getting this authority is not because, so far as I know, this is a controversial question but simply because each time the question has come before the Congress it has been wrapped in a large package or has come at the wrong time. I recall in the last week of the session 2 years ago we were in somewhat the same position we are now.

This measure had passed the House of Representatives but because it was tied up in some larger questions it was never considered separately. It is for that reason that I have offered a very narrowly defined amendment which is similar to a portion of other pending legislation.

Mr. METZENBAUM. Will the Senator from Colorado be good enough to advise how many acres of sites for shale oil waste would be involved in this legislation?

Mr. ARMSTRONG. Yes; we are talking about two sites not to exceed 6,400 acres each and in addition off-tract leasing not to exceed 320 acres which would be made available at the discretion of the Secretary to developers of oil shale on non-Federal land. This latter provision, although it is small in acreage, is designed to solve the problem of small Federal endholding in otherwise privately owned oil shale tracts.

There are two such tracts in my State where we simply have on the map a checkerboard pattern of private and nonprivate land and so that 320 acres is designed to accommodate that circumstance.

Mr. METZENBAUM. Will the Senator from Colorado be good enough to advise the Senator from Ohio as to the price at which that acreage would be leased and whether or not it would be leased on a competitive bid basis?

Mr. ARMSTRONG. Yes; the amendment states in section 7 that an offsite lease shall provide for the payment of an annual rental which shall reflect the fair market value of the right granted. It does not require competitive bidding but, of course, competitive bidding would really not be in order for this kind of lease because the only person to whom it would be useful would be someone who already has a lease for the oil shale to be developed. In other words, we are not conveying any new mineral rights or any oil shale rights but only in the discretion of the Secretary the right to dispose of the spent product on an adjacent site and so there could be no competition simply because there would be only one person theoretically interested or one firm that might be interested in a disposal situation.

Mr. METZENBAUM. Is the Senator from Colorado suggesting they need 6,400 acres in order to dispose of the waste from the shale oil mining?

Mr. ARMSTRONG. The figure of 6,400 acres is by way of limitation and originally—may I ask the Senator to defer for a moment? I wish to consult staff on the point I am about to make.

Mr. METZENBAUM. Madam President, I suggest the absence of a quorum.

Mr. ARMSTRONG. Madam President, I have the answer to the Senator's question if he will withhold for just a moment.

The point I wanted to verify before I stated it publicly was this, that 6,400-acre limitation was put in by the Senate committee at the suggestion of the Senator from Colorado. The bill passed by the House of Representatives contained no such limitation, and it seemed to us that it was wise to have some outer parameter on the discretion of the Secretary, but I wanted to verify before stating it that in the original bill, which has been passed by the House of Representatives, there was no such limitation.

Mr. METZENBAUM. Is it not possible under this amendment of the Senator from Colorado for the holder of a shale oil lease, perhaps property containing thousands of acres or whatever, to be able to obtain from the Government on a negotiated basis 6,400 acres which ostensibly is to be used for waste but could actually contain substantial shale oil deposits?

Mr. ARMSTRONG. I call the Senator's attention to the language of the proposed amendment, section 3, which states:

An offsite lease shall include no rights to any mineral deposits.

The Senator's point is well taken, but I believe we have accommodated that concern in the language of the amendment.

Mr. METZENBAUM. As the Senator from Colorado knows this body has brought this amendment on an appropriations bill without any prior knowledge, without any chance for any of us to study this measure, and it proves again very conclusively that on an appropriations bill there should not be legislation attached.

As the Senator from Colorado well knows it violates the rules of the Senate. The Senator from Ohio admits that he does not know all that this amendment contains because he was taken by surprise by it being offered today.

The Senator from Ohio was under the impression we would be discussing and dealing with matters having to do with the appropriations process. It is a very legitimate process. It was a logical reason for us to be here as called back by the President of the United States.

But every time this body attempts to move to deal with that which it is called back for, and that is for appropriations bills, certain Members of the Senate feel that that is a ripe and opportune time to add to the legislation, and that is what we have in this instance. We have a legislative proposal that has not moved as rapidly as some might want it to move, and some might think it should move. But it makes sense that this amendment not be included and that we go ahead with the appropriations process.

I have already indicated to the leadership of the Senate that I would go out of my way to cooperate in every instance so that we may move forward with the appropriations bills, those being the matters for which we were called back into the special session.

But now we are asked to legislate on this measure, and I have no reservations in saying that if it is the intent of the Senator from Colorado to press forward with this amendment then the Interior appropriations bill will probably not be brought to a conclusion here in this session of Congress. I do not believe it should be because it is my opinion that this matter is not appropriately offered as an amendment to the appropriations bill.

Madam President, I raise a point of order that this is legislation being attached to an appropriations bill.

Mr. ARMSTRONG. Madam President, will the Senator withhold his point of order briefly?

Mr. METZENBAUM. I certainly will.

Mr. ARMSTRONG. If Senator will withhold temporarily, let me just make a couple of observations.

First, let me say that in general I agree with his predisposition against legislative amendments to appropriations bills. I think it is unfortunate that it has become increasingly customary for such amendments to be added to money bills.

But I do not want to leave the impression for anyone who might casually read this RECORD or any spectator who may be observing this Senate that somehow the amendment which I have offered is an unusual one.

On the contrary, during the course of the consideration of appropriations bills many, sometimes dozens, even scores, perhaps hundreds of legislative provisions are routinely adopted as part of the appropriations process.

I do not suggest that this is a desirable way of doing business, but it is a fact of life.

Now, the Senator is correct that legislation on an appropriations bill does violate the rules of the Senate unless

it is specifically approved. There is a defense which I can raise, and I am not disposed to make that kind of an issue out of this particular amendment, but I merely appeal to the Senator to withhold his point of order and just recount again the reasons why.

First, because the oil shale industry is important to the future of our country, and it is in the process of shutting down.

I happen to be well informed about this because virtually all of the oil shale industry exists within my State.

One of the few remaining viable projects of the oil shale industry suspended its operations on August 1st of this year pending the approval of legislation to permit it to dispose of its spent shale off site. This is authority which it had been seeking through general approval for a number of years.

The amendment which I have offered, while it is, in the sense the Senator has suggested, misplaced on this bill, has been previously approved in spirit and in substance on two occasions by the House of Representatives and without any great controversy, and has on at least two occasions been approved by the jurisdictional committee of the Senate.

So I would hope the Senator will see fit to withhold his point of order and let the amendment be adopted.

May I also say we have reason to think it would be acceptable to the House because of previous passage.

Mr. JOHNSTON. Madam President, will the Senator yield?

Mr. ARMSTRONG. Yes, having made my case I yield.

Mr. JOHNSTON. You do not have to be a parliamentary whiz around here to know that at this late hour nothing is going to pass except virtually by unanimous consent, and from what I just heard the Senator from Ohio say this amendment or indeed the whole bill is not going to pass unless you can get his consent.

Mr. ARMSTRONG. I think that is correct, and I would be grateful if he would not make his point of order, and I will withdraw the amendment. I would not want to hold the bill in hazard over my amendment. I think my amendment is a worthy one, but it would not serve either the Senator from Colorado or the oil shale in Colorado to cause any problems for the appropriations managers.

Mr. JOHNSTON. I was going to suggest that perhaps the best way to do it is to temporarily set the amendment aside and get together with the Senator from Ohio, if it is possible.

Mr. ARMSTRONG. I would defer to the Senator's suggestion or any thought he has, and I hope if the Senator had any chance to consider it, he would not be disposed to move his point of order.

Mr. METZENBAUM. Madam President, I would like to suggest to the Senator from Colorado at this point that he withdraw his amendment and that between now and tomorrow, when we hope to dispose of this measure, that his staff and mine take a look at it.

I do not know all of the provisions of it. I think there are six pages to the amendment. I do not have any real problems about finding a site for waste disposal. I cannot conceiveably believe that you need 6,400 acres for each of two sites for waste disposal.

I would suggest that we do some examining to see whether or not it is not possible to find a correct amount of acreage needed and to look at the other provisions and, perhaps, by the morning be able to work out something that the Senator from Ohio would not find objectionable, and at this moment rather than let it be set aside I suggest it be withdrawn and it can be reoffered at a later point.

Mr. ARMSTRONG. I am grateful to the Senator from Ohio for his forbearance and for his suggestion.

I do ask unanimous consent that the amendment be withdrawn without prejudice to possibly offering it tomorrow.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment at this time and the amendment is withdrawn.

UP AMENDMENT NO. 1431

Mr. GORTON. Madam President, I have an amendment at the desk which I ask be considered.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON) proposes an unprinted amendment numbered 1431.

Mr. GORTON. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, amend the Section of H.R. 356 in Title I, entitled Fish and Wildlife and Parks, National Parks Service, Land Acquisition and State Assistance, by adding $10,700,000 to the total for expenses necessary to carry out the provisions of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 4601-4-11), including administrative expenses, and for acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the National Forest Service, all of which additional amount is for the Olympic National Park.

On page 9, line 10 amend the section of H.R. 7356 in Title I entitled Fish and Wildlife and Parks, United States Fish and Wildlife Service, Land Acquisition, by adding $4,000,000 to the total for expenses necessary to carry out the provisions of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C.4601-4-11), including administrative expenses, and for acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the United States Fish and Wildlife Service, all of which additional amount is for the Protection Island National Wildlife Refuge.

Mr. GORTON. Madam President, the amendment I propose would add $10.7 and $4 million respectively, to two appropriations totals in the pending legislation. Those totals are in the fish and wildlife and parks, National Parks Service, land acquisition and State assistance appropriation, and the fish and wildlife and parks, U.S. Fish and Wildlife Service, land acquisition appropriation, respectively.

In 1976, the Congress passed Public Law 94-578 in which $13 million was authorized for acquisition of lands within the Olympic National Park in the State of Washington. The lands authorized for acquisition were inholdings within the park and were part of an overall plan to reduce the size of park expansion and limit impacts on the Federal Government. The same legislation directed the Secretary of the Interior to report to Congress on additional acquisition needs after 3 years.

The initial $13 million was appropriated and spent. The Secretary later reported that an additional $10.7 million was needed to complete the planned acquisitions. This $10.7 million, the subject of this amendment, would be used according to the Secretary, to complete acquisitions in the Point of Arches-Shi Shi Beach coastal area and along the shoreline of Lake Ozette that were identified for acquisition in 1976 by Public Law 94-478, and to complete land transfers with corporate owners designed by Public Law 94-578 to limit park expansion.

It is important that these funds be appropriated now rather than be put off to future years. Though private individual and corporate property owners came together in 1976 and agreed to a plan of property acquisition with the National Park Service, that plan being memorialized in Public Law 94-578, those parties cannot be expected to hold their properties from active use or sale for other purposes indefinitely. It is the responsibility of the Federal Government to carry through with its acquisition plans. The $10.7 million here involved is necessary for the Federal Government to do so.

Acquisition of land by the Federal Government is, like many Federal activities, subject to procedural requirements. In this case, they are there to protect sellers. These procedural requirements, including reviewed property appraisals and offering procedures, take time and cost money. Too much delay in appropriation of the money necessary for acquisition of property can create a need to commerce this procedural process anew. Consequent-

ly, what may appear to be an economy in deferring purchase of property may actually become an expense in duplicative procedural costs.

Postponement of purchase of properties has, in recent years, resulted in higher prices paid for property, the fair market value of which has escalated over time. Though this has perhaps not been the case in the last 2 or 3 years, land value increase will certainly recur. If we act now with acquisition, this can be avoided.

It is important to the cause of land preservation that an appropriation be made for purchase of real property at the Protection Island National Wildlife refuge. Protection Island is an important seabird habitat which wildlife preservation groups have been concerned about saving from development for some years. Those groups have been raising money from among themselves during recent years and have been purchasing development lots on Protection Island as they became available for sale as they awaited congressional action in the creation of a national wildlife refuge on Protection Island. Creation of the refuge was accomplished this year by passage of H.R. 1486, Public Law 97-333.

One provision of H.R. 1486 provided that the U.S. Fish and Wildlife Service and Protection Island landowners may agree to transfer property to public ownership at the assessed value of the property in the first 2 years after the first appropriation for land acquisition. This provision does not limit other fair market value transactions. It is my understanding that the land preservation groups which have purchased lots over time now stand ready to engage in such transactions. Their purpose for acting as promptly as possible is to liquidate their investments in preservation so that they may pursue other purchases which they regard to be important to land preservation.

The U.S. Government has reached the point in land preservation when we must rely greatly on the resources of private groups and individuals in accomplishing the greatest amount of preservation at the least public cost. The sequence and timing of land acquisition is a most valuable tool in enhancing the purchasing power of the funds we will have available. We should not, by postponing the appropriation of funds for purchase of property at Protection Island, lose the timing advantage which preservation groups have given us by making purchases before property values escalated or when they were stressed. Likewise, we should not lose the advantage we create for ourselves by restoring liquid capital to those groups who will commit it to other preservation purposes.

We do not know whether the cost of property acquisition at Protection Island will be significantly higher if acquisition is postponed. We do know, however, that the difficulty of delivering potable water to the island and a county imposed construction moratorium have discouraged property value escalation during the past several years. Because potable water could be delivered to the island in the future, and because the construction moratorium could be lifted, it would be wiser to purchase the property now, rather than wait. For this reason, it would be wisest to appropriate acquisition funding in this appropriations bill.

I can say this evening that this amendment covers two subjects. It proposes to add $10.7 million and $4 million, respectively, two appropriations totals in the pending legislation, one for the acquisition of property within the outer boundaries of the Olympic National Park in the northwest part of the State of Washington, which has been sought for many years, a portion of which has already been purchased.

Because this is privately owned land and because much of it is valuable timberland, it is important that a matter which began a number of years ago now be brought to a speedy conclusion.

Second, there is a $4-million appropriation in this amendment for the acquisition of Protection Island which was, by action of this Congress, made a national wildlife refuge.

The property on that island falls into two categories: some purchased by private organizations pending the creation of the wildlife refuge, such as Nature Conservancy which would like to get their money out of it; additional moneys for acquisitions without serious contest and at the presently assessed valuation by Jefferson County, Wash.; and, third, of course, for purchases which might have to go through condemnation or other types of purchases.

It is important to note that each of these items is included in the House version of this bill which is before us at the present time.

I also understand that the distinguished chairman of the Appropriations Subcommittee, the chairman of the Energy Committee, whose support in passing the creation of the wildlife refuge at Protection Island, was absolutely essential does have some comments to make in this respect.

● Mr. JACKSON. I am pleased to join Senator GORTON in offering an amendment which would provide $10.7 million out of the land and water conservation fund to complete acquisition of lands in the coastal unit of Olympic National Park.

In 1976, Congress passed Public Law 94-578 which adds Shi Shi Beach, Point of Arches, and the Lake Ozette shoreline to Olympic National Park. The 4,000 acres that were added to the park include outstanding examples of wilderness coastline and primeval stands of coastal hemlock, spruce, and western cedar. To date, only about half of the privately owned land involved has been acquired.

Madam President, a $10.7 million appropriations at Olympic National Park would be well spent. Most of the property to be acquired can be purchased from willing sellers with little controversy. The only fear is that if adequate funds are not appropriated, some lands may be adversely developed or logged. Along Lake Ozette, for example, storms have blown down timber on privately owned property. The current owner, ITT Rainer, has acquired all the necessary permits but has responsibly refrained from harvesting these logs in the national park. If the Park Service is not able to purchase this property soon, it is likely that roads will be constructed and the full timber removal process will take place.

Therefore, Madam President, I am hopeful that we can provide the funds necessary to complete these transactions and avert the threat of logging and development within the authorized boundaries of Olympic National Park.

Madam President, I support Senator Gorton's amendment to the Department of the Interior appropriations bill for fiscal year 1983 which would add $4 million for the acquisition of lands and waters for the Protection Island National Wildlife Refuge.

Legislation to create a national wildlife refuge on Protection Island was signed into law on October 15, 1982. The enactment of this measure was the result of patience and hard work on the part of many individuals who realized the importance of providing a habitat for a broad diversity of bird species. We are eager to see that the money authorized for the necessary land acquisitions on the island be made available so that the refuge will actually be established.

Mr. McCLURE. Madam President, the Senator from Washington has stated the background of both of these matters. The Olympic Park matter has been around for a long, long while. I would anticipate when we get to conference with the other body on this appropriations matter we will probably be able to accommodate the full amount of money that has been asked for with respect to this particular project.

On the Protection Island, that is a very new matter having just been authorized this year.

I am aware, as Senator GORTON has stated, that we can satisfy a part of the immediate pressure with about 25 percent of the total funds.

Mr. GORTON. The Senator is correct.

Mr. McCLURE. It would be my anticipation, although we have not included it in this bill, it is in the House bill, the full $4 million, and again I think we can accommodate in the conference the $1 million figure that will satisfy the immediate pressure on Protection Island and get well started on the acquisitions there.

I hope that action will be satisfactory to my colleagues from Washington.

Mr. GORTON. As has been the case in my entire 2 years in this body, the Senator from Idaho is both understanding and very, very generous with my specific requests, and on that gracious undertaking on his part, I ask unanimous consent to withdraw the amendment.

Mr. McCLURE. I thank the Senator.

The PRESIDING OFFICER. The amendment is withdrawn.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia or the Senator from New Jersey.

COMMITTEE AMENDMENT STRIKING SECTION 108 VITIATED

Mr. BRADLEY. Madam President, I ask unanimous consent that the action of the Senate agreeing to that part of the committee amendment striking section 108 be vitiated, and that the committee amendment which was proposed to strike section 108 found at page 37, lines 9 through 23 be laid on the table.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Section 108, at page 37, lines 9 through 23, referred to above, is as follows:

SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of the following tracts within the Block, Hudson, Toms, Carteret, Lindenkhol, Spencer, Wilmington, Baltimore, Washington, or Norfolk Canyons of Outer Continental Shelf Lease Sale Numbered 76: Block Canyon, NK 19-10: 945, 946, 989, 990; Hudson Canyon, NJ 18-3: 290, 291, 334, 335, 336, 379, 380, 423-427, 467-471, 513-515, 558, 559; Toms Canyon, NJ 18-3: 815, 859; Lindenkohl Canyon, NJ 18-6: 193-194; Wilmington Canyon, NJ 18-6: 491, 492, 535, 536, 579, 580, 624; Baltimore Canyon, NJ 18-6: 750, 751, 794, 838, 882, 883; Washington Canyon, NJ 18-8: 515, 516, 559, 560, 604; and Norfolk Canyon, NJ 18-8: 907, 908, 909, 951, 952, 953, 997.

Mr. McCLURE addressed the Chair.

Mr. BRADLEY. Madam President, will the Senator yield? Is the Senator going to speak to that matter?

Mr. McCLURE. We have no objection. I just want the RECORD to reflect that we have no objection.

The PRESIDING OFFICER. The request is granted.

Mr. BRADLEY. I thank the Senator for his consideration.

As the result of this action, roughly 60 tracts or land off the coast of New Jersey will be withdrawn from an OCS sale No. 76. These are environmentally sensitive areas which are the breeding grounds of the tilefish, an essential part of the $1 billion New Jersey fishing industry. The action taken by the Senate removes those from the OCS lease, pursuant to the desire of the New Jersey State Department of Environmental Protection.

As I understand, this action of the Senate restores the House language in full and the items, therefore, are not conferenceable. I thank the Senator from Idaho.

Mr. MATTINGLY addressed the Chair.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator from Georgia.

OCONEE RANGER DISTRICT IN GEORGIA

Mr. MATTINGLY. Mr. President, I would like to draw the attention of the distinguished subcommittee chairman to the comments made in the committee's explanatory statement dealing with the Oconee Ranger District in Georgia. The House bill prohibited the use of any funds for design or construction of this project. The committee's explanatory statement does not concur with that prohibition.

Mr. President, I believe the House position is correct. I do not believe the expenditure of any funds for this new facility is warranted. Although no funds are provided in this bill for the project, I believe that it is important that the record reflect a united position between both Houses on this matter. I have previously notified the Forest Service of my position in regard to this proposal. There is no need at this time to proceed with this proposal and I would appreciate the Senator's consideration of adopting the prohibition applied by the House.

I would also like to add my many thanks to the Senators in the past for complying with the needs of my State.

Mr. McCLURE. Mr. President, I thank the Senator from Georgia for the clarification that he has provided for the RECORD.

The committee language was inserted in the report on the basis of an appeal from the Forest Service, which pointed out that, first, there were no funds included in the fiscal year 1983 budget for this project, and, second, that there were potential cost savings that could occur if the consolidation of the two ranger districts proceeded.

The committee report, unfortunately, does not reflect the position of the Senator from Georgia and the committee will concur with his suggestion of adopting that prohibition stated by the House report.

Mr. MATTINGLY. I thank the Senator.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Is the Senator from Idaho finished with that last item?

Mr. McCLURE. Yes.

Mr. LEVIN. Mr. President, I would like to make a parliamentary inquiry at this point. Is section 108 of the committee bill subject to a point of order on the ground that it is legislation on an appropriations bill?

The PRESIDING OFFICER. Section 108 of the bill, as amended by the committee, found on page 39, does contain legislative proposals and, therefore, constitutes legislation on an appropriations bill.

Mr. JOHNSTON. Mr. President, will the Senator withhold on the point of order before he makes one, if he intends to make one?

Mr. LEVIN. I am happy to.

Mr. JOHNSTON. Could the Senator tell me what the objection to that provision might be?

Mr. LEVIN. The original provision of the Alaska lands bill provided that either the Geological Survey or private individuals could be doing the surveying which is at issue, the investigation which is provided for into these lands. But, by not having this provision, it in effect said if one private company gets information about those lands then it would have to share that information with other companies, which made it more likely that the Geological Survey would be doing the investigation, because not many commercial companies would be likely to be doing the investigation under those constraints. So the U.S. Geological Survey would be more likely to be doing the investigation, which is fine with me, because their investigation would be much more environmentally sensitive, in my opinion, or more likely to be environmentally sensitive, than would be private companies.

Now we come along and amend the Alaska lands bill and, in effect, what we will be doing here is making it somewhat less likely that the investigation of those lands will be as environmentally sensitive as it would be if the Geological Survey was doing the investigation. So before I would be willing to see this kind of change in the Alaska lands bill, I would like to see some change in this language which would provide this protection to the private folks, providing they use the most environmentally available sensitive means of investigation. If they use the most environmentally reasonable available means of investigation, then I would think we ought to give them the protection that the committee obviously wants to give them. But, in the absence of that, I would much rather have the Geological Survey doing the investigation.

So I would raise the point of order, unless we could work out some lan-

guage which says we will grant this protection to these companies if they are certified by the agencies using the most environmentally sound method of investigation.

Mr. JOHNSTON. Mr. President, I will not debate this at great length because I think if the Senator does make the point of order, the point of order, as the Chair stated, would be sustained.

I think the Senator's analysis is correct, that is to say private companies are not likely to go in and make this assessment if the results of that assessment are available to all competitors. But what we are talking about is a $61 million price tag, according to CBO, and under the law if private companies do not do it then USGS is required to do it. So what you are doing is requiring USGS to spend $61 million that otherwise would be spent by private contractors and under this language the results of what the private contractors did would be available. It simply would not be available to be used by a competitor.

I would further invite the Senator's attention to the plain fact that the USGS does not have any rigs or geophysical units to go out and do this kind of work. They would have to contract to do it.

Now, the circumstances under which they would contract to do it are the very same circumstances that they could require private individuals to do it. So, in other words, to require USGS to do it does not determine at all the conditions under which it is done. The safety factors, the guidelines, those are likely to be precisely the same whether it is done by USGS contracting it out to private industry or by USGS putting it up for bids for private industry.

If the Senator is concerned about the standards, then the Senator's amendment will not affect that. All the Senator's amendment would do would be to cost taxpayers $61 million, to use the CBO figures, and it would not get you any additional environmental protection.

So I wonder if the Senator would take that into account in his point of order.

Mr. LEVIN. I thank my friend from Louisiana. The key words that he used in his statement are, that it is more than likely to be as environmentally sound. It perhaps is likely, but if the language were added which I suggest—and I think it can be easily added because it does not contradict what the Senator says—it would not be just more likely, it would be assured that the most environmentally sound approach would be used by private entrepreneurs.

I have no objection to using private entrepreneurs and allowing them to go in and look and giving them protection. I do not have any concern about that, other than the one I mentioned.

I would like to save the money, but not at the environmental expense. I think we can accomplish both by language which says that the protection given to the information that is obtained by these private companies will be protected and need not be open to their competitors providing they use the same method which would have been used by the Geological Survey had they gone in. That is all I am after.

I am not trying to spend the $61 million. I am trying to use the same environmental protection that the Geological Survey would have used had they gone in.

Mr. McCLURE. Will the Senator yield?

Mr. LEVIN. Yes.

Mr. McCLURE. Mr. President, I wish to underscore what the Senator from Louisiana has said and add just one other point.

First of all, I understand that the Senator does not desire to prohibit this exploration. He just wants to make sure if it is done, by whomever it is done by, that it is done in the same manner with suitable protection for the environment.

I think if we look back at the Alaska Lands Act, the law that provides for this exploration program, you will find that there are very specific protections written into that act with respect to any of the exploration programs that would take place under it. There is no exception to say that the USGS will do it one way and the private sector can do it some other way. The protection required by that act is, without exception, to require them to do it in a way that does take adequate protection for the environment.

If I understand the Senator to say that what he wishes is a specific provision that says there can be no variation in the requirement between USGS and the private sector, then I would have no objection to that. I think that is implicit in the law that is already on the books. I would have no objection to making it explicit if that will satisfy the concern that the Senator has expressed.

Mr. LEVIN. I thank the Senator from Idaho. I was very much involved in this portion of the Alaska lands bill. I am troubled to see the Alaska lands bill reopened at all on an appropriation bill. I think it is inappropriate, to coin a phrase there, for us to use an appropriation bill to open an Alaska lands bill. But I wanted to be certain that if we are going to do this that we are going to use the most environmentally sound method. Now, we have that guarantee here because, in effect, the private folks are not going to go in under the existing law. It is going to be the Geological Survey that is going to go in, and that means probably no one will. So the environment is protected right now, in effect, by the stalemate.

I want to protect the environment in a different way. I think we can work out language. We can take a little time on this and work out language. The regulations proposed by the Interior Department are not adequate in this regard. I want to be sure that if we are going to open this up, that we open it up to people that will use at least as environmentally safe methods of exploration as the Geological Survey.

Mr. McCLURE. Do I understand the Senator wants to write descriptive language, to write the regulations for the Department with respect to entry on the wildlife refuge? If that is the intention of the Senator, I will join in his request to have this section stricken because I have the same concern he has about piecemeal amendments to the Alaska lands bill. I do not want to get into rewriting that provision in that way any more than the Senator does. I hope we will not get to that point because I do not think we have that kind of a problem if what he is really saying is all we want is to make sure that whoever goes in there from the private sector does just as good a job as the Geological Survey does.

Mr. LEVIN. We want the language to require them, if they go in, to use the most environmentally safe method of exploration.

Mr. McCLURE. The Senator has said that.

Mr. LEVIN. This is not the place to argue legislation. We are on an appropriation bill. We are doing here exactly what appropriation bills are not designed to do.

But I see two alternatives. I do not have any great desire to see this legislation on the bill at all, to tell the truth. I would move to strike the legislation.

Mr. McCLURE. I detected that.

Mr. LEVIN. But if there is a desire to proceed with it so that these companies can, as a practical matter, go in, then I think we should write language here which requires them to use the most environmentally sound means of exploration which are available.

Mr. McCLURE. The Senator refers to the fact that he was active in the consideration of the Alaska Lands Act. That was written rather carefully, I believe. I would refer to the provisions which are already in the act, section 1002, subsection d, going on with exploration plans which are in subsection 3; subsection f, modification to exploration plans; subsection g, taking the three pages of the act.

Mr. JOHNSTON. Will the Senator yield?

Mr. McCLURE. We can carry that language forward. There is a rather detailed requirement with respect to these exploration plans. If the Senator

is saying that that law was inadequate, that we need to rewrite the law, that is something else again.

Mr. JOHNSTON. Will the Senator yield at that point?

Mr. LEVIN. I yield.

Mr. JOHNSTON. Would the Senator accept this restatement of what he said, and I think it is virtually verbatim, that at the end of section 108 add the following: "The Secretary shall be regulation insure that the environmental standards employed by any nongovernment party obtaining such information shall be at least as stringent as those employed by a Federal agency had it obtained the information"?

Mr. LEVIN. I would like to write language in here which assures that any investigation or exploration use the most reasonably safe environmental methods available. If we are to open the bill this way—and I am not happy about opening it. The Senator from Alaska is here. I think he knows the kind of work which we did to this bill. We are reopening the bill. We are reopening the bill here and if we are going to reopen it, it would seem to me that we ought to protect that environment to the same extent that it is protected now.

Mr. JOHNSTON. What I just gave the Senator is what he asked for.

Mr. LEVIN. I asked for two things and the Senator gave me one. What I asked for was that they use at least the same methods that the Geological Survey used. I also said that they would use the most environmentally safe and protective option that is reasonably available to them in their exploration.

Mr. JOHNSTON. Who defines that?

Mr. LEVIN. The Secretary of the Interior.

Mr. JOHNSTON. By rule?

Mr. LEVIN. By rule. What is the most environmentally safe method that is reasonably available?

Mr. JOHNSTON. The Senator sort of has us over a barrel here. We have not sought to change the standard. Indeed, we have not changed the standard at all. We simply make it workable.

Mr. LEVIN. But that would change the amount of exploration there is going to be.

Mr. JOHNSTON. No, it does not.

Mr. LEVIN. There will be more exploration by this. Again, I am not trying to stop it. I want to make sure that it is environmentally safe if we are going to permit it. Originally, this was all going to be done by the Geological people. Then we changed it in the bill to allow private people to do it. There were some protections on that which had to do with sharing of information, which reduced the likelihood that they would do it.

Mr. JOHNSTON. It may have been originally planned that way. I do not know in whose mind but not in the Senate committee which drew up the bill.

Mr. LEVIN. During the debate on this bill, this was opened up for private exploration. I understand that. But there is less likelihood of there being private exploration with the present restrictions of information sharing.

The Senator wants to eliminate that protection of the environment, which is something which I think is reasonable, but I would like to add a protection in the process, which is that the method which is the most environmentally safe that is reasonably available be utilized. I think that does what the Senator needs in terms of opening this up to private enterprise, and I think it protects the environment in the process. I think we can word that so that it protects both interests.

Mr. JOHNSTON. Can the Senator propose such an amendment?

Mr. LEVIN. We would be happy to work with the staff to try to do that.

Is the manager's intention to proceed to a vote on this matter tonight?

Mr. McCLURE. Will the Senator yield?

Mr. LEVIN. I yield.

Mr. McCLURE. I do not think there is any prospect at all that we will get to final passage of this matter tonight. We will be back on the bill tomorrow morning, and there will be the opportunity to discuss these matters both between now and then and again at that time, if necessary.

Mr. LEVIN. I thank the manager.

Mr. McCLURE. I do understand, Mr. President, that the Senator has not pursued the point of order at this time but reserves the right to pursue that point of order at a later time during the consideration of this bill.

Mr. LEVIN. The Senator is correct. I thank the Senator.

Mr. McCLURE. Mr. President, for the information of all Members, we hope to be able to resolve the matters that are not controversial, matters that we can resolve, this evening, with discussions, with making the record, and by agreement. It would not be my intention to ask for or press for rollcall votes at any time past the hour of 6:30. If Members are concerned about rollcall votes at a later time, I will either attempt to get those put off until tomorrow or put the issue off until tomorrow so we will not have to have any rollcall votes past the hour of 6:30 this evening.

In the event we are not able to do that, then I believe it is the leadership's intention that if we got to such a point, we would recess pursuant to the previous order, so Members may know that they will not be compelled to come back to the floor and vote past the hour of 6:30 this evening.

Mr. STEVENS. If the Senator will yield, that is the intention of the leadership, Mr. President, that if there is not a rollcall commenced by 6:30 p.m., we shall announce that there will be no further rollcalls this evening. There are still a few minutes to go in case somebody raises the issue here now. The Senator from Idaho is going to continue to work out consent items here. As soon as those have been disposed of, we shall have a short call of consent item matters subject to approval of the minority leader. We do not intend to be in session much after 6:30 tonight.

Mr. SPECTER. Mr. President, I call the attention of the distinguished Senator from Idaho to the conversation which he and I had when this matter was in the Appropriations Committee concerning the Westinghouse fluidized bed coal gasification process at Waltz Mill, Pa., which has been funded by the House at $6.5 million for fiscal year 1983. This had been in the Senate bill formerly and I had intended to make an amendment in the Appropriations Committee to raise the funding to conform to the House level of $6.5 million, but I did not do so at that time because of the budget limitations so that the bill could come to the floor within the established ceiling.

I would like to say for the RECORD at this time that I believe the funding level at $6.5 million as established by the House to be a very reasonable figure for this project, which is the only project in the United States which is able to use every kind of coal. The Department of Energy's partial support for continued research and development would address generic environmental, health, and safety issues, and enhancement of generic data base for fluidized bed technology development.

The United States needs domestic developed versatile gasification technology if it is going to successfully reduce its dependence on foreign energy supply.

In prior years, the Government's investment in this worthwhile program has been about 5 to 3, $55.6 to $33.8 million. By end of 1982, the cumulative investment will be nearly equal—$66 to $63 million. By 1986, the Government will have invested only $86 million to the $244.5 spent million by the private sector.

In the process development unit alone, the investment by the private sector will be $9.4 to the Government's $6.5, assuming that is the figure the Congress approves.

Mr. President, I suggest that this is a matter which is very important for the Nation as a whole. I hope that the distinguished chairman will see fit to do his utmost when the matter comes to conference to have the figure set by conference at the $6.5 million level.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. SPECTER. I do so yield.

Mr. McCLURE. The Senator knows the history of the Waltz Mill project. I am familiar with it from the standpoint of the information we got this year and also the history of it in past years. As the Senator has indicated, $6.5 million is included within the House bill for this project. Of course, as such, it is a conferenceable item. My expectation would be that the amounts to be included within the total coal research and development program will be compromised with the House.

In this instance, I believe that it is likely, and I think predictable, the Waltz Mill will fare very well in that overall compromise. But in order to be able to have the flexibility to negotiate with the other body with respect to all the elements of that compromise, we did not include either money in the project in this bill. I assure the Senator that it will have very good consideration and I expect that he will be pleased with the outcome in the conference.

Mr. SPECTER. Mr. President, I thank the distinguished chairman for those words. As I have learned in the context of the U.S. Senate, those words amount to a sort of magical code, which means, in effect, though no commitments are given or understood to be taken, the chairman will do what he can within the limits of the existing funding to agree with the House figure. I very much appreciate those assurances and the approach taken.

Mr. McCLURE. I thank the Senator.

UP AMENDMENT No. 1432

(Purpose: To delete language overriding the provisions of the Small Business Innovation Development Act (P.L. 97-219))

Mr. RUDMAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from New Hampshire (Mr. RUDMAN) proposes an unprinted amendment numbered 1432.

On page 74, line 3, strike section 311.

Mr. RUDMAN. Mr. President, this amendment eliminates section 311, found on page 74 of the bill. That section very briefly reads:

SEC. 311, No part of any appropriation contained in this Act for research and development activities shall be merged with other research and development moneys appropriated by this, or by any other Act, to create a separate account to carry out the purposes of the Small Business Innovation Development Act of 1982 (Public Law 97-219).

Mr. President, I have asked that this language be removed, No. 1, because there are serious reservations as to what precisely it does. The bill referred to was signed into law by the President this year after passage by unanimous vote in the Senate and by overwhelming vote in the House. There have been concerns on the part of some of the agencies as to how this will be administered. It is my view that if this were to be adopted in the form it appears in this bill, it would be a high likelihood that by this very simple language, we might vitiate the effect of a bill passed by Congress and signed by the President.

Mr. President, I have discussed this with the distinguished chairman of the subcommittee. I believe he agrees that there are concerns in this area. I shall be grateful if he would comment on this amendment. Hopefully, the chairman might be willing to accept this amendment in the form in which it is printed.

Mr. McCLURE. Mr. President, this language is in the House bill. If we take this out, it will be a conferenceable item. We shall discuss this matter with the members of the conference. I am quite willing to take it out now, knowing that we shall have to resolve the issue ultimately in the conference.

I do know of the Senator's concern that we not divide this fund into so many small parts that it cannot be effective in any of its parts. I know of the Senator's long interest and tremendous amount of activity in furthering this program. I think this action that he has taken today is a further expression of that interest. I do not know that I can tell what will happen in the conference, but I shall be happy to agree to the amendment at this time. Then we shall have to resolve the matter more fully in the conference.

Mr. RUDMAN. I thank the distinguished chairman of the subcommittee. Obviously, as a member of the subcommittee, I look forward to working with the distinguished chairman. There are a number of forces that would like to see Public Law 97-219 stricken from the books. They have lost their fair fight in the Senate, they lost their fair fight in the House. They are now trying to find ways with a little language here and there across the entire panoply of the appropriations process to circumvent what the President supports and signed into law. I feel a lot like someone in a shooting gallery, with a little target popping up every 3 months after hitting the bull's-eye on each succeeding shot.

I thank the chairman and shall look forward to working with him in trying to convince the House in conference that they have not done the wise thing.

Mr. JOHNSTON. Mr. President, the minority has taken a look at this matter and has some misgivings about it but is willing to resolve those misgivings in favor of the distinguished Senator from New Hampshire and go along with his amendment.

Mr. RUDMAN. I thank the Senator from Louisiana.

The PRESIDING OFFICER. The question is on the amendment.

The amendment (UP No. 1432) was agreed to.

Mr. STEVENS. Mr. President, may I inquire of the Senator from Idaho if he expects any further business on this bill this evening?

Mr. McCLURE. Mr. President, I know of no one on the floor right now who wishes to offer an amendment with respect to this bill at this time. My understanding is that following the routine morning business tomorrow and upon the return to legislative action this matter will be the pending matter tomorrow morning; am I correct.

Mr. STEVENS. I believe the Senator from Idaho is correct. I would make a parliamentary inquiry to see if there is anything different the Chair might state.

The PRESIDING OFFICER. After the expiration of morning business, this appropriations bill will once again become the pending business.

Mr. McCLURE. I thank the Chair and I thank the Senator from Alaska.

Again I should like to state to Senators who are interested in the matters that may be brought up on this bill that we have a limited time tomorrow morning to deal with the issues that will be presented if we are to finish this before we return to the other matter at 2 o'clock tomorrow.

It is, of course, our practice to allow both parties to caucus during the noon hour, so we have to complete action on this bill by noon tomorrow. There are two or three items that are or possibly might be raised that have the potential for some controversy, so I would hope those Senators who have any interest in those matters will be prepared to be here first thing tomorrow morning as we go back into legislative business.

Mr. METZENBAUM. Will the Senator from Idaho yield for a question on this matter?

Mr. McCLURE. Certainly.

Mr. METZENBAUM. Are the matters about which he speaks probably in the area of legislation on an appropriations bill or do they have to do with the amounts involved in the appropriations bill?

Mr. McCLURE. They are primarily legislative matters. We touched on one with the Senator from Michigan and evidently tomorrow we will return to that matter in one form or another. The Senator from Colorado and the Senator from Ohio had some discussion earlier with respect to the oil shale matter. I expect that that will be considered again. There will be some consideration of modification of language with respect to the withdrawal of wilderness areas from minerals leas-

ing to correct what some think was an oversight on the part of the Senator from Arizona (Mr. DECONCINI) in offering that language in the full committee. Those are all legislative matters and they will be brought up tomorrow in one way or another, I suspect, and discussed somewhat further.

Mr. METZENBAUM. Does the Senator from Idaho know whether or not the Senator from Wyoming (Mr. WALLOP) intends to offer an amendment in connection with wilderness matters?

Mr. McCLURE. The Senator from Wyoming has not indicated to me that he intended to offer an amendment in that regard, although he has discussed with me his concern about the Wyoming wilderness bill. But he has not indicated that he intended to offer it as an amendment to this pending matter. He would be free to do so, I assume, but he has not so indicated.

Mr. METZENBAUM. I am happy to say to the Senator from Idaho that although I indicated some opposition to that matter before we closed down for the recess, if the Senator from Wyoming wishes to discuss the matter and the Senator from Idaho wants to convey that to him, I am willing to take another look at that issue and see if I can be helpful.

Mr. McCLURE. I thank the Senator from Ohio. There are several such matters that have cleared the authorizing committee which we still hope can be resolved and acted on in this session of the Congress. I had some discussion with the distinguished Congressman from Ohio, Mr. SEIBERLING, last evening about some of those matters and he expressed concern that they were not moving in the Senate. I indicated to him we were doing our best to get them moving.

I might say that on one or two of the items I think the other body acted rather hastily and left us with a tangled mess to unsnarl before we could act on them, but we have tried very hard to get those matters concluded. They are ready for action in the Senate. I hope we will be able to act on one or several of those matters before the end of this session. They are matters of interest to a great number of people in this country. We are close enough to being able to resolve them that I hope we can.

I thank the Senator for his suggestion.

Mr. President, I say to the Senator from Alaska that I see no one else on the floor who seeks recognition for the purpose of dealing with the pending matter. I would be ready, if the Senator is, to lay this matter aside until tomorrow morning.

Mr. STEVENS. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I am about to submit for printing an amendment in the nature of a substitute to the House-passed nuclear waste legislation, a rather lengthy document.

Mr. President, this document has either been distributed or is in the process of being distributed to the offices of all Senators.

Mr. President, this document is the result of some intensive efforts on the part of a number of people who are members of the staffs of the various committees in the Senate and in the House that have legislative jurisdiction over portions of the legislation which has been considered in various committee forums.

It represents the best effort that I believe can be made to resolve the issues that have separated individual points of view to the point that nothing was possible to be done. Each point of view effectively stalemated the others. This I believe represents what may be the maximum or the minimum effort in legislation. It is probably the best that can be done to get a bill that can be passed.

I do not say that by way of any ultimatum to any person, just that I believe that if it moves in one direction to solve one problem for the benefit of other people, it moves in other directions and creates other problems for others.

I offer it in that spirit. Indeed, this is a compromise. It is a compromise which I offer for myself, for Mr. SIMPSON, for Mr. JACKSON, for Mr. JOHNSTON, and for Mr. DOMENICI. I hope that every Senator will approach the analysis of this particular document from the standpoint that it is the last best effort to resolve, in this Congress, a matter which has troubled this country for far too long and upon which we have invested literally hundreds of hours of time by committee members and by their staffs. I hope everyone will carefully look at this matter from the standpoint that if we cannot agree on this, it is unlikely that we will be able to agree on anything in this subject matter area during the remainder of this session.

Mr. President, in that spirit and with that plea, I submit for printing the amendment in the nature of a substitute and invite the attention of all Senators to it.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPLANATORY STATEMENTS FOR H.R. 9, H.R. 5161, S. 2715, H.R. 6419, S. 1705, S. 2308, S. 2955, AND S. 2110

Mr. McCLURE. Mr. President, the Committee on Energy and Natural Resources has ordered reported a series of pending measures, which have been filed today. In lieu of a formal report on each measure given the lateness of the hour in this session, I am submitting an explanatory statement for printing in the RECORD.

I ask unanimous consent that the explanatory statements for the following reported bills be printed in the RECORD at this point: H.R. 9, H.R. 5161, S. 2715, H.R. 6419, S. 1705, S. 2308, S. 2955, and S. 2110.

The PRESIDING OFFICER. Without objection, so ordered.

The statements follow:

FLORIDA WILDERNESS ACT OF 1982

Mr. McCLURE, from the Committee on Energy and Natural Resources, submitted the following explanatory statement to accompany H.R. 9.

The Committee on Energy and Natural Resources, to which was referred the Act (H.R. 9) to designate components of the National Wilderness Preservation System in the State of Florida, having considered the same, reports favorably thereon with an amendment to the text and submits the following information thereon:

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Florida Wilderness Act of 1982".

WILDERNESS DESIGNATION

SECTION 1. In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.) the following lands are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Apalachicola National Forest, Florida, which comprise approximately one thousand one hundred and seventy acres, are generally depicted on a map entitled "Bradwell Bay Wilderness Addition—Proposed", dated February 1980, and which are hereby incorporated in and shall be deemed a part of, the Bradwell Bay Wilderness as designated by Public Law 93-622;

(2) certain lands in the Apalachicola National Forest, Florida, which comprise approximately seven thousand eight hundred acres, are generally depicted on a map entitled "Mud Swamp/New River Wilderness—Proposed", dated February 1980, and shall be known as the Mud Swamp/New River Wilderness;

(3) certain lands in the Osceola National Forest, Florida, which comprise approximately thirteen thousand six hundred acres, as generally depicted on a map entitled "Big Gum Swamp Wilderness—Proposed", dated March 1980, and shall be known as the Big Gum Swamp Wilderness;

(4) certain lands in the Ocala National Forest, Florida, which comprise approximately seven thousand seven hundred acres, as generally depicted on a map entitled "Alexander Springs & Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Alexander Springs Wilderness: *Provided, however,* That the Secretary of Agriculture shall not prohibit existing motorboat use on Alexander Springs Creek;

(5) Certain lands in the Ocala National Forest, Florida, which comprise approximately thirteen thousand two hundred and sixty acres, as generally depicted on a map entitled "Juniper Prairie Wilderness—Proposed", dated November 1981, and shall be known as the Juniper Prairie Wilderness;

(6) certian lands, in the Ocala National Forest, Florida, which comprise approximatley two thousand five hundred acres, as generally depicted on a map entitled, "Little Lake George Wilderness—Proposed", dated March 1980, and shall be known as the Little Lake George Wilderness; and

(7) certain lands in the Ocala National Forest, Florida, which comprise approximately three thousand one hundred and twenty acres, as generally depicted on a map entitled "Alexander Springs and Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Billies Bay Wilderness.

MAPS AND DESCRIPTIONS

SEC. 2. As soon as practicable after the provisions of section 1 of this Act take effect, the Secretary of Agriculture shall file maps and legal descriptions of each wilderness area designated by such section with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the House of Representatives and the Committee on Energy and Natural Resources of the United States Senate, and each such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That Correction of clerical and typographical errors in such legal descriptions and maps may be made. Each such map and legal description shall be on file and available for public inspection in the office of the Chief, United States Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

SEC. 3. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness: *Provided,* That any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of the relevant provisions of this Act.

SEC. 4. (a)(1) The Department of the Interior shall not issue phosphate leases in the Osceola National Forest, Florida, unless and until the President transmits a recommendation to the Congress that phosphate leasing be permitted in a specified area in the Osceola National Forest. Notice of such transmittal shall be published in the Federal Register. No recommendation of the President under this section may be transmitted to the Congress before ninety days after publication in the Federal Register of notice of his intention to submit such recommendation.

(2) FINDINGS.—A recommendation may be transmitted to the Congress under subsection (a) if the President finds that, based on the information available to him—

(i) there is a clear and present national need for the phosphate resulting from a domestic shortage of phosphate reserves, and

(ii) such national need outweighs the overall public values of the public lands involved, including the wilderness area designated in section 1(3) of this Act, and any adverse environmental impacts which are likely to result from the activity.

(3) REPORT.—Together with his recommendation, the President shall submit to the Congress—

(i) a report setting forth in detail the relevant factual background and the reasons for his findings and recommendation;

(ii) a statement of the conditions and stipulations which would govern the activity; and

(iii) in any case in which an environmental impact statement is required under the National Environmental Policy Act of 1969, a statement which complies with the requirements of section 102(2)(C) of such Act. In the case of any recommendation for which an environmental impact statement is not required under section 102(2)(C) of the National Environmental Policy Act of 1969, the President may, if he deems it desirable, include such a statement in his transmittal to the Congress.

(4) DISAPPROVAL.—Any recommendation under this section shall take effect only upon enactment of a joint resolution of Congress approving such a recommendation. Any recommendation of the President submitted to Congress under subsection (a) shall be considered received by both Houses for purposes of this section on the first day on which both are in session occurring after such recommendation is submitted.

(5) NINETY-DAY COMPUTATION.—For purposes of this section—

(i) continuity of session of Congress is broken only by an adjournment sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the ninety-day calendar period.

(b) Within sixty days of the date of enactment of this Act, the Secretary of the Interior shall, with respect to those individuals and companies (hereinafter referred to as "applicants") which have applied for phosphate preference right leases by applications numbered—

BLM-A-080538, 080539, 080540, 080544, 080545, 080546, 080547, 080548, 080549, 080093, 080297, 080298, 080299, 080801, 080975, 079903, 079904, 079905, 079906, 079907, 079956, 079957, 079958, 079959, 079992, 080004, 080027, 080028, 080048, 080067, 080069, 080070, 080632, 080634, 080638; ES-0980, 0981, 0982, 0983, 3181, and 3208,

determine if any of those individuals or companies have made a discovery or discoveries of valuable deposits in accordance with the regulations and policies in effect as of the date of the filing of the applications.

(c) Within one year of the date of enactment of this Act, the Secretary, in consultation with the applicants, shall determine the present fair market value of leases which would be issued, absent the leasing prohibition of subsection (a) of this section, for those applications for which the Secretary has determined that a valuable deposit discovery or discoveries exist.

(1) The determination of fair market value shall be based on the replacement cost of the unmined recoverable phosphate in the ground, taking into account comparable sales of unmined recoverable phosphate in the ground in the eastern United States, costs of compliance with all applicable Federal, State, and local laws and regulations, including reclamation and restoration of the land (including wetlands) and other costs normally incurred in the mining of phosphate. In determining fair market value the Secretary may contract with an applicant to perform any necessary exploratory drilling or other evaluation work and may compensate the applicant therefor through payment of money or as an addition to the monetary credit under this Act. In lieu of the monetary credits described above, the Secretary may, at his option only, offer to purchase the preference right to the applicant's lease.

(2) In the event the Secretary and any or all of the applicants cannot agree on fair market value within one year of the date of enactment of this Act, either the Secretary, or any of the applicants shall have the right to petition the United States Claims Court for determination of fair market value in accordance with the standards set forth in this subsection, and said Court shall have jurisidiction to make said determination which shall be binding on all parties for purposes of this Act subject to the right of appeal.

(d)(1) Within three months of the date of enactment of this Act the Secretary of the Interior shall enter into negotiations and shall, within one year of the date of enactment of this Act for those lease applications for which he has determined a valuable deposit discovery or discoveries exist, extend to the applicant, its successors or assigns upon voluntary surrender and relinquishment by the lease applicant of the preference right lease applications and all right to lease the land covered by such applications a monetary credit to be used against that portion of bonus payments, rental or royalty payments paid into the Treasury of the United States and retained by the Federal government on any mineral, oil or gas lease competitively won or otherwise held by the applicant, its successors or assigns. Such credit shall be used over a period of years with not more than ten percent of a the credit to be used in any one year.

(2) Monetary credits authorized pursuant to this subsection shall be based on the fair market value of the prospective leases as determined pursuant to subsection (c) of this section.

(e) The designation of the Big Gum Swamp wilderness shall in no way be construed to diminish, abate, impair, or modify any rights which may be vested in the applicants on the date of enactment of this Act for Federal phosphate preference right leases applicable to any lands within the Big Gum Swamp wilderness area designated by this Act. The fair market value of any such rights as may exist shall be determined without reference to any restrictions on access or use which may result from designation of this area as wilderness.

(f) Notwithstanding any provision of this section to the contrary, the Secretary and the applicant may mutually agree to extend any of the time limitations in this section.

(g) effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this Act: *Provided,* That any payments made pursuant to this Act shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts: *Provided, however,* That until the necessary sums are appropriated

the holder of a phosphate lease application specified in section 4(b) will retain such legal rights he may have under such application and such rights shall remain in full force and effect.

PURPOSE

H.R. 9, as reported, would add 6 areas of national forest Land in the State of Florida, totaling approximately 49,150 acres, to the National Wilderness Preservation system and add one 1,170-acre addition to an existing wilderness. The Act also bans phosphate leasing in the Osceola National Forest unless the Congress, upon the recommendation of the President, determines otherwise. It also establishes procedures for compensating present holders of preference right lease applications in the Osceola National Forest for any statutory rights to a lease which the Secretary finds they have established.

BACKGROUND AND NEED

Wilderness

H.R. 9, as reported, would designate six new wilderness areas in the national forests in Florida, totaling 47,980 acres, and would add 1,170 acres to an existing wilderness. All areas would become components of the National Wilderness Preservation System and be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act.

All seven areas comprise roadless or undeveloped National Forest System lands in Florida that were included in the Second Roadless Area Review and Evaluation (RARE II). The RARE II recommendations were forwarded to Congress on April 16, 1979.

As reported by the Committee, the new areas to be added to the Wilderness Preservation System include the Bradwell Bay Wilderness addition (1,170 acres); the Mud Swamp/New River Wilderness (7,800 acres); the Big Gum Swamp Wilderness (13,600 acres); the Alexander Springs Wilderness (7,700 acres); the Juniper Prairie Wilderness (13,260 acres); the Little Lake George Wilderness (2,500 acres); and the Billies Bay Wilderness (3,120 acres).

These proposed additions to the wilderness system are described in pp. 5-7 of House Report 97-402, Part I (December 11, 1981) of the House Committee on Interior and Insular Affairs.

OSCEOLA NATIONAL FOREST

In addition to the wilderness proposals of the bill, the Committee acted to resolve a controversy involving the issuance of phosphate leases in the Osceola National Forest, Florida. The applications for leases have been pending for twelve years due to environmental studies, to changes in Federal regulations governing mining in the Forest, and to lawsuits.

The Osceola National Forest was specifically acquired for timber production and watershed protection. It is located in Baker and Columbus counties in central Florida, and is approximately 157,000 acres in size. It is also subject to mineral leasing for phosphate deposits under the authority of the Mineral Leasing Act of 1920 (30 U.S.C. 181, et seq.), as amended, and the Mineral Leasing Act of 1947 for Acquired Lands (30 U.S.C. 351-359).

These Acts authorize the Secretary of the Interior to issue exclusive two-year prospecting permits to qualified applicants where prospecting or exploratory work is necessary to determine the existence or workability of phosphate deposits. If the prospecting permittee discovers "valuable deposits of phosphate" within the permitted area, the law states that the permittee is "entitled" to a lease on all or part of the lands covered by the permit. Lessees are also subject to such additional requirements as may be imposed by the Secretary of the Interior or Agriculture to assure the protection of the surface values of the land. The Secretary of the Interior has authority to issue a phosphate lease. However, the Secretary of Agriculture is charged with the responsibility of ensuring that National Forest lands such as the Osceola are properly utilized for the primary purpose for which they have been acquired, or are being administered.

In 1964, 92 prospecting permits covering 144,131 acres of acquired National Forest lands in the Osceola were issued by the Secretary of the Interior with the concurrence of the Forest Service. Exploration drilling indicated apparently workable deposits in western portions of the Osceola. From July 21, 1969 to May 25, 1972, four mining companies filed applications for preference right leases on 41 permit areas in the Osceola on approximately 52,000 acres of land. This area represents about 34% of the Osceola National Forest.

These preference right lease applications were filed in accordance with the terms of the prospecting permits and the applicant's mineral discovery. The Geological Survey certified an initial showing under the pre-1976 regulations on part of the 41 preference right lease applications. However, before the preference right leases could be issued, the National Environmental Policy Act was passed in 1969. Action on the preference right lease applications was delayed pending the completion of an environmental impact statement and a suit brought by the State of Florida in 1971 to enjoin the U.S. government from issuing Osceola phosphate leases on environmental grounds.

The State of Florida sued claiming that no present technology existed which would ensure that the Osceola wetlands could be reclaimed. The State was also concerned that certain endangered species indigenous to the Osceola might become extinct if phosphate mining were allowed. It claimed that phosphate mining would adversely affect the quantity and quality of water in the Osceola necessary for ecosystem maintenance and the water supply of nearby municipalities.

On June 27, 1974, the Final Environmental Impact Statement was filed. It was reviewed by the Environmental Protection Agency and judged unsatisfactory. EPA specifically expressed concerns about the impact of surface mining upon water withdrawals from the Floridian Aquifer; pollution of the Suwannee River system from such mining runoff; air quality problems associated with the chemical processing of phosphates; and the lack of any assessment of the problem of disposal of hazardous wastes associated with phosphate mining in the Osceola. As a result of this review, further examination of mining in the Osceola was urged by the Environmental Protection Agency.

On October 28, 1975, the Secretary of the Interior ordered an additional environmental impact study to further investigate the impact of mining upon Osceola hydrology and threatened wildlife species. This Supplemental Environmental Impact Statement was filed by Interior in 1979. It provided new descriptions of the types of phosphates in the Osceola, redefined the geology and water resources, and recommended mitigating measures for the endangered species in the lease area. Upon review of this supplemental EIS, the Fish and Wildlife Service and the Environmental Protection Agency submitted comments the Bureau of Land Management objecting to the issuance of any preference right lease applications in the Osceola. EPA in particular was concerned that phosphate mining in the Osceola would result in the destruction of 28,000 acres of the Osceola ecosystem, 40 percent of which are wetlands.

On June 10, 1981, the Bureau of Land Management requested the Forest Service to prepare environmental protection stipulations based on initial showings by the preference right lease applicants which by then had been submitted and approved on all 41 applications. These stipulations were submitted by the Department of Agriculture on February 3, 1982, along with notification to the applicants to submit a final showing. When the final showing is submitted, the U.S. Geological Survey will then determine whether or not any of the lease applicants have "discovered" a valuable deposit which statutorily entitles them to a lease. At present, the Department of the Interior is reviewing the 41 pending lease applications.

Despite the fact that the twelve years of delay appears to be nearing an end, the Osceola controversy continues. Growing public sentiment in Florida against mining the Osceola as expressed by public officials, the Governor and Cabinet of the State of Florida, local and regional agencies, and interested citizen groups, has prompted a renewed effort to seek a legislative resoluton of the controversy. On December 15, 1981, the U.S. House of Representatives responded to these concerns by considering and passing H.R. 9, banning phosphate leasing in the Osceola, and compensating holders of preference right lease applications for any rights which the Secretary may determine they have.

Subsequently, to underscore its continuing critical concern with the preservation of the Osceola environment, on March 25, 1982, the State of Florida passed a statute amending Chapter 403 (Environmental Control) of the Florida Statutes. Specifically, the legislature amended section 403.087 pertaining to the issuance of State permits for sources of water and air pollution. The amendment generally provides that the extraction of solid minerals from State and National Parks or Forests is prohibited if it will degrade the ambient quality of water or air within these areas. However, a proviso states the State law does not apply in the event the Federal government prohibits the mining or leasing of solid minerals on Federal parks or forest lands.

H.R. 9, as reported by the Senate Energy and Natural Resources Committee, bans phosphate leasing in the Osceola, and compensates holders of preference right lease applications for any rights which the Secretary may determine they have.

As reported, H.R. 9 is a refinement of the measure which was passed by the House on December 15, 1981. The House passed bill contained several provisions which were either deleted or changed by the Committee, primarily to lessen the fiscal impact of this Act.

LEGISLATIVE HISTORY

H.R. 9 passed the House on December 15, 1981. A hearing before the Subcommittee on Public Lands and Reserved Water was held on April 1, 1982. At a business meeting

December 7, 1982, the Committee on Energy and Natural Resources ordered H.R. 9, as amended, favorably reported.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in an open business session on December 7, 1982, by unanimous vote of a quorum present, recommends that the Senate pass H.R. 9, if amended as described herein.

The rollcall vote on reporting the measure was 19 yeas, 0 nays as follows:

Yeas: Mr. McClure, Mr. Hatfield, Mr. Domenici, Mr. Wallop, Mr. Warner, Mr. Weicker,* Mr. Humphrey,* Mr. Murkowski, Mr. Nickles, Mr. East,* Mr. Heinz, Mr. Jackson, Mr. Johnston,* Mr. Bumpers, Mr. Ford, Mr. Matsunaga,* Mr. Melcher, Mr. Tsongas, Mr. Bradley.

Nays: None.

COMMITTEE AMENDMENT

The Committee adopted an amendment in the nature of a substitute to H.R. 9. As reported, this amendment differs from H.R. 9 as passed by the House as follows:

Section 4(a)(1)(ii) was amended to require that, should the President at some future date recommend to Congress that the Osceola be opened for mining, he consider both the short- and long-term environmental impacts of such mining. This was accomplished by deleting the word "temporary" on line 14, page 7 of H.R. 9 and putting in its place the word "any".

Section 4(a)(4) was amended to provide that any recommendation made by the President to permit phosphate leasing in specified areas of the Osceola in the future under the authority vested in him under Section 4(a)(1) of the bill, would take effect only upon enactment of a joint resolution of Congress approving such recommendation. A conforming technical amendment deleted Section 4(d)(1)(C) of the Act. The Committee believes that control over future phosphate mining in the Osceola should rest solely with Congress.

Section 4(c) was amended to redefine the provision on determination of fair market value. The term "phosphate rock" was deleted and replaced with the words "unmined recoverable phosphate in the ground". This change substantially lowers the potential cost of this bill. The term "phosphate rock" is a mining term referring to mined phosphate concentrate, a finished product that current sells for about $30.00 per short ton. Unmined recoverable phosphate in the ground in the eastern United States, on the other hand, is estimated to be worth about $3.00 per short ton. This amendment therefore clarifies any unintended ambiguity with respect to the amount of compensation the Committee expects to be due preference right lease applicants under this Act who establish a right to a lease. Section 4(c) was amended to delete the binding arbitration provision. All other references to binding arbitration were deleted from the bill in the form of technical amendments. The binding arbitration provision was replaced with a provision giving the Secretary or lease applicants the right to petition the U.S. Claims Court for a final determination of fair market value in the event the parties are unable to arrive at a negotiated fair market value within one year of the Act's enactment.

Section 4(d)(1) was amended to direct the Secretary of the Interior to offer a monetary credit within one year of the Act's enactment for those lease applications for which he has determined a valuable deposit discovery exists. This leaves a monetary credit and the option of the Secretary to purchase a lease right as the only methods of compensation in the Act, as reported. It also shortens the time in which such determination should be made from three years to one.

Section 4(d)(1)(A) was amended to delete the mineral lease exchange authority as a method of compensation under this Act. All references to such exchange authority were deleted throughout the bill. Testimony before the Committee indicated that mineral lease exchanges in this instance could prove unduly complex and time-consuming.

Section 4(d)(1)(B) was amended to stretch out over a period of years the monetary credits which may be extended to preference right lease applicants for relinquishing their validated right to mine the Osceola. Not more than ten percent of the credits that may be used against that portion of bonus payments, rental or royalty payments paid into the U.S. Treasury on leases otherwise held by the applicant may be used in any one year. It should be noted that this monetary credit only applies to the Federal portion of the bonus, rental, or royalty payments involved. It does not affect that portion of lease payments which would go to a state.

Section 4(d)(1)(B) was amended to eliminate monetary credits to be used for "bidding rights". Such rights are included in the term bonus bid.

Section 4(d)(1)(C) giving the Secretary the option to suspend the issuance of phosphate preference right leases until such time as the President may transmit a recommendation to Congress permitting phosphate leasing in the Osceola was deleted.

Section 4(d)(2) was technically amended to shift the language referring to fair market value determinations to Section 4(c).

Section 4(f) was amended to delete the exchange value provision.

Section 4(h) was amended to change the date by which sums are authorized to be appropriated to October 1, 1983 from October 1, 1982.

SECTION-BY-SECTION ANALYSIS

Section 1—This section adds 6 areas of National Forest land in the State of Florida, totaling approximately 49,150 acres, to the National Wilderness Preservation System, and adds 1,170 acres to an existing wilderness. The areas are as follows:

(1) Bradwell Bay addition—1,170 acres.
(2) Mud Swamp/New River—7,800 acres.
(3) Big Gum Swamp—13,600 acres.
(4) Alexander Springs—7,700 acres.
(5) Juniper Prairie—13,260 acres.
(6) Little Lake George—2,500 acres.
(7) Billies Bay—3,120 acres.

Section 2—Provides that maps and legal descriptions of each wilderness area designated in the bill be filed by the Secretary of Agriculture with the House Interior and Insular Affairs and Agriculture Committees and with the Senate Energy and Natural Resources Committee as soon as practicable after enactment of the Act.

Section 3—Provides that the Secretary of Agriculture shall administer the wilderness areas.

Section 4—Section 4(a) bans the issuance of phosphate leases in the Osceola National Forest unless and until the President determines a clear and present national need exists for the phosphate due to domestic shortages that outweigh the public values of the lands involved. The President must publish notice of his proposed transmittal in the Federal Register prior to so reporting to Congress. Any recommendation made by the President under this section shall take effect only upon enactment of a joint resolution of Congress approving such recommendation.

SEC. 4(b) gives the Secretary of the Interior 60 days after the Act's enactment in which to determine which, if any, of the holders of the 41 preference right lease applications listed in the bill have made a valuable discovery of phosphate in the Osceola National Forest.

SEC. 4(c) gives the Secretary one year after the date of enactment of the Act in which to determine through negotiations with the holders of the 41 preference right lease applications the present fair market value of any leases for which the Secretary determines a valuable deposit discovery exists, and which would be issued absent the leasing prohibition of subsection (a) of this section. Such fair market value determination is to be based on the replacement cost of unmined recoverable phosphate in the gound, taking comparable eastern U.S. phosphate sales into consideration, as well as the costs of compliance by the applicants with all mining, reclamation and restoration costs. The Secretary has the option of offering to purchase the preference right to the applicant's lease in lieu of a monetary credit provided in Section 4(d)(1). When fair market value cannot be determined through negotiation, either the Secretary or applicant may thereafter petition the United States Claims Court for a determination of fair market value. The Claims Court determination will be binding on all parties, subject to the right of appeal.

SEC. 4(d) gives the Secretary of the Interior one year in which to extend to holders of preference right lease applications with valuable deposits validated by the Secretary a monetary credit to be used against that portion of bonus, rental or royalty payments, or any combination of these options paid into the Treasury of the U.S. and retained by the Federal government, based on the fair market value of the prospective leases as determined by negotiated agreement. In the event such determination of fair market value is made by the U.S. Claims Court pursuant to subsection 4(c)(2), any award determined by the Court shall be in the form of a monetary credit. In either case, such credit shall be used over a period of years with not more than ten percent of the credit to be used in any one year. Monetary credits authorized under this section are to be based on the fair market value of the prospective leases as determined through agreement or court determination.

SEC. 4(e) provides that the designation of the Big Gum Swamp Wilderness shall in no way impair or modify any rights which may be vested in applicants for preference right leases, there, and the fair market value of such rights as may exist shall be determined without reference to any restriction on access or use resulting from the designation of this area as wilderness.

SEC. 4(f) allows the Secretary and applicant to mutually agree to extend any of the time limitations in Section 4.

SEC. 4(g) authorizes such sums as may be necessary to carry out the Act, subject to the appropriation of funds. Any payments made pursuant to this Act shall be effective only to such extent or in such amounts as are provided in advance appropriations acts.

---

* Indicates voted by proxy.

Until the necessary sums are appropriated, the holders of phosphate lease applications in the Osceola will retain such legal rights as they may have under such application and such rights shall remain in full force and effect.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of the Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out H.R. 9.

The bill is not a regulatory measure in the sense of imposing Government-established standards or significant economic responsibilities on private individuals and businesses.

H.R. 9 would designate components of the National Wilderness Preservation System in the State of Florida.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of H.R. 9.

COST AND BUDGETARY CONSIDERATIONS

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., December 9, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 9, the Florida Wilderness Act of 1982, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

H.R. 9 designates as wilderness 49,150 acres of national forest land in the state of Florida and prohibits phosphate leasing in the Osceola National Forest (except in the case where the President determines that there is a severe national need for phosphates). The bill establishes a mechanism for determining fair market value of pending preference right phosphate leases and directs the Secretary of the Interior to acquire these rights either by purchase or by providing monetary credits toward bonus, rental or royalty payments. It is estimated that additional costs to the federal government related to surveying and planning as a result of the wilderness designation will be approximately $500,000 over the five fiscal years beginning with 1983 based on information from the National Forest Service. The provisions relating to the prohibition of mining in the Osceola National Forest are expected to result in additional expenditures by the federal government, and the loss of receipts from rents and royalties forgone. It is estimated that the total budget impact of these provisions will exceed $100 million over the five fiscal years beginning with 1983.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN, *Director.*

EXECUTIVE COMMUNICATIONS

The pertinent legislative report received by the Committee from the Department of Agriculture setting forth Executive agency recommendations relating to H.R. 9 is set forth below:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., April 9, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As you requested, here is our report on the House act, H.R. 9, a bill "To designate components of the National Wilderness Preservation System in the State of Florida."

The Department of Agriculture recommends that the bill be enacted with the amendments suggested herein.

H.R. 9 would designate six new wildernesses on the National Forests in Florida totaling 47,980 acres and add 1,170 acres to one existing wilderness. All areas would become components of the National Wilderness Preservation System and be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act. Section 4 would generally prohibit phosphate leasing on the Osceola National Forest.

All seven areas are roadless or undeveloped areas on National Forest System lands in Florida that were included in the Second Roadless Area Review and Evaluation (RARE II). We support the wildernesses proposed in H.R. 9 except the Big Gum Swamp wilderness. We recommend that the Big Gum Swamp area not be designated as wilderness at this time. Applications are pending for phosphate preference right leases on about one quarter of the tract. Until the Secretary of the Interior determines whether the preference right leases should be issued and also provides a better idea of the location and value of the mineral deposits, we recommend deferral of this wilderness designation. We also recommend deleting the New River portion of the proposed Mud Swamp/New River wilderness. The enclosed supplemental statement describes each area and provides additional information regarding our recommended amendments.

Section 1 of H.R. 9 references the Wilderness Act (16 U.S.C. 1131 et seq.). This could lead to confusion as now written since the Eastern Wilderness is coded as 16 U.S.C. 1132. We recommend that the citation for the Wilderness Act be changed to "78 Stat. 890".

We oppose the provisions of section 4 that would prohibit phosphate leasing on the Osceola National Forest and terminate leases through exchange. We have a number of concerns about these provisions and discuss them in detail in the enclosed supplemental statement. The Department of the Interior has major concerns about the feasibility and costs of the exchange proposed in section 4.

Also we understand the Department of Justice has identified legal problems associated with the arbitration provisions of section 4. Therefore, we recommend section 4 be deleted from the bill.

We note that the bill does not include provision for release of nonwilderness areas nor does it set specific time limits for congressional action on recommendations for additional wilderness which may be generated from the further planning process. These concepts are of such importance that no additions to the Wilderness System should be made without providing at the same time equally assured status to unroaded lands designated for multiple uses other than wilderness in RARE II, or which may be recommended for uses other than wilderness as a result of the further planning process. We, therefore, urge that language embodying these concepts be included in any Florida wilderness legislation.

It is estimated that surveying, planning, and related activities necessary to implement these seven wilderness designations will cost approximately $140,000 annually over the next 5 years. Section 4 pertaining to phosphate leasing could result in substantial additional costs. An estimate of these costs will be available upon completion of the administrative process currently underway.

The Office of Management and Budget advises that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

JOHN R. BLOCK, *Secretary.*

Enclosures.

USDA SUPPLEMENTAL STATEMENT ON H.R. 9

WILDERNESS PROPOSALS

Support designation

Bradwell Bay Addition.—The proposed 1,170-acre Sopchoppy River addition to the Bradwell Bay wilderness includes the narrow serpentine channel of the Sopchoppy River that tunnels its way through swamps, and pine-palmetto flatwoods. This is a wilderness study area designated in the Act of January 3, 1975. We support wilderness designation for the 1,170-acre addition to the Bradwell Bay wilderness.

Billies Bay.—H.R. 9 proposes a 3,120-acre Billies Bay Wilderness that is the same as the RARE II recommendation. The major attraction of the area is the abundant wildlife. We support this proposal.

Alexander Springs.—Immediately to the south and east of Billies Bay, separated by a paved State highway and campground development, is the proposed Alexander Springs Wilderness. This subtropical area contains the creek originating at Alexander Springs, a major spring with a flow of 76 million gallons per day. H.R. 9 excludes an area previously included in the RARE II recommendation which contained summer homes located on National Forest land. We concur with this exclusion and recommend designation of a 7,700-acre wilderness.

Little Lake George.—H.R. 9 would designate a Little Lake George Wilderness that encompasses 2,500 acres. A 3,040-acre Little George Wilderness was recommended as a result of RARE II. The area excluded from the RARE II recommendation includes approximately 500 acres on the northern part of the area where there is occasional motorboat use on the streams traversing the area and a woods trail used for access by hunters. We concur with this exclusion and support the 2,500-acre wilderness proposal.

Juniper Prairie.—The Juniper Prairie Wilderness proposal in H.R. 9 encompasses 13,260 acres. It is similar to the RARE II recommendation with the exception of 340 acres at the eastern edge of this area that is excluded to provide for the continued administrative use of Sweetwater Cabin. We agree with this deletion that excludes the cabin and associated roads. We recommend a boundary modification in the northeast corner to eliminate approximately 30 acres of private lands. We can provide the committee with maps showing the revised boundary and detailed description of the exclusions. We concur with a Juniper Prairie Wilderness of 13,260 acres.

Recommend change

Mud Swamp/New River.—The proposed Mud Swamp/New River Wilderness included in H.R. 9 encompasses essentially the same area as considered during RARE II except that H.R. 9 also includes a 2½-mile corridor along the New River at the northwest corner of the area. We recommend that this corridor be excluded from the proposal because it is separated from the area by a frequently used forest road and concrete bridge. Furthermore, the 2½-mile long, half-mile wide corridor, along the New River would be difficult to manage for wilderness purposes because of its elongated shape and lack of on-the-ground boundary features.

The Mud Swamp area without the New River addition would be a suitable addition to the Wilderness System and includes extensive swamp and forest habitat for a variety of wildlife, including alligator and Florida panthers (cougars). We recommend that the acreage on lines 8 and 9, page 2, be changed to "seven thousand one hundred acres" and the name referenced on line 10, page 2, be changed to "Mud Swamp Wilderness—Proposed, dated February 1980" and line 12, page 2, be changed to "Mud Swamp Wilderness". We also recommend a minor boundary adjustment to eliminate 2.5 acres of private land that is located outside the National Forest proclamation boundary.

Recommend deletion

Big Gum Swamp.—The proposed 13,600-acre Big Gum Swamp Wilderness on the Osceola National Forest is a large continuous cypress gum swamp. Applications are pending for phosphate preference right leases on about one quarter of the tract. We recommend deferral of wilderness designation for Big Gum Swamp until the Secretary of the Interior determines whether the preference right leases should be issued and also provides a better idea of the location and value of the mineable deposits.

WILDERNESS BOUNDARIES

We recommend using 100' offsets from centerline of roads for wilderness boundaries which parallel those roads. This offset distance assures exclusion of most road right-of-ways and occasional roadside facilities while providing some uniformity among wilderness. We do recommend using 66' offset for the Bradwell Bay addition in order to be consistent with the exising 66' offset on Bradwell Bay wilderness. We also recommend 150' offset for the west boundary of Billies Bay to avoid a powerline along FS-38 right-of-way. We can provide the committee with a set of maps denoting these recommended offsets.

PUBLIC DOMAIN AND WEEKS LAW LANDS

Within the proposed wilderness on the Ocala National Forest, there are both lands originating from public domain and acquired lands. Additionally, some of the National Forest lands are designated as the Ocala Game Refuge. The public domain lands within the boundaries of the Ocala Game Refuge are withdrawn from mineral entry, but no mention is made regarding the application of the leasing laws. Public domain lands outside the Ocala Game Refuge but within the wilderness boundaries are subject to the 1872 mining laws as prescribed in the Wilderness Act. It is our understanding that the likelihood of claims being filed is small. Public domain lands that are not currently withdrawn would be managed as called for in section 4(d) of the Wilderness Act. Our records indicate no outstanding or reserved rights on any of the areas.

PHOSPHATE LEASING PROVISIONS

Section 4 of H.R. 9 contains two major provisions regarding the phosphate issue. The first would generally prohibit phosphate leasing in the Osceola National Forest and the second would direct the Secretary of the Interior, within 3 years of the date of enactment of the bill, to exchange phosphate preference right lease applications on which discoveries of valuable deposits have been made for leases covering other minerals subject to the Mineral Leasing Act without competitive bidding. Exchanges would be on an equal value basis, subject to equalization by the payment of either party of up to 25 percent of the value of the leases to be issued by the Secretary. Section 4(d) provides for binding arbitration to resolve disagreements regarding value of the preference right leases.

The phosphate leasing provisions of the Mineral Leasing Act of 1920 authorize the Secretary of the Interior to issue exclusive 2-year prospecting permits to qualified applicants where prospecting or exploratory work is necessary to determine the existence or workability of phosphate deposits and to renew such permits under certain circumstances. If the permittee shows the Secretary that valuable deposits of phosphate have been discovered, the permittee is entitled to a lease for all or any of the land under the prospecting permit.

The Mineral Leasing Act for Acquired Lands of August 7, 1947, which authorizes leasing of minerals on certain acquired lands under the same conditions as those in the Mineral Leasing Act, specifically establishes the role of the Secretary of Agriculture in consenting to the leasing of mineral deposits. The Secretary of Agriculture may prescribe conditions to insure the adequate utilization of the lands for the primary purposes for which they have been acquired or are being administered.

Although the Secretary of Agriculture is not authorized to deny the issuance of leases, the statute requires that the Secretary prescribe adequate conditions to protect the affected area so that its primary purposes will not be lost. Pursuant to the above mentioned provisions, 92 prospecting permits covering about 144,000 acres in the Osceola National Forest were issued between 1965 and 1968. During the period from July 1969 through May 1972, 41 applications for preference right phosphate leases covering about 52,000 acres of the permitted lands were filed by four companies. No leases have yet been issued.

The standard permit issued for phosphate prospecting in the Osceola contains a list of special stipulations. Stipulation No. 3 states: "In the event the permittee makes application for mining lease on any lands under this permit the Forest Service reserves the right to include in such mining lease special stipulations to protect surface values." It is clear from this provision that the Forest Service, at the time it consented to issuance of the prospecting permit recognized its right to reserve the authority to protect the surface of the lands in the Osceola through lease stipulations. By its signature, the permittee agreed to the terms of the permit, including the authority to exercise this reserved right by the Forest Service. These statutory and contractual authorities provide ample support for the Forest Service through the Secretary of Agriculture, to impose lease restrictions on the mining companies in order to protect the primary surface values in the Osceola National Forest.

In the last few months, there has been a series of meetings with industry representatives to review current reclamation technology used in central Florida to reclaim phosphate mining areas. Preliminary on-the-ground review of mining areas indicates that satisfactory soil conditions can be created by proper planning and execution of the mining and reclamation process. Reclamation to date has been satisfactory for establishment of shallow-rooted vegetation to meet the State reclamation requirements. Observations indicate that technology to establish shallow-rooted species can be further refined to create soil conditions satisfactory for tree growth, although we have not tested such results. We have developed necessary lease stipulations that will assure affected sites are reclaimed for timber production and other resource uses and that a necessary balance between uplands and wetlands is achieved. The Secretary of the Interior can complete the administrative process to determine if the valuable deposit requirement for leasing has been satisfied. This determination compares all the estimated costs of developing and operating the mine with estimated revenues. The determination takes into account compliance with all applicable mining, surface protection, and reclamation requirements. The completion of this process will determine if economic deposits exist and thus whether the permittees are entitled to preference right leases.

Section 4(b) directs the Secretary of the Interior to make a determination of "valuable deposit" based on the regulations in effect as of the date of lease applications (July 1969-May 1972) instead of the more stringent standards as promulgated by the Secretary of the Interior on May 7, 1976. The earlier regulation basically states that the determination can be made without consideration of costs associated with adherence to environmental stipulations. This provision would allow that only mining costs would be used in the decision, and therefore, would not be a realistic estimate on the total costs. Any determination should take into account compliance with all applicable mining, surface protection, and reclamation requirements.

We have concerns about the feasibility and costs of the exchange proposed in section 4. Assuming the Secretary of Agriculture and the lease applicants can agree on terms for restoration after mining, the Secretary of the Interior could determine that deposits of substantial value exist. Experience with similar exchanges of mineral interest indicates the process for identifying and evaluating minerals suitable for exchange is extremely time consuming and it is difficult to reach agreement on value. The language in section 4(c) regarding determination of fair market value based on "replacement cost of the phosphate rock" is unclear and will further compound the problems associated with the exchange. The reference in the same subsection to comparable sales method of appraisal leads to confusion regarding which method of appraisal is actually intended by the legislation.

This Administration is opposed to such exchanges or purchases for the reason that the prospector accepted permits with the contractual understanding that the Secretary of Agriculture had the right to stipulate mining and reclamation requirements for environmental protection. No right of ownership has been conveyed by the Government. Only if a determination that a val-

uable deposit exists does a lease applicant have a compensable right. The exchange provisions of section 4 could be construed to give lease applicants an undetermined value of the phosphates by law—such value to be subject to a mineral exchange or cash. Section 4(g) gives the lease applicant an effective veto of exchange values which could result in litigation to determine the amount of cash payment.

In summary, we oppose the provisions of these bills that would prohibit phosphate leasing on the Osceola National Forest, and that would terminate leases through exchange or acquisition because of the progress being made in reclamation technology and the costs and difficulties associated with the proposed exchanges. Furthermore, the legislation could establish compensable rights for the mining companies that they do not now own, and could create an artificially high price for these newly created rights with either cash or Federally owned assets. We believe it is not necessary or desirable to withdraw the Osceola National Forest from phosphate leasing. Therefore, we oppose legislation that would prohibit phosphate leasing on the Osceola National Forest, and terminate leases through exchange or acquistion.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law would be made by the bill H.R. 9, as reported.

WEST VIRGINIA WILDERNESS

Mr. MCCLURE, from the Committee on Energy and Natural Resources, submitted the following explanatory statement to accompany H.R. 5161.

The Committee on Energy and Natural Resources, to which was referred the Act (H.R. 5161) to designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness, having considered the same, reports favorably thereon with an amendment to the text and submits the following information thereon:

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

DESIGNATION OF WILDERNESS AREAS

Section 1. In furtherance of the purposes of the Wilderness Act, the following lands are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Monongahela National Forest, West Virginia, which comprise approximately thirty-five thousand six hundred acres, as generally depicted on a map entitled "Cranberry Wilderness—Proposed", dated May 1982, and which shall be known as the Cranberry Wilderness: *Provided,* That for purposes of the Act of July 14, 1955 (69 Stat. 322) as amended, the Cranberry Wilderness may be reclassified only by Act of Congress enacted after the date of enactment of this Act;

(2) certain lands in the Monongahela National Forest, West Virginia, which comprise approximately six thousand one hundred acres, as generally depicted on a map entitled "Laurel Fork North Wilderness—Proposed", dated November 1981, and which shall be known as the Laurel Fork North Wilderness; and

(3) certain lands in the Monongahela National Forest, West Virginia, which comprise approximately six thousand one hundred acres, as generally depicted on a map entitled "Laurel Fork South Wilderness—Proposed", dated November 1981, and which shall be known as the Laurel Fork South Wilderness.

MAPS AND DESCRIPTIONS

Sec. 2. As soon as practicable after the provisions of this Act take effect, the Secretary of Agriculture shall file maps and legal descriptions of each wilderness area designated by this Act with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the House of Representatives and the Committees on Energy and Natural Resources and Agriculture, Nutrition, and Forestry of the United States Senate, and each such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal descriptions and maps may be made. Each such map and legal description shall be on file and available for public inspection in the office of the Chief, United States Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

Sec. 3. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness: *Provided,* That any reference in such provisions to the effective date of the relevant provision of this Act.

DISPOSITION OF VALID EXISTING RIGHTS

Sec. 4. (a) The Secretary of the Interior (hereinafter in this Act referred to as "the Secretary"), in consultation with the Secretary of Agriculture, shall acquire:

(1) all nonfederally owned coal deposits and other mineral interests and rights within the boundaries of the Cranberry Wilderness; and

(2) coal deposits and mineral interests and rights outside the boundaries of the Cranberry Wilderness which are—

(A) contiguous to the deposits, mineral interests, and rights referred to in paragraph (1) and owned by the person or entity which owns the deposits, interests, and rights referred to in paragraph (1); or

(B) economically accessible only through the exercise of rights held within the wilderness.

(b) For purposes of carrying out the acquisition required under subsection (a), not later than three months after the date of enactment of this Act, the Secretary shall initate negotiations with the owner of the coal deposits or other mineral interests and rights within the Cranberry Wilderness.

(c)(1) The Secretary shall conduct such coal or mineral evaluations with respect to the coal or other mineral interests or rights within the Cranberry Wilderness as may be necessary to determine fair market value. The fair market value of any rights as may exist shall be determined without reference to any restriction on access or use which may result from designation of the area as a wilderness. In determining fair market value the Secretary may contract with the owner to perform any necessary exploratory drilling or other evaluation work and may compensate the owner therefor through payment of money or as an addition to the monetary credit under this Act. Where the Secretary conducts such evaluations, he shall provide the owner with all data available to the Secretary as a result of the evaluations.

(c)(2) Within one year of the date of enactment of this Act, the Secretary, in consultation with the owner shall determine the present fair market value of coal deposits and mineral interests and rights.

(A) The determination of fair market value shall be based on the replacement cost of the unmined recoverable coal deposits and mineral interests and rights in the ground, taking into account comparable sales of recoverable minerals of comparable nature in the ground in the eastern United States, costs of compliance with all applicable Federal, State, and local laws and regulations, including reclamation and restoration of the land (including wetlands) and other costs normally incurred in the mining of such minerals.

(B) Upon voluntary surrender and relinquishment by the owner of all nonfederally owned coal deposits and other mineral interests and rights in the Cranberry Wilderness, the Secretary shall extend to the owner, its successors and assigns, a monetary credit to be used against that portion of payment, bonus payments, rental or royalty payments paid into the Treasury of the United States and retained by the federal government on any mineral, oil, or gas lease or other federal property competitively won or otherwise held by the applicant, its successors, or assigns. The monetary credit may be transferred or sold at any time by the owner to any other party with all the rights of the owner to the credit, and after such transfer, the owner shall notify the Secretary. In lieu of the monetary credits described above, the Secretary may, at his sole option, purchase the mineral rights referred to above.

(C) Monetary credits authorized pursuant to this subsection shall be based on the fair market value of the owner's mineral interests as determined pursuant to subsection (c) of this section. Such credit shall be used over a period of years with not more than ten percent of the credit to be used in any one year.

(d) In the event the Secretary and the owner cannot agree on fair market value within one year of the date of enactment of this Act, either the Secretary or the owner shall have the right to petition the United States Claims Court for determination of fair market value in accordance with the standards set forth in this subsection, and said Court shall have jurisdiction to make said determination which shall be binding on all parties for purposes of this Act subject to the right of appeal.

(e) Effective October 1, 1983, there are hereby authorized to be appropriated such sums as may be necessary to establish the value of the nonfederally owned mineral interests or rights lying within the Cranberry Wilderness area. Effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the other provisions of this Act: *Provided,* That no payment shall be effective except to the extent or in such amounts as are provided in advance in Appropriation Acts.

(f) Exploration activities, including core drilling and use of mechanized ground equipment, shall be allowed in the Cranberry Wilderness designated by this Act to determine the value of the nonfederally owned mineral resources therein, under such reasonable stipulations and conditions as may be imposed by the Secretary of Agriculture.

OTHER PROVISIONS

Sec. 5. (a) The Congress finds that—

(1) the Department of Agriculture has completed the second Roadless Area Review and Evaluation program (RARE II); and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of West Virginia and of the environmental impacts associated with alternative allocations of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II final environmental statement (dated January 1979) with respect to National Forest System lands in States other than West Virginia, such statement shall not be subject to judicial review with respect to National Forest System lands in the State of West Virginia;

(2) with respect to the National Forest System lands in the State of West Virginia which were reviewed by the Department of Agriculture in the second roadless area review and evaluation (RARE II), that review and evaluation shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the initial plans and in no case prior to the date established by law for completion of the initial planning cycle;

(3) areas in the State of West Virginia reviewed in such final environmental statement and not designated as wilderness by this Act need not be managed for the purpose of protecting their suitability for wilderness designation pending revision of the initial plans; and

(4) unless expressly authorized by Congress the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of West Virginia for the purposes of determining their suitability for inclusion in the National Wilderness Preservation System.

PURPOSE OF THE MEASURE

H.R. 5161, as reported, would add 3 areas of National Forest land in the State of West Virginia, totaling approximately 47,800 acres, to the National Wilderness Preservation System. The Act also directs the United States to acquire all nonfederally owned mineral interests and rights underlying and contiguous to, the 35,600 acre Cranberry Wilderness Area designated by the Act.

BACKGROUND AND NEED

H.R. 5161, as passed the House of Representatives, is similar to the legislation (H.R. 8033) which passed the House in the 96th Congress. It was not considered in the Senate.

A. *Cranberry Wilderness.*—This 35,600 acre wilderness proposal is part of the existing 53,000 acre Cranberry Backcountry, which has been administratively closed to motor vehicle use and managed to protect its outstanding scenic and natural values since 1936. In 1974, the proposed wilderness was designated a wilderness study area (Public Law 93-622). The wilderness study was completed by the Forest Service in 1978 and the entire study area, except for the 750 acre Cranberry Glades Botanical Area, was officially recommended to Congress for wilderness designation when the RARE II recommendations were forwarded on April 16, 1979. The wilderness proposal of H.R. 5161 is identical to the Forest Service recommendation with the exception of a very minor boundary adjustment west of the Highland Scenic Highway to allow for tree removal to preserve scenic beauty.

The proposed wilderness is within the Cranberry Black Bear Sanctuary and is closed to all bear hunting by the State of West Virginia in order to provide a secure breeding area for an estimated 100 bears. Other wildlife populations include an estimated 900 deer, 900 will turkeys, 1,800 grouse, and possibly cougar. The present management of the proposed wilderness adjacent lands as "back-country" is very similar to wilderness management although "Backcountry" classification is an administrative designation only, and does not necessarily guarantee management of the area in an undeveloped state in perpetuity.

B. *Laurel Fork North and South Wilderness.*—The two proposed 6,100 acre wilderness areas are separated only by a forest road and otherwise represent the continuous wilderness asset of the Laurel Fork drainage. The area is very moist, is traversed by the Laurel Fork River, and is bounded on the east and west by the ridges of Rich and Middle Mountains, respectively. Both areas were recommended for wilderness by the Forest Service in the RARE II process. Laurel Fork is highly scenic and has a series of beaver ponds along its length. The proposed wilderness areas also provide excellent habitat for wild turkey, black bear, bobcat, fisher and river otter.

C. *Mineral Rights.*—When the Monongahela and other Eastern National Forest lands were acquired by the Federal Government in the early part of this century, the Government often bought only the land surface, leaving the underlying mineral rights in private ownership. Such is the case in the proposed Cranberry Wilderness, where the bulk of the mineral rights are privately owned by the CSX Corporation and subsidiaries. Mining of the coal would not be compatible with wilderness designation of the area, but would be permitted.

H.R. 5161, as reported, directs the Federal Government to acquire the outstanding private mineral interests and rights. As wilderness areas will be withdrawn from mineral leasing by the time the acquisition is completed, the net effect of H.R. 5161 will be to permanently prevent the mining of coal in the proposed Cranberry Wilderness.

As discussed earlier, the bulk of the mineral rights underlying the proposed Cranberry Wilderness are in private ownership. Plans for two underground coal mines and attendant surface facilities within the wilderness proposal have been advanced since the mid 1970's and have encountered strong opposition. (The Forest Service's wilderness study of the Cranberry area concluded that coal mining could have major environmental impacts.) As a result, in 1978 the State of West Virginia imposed a moratorium on mining. Although the moratorium has now expired, CSX Corporation, which owns the mineral rights (primarily coal) has offered to convey its mineral rights within the wilderness proposal for money or monetary credits to be redeemed for the Federal portion of bidding rights.

H.R. 5161, as introduced, provided for the owner of the subsurface mineral rights in the proposed Cranberry wilderness area in West Virginia, to be compensated for its surrender of the mineral interests by means of a land exchange.

The exchange was to involve the selection of up to four sites outside the State of West Virginia, where the Department of the Interior and the owner of the mineral rights in the Cranberry area could agree that the mineral values were close to those of the Cranberry area.

H.R. 5161 as reported, would replace the land exchange provision with an extension of a monetary credit to the owner of the mineral interests in the Cranberry area. Such credit would be used in connection with other federal mineral or oil and gas leases which the owner might seek, and would not affect the portion of royalties or bonus payments to state governments that would be made under such leases.

As reported, H.R. 5161 would provide that a determination of the fair market value of the minerals in the Cranberry area, up to that level, would be negotiated by the owner of the mineral interests and the Department of the Interior. If agreement cannot be reached, the fair market value determination would be made by the U.S. Claims Court.

LEGISLATIVE HISTORY

H.R. 5161 passed the House of Representatives on June 14, 1982. The Subcommittee on Public Lands and Reserved Water received testimony on H.R. 5161 at a hearing on August 11, 1982. The Administration opposes the enactment of H.R. 5161. At a business session on December 7, 1982, the Committee on Energy and Natural Resources ordered H.R. 5161, as amended, favorably reported.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in an open business session on December 7, 1982, by unanimous vote of a quorum present recommends that the Senate pass H.R. 5161, if amended as described herein.

The rollcall vote on reporting the measure was 19 yeas, 0 nays as follows:

Yeas: Mr. McClure, Mr. Hatfield, Mr. Domenici, Mr. Wallop, Mr. Warner, Mr. Weicker,* Mr. Humphrey,* Mr. Murkowski, Mr. Nickles, Mr. East,* Mr. Heinz, Mr. Jackson, Mr. Johnston,* Mr. Bumpers, Mr. Ford, Mr. Matsunaga,* Mr. Melcher, Mr. Tsongas, Mr. Bradley.

Nays: None.

COMMITTEE AMENDMENTS

The Committee adopted an amendment in the nature of a substitute to H.R. 5161, as passed the House. The Committee substitute does not change the provisions of Sections 1, 2 and 3 of H.R. 5161 as passed the House. Section 1 designates certain lands in West Virginia as wilderness. Section 2 provides for the filing of maps. Section 3 provides for the administration of the area.

The Committee amendment changes Section 4(a) to direct the Secretary of the Interior to acquire nonfederally owned coal deposits, mineral resources and rights within the boundaries of the Cranberry Wilderness and, in certain cases, outside the boundaries of that area. The nonfederally owned coal deposits, mineral interests and rights to be acquired outside the boundaries of the Cranberry Wilderness must be (1) contiguous to the deposits, mineral interests and rights in the area and owned by the party(s) who own those interests inside the area or (2) economically accessible only through ex-

* Indicates voted by proxy.

ercise of the rights within the proposed Cranberry Wilderness.

The Committee also deleted the authorization for the Secretary of Agriculture to acquire the interests within three years and deleted exchange as a method of acquisition. The Committee, noting that a specific tract for tract exchange was absent in H.R. 5161, as passed the House, preferred to require the use of monetary credits or purchase as the form of acquisition in H.R. 5161 as reported.

In Section 4(c) the Committee amendment directs the Secretary of the Interior to begin negotiation within three months from date of enactment for acquisition by the U.S. with the owners of the interests in lands in the proposed Cranberry Wilderness.

Section 4(c)(1) of the Committee amendment directs the Secretary of the Interior to conduct the necessary mineral evaluations within the Cranberry Wilderness to determine fair market value. The Secretary may contract with the owners of the mineral interests for the drilling and evaluation and may compensate the owner for such work. The Committee added language that allows fair market value to be determined without reference to any restrictions or access or use which may result in designation of the area as wilderness.

The Committee deleted the language in Section 4(c)(1) which provided for identification of lands for exchange.

In Section 4(c)(2) the Committee deleted the entire paragraph which dealt with mineral evaluation in H.R. 5161 as passed the House, and replaced it with a provision that directs the Secretary of the Interior to establish fair market values of the mineral interests within one year of the date of enactment of this Act.

The Secretary is required to begin negotiations with the owners within three months of the date of enactment of this Act. The Committee notes that any evaluation and field work done under Section 4(c)(2) in the first three months could facilitate negotiations required in Section 4(b).

In Section 4(c)(2)(A) of the Committee amendment the process for the determination of fair market value is established. The paragraph is self explanatory.

In Section 4(c)(2)(B) of the Committee amendment directs the Secretary of the Interior to extend monetary credits to the owner of mineral interests and rights in the Cranberry Wilderness upon their surrender of those rights. The monetary credit applies only to the federal portion of payment, bonus payments, rental or royalty payments paid into the U.S. Treasury. It does not apply that portion of these payments that are shared with the States.

In Section 4(c)(2)(C) of the Committee amendment, the amount of monetary credit to be extended is based on the fair market value of the owners' mineral interests. The monetary credits shall be used over a period of years with not more than ten percent of the entire credit to be used in any one year.

In Section 4(d) the Committee deleted all references to binding arbitration included in the House-passed version of H.R. 5161, and provided the Secretary of the Interior or the owner the right to petition the U.S. Claims Court for a FMV determination. The Committee did not reduce the right of appeal or eliminate due process.

In Section 4(e) the Committee amendment changes the date of authorization of appropriations from October 1, 1982 to October 1, 1983 to comply with the Budget Act. The Committee amendment expressly authorizes the use of motorized equipment and core drilling in the Cranberry Wilderness to do the necessary evaluations as required by the Act subject to reasonable conditions as may be imposed by the Secretary of Agriculture.

The Committee amendment did not change any of the provisions of Section 5 of H.R. 5161 as passed the House.

COST AND BUDGETARY CONSIDERATION

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 9, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 5161, a bill to designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

This bill designates as wilderness 47,800 acres of national forest land in the state of West Virginia. The bill establishes a mechanism for determining fair market value of affected mineral interests and directs the Secretary of the Interior to acquire by purchase or by providing monetary credits towards bonus, rental or royalty payments all nonfederally owned mineral interests in, partially in, or only economically accessible through the Cranberry Wilderness Area. Based on information from the National Forest Service, it is estimated that additional costs to the federal government related to surveying and planning as a result of the wilderness designation will be approximately $460,000 over the five fiscal years beginning with 1983. The provisions relating to the determination of fair market value and acquisition of mineral interests are expected to result in additional expenditures by the federal government. Preliminary estimates from the Bureau of Land Management indicate that these costs could exceed $20 million during the five fiscal years beginning with 1983.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of the Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out H.R. 5161.

The bill is not a regulatory measure in the sense of imposing Government established standards or significant economic responsibilities on private individuals and businesses.

H.R. 5161 would designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of H.R. 5161.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report received by the Committee from the Department of Agriculture setting forth Executive agency recommendations relating to H.R. 5161 is set forth below:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., August 12, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We would like to offer our views on the House Act H.R. 5161, a bill "To designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness."

The Department of Agriculture recommends that the bill not be enacted.

H.R. 5161 would designate three new wildernesses on the Monongahela National Forest in the State of West Virginia. The bill includes a provision directing the Secretary of the Interior to acquire by exchange the privately owned mineral rights within the proposed Cranberry wilderness.

The previous Administration, as a result of RARE II, recommended four new wildernesses in West Virginia. These areas total 69,600 acres and include a proposed 35,600-acre Cranberry wilderness; Seneca Creek, 21,800 acres; and Laurel Fork North and Laurel Fork South, each with 6,100 acres. H.R. 5161 would exclude Seneca Creek and designate the three other areas as wilderness.

H.R. 5161 would designate a 35,600-acre Cranberry wilderness. The majority of the proposed Cranberry wilderness has been closed to public motorized use since 1936 when it was administratively designated the Cranberry Backcountry, with management emphasis on wildfire protection and enhancement of fish and wildlife values. The area is characterized by broad-rounded mountians that are heavily forested in mixed hardwoods and red spruce. The surface owner-ship rests entirely with the National Forest. However, the subsurface mineral rights on approximately 30,950 acres are privately owned and there are subordinated private mineral rights on 1,575 acres. These mineral subordinations are associated with the Highland Scenic Highway corridor. Subordination limits surface occupancy and limits powerline crossing of the highway. The mineral resources of particular concern include coal, oil, and gas.

Wilderness classification without Federal ownership or control of the subsurface coal rights is not desirable. While the area offers an unusual opportunity for solitude in an undeveloped setting, it has potentially important mineral resources.

The Department of the Interior has major concerns about the feasibility and costs of the exchange proposed in H.R. 5161. Experience with similar exchanges of mineral interests indicates the process for identifying and evaluating minerals suitable for exchange is extremely time consuming and it is difficult to reach agreement on value. Furthermore, there is concern about the monetary values foregone when legislation denies or prohibits the production of minerals, whether they be privately or publicly owned. The mineral values in this area are substantial, possibly in excess of $25 million.

Therefore, we cannot support the mineral exchange provisions of section 4 and oppose wilderness designation of the Cranberry area.

H.R. 5161 proposed wilderness designation for Laurel Fork North (09044) and Laurel Fork South (09045). Both areas were recommended for wilderness designation as a result of RARE II.

The proposed Laurel Fork North wilderness encompasses 6,100 acres of northern hardwood forest and is characterized by valleys and slopes cut by the many side drainages of the Laurel Fork of the Cheat River that flows through the center of the area. Immediately to the south, is the proposed Laurel Fork South wilderness. Like the area to the north, it also consists of 6,100 acres with similar forest and terrain.

Both areas are adjacent to the Glady Gas Field utilized by Columbia Gas Corporation as a storage area. Recent exploration in the Eastern Overthrust indicates a high potential for additional gas reserves at greater depths than previously explored. Of the approximately 12,000 acres of National Forest involved, the United States owns the mineral rights on approximately 11,200 acres. The majority of the Federal minerals in Laurel Fork South are currently under lease and approximately 13 percent of the mineral rights in Laurel Fork North are in private ownership.

The potential for discovery of additional gas reserves under these proposed wildernesses was not considered high during the RARE II process. Recent exploration activities in the area indicate higher potential for discovery of additional reserves, some of which will be foregone if the areas are designated wilderness.

Since portions of the land in both areas are currently under oil and gas leases or in private ownership and the nature and extent of development is unknown, we would prefer that these areas not be designated wilderness.

The Office of Management and Budget advises that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

JOHN R. BLOCK
Secretary.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law would be made by the bill H.R. 5161, as reported.

NATIONAL PARK VISITOR FACILITIES FUND ACT

Mr. McCLURE, from the Committee on Energy and Natural Resources, submitted the following explanatory statement to accompany S. 2715.

The Committee on Energy and Natural Resources, to which was referred the bill (S. 2715) to establish the National Park Visitor Facilities Fund, and for other purposes, having considered the same, reports favorably thereon with an amendment to the text and submits the following information thereon:

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "National Park System Visitor Facilities Fund Act".

SEC. 2. DEFINITIONS.—For purposes of this Act—

(1) "Foundation" means the National Park Foundation established under the Act of December 18, 1967 (81 Stat. 656; 16 U.S.C. 19e and following);

(2) "Fund" means the National Park System Visitor Facilities Fund established under section 3 of this Act;

(3) "Secretary" means the Secretary of the Interior; and

(4) "visitor facility" means any structure, fixture, or improvement—

(A) which is located within a unit of the National Park System upon land owned by the United States;

(B) in which no concessioner has a possessory interest (within the meaning of section 6 of the National Park Service Concessions Policy Act (16 U.S.C. 20-20g)); and

(C) which is used to provide food, lodging, or other services to visitors.

such term also includes concessioners' employee dormitories which meet the requirements of subparagraphs (A) and (B).

SEC. 3. ESTABLISHMENT OF FUND.—There is hereby established in the Treasury of the United States the National Park System Visitor Facilities Fund. There shall be credited to the Fund an amount equal to all National Park System concession fees, including franchise fees and building user fees, paid to or due and owing to the United States after October 1, 1982 for the privilege of providing visitor accommodations and services in units of the National Park System (other than revenues obtained under the provisions of section 111 of the National Historic Preservation Act of 1966) (16 U.S.C. 470-470t).

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.—(a) Beginning in fiscal year 1984, amounts credited to the Fund pursuant to this Act are authorized to be appropriated to the National Park Service, to be made available for expenditure by the Foundation to carry out its functions under this Act.

(b) In addition to the amount authorized to be appropriated pursuant to subsection (a) of this section, there is authorized to be appropriated, not to exceed $1,000,000 to the National Park Service, to be made available for expenditure by the Foundation to carry out its functions under this Act. Such sums shall be available for expenditure by the Foundation only to the extent such sums are matched on a dollar-for-dollar basis by cash or in-kind contributions made to the Foundation for the purposes of this Act.

(c) Except as provided in section 8 of this Act, sums appropriated under this section shall remain available until expended.

SEC. 5. ADMINISTRATION OF FUND PROJECTS.—(a) In a timely fashion, the Director of the National Park Service, with the concurrence of the Secretary, shall submit to the Executive Committee of the National Park Foundation detailed recommendations for the reconstruction, rehabilitation, replacement, improvement, relocation, or removal of visitor facilities. The Director shall specify those projects which he deems to have the highest priority for funding under this Act. The Executive Committee shall consider such recommendations and, with the concurrence of the Director of the National Park Service, recommend projects to the Board of the Foundation for its approval.

(b) The Secretary shall make grants to the Foundation from amounts available in the Fund for the purpose of carrying out projects approved under this section.

(c)(1) Any project approved and carried out under this section shall be consistent with the purposes for which the park system unit involved was established and with any approved general management plan applicable to that unit. Any plans for, and location of, any specific project shall be reviewed by and concurred in by the Director of the National Park Service.

(2) In recommending any project under this Act with respect to any property listed on, or eligible for listing on the National Register of Historic Properties, the National Park Service shall take into account the recommendations of the Advisory Council on Historic Preservation and any project affecting any such property shall be carried out in a manner consistent with the requirements of the National Historic Preservation Act (16 U.S.C. 470-470t).

(d) The Foundation shall carry out projects under this Act, and expend grants made available under this Act, in accordance with applicable provisions of law and regulations. All grants for any projects to be carried out under this Act shall be in accordance with Circular A-110 published by the Office of Management and Budget applicable to Federal grants. The Foundation shall be responsible for managing the construction activities, including the selection of persons to perform architectural, engineering, construction, and related services.

(e) By undertaking to administer any project under this Act, the Foundation shall be deemed to have agreed that all right, title, and interest in any visitor facility with respect to which such project is carried out shall be vested in the United States. The United States shall not be liable for any debts, defaults, acts, or omissions of the Foundation in connection with its activities under this Act.

(f) The Foundation shall include in its annual report to the Congress a description of projects undertaken under this Act and the Foundation's accomplishments under this Act.

SEC. 6. AUTHORITY OF THE NATIONAL PARK FOUNDATION.—For the purposes of this Act, the Foundation, in addition to any other authorities it may have—

(1) shall have all necessary and proper powers for exercise of the authorities vested in it by this Act;

(2) may execute all instruments deemed necessary or appropriate in the exercise of any of its functions under this Act; and

(3) may expend a portion of moneys received under this Act for such reasonable personnel and incidental expenses as are necessary to carry out its functions under this Act.

SEC. 7. RESPONSIBILITIES OF THE SECRETARY.—Nothing in this Act shall affect the authorities or responsibilities of the Secretary under other provisions of law, including the authorities and responsibilities vested in him under the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1, 2, 3, and 4) and under the National Park System Concessions Policy Act (79 Stat. 969; 16 U.S.C. 20-20g).

SEC. 8. EXPIRATION OF AUTHORITY.—The authorities contained in this Act shall expire on September 30, 1989. After that date, any moneys previously credited to the fund under this Act which have not been appropriated, or if appropriated, which have not been obligated or expended, shall be transferred to miscellaneous receipts of the Treasury.

PURPOSE

The purpose of S. 2715, as amended, is to establish the National Park System Visitor Facilities fund for reconstruction, rehabilitation, replacement, improvement, reloca-

tion or removal of federally owned visitor facilities within units of the National Park System. The fund will be administered by the Secretary of the Interior through grants to the National Park Foundation to accomplish authorized projects.

BACKGROUND

Numerous structures located within the 333 units of the National Park System were constructed many years ago and are now in serious need of major maintenance and rehabilitation. The Department of the Interior and the Congress have recognized that need and have appropriated increased funds in the last several years in an attempt to remedy the problem. However, such funds have primarily been directed to work on major park structures. There are over 1000 small buildings in the park system (mostly cabins and small motels, including associated support facilities) which are owned by the U.S. Government, which is responsible for non-routine maintenance, and which are used for overnight visitor accommodations or for providing support services for visitors. These buildings have been consistently placed at the bottom of the priority list for maintenance funding and most are now in critical need of major rehabilitation. It has become apparent that due to the nature of these small scattered structures they have not, for various reasons, been accorded priority for maintenance funding and that special efforts must be made to assure maintenance before the structures deteriorate beyond the point where rehabilitation is economically infeasible.

The National Park Foundation was established by Public Law 90-209 (1967) to assist the National Park Service by undertaking functions that are most appropriately accomplished by a private tax-exempt organization and as such is in a unique position to provide the flexible, small scale private and public resources to accomplish the needed work. The National Park Foundation is also able to serve as a conduit for the merger of public and private finances to meet the objectives of this legislation.

LEGISLATIVE HISTORY

S. 2715 was introduced by Senators Wallop and Domenici on July 1, 1982. The Public Lands and Reserved Water Subcommittee received testimony on S. 2715 on July 30, 1982. The administration supports the enactment of S. 2715 as introduced as indicated in testimony given before the Subcommittee. At a business session on December 7, 1982, the Committee on Energy and Natural Resources ordered S. 2715 as amended, favorably reported.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in an open business session on December 7, 1982, by majority vote of a quorum present recommends that the Senate pass S. 2715 if amended as described herein.

The rollcall vote on reporting the measure was 15 yeas, 1 nay, and 1 present as follows:

Yeas: Mr. McClure, Mr. Hatfield, Mr. Weicker*, Mr. Domenici, Mr. Wallop, Mr. Warner, Mr. Humphrey*, Mr. Murkowski, Mr. Nickles, Mr. East*, Mr. Heinz, Mr. Jackson, Mr. Bumpers, Mr. Ford, and Mr. Melcher.

Nays: Mr. Bradley.

Present: Mr. Tsongas.

*Indicates voted by proxy.

COMMITTEE AMENDMENTS

The Committee adopted an amendment in the nature of a substitute to S. 2715, as introduced. The Committee amendment removes the authorizational ceiling; establishes a matching fund; and strengthens the administration of the Visitor Facilities Fund by making the Fund projects subject to a different process for recommendation and administration than in S. 2715, as introduced. Specifically, S. 2715, as reported did not change sections 1 and 2 in S. 2715 as introduced.

Section 3 of the Committee amendment establishes the National Park System Visitor Facilities Fund in the Treasury of the United States, comprised of National Park System concession fees, including franchise fees and building user fees but excluding revenues received under provisions of section 111 of the National Historic Preservation Act of 1966.

In section 4 of the Committee amendment removes the authorizational ceiling of $5,000,000 annually in S. 2715 as introduced. The section authorizes appropriations up to the total amount covered into the fund.

Section 4(b) of the Committee amendment authorizes appropriations, not to exceed $1,000,000 annually in addition to that amount authorized by section 4(a) providing that expenditures can be made only to the extent that such monies are matched by private contributions.

One of the most important and attractive components of this Act is the dollar-for-dollar matching monies made available by this subsection to attract cash or in-kind contributions from non-Federal sources. The Committee hopes that the opportunity presented by this feature to leverage contributions and donations will be exercised to the fullest.

Section 4 (c) provides that sums appropriated will remain available until expended.

Section 5 (a) of the Committee amendment sets forth the procedure by which the Secretary of the Interior and the Director of the National Park Service will submit project recommendations to the Executive Committee of the National Park Foundation, and the procedure for selection and approval of high priority projects for implementation.

It will be critically important that project proposals be initiated, reviewed, recommended and adopted sufficiently in advance of the relevant fiscal year budget and appropriations processes to assure an even flow of projects for consideration and approval. The Committee looks upon this program as one to constitute an upgrading of visitor facilities, and not one of materially increasing or decreasing a park unit's visitor serving capacity in the process.

The Committee amendment to S. 2715 specified that funds were to be used for the purpose of reconstruction, rehabilitation, replacement, improvement, relocation or removal of visitor facilities. The Committee intends that the use of the word "removal" was included to provide the maximum latitude for correction of visitor facility maintenance problems. While certain structures may, because of extreme deterioration or other reasons require removal, the Committee intends that, in so doing, there shall not be a reduction in type and quantity of available visitor facilities in the National Park System as a result of implementation of the provisions of this Act.

The National Park Service should promptly prepare and adopt criteria for the guidance of priority project selection. Particular attention should be devoted in the development of such criteria to the early application of program funds to structures having historic attributes, structures which are severely threatened by an advance state of deterioration, structures which exhibit health and safety problems, and structures which offer beneficial services to greater numbers of visitors, though not necessarily in the order of priority as listed.

The Committee notes that while the great bulk of the facilities which will be ultimately benefitted by this legislation are overnight accommodations, numerous other related support facilities are entailed, such as food service structures and equipment rental and other visitor service structures, all of which are within the scope of receiving funds from the program derived from this legislation.

While this program basically constitutes one of upgrading of visitor facilities, it is critically important that the appropriate range of types of overnight accommodations be retained so as to continue to assure the opportunity for visitor choice over a range of both experiences and price levels. For example, "upgrading" should not be interpreted to mean that the least expensive and/or most primitive type of overnight accommodation (for example, tent cabins) should be necessarily "upgraded" out of existence. The range of accommodation types and corresponding price levels will normally be indicated by the general management plan for each park unit.

Section 5(b) requires the Secretary to make grants to the Foundation to carry out approved projects.

Section 5(c)(1) requires that any project approved be consistent with the purposes for which the applicable park unit was established and with the approved general management plan. The subsection also requires that the plans, location and design related to any project be approved by the Director of the National Park Service.

Section 5(c)(2) requires that the National Park Service take into account recommendations of the Advisory Council on Historic Preservation regarding any project involving property listed or eligible for listing on the National Register of Historic Properties.

Section 5(d) requires that the Foundation shall carry out projects and expend monies in accordance with applicable law and regulations, and specifically in accordance with the Office of Management and Budget Circular A-110. The provision also establishes that the Foundation is responsible for managing all aspects of the construction activities.

Section 5(e) provides that the Foundation shall not acquire any right, title or interest in any property by right of implementation of the provisions of this Act, and that the United States shall not be liable for any act of the Foundation.

Section 5(f) requires the Foundation to include a description of projects undertaken and over all accomplishments related to this act in its annual report to the Congress.

Since this is a new program in which the Congress and others will have a strong interest, it is important that this part of the annual report be reasonable detailed and comprehensive, so as to provide a good view of the operation of the entire program.

The Committee expressed concern that the donation of services or materials never dictate the implementation of a project in a manner contrary to the way in which the project might otherwise have been designed, located and carried out, absent the donation. In other words, donations should not dictate project decisions, but rather should be sought, received and applied to projects

for which they are supportive and compatible.

Section 6 sets forth the authorities of the Foundation required to implement the Act.

Section 7 provides that nothing in this Act shall affect the authorities of the Secretary under other provisions of law.

Section 8 provides that the authorities contained in this act shall expire on September 30, 1989.

COST AND BUDGETARY CONSIDERATIONS

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 8, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 2715, the National Park System Visitor Facilities Fund Act.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill Number: S. 2715.

2. Bill title: National Park System Visitor Facilities Fund Act

3. Bill status:

As ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

4. Bill purpose:

The bill establishes in the U.S. Treasury the National Park System Visitor Facilities Fund to be credited with all National Park System concession fees paid or owing to the United States after October 1, 1982, excluding concession fees collected pursuant to the National Historic Preservation Act of 1966. Sums credited to the fund are authorized to be appropriated to the National Park Service (NPS) beginning in fiscal year 1984, for purposes of repairing, replacing, or removing visitor facilities.

5. Estimated cost to the Federal Government:

[By fiscal years, in millions of dollars]

	1984	1985	1986	1987	1988
Estimated authorization level	6.7	7.0	7.3	7.6	8.0
Estimated outlays	3.4	6.2	7.1	7.5	7.8

The costs of this bill fall within budget function 300.

Basis of Estimate: Authorization levels are estimated based on concession fee receipts for recent past fiscal years, and are assumed to be appropriated prior to the start of each fiscal year. Each year's authorization level reflects estimated concession fee receipts from the prior year plus an additional $1 million per year. The bill authorizes the appropriation of $1 million, in addition to sums appropriated from the fund, contingent upon receipt by the National Park Foundation of equal cash or in-kind donations, to be used for purposes of administering the provisions of this bill. Based on information from the committee staff, CBO has interpreted the authorization to be for an annual $1 million appropriation, beginning in fiscal year 1984. For purposes of this estimate, CBO has also assumed that the requisite donations will be made to the National Park Foundation. Outlays were estimated based on information from the NPS.

6. Estimated cost to State and local governments: None.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: Anne E. Hoffman (226-2860)

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of the Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 2715.

The bill is not a regulatory measure in the sense of imposing Government established standards or significant economic responsibilities on private individuals and businesses.

S. 2715 would establish the National Park Visitor Facilities Fund, and for other purposes.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of S. 2715.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report received by the Committee from the Department of the Interior setting forth Executive agency recommendations relating to S. 2715 is set forth below:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C. September 30, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This responds to your request for the views of this Department on S. 2715, a bill "To establish the national Park Visitor Facilities Fund, and for other purposes."

We believe that S. 2715 presents a positive and innovative solution to problems with visitor facilities in our National Parks, and we strongly recommend that the bill be enacted.

We have become increasingly aware of serious deficiencies in the physical plant of the National Park System, and, especially, of the tremendous need for renovation and restoration of visitor facilities in our National Parks. Many visitor facilities do not meet minimum health and safety standards. S. 2715 would provide a means for addressing a number of these deficiencies.

The National Park Service, directly or through private concessioners, provides various visitor facilities ranging from backcountry campsites with no amenities to large hotels and lodges with a full complement of food, lodging, and other services. Under section 6 of the Act of October 9, 1965 (79 Stat. 969), which sets forth National Park System Concessions policies, concessioners who construct visitor facilities or add improvements to existing buildings under a concession contract are responsible for maintaining them, and they receive a possessory interest in the facilities. At the end of their contract, concessioners are entitled to just compensation for any possessory interest in the facilities which has arisen. From time to time, however, by purchase, donation, or Government-funded construction, the Government has acquired ownership of about 1,000 structures and is directly responsible for their maintenance. It is these 1,000 Government-owned and maintained cabins, motels, and food facilities to which S. 2715 is addressed.

S. 2715 would permit the combination of revenues generated from National Park System franchise fees with private contributions and management resources to upgrade the quality of National Park visitor accommodations. Under S. 2715, revenues received from concessioners' franchise fees, authorized by section 3 of the Act of August 25, 1916, would be paid into a special fund, the National Park Visitor Facilities Fund, in the Treasury. Moneys from the Fund would be available for appropriation to the National Park Service for grants to the National Park Foundation, a federally chartered foundation authorized, in the Act of December 18, 1967 (P.L. 90-209), to accept and administer gifts for the benefit of the National Park System. The Foundation, with the concurrence of the Secretary of the Interior, would provide for the construction, rehabilitation, or other improvement of those visitor facilities not subject to concessioners' possessory interests. Upon completion of the projects, all right, title, and interest in the repaired or improved facilities would vest in the United States. The Fund, and the authorities provided to the Foundation by S. 2715, would expire on September 30, 1989.

Under S. 2715, the Secretary would appoint three nongovernmental members of the National Park Foundation Board who would act as a committee of the Board to consider and recommend Fund projects to the Foundation. The National Park Service would then submit to that committee recommended projects. Following the committee's review, those recommendations having the concurrence of the National Park Service, the Secretary, and the committee would be submitted to the Board of the Foundation for its approval. Upon approval of projects by the Board, the Secretary would be required to make grants to the Foundation from sums appropriated from the Fund for the purpose of carrying out those projects. The Foundation would then let contracts for construction of the approved projects in accordance with applicable laws and regulations.

The National Park Foundation is a proven entity which has been supporting National Park Service programs with private funding since its creation by the Congress 14 years ago. By providing the Foundation with authority to undertake projects approved by the Secretary, we believe that the visitor facilities covered by this bill can be rehabilitated expeditiously, efficiently, and in a cost-effective manner. The National Park Foundation will be able to attract both cash and in-kind contributions and to draw upon the business expertise of its Board members. The net effect of the Foundation's participation in the improvement of visitor facilities will be the maximization of the amount of repairs and renovations that will be completed with the moneys appropriated and the contributions received.

We agree, also, that the revenues generated by park concession franchise fees should be earmarked in the National Park Visitor Facilities Fund to be available to repair and renovate National Park vistor facilities. Earmarking funds will provide a readily identi-

fiable source for funding visitor facilities renovations and repairs.

S. 2715 addresses two concerns that might otherwise be raised by introducing the Foundation into the visitor facilities restoration process: (1) the role of the Foundation in resource protection; and (2) the role of the Foundation in concessions management.

S. 2715 specifically states that its provisions will in no way alter the authorities and responsibilities of the Secretary for protection of the National Parks under the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented. All actions or decisions of the Foundation under the provisions of S. 2715 would be subject to the review and approval of the Secretary.

Similarly, the bill specifically provides that the Secretary would continue to exercise all authorities and responsibilities for concessions management vested in him under the Act of October 9, 1965 (79 Stat. 969). The Foundation's sole function as to concessions would be to contract for the actual "bricks and mortar" repairs and construction of facilities according to needs identified by the Secretary. Under S. 2715, improvements made by the Foundation would become the property of the Federal Government.

We estimate that revenues from concessions franchise fees would average approximately $6,000,000 per year. S. 2715 would authorize not more than $5,000,000 of this amount to be paid into the Fund annually. The remainder would be credited to miscellaneous receipts of the Treasury. The bill would authorize a $4,000,000 annual appropriation from the Fund for grants to the Foundation, with an additional appropriation authorization of $1,000,000 from the Fund to be available for matching, dollar for dollar, both cash and in-kind contributions donated to the Foundation for restoration and repair of visitor facilities. We believe that such appropriated funding, combined with Foundation contributions and management resources, will enable the Foundation to complete upgrading of approximately 1,000 of the facilities for which the Government is responsible. We estimate that approximately $30,000,000 in projects would be undertaken pursuant to the authorities of S. 2715 during the five years in which the Fund would exist.

As a technical matter, we do note that, under the provisions of S. 2715, both the commencement of the Fund and the authority to appropriate moneys from the Fund begin on October 1, 1983. Thus, while the authority to appropriate project money will be force, in fact, there will be no money to appropriate since the Fund will have had no time in which to accrue deposits from franchise fees. We therefore believe that the Fund should begin accumulating in October 1982 and recommend that section 3 be amended by striking out "1983" and inserting in lieu thereof "1982".

In conclusion, we believe that S. 2715 would provide an imaginative and flexible method of improving Government-owned visitor accommodations in the parks, and we strongly recommend its enactment.

The Office of Management and Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

DONALD PAUL HODEL,
Under Secretary.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law would be made by the bill S. 2715, as reported.

DIRECTING THE SECRETARY OF THE INTERIOR TO RELEASE CERTAIN CONDITIONS CONTAINED IN A PATENT CONCERNING CERTAIN LAND CONVEYED BY THE UNITED STATES TO EASTERN WASHINGTON UNIVERSITY

Mr. MCCLURE, from the Committee on Energy and Natural Resources, submitted the following Explanatory Statement to accompany H.R. 6419.

The Committee on Energy and Natural Resources, to which was referred the Act (H.R. 6419) to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University, having considered the same, reports favorably thereon without amendment and submits the following information thereon:

PURPOSE OF THE MEASURE

H.R. 6419 would direct the Secretary of the Interior to release the reversionary interest of the United States in certain lands which are now held by the Eastern Washington University and would enable the University to sell or exchange those lands in order to acquire other lands more suitable for educational or recreational purposes.

BACKGROUND AND NEED

The 21 acres of lakeside property that are the subject of the bill were acquired by the university in 1961 under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869-869-4). The patent provides that the land shall revert to the United States if the patentee attempts to transfer title or uses the land for other than educational and recreational purposes without the consent of the Secretary of the Interior.

The university originally acquired the land intending to develop it extensively as a retreat for its music school. The university did develop a road, powerline, well, toilets, two docks, and primitive camping areas, but abandoned its plans to install permanent buildings for educational purposes because of lack of funds. It continued using the land for recreation only, and in 1976 revised its management plan to make it compatible with the limited nature of this development and use.

As of 1980, the value of the property was approximately $250,000, according to the Oregon State Office of the Bureau of Land Management. The land is several miles from the campus. Because of its physical features, including cliffs at the edge of the lake, it is not considered safe for unsupervised recreation. The university wants to exchange or sell the land to acquire property adjacent to the campus, but cannot do so because of the reverter provision in its patent. Thus, in order for the university to conclude such an exchange, it is necessary to remove the reverter restriction. The bill is designed to achieve this objective, which cannot be accomplished administratively.

LEGISLATIVE HISTORY

A hearing on H.R. 6419 was conducted by the House Subcommittee on Public Lands and National Parks on June 21, 1982. The measure was reported favorably from the Full Interior Committee on August 4, 1982. It passed the House unanimously on August 17, 1982. No hearings have been held in the Senate on this measure.

COMMITTEE RECOMMENDATIONS AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in open business session on December 7, 1982, by unanimous vote of a quorum present recommends that the Senate pass H.R. 6419.

The rollcall vote on reporting the measure was 19 yeas, no nays, as follows:

Yeas: McClure, Hatfield, Weicker,* Domenici, Wallop, Warner, Humphrey,* Murkowski, Nickles, East,* Heinz, Jackson, Johnston,* Bumpers, Ford, Matsunaga,* Melcher, Tsongas, and Bradley.

Nays: None.

*Indicates vote by proxy.

SECTION-BY-SECTION ANALYSIS

Section 1 requires the Secretary of the Interior to release the reversionary conditions now contained in the patent which conveyed the relevant lands to Eastern Washington University. Subsection (a) specifies the conditions to be released. Subsection (b) describes the lands in question. Subsection (c) limits the authority so as to require that the University complete the implementation of the sale or exchange to be facilitated by the bill within five years of enactment. After that period, the Secretary's authority to release the conditions specified in subsection (a) lapses.

Section 2 provides that the Secretary shall release the reversionary conditions of the patent only after the University prepares and delivers to the Secretary a recordable document setting forth the terms of an agreement between the University and the Secretary which will impose on the lands the University acquires restrictions similar to those being released from the lands the University now holds under the patent, and requires that any exchange or sale of the lands presently held will be on the basis of fair market value. The section also requires that the University include the terms of its agreement with the Secretary in any document which transfers to the University property acquired by the University pursuant to the agreement. This is intended to make the restrictions imposed by the agreement a matter of record for the protection of any third parties.

COST AND BUDGETARY CONSIDERATION

The Committee does not anticipate any additional budgetary impact from enactment of H.R. 6419, to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University and to enable the University to sell or exchange those lands in order to acquire other lands more suitable to educational purposes.

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 8, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 6419, a bill to direct the Secretary of the Interior to release certain conditions contained in a patent concerning cer-

tain land conveyed by the United States to Eastern Washington University, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

This bill directs the Secretary of the Interior to remove restrictions on the use and transfer of approximately 21 acres of land held by Eastern Washington University in order to allow the university to sell or exchange this land and acquire land more suitable for educational and recreational purposes. Under provisions of the bill the restrictions currently on the land held by the university are to be placed on any land either received in exchange or purchased with the proceeds from the sale of the land.

Based on this review, it appears that no additional cost to the federal government will be incurred as a result of enactment of this legislation.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of the Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out H.R. 6419.

The bill is not a regulatory measure in the sense of imposing Government established standards or significant economic responsibilities on private individuals and businesses.

H.R. 6419 would direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain lands conveyed by the United States to Eastern Washington University.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of H.R. 6419.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report was requested by the Committee but was not received at the time the report was filed. When the report is available, the Chairman will request it to be printed in the CONGRESSIONAL RECORD for the advice of the Senate.

The pertinent legislative report received by the Committee on Interior and Insular Affairs in the House of Representatives from the Department of the Interior setting forth Executive agency recommendations relating to H.R. 6419 is set forth below:

U.S. DEPARTMENT
OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., August 5, 1982.

Hon. MORRIS K. UDALL,
Chairman, Committee on Interior and Insular Affairs, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This responds to your request for our view on H.R. 6419, a bill "To direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University."

We would have no objection to the enactment of H.R. 6419, if amended to incorporate our recommendations.

H.R. 6419 would direct the Secretary of the Interior to release certain conditions in patent numbered 1216646, which conveyed to Eastern Washington University (formerly the Eastern Washington College of Education), under authority of the Recreation and Public Purposes Act, approximately 21 acres of land described as lot 6, section 34, township 22 North, range 41 East, Willamette Meridian Washington. The conditions to be released are that the lands will revert to the United States if either the University or any successor uses the land for other than recreational and educational purposes or attempts to transfer title to the land.

The Secretary would not be required to release the reverter provisions of the patent unless the University has demonstrated to his satisfaction: (1) that it will dispose of these 21 areas of land only for the purpose of acquiring, by exchange or purchase, property which is more suitable for educational or recreational purposes; (2) that, if the property is sold or exchanged, the sale price or the value of the property acquired through exchange will not be less than the fair market value of the involved land; (3) that, if the land is exchanged, the University will pay to the United States the difference between the fair market value of the 21 acres and the property acquired by exchange or, if the land is sold, any portion of the amount received from the sale of the 21 acres which is not used to purchase other property; and (4) that title to any property acquired by the University by exchange of the 21 acres or by purchase with the proceeds of the sale of such land would vest in the United States if the University or any successor of the University (a) uses the substitute property for purposes other than educational or recreational purposes, (b) attempts to transfer title to such property, or (c) prohibit or restricts, directly or indirectly, or permits agents, employees, contractors, or subcontractors (including lesses, sublessees, or permittees) to prohibit or restrict the use of the property or any facilities thereon by any individual because of race, creed, color, sex, or national origin.

The University originally acquired the land in question in 1961 intending to develop it extensively as a retreat for its music school. The land is about 10 miles from the campus. The University did develop a road, powerline, well, toilets, two docks, and primitive camping areas, but abandoned its plans to install permanent buildings for educational purposes because of lack of funds. It continued using the land for recreation only and, in 1976, revised its management plan to make it compatible with the limited nature of this development and use. In September 1980, the property was worth about $250,000. We understand the University officials have been criticized for retaining valuable property which is not actually useful for educational purposes.

Because of its physical features, including cliffs at the edge of the lake, the tract is not considered safe for unsupervised recreation. The University wants to obtain some safe, useable property closer to the campus, either by exchanging the 21 acres or selling it and purchasing substitute land. However, the reverter provision in the patent precludes such action. In order for the University to use the lands to acquire lands more suitable to its purpose, it is necessary to remove the reverter provision. H.R. 6419 is designed to achieve this objective. It cannot be accomplished administratively by the Secretary.

We recognize that a change in circumstances may render land unsuitable for the purposes for which it was granted under the Recreation and Public Purposes Act and that in some circumstances it may be desirable to allow the land originally conveyed to be sold or exchanged for land more suited to the purpose of the grant. On the basis of the information we have, we believe that the facts which generated this bill present a case for allowing substitution of more suitable land for lands that do not meet the needs of the grantee, in order to accomplish the purpose of the original grant. It is our view that when lands have been granted by the United States for a specified purpose on payment of less than fair market value, any change of use of the lands should be carefully circumscribed to protect the public interest, and to assure that any transaction would be as compatible as possible with the intent of the initial grant. This has also been Congressional policy.

H.R. 6419 would meet these requirements if it were amended along these lines:

First, we recommend that the legislation establish a time limit for conveyance of the 21 acres and acquisition of the substitute property.

In addition, we believe that enforcement of the reverter provision on the substitute land which the University would be acquiring would be difficult unless there is a recordable document such as an agreement between the University and the Secretary assuring the right of reverter to the Federal Government. Accordingly, we recommend that the bill be amended to require the University to execute and deliver to the Secretary a document confirming the obligations imposed on the University by the bill.

We would be happy to work with the Committee in developing the suggested amendments.

The Office of Management and Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

GARREY E. CARRUTHERS,
Assistant Secretary.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law would be made by the bill H.R. 6419, as reported.

GRANTING TEMPORARY USE PERMITS TO FEDERAL AGENCIES ON PUBLIC LANDS

Mr. MCCLURE, from the Committee on Energy and Natural Resources, submitted the following explanatory statement to accompany S. 1705.

The Committee on Energy and Natural Resources, to which was referred the bill (S. 1705) to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior, having considered the same, reports favorably thereon with an amendment to the text and submits the following information thereon:

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That The Federal Land Policy and Management Act of 1976 is amended as follows:

(1) By inserting in section 302(b) the phrase "temporary use permits under section 319 of this Act," between the comma following the words "section 204 of this Act," and the word "and," in the first proviso;

(2) By adding the following new section 319:

"TEMPORARY USE PERMITS FOR FEDERAL AGENCIES

"SEC. 319. The Secretary is authorized to issue temporary use permits to Federal departments and agencies to use, occupy, and develop public lands. Such permits may be issued for a term not to exceed three years and may be renewed once for an additional term not to exceed three years."; and

(3) By adding the following new heading to the Table of Contents after section 318:

"Sec. 319. Temporary Use Permits for Federal Agencies.".

PURPOSE

S. 1705, as reported would authorize the Secretary of the Interior to allow temporary use of public lands by federal departments and agencies by permit for a specific term and one renewal period.

SEC. 302(b) of FLPMA authorizes the Secretary to permit other Federal agency use of public lands only through rights of way, withdrawal or cooperative agreement when the proposed uses are similar or closely related to the programs of the BLM for the public lands involved. There is no provision for temporary or short term uses. The temporary land use requirement of Federal departments or agencies are diverse and are difficult to accommodate under current law. Withdrawal and cooperative agreement authority are not sufficient or unwieldy.

The need for temporary use permits has become evident from recent experiences of the Bureau of Land Management in attempting to accommodate the land use requirements of Federal departments and agencies. In one instance, for example, BLM was unable to permit the use of a site on public lands by the Environmental Protection Agency for the purpose of monitoring the effects of hazardous waste disposal areas on private lands adjacent to those public lands. In another, the Secretary could not permit the Federal Aviation Administration to use public lands for its vector analysis program, which requires the occasional short-term use of mountain tops.

The amount and variety of Interior-controlled public land in the continental United States and Alaska, together with its diversified terrain and climatic conditions, present the military services with opportunities to vary their training operations and yet not require the use of any one particular area on a recurring basis. Yet the Secretary of the Interior is not able to permit short-term use of public lands by the military because the authorizing authorities he may use are not suitable.

A temporary use permit or authorization is consistent with procedures formerly used by the Bureau of Land Management to authorize special uses of public lands on a temporary basis. Issuance of temporary use permits should be subject to environmental review by the Secretary of the Interior in the same manner as are other land use authorizations.

LEGISLATIVE HISTORY

S. 1705 was introduced by Senator McClure by request on October 6, 1981. The Public Lands and Reserved Water Subcommittee received testimony on S. 1705 on July 27, 1982. The administration supports the enactment of S. 1705 as introduced as indicated in testimony before the Subcommittee. At a business session on December 7, 1982, the Committee on Energy and Natural Resources ordered S. 1705, as amended, favorably reported.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in an open business session on December 7, 1982, by unanimous vote of a quorum present recommends that the Senate pass S. 1705.

The roll call vote on reporting the measure was 19 yeas, 0 nays, as follows:

Yeas: Mr. McClure, Mr. Hatfield, Mr. Domenici, Mr. Wallop, Mr. Warner, Mr. Weicker,* Mr. Humphrey,* Mr. Murkowski, Mr. Nickles, Mr. East,* Mr. Heinz, Mr. Jackson, Mr. Johnston,* Mr. Bumpers, Mr. Ford, Mr. Matsunaga,* Mr. Melcher, Mr. Tsongas, and Mr. Bradley.

Nays: None.

COMMITTEE AMENDMENT

The Committee amendment was in the nature of a substitute to S. 1705 as introduced.

The amendment limits the authority of the Secretary of the Interior to issue permits for temporary use of public lands by Federal agencies and departments only for a three year term period with one renewal period not to exceed 3 years. S. 1705, as introduced, contained no limitations on time or use by any specific entity or entities.

COST AND BUDGETARY CONSIDERATIONS

The Committee does not anticipate any additional budgetary impact from enactment of S. 1705, to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior.

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 9, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional budget Act of 1974, the Congressional Budget Office has review S. 1705, a bill to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

Based on this review, it is expected that no significant additional cost to the govenment would be incurred as a result of enactment of this bill.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of the rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 1705.

The bill is not a regulatory measure in the sense of imposing Government established standards or significant economic responsibilities on private individuals and businesses.

S. 1705 would amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of S. 1705.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report was requested by the Committee but was not received at the time the report was filed. When the report is available, the Chairman will request it to be printed in the CONGRESSIONAL RECORD for the advice of the Senate.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 on Rule XXVI of the Standing Rules of the Senate, changes in existing law made by the bill, S. 1705 as ordered reported, as shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

ACT OF OCTOBER 21, 1976

(90 Stat. 2743, as amended, 43 USC 1701)

MANAGEMENT OF USE, OCCUPANCY, AND DEVELOPMENT

SEC. 302. (a) The Secretary shall manage the public lands under principles of multiple use and sustained yield, in accordance with the land use plans developed by him under section 202 of this Act when they are available, except that where a tract of such public land has been dedicated to specific uses according to any other provisions of law it shall be managed in accordance with such law.

(b) In managing the public lands, the Secretary shall, subject to this Act and other applicable law and under such terms and conditions as are consistent with such law, regulate, through easements, permits, leases, licenses, published rules, or other instruments as the Secretary deems appropri-

*Indicates voted by proxy.

ate, the use, occupancy, and development of the public lands, including, but not limited to, long-term leases to permit individuals to utilize public lands for habitation, cultivation, and the development of small trade or manufacturing concerns: *Provided,* That unless otherwise provided for by law, the Secretary may permit Federal departments and agencies to use, occupy, and develop public lands only through rights-of-way under section 507 of this Act, withdrawals under section 204 of this Act, *temporary use permits under section 319 of this Act,* and, where the proposed use and development are similar or closely related to the programs of the Secretary for the public lands involved, cooperative agreements under subsection (b) of section 307 of this Act: *Provided further,* That nothing in this Act shall be construed as authorizing the Secretary concerned to require Federal permits to hunt and fish on public lands or on lands in the National Forest System and adjacent waters or as enlarging or diminishing the responsibility and authority of the States for management of fish and resident wildlife. However, the Secretary concerned may designate areas of public land and of lands in the National Forest System where, and establish periods when, no hunting or fishing will be permitted for reasons of public safety, administration, or compliance with provisions of applicable law. Except in emergencies, any regulations of the Secretary concerned relating to hunting and fishing pursuant to this section shall be put into effect only after consultation with the appropriate State fish and game department. Nothing in this Act shall modify or change any provision of Federal law relating to migratory birds or to endangered or threatened species. Except as provided in section 314, section 603, and subsection (f) of section 601 of this Act and in the last sentence of this paragraph, no provision of this section or any other section of this Act shall in any way amend the Mining Law of 1872 or impair the rights of any locators or claims under that Act, including, but not limited to, rights of ingress and egress. In managing the public lands the Secretary shall, by regulation or otherwise, take any action necessary to prevent unnecessary or undue degradation of the lands.

(c) The Secretary shall insert in any instrument providing for the use, occupancy, or development of the public lands a provision authorizing revocation or suspension, after notice and hearing, of such instrument upon a final administrative finding of a violation of any term or condition of the instrument, including, but not limited to, terms and conditions requiring compliance with regulations under Acts applicable to the public lands and compliance with applicable State or Federal air or water quality standard or implementation plan: *Provided,* That such violation occurred on public lands covered by such instrument and occurred in connection with the exercise of rights and privileges granted by it: *Provided further,* That the Secretary shall terminate any such suspension no later than the date upon which he determines the cause of said violation has been rectified: *Provided further,* That the Secretary may order an immediate temporary suspension prior to a hearing or final administrative finding if he determines that such a suspension is necessary to protect health or safety or the environment: *Provided further,* That, where other applicable law contains specific provisions for suspension, revocation, or cancellation of a permit, license, or other authorization to use, occupy, or develop the public lands, the specific provisions of such law shall prevail.

* * * * *

TEMPORARY USE PERMITS FOR FEDERAL AGENCIES

SEC. 319. The Secretary is authorized to issue temporary use permits to federal departments and agencies to use, occupy, and develop public lands. Such permits may be issued for a term not to exceed three years and may be renewed once for an additional term not to exceed three years.

SHOW LOW, ARIZONA, LAND CONVEYANCE

Mr. MCCLURE, from the Committee on Energy and Natural Resources, submitted the following explanatory statement To accompany S. 2308.

The Committee on Energy and Natural Resources, to which was referred the bill (S. 2308 to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Arizona, having considered the same, reports favorably thereon with an amendment to the text and submits the following information:

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That the Secretary of Agriculture is authorized and directed to survey and convey, by quitclaim deed and without consideration, to the city of Show Low, Arizona, all right, title, and interest of the United States to the lands generally depicted on a map entitled "Land Conveyance, City of Show Low, Arizona," and dated July 1982, which shall be on file and available in the office of the Chief Forest Service, Department of Agriculture, and more particularly described as follows:

(a) a tract of land, together with improvements thereon known as the "David C. Porter Park" estimated to include approximately 52.46 acres; and

(b) a tract of land, together with improvements thereof known as the "Show Low Municipal Airport" estimated to include approximately 533 acres.

SEC. 2. Title to any real property acquired by the city of Show Low pursuant to this Act shall revert to and become the property of the United States if the city or any successor of the city uses such real property for other than public purposes.

PURPOSE OF THE MEASURE

S. 2308 would authorize and direct the Secretary of Agriculture to survey and convey, without consideration, certain lands comprising approximately 585 acres to the city of Show Low, Arizona.

BACKGROUND AND NEED

As introduced, S. 2308 involves two parcels of land. The first is a 48-acre portion of a 52.46-acre parcel of Federal land presently under permit to the city for a city park. It has been under continuous permit to the city for a city park since November 1953. The tract has improvements placed by the city under terms of the permit, including a ball park, picnic and sanitary facilities, and parking areas. The property is surrounded by private lands and is within the developed area of the city. The bill as introduced excludes that portion of the tract used as a highway right-of-way, which establishes a portion of the southern boundary of the property.

The second parcel described in the bill as introduced consists of 897 acres and contains the Show Low Airport. This use by the city is also under permit with the Forest Service but the permit only provides for use of 317 acres. This permit has continued since November 1946. The city is interested in obtaining this property and approximately 580 acres of adjacent land to provide for possible expansion of its airport at sometime in the future and to ensure against future encroachments upon the airport in the form of development and noise-sensitive activities. The acquisition of this land by the city is an important part of the impementation of its airport Master Plan. Ownership of this property will ensure the city maximum control of the use of the land most critical to the airport's operation.

LEGISLATIVE HISTORY

S. 2308 was introduced on March 30, 1982. A hearing before the Public Lands and Reserved Water Subcommittee was held on July 27, 1982. S. 2308 was ordered favorably reported as amended at a mark-up session on December 7, 1982.

COMMITTEE RECOMMENDATIONS AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in open business session on December 7, 1982 by unanimous vote of a quorum present recommended that the Senate pass S. 2308 if amended, as described herein.

The rollcall vote on reporting the measure was 19 yeas and no nays as follows:

Yeas: McClure, Hatfield, Weicker,* Domenici, Wallop, Warner, Humphrey,* Murkowski, Nickles, East,* Heinz, Jackson, Johnston,* Bumpers, Ford, Matsunaga,* Melcher, Tsongas, Bradley.

Nays: None.

COMMITTEE AMENDMENT

During the consideration of S. 2308, the Committee adopted an amendment in the nature of a substitute offered by Senator Wallop.

In addition to several technical and clarifying changes, the Committee substitute makes two major changes in the bill as introduced. First, the amendment reduces the acreage to be conveyed from approximately 950 acres to 585 acres. The Committee believes that this conveyance is ample to meet the city's airport needs. It includes the 317 acres currently under permit plus a 216-acre addition on the south side of the airstrip in section 16. It also includes the entire 52-acre parcel of Federal land presently under permit to the city for a city park. Conveyance of both parcels would be made subject to two outstanding highway rights-of-way.

The Committee amendment also includes a reverter provision making it clear that should the lands conveyed to Show Low be used for other than public purposes, they will revert to, and become the property of, the United States. The Committee notes that "public purposes" includes retaining these lands in public ownership.

COST AND BUDGETARY CONSIDERATIONS

S. 2308 authorizes no appropriation and should have no discernible impact on the Federal budget. The estimate of the Congressional Budget Office follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 8, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S. 2308, a bill to direct the Secre-

*Indicates vote by proxy.

tary of Agriculture to convey certain property to the city of Show Low, Arizona, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

This bill authorizes and directs the Secretary of Agriculture to survey and convey without consideration approximately 585 acres of land. According to the provisions of the bill, title to this land will revert to the federal government if it ceases to be used for public purposes. Based on information from the National Forest Service, it is estimated that additional costs associated with surveying and administration of the conveyance will be approximately $25,000 in fiscal year 1983. The National Forest Service has estimated that the value of the land to be exchanged is approximately $3 million.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT EVAI UATION

In compliance with paragraph 11(b) of the Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 2308.

The bill is not a regulatory measure in the sense of imposing Government-established standards or significant economic responsibilities on private individuals and businesses. S. 2308 directs the Secretary of Agriculture to convey certain property to the city of Show Low, Arizona.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of S. 2308.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report was requested by the Committee but was not received at the time the report was filed. When the report is available, the Chairman will request it to be printed in the CONGRESSIONAL RECORD for the advice of the Senate.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law are made by the bill, S. 2308.

CHEAHA WILDERNESS ACT

Mr. MCCLURE, from the Committee on Energy and Natural Resources, submitting the following Explanatory Statement to accompany S. 2955.

The Committee on Energy and Natural Resources to which was referred the bill S. 2955 to establish the Cheaha Wilderness in Talladega National Forest, Alabama, having considered the same, reports favorably and submitts the bill.

Following information thereon:

PURPOSE

S. 2955 would esigniate a 6,780-acre Cheaha Wilderness in the Talledega National Forest, Alabama.

BACKGROUND AND NEED

The 6,780-acre proposed wilderness abuts Cheaha State Park and encompasses the second and third highest peaks in Alabama. Lying within a 90 minute drive of Birmingham and 2 hours from Montgomery, the proposal straddles the southernmost extension of the Blue Ridge Mountains and is popular for hiking and other forms of primitive recreation. The Odum Scout Trail and several other trails traverse the area. Scenery is spectacular throughout, as is evidenced by the fact that the area got the highest wilderness attributes rating in the state during the RARE II review process.

The proposed wilderness consists entirely of National Forest System land and includes the steep and rugged topography of Talladega Mountain.

Resource conflicts with wilderness designation are minimal. A study by the U.S. Bureau of Mines shows no significant mineralization, timber potential is also low.

The area was recommended for further planning in RARE II because consideration was then being given to location of a scenic highway through part of the area. The proposed highway has since been rerouted outside the area.

LEGISLATIVE HISTORY

S. 2955 was introduced on September 24, 1982. A hearing before the Subcommittee on Public Lands and Reserved Water was held on November 30, 1982.

The Administation in testimony supports the enactment of S. 2955 with amendment.

At a business session on December 7, 1982, the Committee on Energy and Natural Resources ordered the S. 2955 favorably reported.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in an open business session on December 7, 1982, by unanimous vote of a quorum present recommends that the Senate pass S. 2955.

The rollcall vote on reporting the measure was 19 yeas, 0 nays as follows:

Yeas: Mr. McClure, Mr. Hatfield, Mr. Domenici, Mr. Wallop, Mr. Warner, Mr. Weicker,* Mr. Humphrey,* Mr. Murkowski, Mr. Nickles, Mr. East,* Mr. Heinz, Mr. Jackson, Mr. Johnston,* Mr. Bumpers, Mr. Ford, Mr. Matsunaga,* Mr. Melcher, Mr. Tsongas, Mr. Bradley.

*Indicates voted by proxy.

Nays: None.

SECTION-BY-SECTION ANALYSIS

Section 1 is the title section. The Act may be cited as the "Cheaha Wilderness Act".

Section 2 designates certain lands in the Talledega National Forest in Alabama as wilderness and names the area the Cheaha Wilderness.

Section 2(b) contains the standard language of all wilderness bills pertaining to the management of wilderness areas designated by the bill.

Section 2(c) contains the standard language of all wilderness bills pertaining to the filing of maps and legal descriptions for the wilderness areas designated by the bill.

COST AND BUDGETARY CONSIDERATION

The Committee does not anticipate any additional budgetary impact from enactment of S. 2955, to establish the Cheaha Wilderness in the Talladega National Forest, Alabama.

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 9, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S. 2955, the Cheaha Wilderness Act, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

This bill adds approximately 6,780 acres of National Forest System lands in Alabama to the National Wilderness Preservation System. Based on information from the National Forest Service, additional costs to the federal government resulting from surveying, planning, and related activities necessary to implement the wilderness withdrawals are expected to be approximately $20,000 per year during the five fiscal years beginning with 1983.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 2955.

The bill is not a regulatory measure in the sense of imposing Government established standards or significant economic responsibilities on private individuals and businesses.

S. 2955 would establish the Cheaha Wilderness in Talladega National Forest, Alabama.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of S. 2955.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report was requested by the Committee but was not received at the time the report was filed. When the report is available, the Chairman will request it to be printed in the CONGRESSIONAL RECORD for the advice of the Senate.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law would be made by the bill S. 2955, as reported.

LEE METCALF WILDERNESS AND MANAGEMENT ACT OF 1982

Mr. MCCLURE, from the Committee on Energy and Natural Resources, submitted the following explanatory statement to accompany S. 2110.

The Committee on Energy and Natural Resources, to which was referred the bill (S. 2110) to establish the Lee Metcalf Wilderness and Management Area in the State of Montana, and for other purposes, having considered the same, reports favorably thereon with amendment(s) to the text and submits the following information.

The amendments are as follows:

1. On page 1, line 9, following the word "Forests", insert: "and certain lands in the Dillon Resource Area, Montana, administered by the Bureau of Land Management".

2. On page 1, line 10, delete "two hundred and two thousand" and insert in lieu thereof: "two hundred and forty-four thousand".

3. On page 2, line 3, delete "February" and insert in lieu thereof: "December".

4. On page 2 lines 7 and 8, amend to read as follows: "the Secretary of Agriculture, hereafter referred to as 'the Secretary', in accordance with the Wilderness Act governing".

5. On page 2, line 12, delete the word "Act." and insert in lieu thereof: "Act: *Provided further,* That the Bear Trap Canyon portion of the Lee Metcalf Wilderness shall be administerd by the Secretary of the Interior.".

6. On page 2, lines 19 and 20, delete "seventy-two thousand" and insert in lieu thereof: "thirty-five thousand five hundred".

7. On page 2, line 21, delete "February" and insert in lieu thereof: "December".

8. On page 2, delete lines 22 and 23 and insert in lieu thereof: "The area shall be hereby withdrawn from all forms of appropriation under the mining laws and from disposition under all laws pertaining to mineral leasing and geothermal leasing, and all amendments thereto, and further shall be administered by the Secretary to maintain presently existing wilderness character, with no commercial timber harvest nor additional road construction permitted. The Secretary shall permit continued use of the area by motorized vehicular equipment only where such use is compatible with the protection and propagation of wildlife within the area.".

9. On page 3, delete all the material following line 6; on page 4, delete lines 1 through 18, and insert in lieu thereof:

"SEC. 3. (a) The Congress hereby determines and directs that—

"(1) the areas listed in subsection (b) of this section have been adequately studied for wilderness pursuant to Public Law 95-150 or in the RARE II Final Environmental Statement (dated January 1979);

"(2) such studies shall constitute an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option for such areas prior to revision of the initial plans required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94-588) and in no case prior to the date established by law for completion of the initial planning cycle;

"(3) such areas need not be managed, unless otherwise specified in this Act, for the purposes of protecting thier suitability for wilderness designation pending revision of the initial plans.

"(b) The areas covered by subsection (a) of this section as follows:

"(1) the Mt. Henry Wilderness Study Area as designated by Public Law 95-150;

"(2) those portions of the Taylor-Hilgard Wilderness Study Area as designated by Public Law 95-150 but not designated as wilderness by this Act;

"(3) certain lands on the Gallatin National Forest and Beaverhead National Forest identified as area 1549 in the Forest Service Roadless Area Review and Evaluation (II) Final Environmental Statement, Executive Communication Number 1504, May 3, 1979, not designated as wilderness by this Act;

"(4) certain lands on the Custer National Forest known as the proposed Tongue River Breaks Wilderness, which comprise approximately 16,500 acres, as identified in Executive Communication 1504, Ninety-sixth Congress (House Document Numbered 96-119).

"(c)(1) The lands described in subsection (c)(2) of this section have been adequately studied for wilderness pursuant to Section 603 of the Federal Land Policy and Management Act (P.L. 94-579) and need not be managed, unless otherwise specified in this Act, for the purposes of protecting their suitability for wilderness designatioin, and may be made available for such uses as are deemed appropriate in land use plans developed pursuant to the Federal Land Policy and Management Act.

"(2) The lands covered by subsection (c)(1) of this section are as follows:

"(A) certain lands administered by the Bureau of Land Management in the Powder River Resource Area, Montana, identified as area number 736, Tongue River Breaks Contiguity, comprising approximately 2,000 acres as described in the "Final Decision Montana Wilderness Inventory" published November 1980 by the Bureau of Land Management;

"(B) certain lands administered by the Bureau of Land Management in the Dillon Resource Area, Montana, identified as area number MT-076-079 "Madison Tack-Ons" comprising approximately 1,500 acres, as described in the "Final Decision Montana Overthrust Belt Wilderness Inventory" published by the Bureau of Land Management, not otherwise designated as wilderness by this Act; and

"(C) certain lands administered by the Bureau of Land Management known as "Bear Trap Canyon Study Area", Madison County, Montana, as described in "Draft Suitability and Environmental Impact Statement for Wilderness Designatioin of Bear Trap Canyon Instant Study Area" published April 1980 by the Bureau of Land Management, not otherwise designated as wilderness by this Act.".

10. On page 4, delete line 19 and insert in lieu thereof the following:

"(d) The Secretary is directed to revise the".

11. On page 5, delete the period on line 2 and insert the following: ", and approximately 40 acres located in the West Fork Mill Creek (Section 13, T7S, R9E MT Principal Meridian) to exclude about 0.3 miles of existing road, parking area and public facilities. Lands excluded pursuant to this subsection are hereby removed from the National Wilderness Preservation System.".

12. On page 5, delete lines 3 through 12 and insert in lieu thereof the following:

"(e)(1) The road depicted on a map entitled "U. L. Bend Wilderness Access for Motor Vehicles" dated February 1982, and 50 feet on either side of such road, are hereby removed from the National Wilderness Preservation System. Such map shall be on file and available for public inspection in the Office of the Director of the U.S. Fish and Wildlife Service.

"(2) The Secretary of the Interior is directed to open the road referenced in subparagraph (e)(1) of this section to motorized vehicles.".

13. On page 5, line 16, delete "in section 1(a)(2) of" and insert in lieu thereof: "by".

14. On page 5, following the material on line 21 add the following: "and directs".

15. On page 5, delete line 24 and insert in lieu thereof: "the Secretary and".

16. On page 6, line 13, delete the comma following the word "half".

17. On page 6, delete line 14.

18. On page 7, line 9, delete the comma following the word "half".

19. On page 9, line 2, delete the word "and".

20. On page 9, delete the material on lines 13 and 14 and insert in lieu thereof:

"All, less HES 187 and 190,".

21. On page 10, delete lines 15-18 and insert in lieu thereof:

"(2) For so long as the Forest Service deems necessary, Burlington Northern Railroad Company accepts the responsibility accruing from this exchange to provide and manage three (3) public recreational access, including trail head facilities as needed, in the Jack Creek drainage over routes approximately as illustrated on Exhibit C of the Memorandum of Understanding dated November 20, 1981, between the U.S. Forest Service and Burlington Northern, Inc., to utilize national forest lands.".

22. On page 11, following line 11, insert on a new line, "Public Land Order 909—Jack Creek Administrative Site—7/13/1953.".

PURPOSE OF THE MEASURE

S. 2110 would establish the Lee Metcalf Wilderness and Management area in the State of Montana, release other National Forest and Bureau of Land Management lands for uses other than wilderness, and effect a major land exchange between the United States and Burlington Northern in the Taylor-Hilgard area.

BACKGROUND AND NEED

In 1977, Congress passed the Montana Wilderness Study Act. One of the areas included in that legislation was the Taylor-Hilgard area, comprising 289,859 acres. Nearly all the proposed Lee Metcalf Wilderness and Management Areas' acreage was within the Taylor-Hilgard Study boundary. Public Law 95-150 directs that the areas to be studied ". . . until Congress determines otherwise, be administered by the Secretary of Agriculture so as to maintain their presently existing wilderness character and potential inclusion in the National Wilderness Preservation System."

S. 2110 would designate certain lands in the Taylor-Hilgard area as wilderness direct the management of certain other lands in the area, and release still other lands from the management required by Public Law 95-150.

Legislation is needed to insure that the highest uses of lands studied under Public Law 95-150 are actually achieved, since Congress must act for the study and interim management phases to be terminated.

More specifically, S. 2110 as reported, would designate approximately 244,000 acres of Forest Service and BLM land as wilderness and direct the management of another 35,000 acres of Forest Service land for wildlife habitat and recreation values. The bill effects an exchange of lands in the area between the Forest Service and the Burlington Northern, Inc., who share a checkerboard land ownership pattern in the Taylor-Hilgard area; the exchange would consolidate holdings of both parties. In addition, S. 2110 directs the Secretary of the Interior to remove a fishing access road from the UL Bend Wilderness, Montana; releases the Forest Service RARE II area known as the Tongue River Breaks from further wilderness management; directs the Forest Service to redraw the boundary of the existing Absaroka-Beartooth Wilderness Area, Montana, to exclude approximately 50 acres of private land on the northern border; and releases from further wilderness management the Mt. Henry Wilderness Study Area, Montana, also mandated for study by Public Law 95-150.

The initial Forest Service report on Taylor-Hilgard as required by Public Law 95-150 recommended some 155,269 acres be added to the National Wilderness Preservation System. The additional acreages proposed for wilderness in S. 2110 are largely in the existing Spanish Peaks Primitive Area nearby, the area within the Taylor-Hilgard Study boundary, and the Bear Trap Canyon

Instant Study Area, managed and recommended for wilderness by the Bureau of Land Management.

The special management area is designed to accommodate the two most important uses of the lands within its boundary: wildlife and recreation. Elk and Grizzly bear populations depend on the lands generally surrounding Monument Mountain. Outdoor recreation, most importantly winter snowmobiling, is established along the Big Sky Snowmobile Trail and associated play areas, and this recreation opportunity is essential to the economy of this part of Montana, most specifically the town of West Yellowstone.

The exchange of private and public lands is necessary to consolidate public ownership in the Taylor-Hilgard portion of the Madison Wilderness. Burlington Northern, Inc., will deed over some 24,007 acres to the Forest Service, and 11,810 acres of federal land will be traded to the Burlington Northern, Inc.

LEGISLATIVE HISTORY

The Subcommittee on Public Lands and Reserved Water received testimony at a field hearing in Bozeman, Montana on May 28, 1981 on issues involved with the Taylor Hilgard and related areas. The Committee published that hearing as Publication No. 97-33, on the future management of the Mount Henry, Taylor-Hilgard, and West Pioneer Wilderness Study areas, Public Law 95-150.

S. 2110 was introduced by Senator Melcher on February 11, 1982.

At a business session on December 7, 1982, the Committee on Energy and Natural Resources ordered S. 2110, as amended, favorably reported.

COMMITTEE RECOMMENDATION AND TABULATION OF VOTES

The Senate Committee on Energy and Natural Resources in an open business session on December 7, 1982, by unanimous vote of a quorum present recommends that the Senate pass S. 2110, if amended as described herein.

The rollcall vote on reporting the measure was 19 yeas, 0 nays, as follows:

Yeas: Mr. McClure, Mr. Hatfield, Mr. Domenici, Mr. Wallop, Mr. Warner, Mr. Weicker,* Mr. Humphrey,* Mr. Murkowski, Mr. Nickles, Mr. East,* Mr. Heinz, Mr. Jackson, Mr. Johnston,* Mr. Bumpers, Mr. Ford, Mr. Matsunaga,* Mr. Melcher, Mr. Tsongas, and Mr. Bradley.

Nays: None.

COMMITTEE AMENDMENTS

The Committee made 22 amendments to S. 2110, as introduced. Many were technical or clarifying in nature. The amendments are described as follows:

1. The amendment includes certain lands in the Dillon Reserve area administered by BLM in the area designated as the Lee Metcalf Wilderness to be designated as wilderness.

2. The amendment changes the acreage being designated as wilderness from 202,000 in S. 2110 as introduced to 244,000 in S. 2110 as reported.

3. This amendment conforms the date of the descriptive map from the date of the bill's introduction to the date of the committee amendments.

4. Technical amendment.

5. This amendment clarifies that certain lands in the Bear Trap portion of the Lee Metcalf Wilderness that are BLM lands will be managed and administered by the Secretary of the Interior in accordance with the Wilderness Act.

6. This amendment changes the acreage being designated for special management subsequent to introduction of the bill.

7. This amendment conforms the date of the descriptive map from the date of introduction to the date of the committee amendment.

8. Changes the management direction language in S. 2110 to make clear that present wilderness characteristics of the area shall be protected, and that motorized vehicles (especially snowmobiles) and other vehicles (bicycles, horsedrawn wagons) shall be allowed, and habitat improvement projects may be conducted by the Secretary of Agriculture, acting through the Forest Service.

9. This amendment releases from further wilderness management requirements certain National Forest lands and Bureau of Land Management areas which are not designated as wilderness in S. 2110 as reported, as well as certain lands in the Mt. Henry and Tongue River Breaks areas.

10. This is a technical amendment.

11. This amendment revises the boundary of the Absaroka-Beartooth wilderness to delete a Forest Service parking lot and 0.3 miles of road on the northern edge of the wilderness.

12. Changes the manner in which Congress directs the opening of the road in the UL Bend Wilderness area.

13. This amendment on a grammatical correction.

14. & 15. These are technical amendments.

16, 17, 18, 19 & 20. Correct printing errors in the land description for the proposed exchange between Burlington Northern and the Forest Service.

21. This amendment conforms the language of the bill to subsequent changes in the Memorandum of Understanding between the Burlington Northern, Inc. and the U.S. Forest Service, clarifying that the Forest Service may relieve Burlington Northern of the responsibility of providing and managing the trails if the Forest Service no longer deems them necessary, without prejudice to the land exchange itself. The memorandum is as follows:

MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding is entered into this 20th day of November, 1981, by and between the Forest Service, United States Department of Agriculture, hereinafter referred to as FS, and Burlington Northern Railroad Company, a Delaware corporation, hereinafter referred to as BN, for the purpose of documenting joint understandings in relation to a proposed wilderness and legislated exchange of lands within the Gallatin and Beaverhead National Forests, Montana.

WITNESSETH:

Whereas, there is a proposal that the Congress of the United States establish a wilderness within the Taylor-Hilgard area,

Whereas, there are intermingled National Forest and BN ownerships within the Taylor-Hilgard area,

Whereas, in the event a wilderness is created, it is the intent to consolidate Federal ownership within the wilderness.

Now, therefore, BN and the FS hereto agree as follows:

1. Within 45 days following passage of Federal legislation which establishes the wilderness and consummates the associated land exchange, BN will execute and transmit to the FS a warranty deed, conveying to the United States those lands described in Exhibit A, attached hereto and made a part hereof, said conveyance to be subject to such reservations and encumbrances as are of record and acceptable to the Secretary of Agriculture.

2. Within 45 days following receipt of such warranty deed from BN, the United States shall issue patent to those lands described in Exhibit B, attached hereto and made a part hereof, said patent to convey ownership of said lands to BN subject only to (1) a reservation for ditches and canals as provided for in the Act of August 30, 1890 (26 Stat. 391, 43 U.S.C. 945), and (2) such reservations and encumbrances as are of record.

3. BN accepts the responsibility accruing from this exchange to provide and manage three (3) public recreational accesses, including trail head facilities as needed, in the Jack Creek drainage over routes approximately as illustrated on Exhibit C, attached hereto and made a part hereof, to utilize National Forest lands.

The recreational accesses will originate from the Jack Creek Road and will connect to the existing FS trails at points A, B, and C, as shown on Exhibit C.

4. It is further understood that the FS will, at the time patent to the lands described in Exhibit B is conveyed to BN, relinquish the interest of the United States in the Hammond Creek Road across Section 6, T. 6 S., R. 2 E., and Section 32, T. 5 S., R. 2 E.

5. It is further understood that this agreement will terminate if the required wilderness and related land exchange legislation is not passed by Congress by December 31, 1981.

Containing 11,810.47 acres, more or less, all in Madison County, State of Montana.

EXHIBIT C

Exhibit C not reproduced in RECORD.

22. This amendment corrects an omission in the original bill.

COST AND BUDGETARY CONSIDERATIONS

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., December 9, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S. 2110, the Lee Metcalf Wilderness and Management Act of 1982, as ordered reported by the Senate Committee on Energy and Natural Resources, December 7, 1982.

This bill designates 279,500 acres of land in Montana as the Lee Metcalf Wilderness and Management Areas. Based on information from the National Forest Service, it is estimated that additional costs resulting from surveying, planning and related activities associated with the designations will be approximately $250,000 over the five fiscal years beginning with 1983.

The bill also contains provisions for the release of certain lands from wilderness management and a land exchange between the National Forest Service and a private party. A small amount of savings to the federal government is expected to be realized as as result of enactment of these provisions.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of the Rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 2110.

The bill is not a regulatory measure in the sense of imposing Government established standards or significant economic responsibilities on private individuals and businesses.

S. 2110 would establish the Lee Metcalf Wilderness and Management Area in the State of Montana, and for other purposes.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little if any additional paperwork would result from the enactment of S. 2110.

EXECUTIVE COMMUNICATIONS

The pertinent legislative report was requested by the Committee but was not received at the time the report was filed. When the report is available, the Chairman will request it to be printed in the CONGRESSIONAL RECORD for the advice of the Senate.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of Rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law would be made by the bill S. 2110, as reported.

HUMAN RIGHTS DAY

Mr. MOYNIHAN. Mr. President, on Friday, December 10, the Senate finished its business unexpectedly early in the day, and adjourned for the weekend a bit suddenly. I had planned to offer several remarks on that day with respect to International Human Rights Day, which was observed on Friday, the 34th anniversary of the adoption by the United Nations General Assembly of the International Declaration of Human Rights. I would like to do so now, if I may.

The anniversary of the adoption of the Declaration should be an occasion for special reflection, by Americans even more than other peoples, because it is—like the U.N. Charter itself—in the main an American work. In the wake of the Second World War, when the United States played the largest single role in restoring peaceful order to a war-ravaged world, our foreign policy was guided by a quintessentially American optimism—American because it was Wilsonian optimism—that the entire world might soon be governed by the spirit of the Declaration of Independence and the Bill of Rights, with perhaps just a little bit of the New Deal thrown in.

This was no more afterthought; it was, in fact, why we had entered the war in the first place.

Recall Franklin Roosevelt's famous "Four Freedoms" speech, delivered before the 77th Congress on January 6, 1941, during the dark days before the United States entered the war. The President's purpose on that day was to explain why the United States would support, through the provision of material and ammunition, the war efforts of the democracies in Europe against the totalitarian powers then embarked upon the campaign to subjugate through military force the free world.

The four freedoms summarized what the democratic nations of the world were fighting for in the great war then raging in Europe and the Pacific. They became the blueprint for American postwar policy, which had its first institutional expression in the United Nations Organization, and its clearest ideological expression in the Universal Declaration of Human Rights.

The democracies which the United States was soon to join in combat, President Roosevelt told the Congress, "look forward to a world founded upon four essential human freedoms * * *"

The first is freedom of speech and expression—everywhere in the world.

The second is freedom of every person to worship God in his own way—everywhere in the world.

The third is freedom from want . . . everywhere in the world.

The fourth is freedom from fear—which, translated into world terms, means a worldwide reduction of armaments to such a point and in such a thorough fashion that no nation will be in a position to commit an act of physical aggression against any neighbor—anywhere in the world.

The United States has remained dedicated to these goals. Indeed, it was Eleanor Roosevelt herself, at the head of the American delegation to the early sessions of the United Nations General Assembly, meeting then in Paris, who took the initiative in drafting the Universal Declaration of Human Rights.

The purpose of the Declaration, as set out in its introductory sentence, was to establish—

A common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society . . . shall strive . . . to promote respect for these rights and freedoms . . .

And the Declaration set out to enumerate those rights and freedoms, in a manner that is reminiscent of nothing so much as our own Constitution and the American Declaration of Independence.

Thirty-four years later, we as a people remain dedicated to the propositions set forth in the Universal Declaration of Human Rights. We have not always been entirely successful in the implementation of the ideal.

The most recent Democratic administration, for instance, tried when it came to power in 1977 to reinvigorate a human rights policy that had seemingly been relegated by previous administrations to a distinctly lesser rung on the ladder of American priorities. While it had good intentions, it lacked breadth of vision. The policy of human rights under the Carter administration became bureaucratized and, thereby, trivialized.

As I wrote in an article published in 1977, the "concepts of human rights should be as integral to American foreign policy as is Marxist-Leninism to Soviet or Chinese or Yugoslav operations and planning."

Instead, we created a minor office in the State Department to handle the issue, relegating it to the destiny of departmental routine. Just as we have the position of Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs, so now we have the position of Assistant Secretary for Human Rights and Humanitarian Affairs. We have, accordingly, come to see the policy of human rights not as the integrating ideological element of our foreign policy but, rather, as only one program among many.

The successor Republican administration came to power last year apparently persuaded that its predecessor had perverted the notion of human rights as a goal of American policy by applying a more stringent code of conduct to governments of the right than to those of the left. There is, of course, a certain inevitable truth to this, at least insofar as the most obvious effects of human rights policy are concerned: We have the means to apply pressure to governments which enjoy or seek our friendship or assistance—we do not have comparable leverage on governments which are hostile to us.

The Reagan administration therefore sought a way out of this dilemma by means of a distinction between authoritarian and totalitarian regimes. As a theoretical matter, one could argue that this distinction is the most important one of the 20th century. As a practical doctrine, unfortunately, it is too easily interpreted—rightly or wrongly—as an excuse for being more severe with human rights violations on the left than on the right.

Such a policy only invites cynicism. We only cheapen the doctrine of human rights when we allow a regime that commits violations of that doctrine to go unnoticed. This invites, in turn, a ridiculing of our human rights policy.

Unless the standard of human rights is clearly stated and impartially applied to every nation in the world, the doctrine will appear arbitrary both within the United States and throughout the world. It will be discounted by our friends and exploited by our enemies.

However, this is not to say that distinctions cannot be made among the various types of nondemocratic regimes. Commonsense tells us that some are better, some worse.

Yet all such distinction must be secondary to the principle of human rights and its impartial application with respect to the behavior of governments.

What our democratic foreign policy requires, if we are to remain true to the principles of the Universal Declaration of Human Rights, is a single standard, impartially applied.

Truthfully stated, uniformly applied and vigorously pursued, there is no more powerful idea, nor is there a more potent weapon.

Proper use of this power, Mr. President, quite naturally requires that we amass all the tools that might be available to us in the task of spreading the beacon of light that a universal standard of human rights represents.

In that context, I am pleased to bring to the Senate today a statement issued in commemoration of International Human Rights Day by the distinguished president of the Association of the Bar of the City of New York, Mr. Louis A. Craco. In very straightforward fashion, Mr. Craco advises the President, and the Senate on some vital steps we can take to lend added vigor to the strength of the Declaration.

It is not lengthy. I urge Senators to examine this statement with the care it warrants. The Association of the Bar of the City of New York is justly renowned for the good work of its Committee on International Human Rights, now chaired by Mr. R. Scott Greathead.

I ask unanimous consent that the full text of Mr. Craco's statement be printed at this point in the RECORD, along with the text of the Universal Declaration of Human Rights.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF LOUIS A. CRACO, PRESIDENT, ASSOCIATION OF THE BAR OF THE CITY OF NEW YORK

On December 10, 1948, the General Assembly of the United Nations adopted the Universal Declaration of Human Rights. By this act thirty-four years ago today, the community of nations articulated the fundamental rights of all individuals and took an important step toward the implementation of the rule of law in all parts of the world.

More than three decades after the adoption of the Universal Declaration, five treaties vital to the worldwide implementation of the rule of law await ratification by the United States. The Association of the Bar of the City of New York now calls on members of the United States Senate to take the long overdue action necessary to ratify these treaties.

Throughout its over one-hundred year history, the Association of the Bar of the City of New York, an organization of over 13,000 lawyers from the United States and thirty-eight foreign countries, has sought to protect fundamental rights and to promote the rule of law worldwide. In the spirit of that long-standing concern, we note that the event we commemorate today was not an end in itself, but a means to an end that has yet to be accomplished. Speaking in September, 1948, even before the Universal Declaration was completed, John Foster Dulles, the American delegate to the General Assembly, stated:

"I hope and believe this Assembly will endorse this Declaration (of Human Rights). But we must not stop there. We must go on with the drafting of a covenant that will seek to translate human rights into law . . ."

The five treaties presently awaiting ratification by the United States are: the Convention on the Prevention and Punishment of the Crime of Genocide, which was signed on behalf of the United States on December 11, 1948; the International Convention on the Elimination of All Forms of Racial Discrimination, signed on behalf of the United States on September 28, 1966; the American Convention on Human Rights, signed on behalf of the United States on June 1, 1977; and the International Covenants on Economic, Social and Cultural Rights and Civil and Political Rights, respectively, which were both signed on behalf of the United States on October 5, 1977.

The oldest of these documents, the Genocide Convention, was transmitted by President Truman to the Senate for its assent to ratification on June 16, 1949, and has been awaiting action for over thirty-three years. In his 1970 report recommending ratification of the Genocide Convention, Secretary of State William P. Rogers said:

"I am convinced that the American people together with all the peoples of the world will hail United States ratification of this Convention as a concrete example of our dedication to safeguarding human rights and basic freedoms."

Indeed, a multitude of individuals and organizations throughout the United States, including the American Bar Association, have urged the ratification of all five human rights treaties. Action by the Senate is long overdue. We call upon the President and the leadership of the Senate to take all steps necessary to ratify these five human rights treaties before the thirty-fifth anniversary of the Universal Declaration of Human Rights.

UNIVERSAL DECLARATION OF HUMAN RIGHTS

PREAMBLE

Whereas recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

Whereas disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people,

Whereas it is essential, if man is not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law,

Whereas it is essential to promote the development of friendly relations between nations,

Whereas the peoples of the United Nations have in the Charter reaffirmed their faith in fundamental human rights, in the dignity and worth of the human person and in the equal rights of men and women and have determined to promote social progress and better standards of life in larger freedom,

Whereas Member States have pledged themselves to achieve, in co-operation with the United Nations, the promotion of universal respect for and observance of human rights and fundamental freedoms,

Whereas a common understanding of these rights and freedoms is of the greatest importance for the full realization of this pledge,

Now, Therefore, The General Assembly proclaims, This Universal Declaration of Human Rights as a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance, both among the people of Member States themselves and among the people of territories under their jurisdiction.

Article 1. All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

Article 2. Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.

Furthermore, no distinction shall be made on the basis of the political, jurisdictional or international status of the country or territory to which a person belongs, whether it be independent, trust, non-self-governing or under any other limitation of sovereignty.

Article 3. Everyone has the right to life, liberty and security of person.

Article 4. No one shall be held in slavery or servitude; slavery and the slave trade shall be prohibited in all their forms.

Article 5. No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment.

Article 6. Everyone has the right to recognition everywhere as a person before the law.

Article 7. All are equal before the law and are entitled without any discrimination to equal protection of the law. All are entitled to equal protection against any discrimination in violation of this Declaration and against any incitement to such discrimination.

Article 8. Everyone has the right to an effective remedy by the competent national tribunals for acts violating the fundamental rights granted him by the constitution or by law.

Article 9. No one shall be subjected to arbitrary arrest, detention or exile.

Article 10. Everyone is entitled in full equality to a fair and public hearing by an independent and impartial tribunal, in the determination of his rights and obligations and of any criminal charge against him.

Article 11. (1) Everyone charged with a penal offense has the right to be presumed innocent until proved guilty according to law in a public trial at which he has had all the guarantees necessary for his defense.

(2) No one shall be held guilty of any penal offense on account of any act or omission which did not constitute a penal offense, under national or international law, at the time when it was committed. Nor shall a heavier penalty be imposed than the one that was applicable at the time the penal offense was committed.

Article 12. No one shall be subjected to arbitrary interference with his privacy, family, home or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks.

Article 13. (1) Everyone has the right to freedom of movement and residence within the borders of each state.

(2) Everyone has the right to leave any country, including his own, and to return to his country.

Article 14. (1) Everyone has the right to seek and to enjoy in other countries asylum from persecution.

(2) The right may not be invoked in the case of prosecutions genuinely arising from non-political crimes or from acts contrary to the purposes and principles of the United Nations.

Article 15. (1) Everyone has the right to a nationality.

(2) No one shall be arbitrarily deprived of his nationality nor denied the right to change his nationality.

Article 16. (1) Men and women of full age, without any limitation due to race, nationality or religion, have the right to marry and to found a family. They are entitled to equal rights as to marriage, during marriage and at its dissolution.

(2) Marriage shall be entered into only with the free and full consent of the intending spouses.

(3) The family is the natural and fundamental group unit of society and is entitled to protection by society and the State.

Article 17. (1) Everyone has the right to own property alone as well as in association with others.

(2) No one shall be arbitrarily deprived of his property.

Article 18. Everyone has right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance.

Article 19. Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.

Article 20. (1) Everyone has the right to freedom of peaceful assembly and association.

(2) No one may be compelled to belong to an association.

Article 21. (1) Everyone has the right to take part in the government of his country, directly or through freely chosen representatives.

(2) Everyone has the right of equal access to public service in his country.

(3) The will of the people shall be the basis of the authority of government; this will shall be expressed in periodic and genuine elections which shall be by universal and equal suffrage and shall be held by secret vote or by equivalent free voting procedures.

Article 22. Everyone, as a member of society, has the right to social security and is entitled to realization, through national effort and international co-operation and in accordance with the organization and resources of each State, of the economic, social and cultural rights indispensable for his dignity and the free development of his personality.

Article 23. (1) Everyone has the right to work, to free choice of employment, to just and favourable conditions of work and to protection against unemployment.

(2) Everyone, without any discrimination, has the right to equal pay for equal work.

(3) Everyone who works has the right to just and favorable remuneration ensuring for himself and his family an existence worthy of human dignity, and supplemented, if necessary, by other means of social protection.

(4) Everyone has the right to form and to join trade unions for the protection of his interests.

Article 24. Everyone has the right to rest and leisure, including reasonable limitation of working hours and periodic holidays with pay.

Article 25. (1) Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control.

(2) Motherhood and childhood are entitled to special care and assistance. All children, whether born in or out of wedlock, shall enjoy the same social protection.

Article 26. (1) Everyone has the right to education. Education shall be free, at least in the elementary and fundamental stages. Elementary education shall be compulsory. Technical and professional education shall be made generally available and higher education shall be equally accessible to all on the basis of merit.

(2) Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial or religious groups, and shall further the activities of the United Nations for the maintenance of peace.

(3) Parents have a prior right to choose the kind of education that shall be given to their children.

Article 27. (1) Everyone has the right freely to participate in the cultural life of the community, to enjoy the arts and to share in scientific advancement and its benefits.

(2) Everyone has the right to the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.

Article 28. Everyone is entitled to a social and international order in which the rights and freedoms set forth in this Declaration can be fully realized.

Article 29. (1) Everyone has duties to the community in which alone the free and full development of his personality is possible.

(2) In the exercise of his rights and freedoms, everyone shall be subject only to such limitations as are determined by law solely for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and the general welfare in a democratic society.

(3) These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations.

Article 30. Nothing in this Declaration may be interpreted as implying for any State, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein.

TRIBUTE TO DEPARTING SENATORS

SENATOR SAMUEL HAYAKAWA

Mr. MURKOWSKI. Mr. President, it has been an honor and a pleasure serving in the Senate for 2 years with my friend and colleague, Senator SAMUEL ICHIYE HAYAKAWA. Having had a successful career as a sematicist, educator, and university administrator, he selflessly chose to continue serving the people of California in the U.S. Senate. Since entering the Senate in 1976, his strong voice has supported agriculture, small business, and Americans of Asian descent.

Senator HAYAKAWA has also been a leading member in foreign relations, and I look forward to building upon the work he started as I assume his seat on the Senate Foreign Relations Committee. We will miss SAM HAYAKAWA as a Senator and a friend, and want him to know that his many years of public service to the State of California and America will not be forgotten.

SENATOR HOWARD CANNON

Mr. President, I would like to take this opportunity to pay tribute to a leader of the U.S. Senate, and of the State of Nevada, Senator HOWARD CANNON. During his 24 years of service in the Senate, Mr. CANNON has seen tremendous change. However, his leadership has always insured that the decisions of this body were wrought from wisdom, knowledge, and hard work.

HOWARD CANNON has fought hard for America as a soldier and a Senator. He has been a devoted servant of the people of Nevada and the United States, and his leadership will be missed by all of us. I wish him the best of luck in his new endeavors.

SENATOR HARRISON SCHMITT

Mr. President, the departure of Senator HARRISON "JACK" SCHMITT will be a significant loss for the U.S. Senate. Senator SCHMITT is a man of many achievements, abilities, and interests. More important, he is a man of selfless service to the people of New Mexico and America.

As a scientist, astronaut, and Senator, he has been an example to us all. Senator SCHMITT's technical knowledge has been a valuable asset over the past 3 years. His determination, hard work, and evenhanded approach to the work of this body has set an example which we will all remember. I wish him the best of luck in his future endeavors, and thank him for his contributions as a friend and fellow Republican.

SENATOR HARRY BYRD

Mr. President, it has been a tremendous honor serving in the Senate with the distinguished Senator from Virginia, Senator HARRY F. BYRD, JR. Senator BYRD's wisdom, historical perspective, and enthusiasm will be sorely missed when the 98th Congress begins in January. Throughout his 17 years of service, Mr. BYRD has fought to control the growth of Government spending, and has been a leader in fiscal restraint.

Mr. BYRD has served this country in time of war and in time of peace, and always to the best of his ability. His leadership will be missed, but his contributions to the Senate and to the Nation, will always be remembered.

SENATOR NICHOLAS BRADY

Mr. President, it is with great regret that I say goodbye to Senator NICHOLAS BRADY, a conscientious Senator and friend from New Jersey. While his arrival in this body was unexpected, his contributions have proven invaluable. He unselfishly shared his fiscal knowledge, helping the Senate in addressing the devastating effects of huge budget deficits upon our Nation's economy.

NICK came to this body under difficult circumstances, at a time in our history when his skills were needed and tested. He has helped his State and his country during a difficult period, and we will always be greatful for his thoughtful contributions. We wish him the best of luck as he returns to the private business community, and thank him for his help, wisdom, and candid spokesmanship.

MESSAGES FROM THE HOUSE

At 12:10 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 3963) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. RODINO, Mr. HUGHES, Mr. KASTENMEIER, Mr. CONYERS, Mr. GLICKMAN, Mr. SAWYER, Mr. FISH, and Mr. KINDNESS as managers of the conference on the part of the House.

The message also announced that the House agrees to the amendments of the Senate to the amendment of the House to the bill (S. 1894) to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes.

The message further announced that the House agrees to the amendments of the Senate to the bill (H.R. 4364) to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz.

The message also announced that in accordance with the request of the Senate, the bill (H.R. 6758) to authorize the sale of defense articles, defense services, and unclassified defense service publications to U.S. companies for incorporation into end items to be sold to friendly foreign countries, including the amendments of the Senate, are returned to the Senate.

The message further announced that the House has passed the following bill, without amendment:

S. 764. An act to provide for protection of the John Sack Cabin, Targhee National Forest, in the State of Idaho.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled bills:

S. 2177. An act to amend title III of the Colorado River Basin Project Act, Public Law 90-537 (82 Stat. 885), as amended by Public Law 95-578 (92 Stat. 2471), and Public Law 96-375 (94 Stat. 1505);

H.R. 2329. An act conferring jurisdiction on certain courts of the United States to hear and render judgment in connection with certain claims of the Cherokee Nation of Oklahoma;

H.R. 4364. An act to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz.;

H.R. 5553. An act to provide for the use and distribution of Miami Indians judgment funds in dockets 124-B and 254 before the U.S. Court of Claims, and for other purposes;

H.R. 5795. An act to provide for the use and distribution of the funds awarded to the Shawnee Tribe of Indians in dockets 64, 335, and 338 before the Indian Claims Commission and docket 64-A by the U.S. Court of Claims, and for other purposes;

H.R. 6005. An act to discontinue or amend certain requirements for agency reports to Congress;

H.R. 6403. An act to provide for the use and distribution of funds awarded to the Wyandot Tribe of Indians in docket 139 before the Indian Claims Commission and docket 141 before the U.S. Court of Claims, and for other purposes;

H.R. 6417. An act to amend Public Law 96-432 relating to the U.S. Capitol Grounds; and

H.J. Res. 595. Joint resolution designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day."

The enrolled bills and joint resolution were subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED BILL PRESENTED

The Secretary reported that on today, December 13, 1982, he had presented to the President of the United States the following enrolled bill:

S. 2177. An act to amend title III of the Colorado River Basin Project Act, Public

Law 90-537 (82 Stat. 885), as amended by Public Law 95-578 (92 Stat. 2471), and Public Law 96-375 (94 Stat. 1505).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SCHMITT, from the Committee on Appropriations:

Report to accompany the bill (H.R. 7205) making appropriations for the Departments of Labor, Health and Human Services, and Education and related agencies for the fiscal year ending September 30, 1983, and for other purposes (with additional views) (Rept. No. 97-680).

By Mr. COHEN, from the Select Committee on Indian Affairs, with an amendment in the nature of a substitute:

S. 2623. A bill to amend and extend the Tribally Controlled Community College Act of 1978, and for other purposes (Rept. No. 97-681).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:

H.R. 9. A bill to designate components of the National Wilderness Preservation System in the State of Florida.

H.R. 5161. A bill to designate certain leads in the Monogahela National Forest, W. Va., as wilderness; and to designate management of certain lands for uses other than wilderness.

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

H.R. 6419. A bill to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land coveyed by the United States to Eastern Washington University.

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment:

S. 1705. A bill to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior.

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with amendments:

S. 2110: A bill to establish the Lee Metcalf Wilderness and Management Area in the State of Montana, and for other purposes.

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:

S. 2308. A bill to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Ariz.

S. 2715. A bill to establish the National Park Visitor Facilities Fund, and for other purposes.

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

S. 2955. A bill to establish the Cheaha Wilderness in Talladega National Forest, Ala.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Douglas A. Fenderson, of Minnesota, to be Director of the National Institute of Handicapped Research.

(The above nomination was reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. D'AMATO:

S. 3095. A bill to amend the Internal Revenue Code of 1954 to permit certain cooperative housing corporations to replace conventional financing with tax-exempt financing; to the Committee on Finance.

By Mr. D'AMATO:

S. 3096. A bill to permit the Securities and Exchange Commission to accept reimbursement for certain expenditures, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GARN:

S.J. Res. 271. A joint resolution to make technical corrections in certain banking and related statutes; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. D'AMATO:

S. 3095. A bill to amend the Internal Revenue Code of 1954 to permit certain cooperative housing corporations to replace conventional financing with tax-exempt financing; to the Committee on Finance.

REFINANCING OF CERTAIN LOW AND MODERATE INCOME HOUSING

● Mr. D'AMATO. Mr. President, I am today introducing legislation to permit the refinancing of publicly assisted low and moderate income cooperative housing. This refinancing of impeding "balloon" payments would involve the use of tax-exempt bonds granted by local housing authorities. Current law already permits tax-exempt financing for new residential construction and for substantially rehabilitated older housing.

Similar financing options should also be available, however, to refinance the balloon payments of conventional mortgages in cases where the local community has demonstrated a geniune commitment to such developments through the granting of local tax abatement. If such relief is not granted, rents will rise more than 37 percent for a predominantly elderly, low and middle income population. This will force the relocation of many longstanding residents and will cause severe hardship and a disruption in their lives.

In my State, I have nine such cooperative apartments. They were constructed between 1939 and 1950 and were originally financed with conventional mortgages of between 4.3 percent and 8.5 percent. The tenants in these 13,542 units can simply not afford the additional costs of refinancing their balloon payments at today's conventional mortgage rates. They must be helped. The required legislation, however, has negligible revenue implications.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3095

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (10) of section 103A(l) of the Internal Revenue Code of 1954 (relating to other definitions and special rules relating to mortgage subsidy bonds) is amended by redesignating subparagraph (C) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) CERTAIN REFINANCINGS PERMITTED.—

"(i) IN GENERAL.—If substantially all of the proceeds of an issue are used to replace mortgages on buildings owned by qualified cooperative housing corporations, subsections (e) and (h), and subparagraph (A) of subsection (j)(1), shall not apply to such issue.

"(ii) QUALIFIED COOPERATIVE HOUSING CORPORATION. For purposes of clause (i), the term 'qualified cooperative housing corporation means any cooperative housing corporation if—

"(I) all buildings owned by the corporation were constructed before 1972,

"(II) State law restricts the amount of earnings of the corporation,

"(III) some portion of the real property taxes on most of the buildings owned by the corporation were abated for at least the 10 years after the construction of said buildings, and

"(IV) the resale price of stock in the corporation is limited by a formula."

(b) The amendments made by this Act shall apply to obligations issued after the date of the enactment of this Act.●

By Mr. D'AMATO:

S. 3096. A bill to permit the Securities and Exchange Commission to accept reimbursement for certain expenditures, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

REIMBURSEMENT FOR CERTAIN EXPENDITURES OF THE SECURITIES AND EXCHANGE COMMISSION

● Mr. D'AMATO. Mr. President, I am introducing, as recommended by the Securities and Exchange Commission, a bill which would make three minor statutory changes affecting the SEC's operations.

The SEC has requested that, if possible, these amendments be considered prior to adjournment of the 97th Congress. I plan to consult with my colleagues on the Banking Committee and, in the absence of an indication that the amendments would be controversial, to seek prompt action on them.

I would like to describe briefly the three changes which the bill would make.

Section 1 of the bill would amend the Securities Exchange Act of 1934 to enable the Commission to accept reimbursement for actual expenses incurred by its members and employees in connection with meetings involving the SEC's functions and activities. The bill would require adoption by the SEC of regulations to prevent actual or apparent conflicts of interest where reimbursement from non-Federal entities is involved.

Section 2 would amend the Securities Exchange Act of 1934 to eliminate the "SECO" program, which subjects a limited number of registered broker-dealers to direct regulation by the SEC, rather than the more common system in which direct regulation is provided by securities self-regulatory organizations, subject to continuing oversight by the SEC. In support of this proposal, the SEC asserts that eliminating the separate regulatory system for SECO brokers will lead to greater efficiency in its use of resources and, at the same time, to greater uniformity in the regulation of broker-dealers.

Section 3 of the bill would provide that the SECO amendments contained in section 3 are to be effective 6 months after the date of enactment.

Section 4 of the bill would amend section 209 of title 18 of the United States Code to permit professional accounting and attorney fellows of the SEC to be reimbursed for actual relocation expenses by their former private employees. The Commission has found that restrictions on payment of relocation expenses, which results from the present applicability of subsection (e) of section 209 only to executive agencies, has inhibited its efforts to attract the most able persons as applicants for the two fellows programs. The amendment is needed now, in order to be available for accounting fellows whose applications are due prior to December 31, 1982.

Mr. President, I ask unanimous consent that the text of the bill, together with a section-by-section analysis and a justification prepared by the SEC, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3096

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 4 of the Securities Exchange Act of 1934 (15 U.S.C. 78d) is amended by adding at the end thereof the following new subsection:

"(c) in accordance with regulations which the Commission shall prescribe to prevent conflicts of interest, the Commission may accept payment and reimbursement, in cash or in kind, from non-Federal agencies, organizations, and individuals for travel, subsistence, and other necessary expenses incurred by Commission members and employees in attending meetings and conferences concerning the functions or activities of the Commission. Any payment or reimbursement accepted will be credited to the appropriated funds of the Commission. The amount of travel, subsistence, and other necessary expenses for members and employees paid or reimbursed under this subsection may exceed per diem amounts established in official travel regulations, but the Commission may include in its regulations under this subsection a limitation on such amounts.)

SEC. 2. Section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 780) is amended as follows:

(1) Paragraph (8) of the subsection (b) thereof is amended to read as follows:

"(h) it shall be unlawful for any broker or dealer required to register pursuant to this title to effect any transaction in, or induce or attempt to induce the purchase or sale of, any security (other than an exempted security or commercial paper, bankers' acceptance or commercial bills), unless such broker or dealer is a member of a securities association registered pursuant to section 15A of this title or effects transactions in securities solely on a national securities exchange of which it is a member."

(2) Paragraph (9) of subsection (b) thereof is amended to read as follows:

The Commission by rule or order, as it deems consistent with the public interest and the protection of investors, may conditionally or unconditionally exempt from paragraph (8) of this subsection any broker or dealer or class of brokers or dealers specified in such rule or order."

Sec. 3. The provisions in Section 2 shall become effective six months after the date of enactment.

Sec. 4. Section 209 of title 18 of the United States Code is amended by the addition of subsection (f) as follows:

"(f) This section does not prohibit the payment of actual relocation expenses to Washington, D.C., to facilitate participation in the professional fellows programs of the Securities and Exchange Commission, or the acceptance of such payment by a program participant."

SECTION-BY-SECTION ANALYSIS

Section 1 would amend the Securities Exchange Act of 1934 to give the Commission the authority to accept, on behalf of the agency, payment and reimbursement for travel and subsistence expenses actually incurred by Commission members or employees in connection with their attendance and participation at conferences and meetings concerned with the functions or activities of the Commission. This amendment is intended to permit the Commission to accept such reimbursement under circumstances consistent with the Federal conflict of interest laws and which are in accord with the Commission's own regulations prohibiting actual or apparent conflicts.

The amendment provides that payments and reimbursements accepted by the Commission will be credited to the agency's appropriated funds, and to that extent, augment the agency's authorization. Further, payments and reimbursements will be paid directly to the agency. Members and employees will travel on official orders from the Commission and will be reimbursed by the Commission in accordance with federal travel regulations.

Because per diem amounts are generally not sufficient to pay the usual accommodation expenses at these meetings and conferences, the Commission believes it is appropriate that existing per diem regulations not apply when travel and subsistence expenses are reimbursed to the Commission.

The Commission is required to adopt or maintain regulations which will prevent real or apparent conflicts of interest in situations where reimbursement for travel and subsistence expenses by Commission members and employees is accepted from non-Federal entities.

Section 2 amends the Securities Exchange Act of 1934 to require all broker dealers who register with the Commission pursuant to that Act and who effect transactions in securities (with a few exceptions) otherwise than on a national securities exchange of which they are members, to join a registered securities association. Specifically, paragraph (8) would make it unlawful for a broker dealer required to register pursuant to the Act to effect any transaction in, or induce or attempt to induce the purchase or sale of any security (except for an exempted security, commercial paper, bankers' acceptance, or commercial bill) unless such broker dealer is a member of a securities association registered pursuant to section 15A of the Act or effects transactions in securities solely on a national securities exchange of which it is a member. The amendment would delete the provision that authorizes the Commission to establish fees and charges necessary to defray the cost of the additional regulatory duties required to be performed with respect to non-members.

Paragraph (9) would allow the Commission to exempt from the requirement of joining a registered securities association any broker dealer or class of brokers or dealers. This paragraph would delete the current provision that authorizes the Commission to prescribe rules and regulations specifically for nonmembers.

Section 3 would specify a delay of six months after enactment for section 2 to beome effective.

Section 4 would amend section 209 of Title 18 of the United States Code to allow participants in the professional accounting and attorney fellows programs of the Securities and Exchange Commission to accept the payment of actual relocation expenses from their former private employers.

As interpreted by the Department of Justice, section 209 now prohibits the acceptance of such relocation expenses. Section 209(e) was adopted to permit the acceptance of relocation expenses by participants in the President's Executive Exchange and White House Fellows program. However, section 209(e) is inapplicable to the Commission's programs because it restricts the applicability of section 209(e) to executive agencies which are established by statute or Executive Order and which offer appointments not to exceed three hundred and sixty-five days.

The proposed new subsection (f) is applicable only to participants in the fellows programs of the Securities and Exchange Commission. It is intended to permit participants in those programs to accept from their former private employers actual relocations expenses to facilitate their moves to Washington, D.C.

The phrase "actual relocation expenses" is intended to encompass moving expenses, transportation of the participant and his or her family to Washington, D.C., and the net out-of-pocket costs of selling and purchasing a house incident to a move to Washington, D.C. Unlike section 209(e), it is not intended

to permit the former private employer to make any payments for the benefit of a participant while he or she is a government employee, nor does it provide for arrangements prior to entering government service for payments or benefits after the completion of government service. It does not limit negotiation near the completion of the participant's period of Commission employment for the payment of moving expenses coincident to post-Commission employment.

JUSTIFICATION FOR THE HOUSEKEEPING BILL

The three main provisions of this bill represent an effort by the Commission, in these times of severe budgetary constraints, to increase its effectiveness without any additional cost to the taxpayer.

The basis for the gift accepting authority contained in Section 1 is the fact that the proper administration of the federal securities laws and the rules thereunder depends, in large part, on the existence of an informed industry, securities bar, and public. The Commission has found that a particularly effective means to achieve this goal is for Commission members and employees to participate in and attend meetings and conferences which focus on developments and emerging trends in securities regulation and related topics. Existing constraints on accepting such reimbursement, coupled with the restrictions on the size of the Commission's travel budget, have compelled members of the Commission to limit their participation in educational and similar programs aimed at examining the federal securities laws and their impact.

Sponsoring organizations are often willing to pay the actual expenses of Commission members and employees invited to participate in meetings and conferences of an educational nature. While Commission employees may often accept such offers, an interpretation of the federal conflict of interest laws by the Comptroller General prohibits acceptance by Commissioners in most instances.[1] The Comptroller General, however has determined that when an agency has an authority to accept the reimbursement as a gift to the agency, it may be accepted regardless of whether an officer or employee of the agency is involved. While a number of federal entities currently have such authority, the Commission does not.

The Comptroller General has recognized three exceptions to the prohibition of government officers and employees from receiving "any contribution to or supplementation of salary" as compensation for their services as officers and employees of the United States government. First, pursuant to 5 U.S.C. 4111, organizations which qualify for tax-exempt status under Section 501(c)(3) of the Internal Revenue code are permitted to pay for travel subsistence and other expenses incident to attendance by government officers and employees at meetings sponsored by such organizations.[2] While the Commission utilizes this exception when ever possible to support its educational efforts, the number of entities which qualify for exemption pursuant to Section 501(c)(3) and which sponsor meetings at which commission members appear is limited. Indeed, many non-profit associations such as the American Bar Association, the American Institute of Certified Public Accountants, and the Securities Industry Association are not qualifed pursuant to Section 501(c)(3).

[1] See 36 Comp. Gen. 268, 269 (1956); 46 Comp. Gen. 689, 690 (1967).

[2] 36 Comp. Gen. at 270

The second exception is the determination that no improper supplementation of salary arises when an employee participates in an activity while on off-duty status.[3] Therefore, reimbursement from the private entity may be accepted if the employee takes annual leave or is granted administrative leave. The Commission's Conduct Regulation contains a procedure for employees to obtain administrative leave for participation in educational programs when it is in the interest of the Commission. However, the Comptroller General has ruled that Commissioners are always on official duty when they are participating in matters which are related to the commission.[4] Therefore, Commission members cannot utilize this exception.

The third exception is that, if an agency has statutory authority to accept gifts in the agency's behalf, a private source may bear the costs incurred by the agency in connection with official travel. In this situation the furnishing of travel accommodations is treated as a "donation" to the agency for utilization by the employee involved. No direct payment is made to any individual employee. Rather the "donation" is made to the agency and the amounts received are credited to the agency's appropriation. The employee is paid by the agency in accordance with regulations relating to reimbursement for official travel. The Commission lacks this specific authority although several agencies have it.[5]

While the purpose of 18 U.S.C. 209 is to prohibit conflicts of interest, as a practical matter, the Comptroller General's interpretation limits the acceptance of payment for travel expenses for non-governmental entities, based, not on the existence of actual or possible conflicts of interest but rather, on whether the agency has authority to accept gifts. The Commission believes that it could eliminate any real or apparent conflict of interest which may arise in administering the authority to accept gifts, by utilizing its rulemaking authority to impose the following restrictions on the receipt of any payment or reimbursements:

(1) Commission regulations[6] absolutely prohibit the acceptance of reimbursement for travel from any person required to file reports or registration statements with the Commission, any person directly or indirectly[7] regulated by the Commission, or, unless authorized by the Commission's Chairman in an individual case, any association of regulated entitles. These restrictions would be applied to gifts accepted by the Commission.

(2) Commission regulations also prohibit the acceptance of reimbursement for "personal living expenses, gifts, entertainment or other personal benefits which are unreasonable or lavish."[8] Should the commission be granted the authority to accept payment or reimbursement for travel and subsistence expenses in connection with official travel. This prohibition would also be applicable to such payments or reimbursements.

(3) The Commission's rules would provide that no payment or reimbursement be accepted pursuant to the statutory authority without approval in accordance with the regulations. A system for consideration of accepting such gifts at the highest levels of the Commission will be adopted.

(4) A public file showing payments or reimbursements accepted will be kept in the Commission's Public Reference Section in Washington, D.C. In addition, the Commission will publicly release on a regular basis a list of such payments or reimbursements.

(5) Circumstances in which the Commission would accept reimbursement would be specifically set forth in its rules. In general these would be limited to amounts for expenses actually incurred by Commission members and employees for travel and subsistence in connection with educational programs, public fora, or other opportunities for the Commission or its staff to inform or exchange views with significant segments of its constituents.

Section 2 of the bill would eliminate the Commission's SECO program. Under the Securities Exchange Act, broker dealers who do not join the National Association of Securities Dealers, Inc. ("NASD"), the only registered national securities association, are subject to direct regulation by the Commission by the SECO program. Currently 88 percent of the active registered broker dealers transacting over-the-counter securities business have joined the NASD and only 12 percent have chosen the SECO alternative. The proposed legislation will replace the SECO program and the attendant regulatory responsibilities assumed by the Commission with a program of complete industry self regulation subject to continued oversight by the Commission. Self-regulation for all broker dealers is preferable to direct regulation by the SEC for several reasons. Specifically, the promulgation of ethical standards, the development of rules dealing with just and equitable principles of trade and the establishment and maintenance of professional qualifications, can be provided through the existing self-regulatory structure subject to Commission oversight. Congress affirmed the desirability of self-regulation during its consideration of the Securities Acts Amendments of 1975 when it recommended that self-regulation be preserved and strengthened.

While the proposed legislation would end the SECO alternative, the Commission believes it would not reduce investor protection. Rather, the reallocation of resources currently tied to the SECO program to those areas of investor protection of major concern should increase the Commission's ability to fulfill its fundamental regulatory responsibilities.

When Congress mandated in the Securities Acts Amendments of 1964 that regulation by the Commission of SECO broker dealers be comparable to that exercised by the NASD over its member firms, the intent was to avoid giving a broker dealer any advantage of choosing one regulatory format over another. In practice, for reasons discussed below, there has generally been a significant time lag between the establishment of a regulation by the NASD for its members and the adoption of a comparable regu-

[8] 17 CFR 200.735-4(b)(6)(iv).

lation for SECO brokers and dealers.[9] Furthermore, the Commission believes that the policy concerns which led some insurance firms selling investment company shares to call for an alternative to regulation by self-regulatory organizations, because they feared domination by traditional brokerage firms, are no longer justifiable or lack compelling appeal given the changes in the composition of the securities industry and the Commission's extensive oversight of the NASD. In addition, although a majority of SECO broker dealers engage in the sale of direct participation programs (i.e., the sale of real estate, oil and gas interests and other types of tax shelters and limited partnerships), no specific rules have been developed to regulate the sale of these products.

Furthermore, enforcement and compliance remedies available to the Commission for use in enforcement action against SECO broaker dealers are limited to deficiency letters, injunctive actions, and administrative proceedings, all of which have certain limitations in deterring violations of the more technical SECO rules. In comparison, the NASD has the power, through disciplinary proceedings, to levy fines on its members for violating rules, providing an additional sanction which is practical, effective and a more appropriate sanction in the case of technical violations.

In March, 1981 the Division of Market Regulation of the SEC began a SECO management study to document the operation of the SECO program and identify difficulties in its administration by the Commission. The purpose of the study was to assess the legal and administrative responsibilities of the Commission in regulating SECO firms and to determine whether SECO should be revised or discontinued. Because the SECO program served only a small minority of the registered broker dealer population transacting over-the-counter business, the program had not been given high priority within the Division. Moreover, staffing and budget constraints had caused the Division to direct its efforts to other activities and programs which relate to the broker dealer industry as a whole rather than to the small proportion of firms in the SECO program.

According to the study, elimination of the SECO program would enable the Commission to redirect approximately $436,725 in administrative costs to other programs. Fees and assessments now generated by the SECO program total $425,580. Although the elimination of the SECO program would divert these funds from the U.S. Treasury, any attempt to put SECO regulation on a par with that provided by the NASD would require significant expenditures by the Commission for additional staff and administrative costs.

Membership in the NASD should not cause SECO broker dealers any inappropriate additional regulatory burden as the legislative history of SECO indicates that registration and regulation of SECO registrants and NASD members was intended to be comparable. Neither will SECO broker dealers incur any additional costs as NASD members, since SECO and NASD fees are identical.

The Commission has entered into negotiations with the NASD to facilitate the grandfathering into the NASD of SECO members. The "special membership package" negotiated between the Commission and the NASD should be attractive enough to stimulate voluntary conversion to the NASD membership by most SECO registrants. The two largest SECO firms, Aetna Life Insurance and Annuity Company and Heritage Securities Inc. have already advised the Commission staff that they anticipate joining the NASD membership. Employees of these two firms comprise 72 percent of all SECO associated persons.

The negotiations have centered on five issues and have not rested on the passage of this legislation. The five issues are as follows:

(1) the initial membership fee of $500.00;

(2) the requirement to submit a new form U-4 for each associated person;

(3) the $50.00 fee for each associated person;

(4) the qualification examination requirements; and

(5) the processing of membership applications.

The Commission cannot unilaterally undertake the abolition of the SECO program, but must seek the approval of Congress. Currently the SECO alternative is codified in sections 15(b) (8) and (9) of the Securities Act Amendments of 1964 (Public Law 88-467, 78 Stat. 565 (1964)). These sections, when originally introduced in the House as part of the Securities Act Amendments of 1964, would have required all broker dealers transacting a securities business in the over-the-counter market to join a national securities association. This legislation abolishing SECO returns to that premise.

Section 5 of the proposed legislation would extend to the Commission's fellows programs the reimbursement rights currently afforded to executive agencies. The Commission currently has two active professional fellows programs, a professional accounting fellow program which accepts two participants annually, and an attorney fellow program which generally has no more than four participants. The Commission also has an economic fellowship program which is not currently active.

Until 1978, the Department of Justice had interpreted 18 U.S.C. 209 to permit the payment by former private employers of relocation expenses to Washington, D.C. of accounting fellows. However, in November 1978 the Justice Department reversed itself and determined that such reimbursement violated Section 209. Subsequently, in December 1979, Congress adopted an amendment to Section 209, subsection (e), which excluded from the purview of that section's prohibition, the payment of actual relocation expenses for participants in a fellows program. However, the new subsection was tailored specifically to the President's Executive Exchange and White House Fellows programs. Therefore, it contains a proviso limiting its applicability to executive exchange or fellowship programs in executive agencies which are established by statute or executive order and to appointments not exceeding three hundred sixty five days. These limitations prevented the amendment from applying to the fellows program at the Commission.

This new subsection (f) to Section 209 would permit the payment of relocation expenses for participants in the Commission's fellows program by their former private sector employers. It does not permit any payments, other than moving expenses, during the period of government employment or provide for payments at the end of the period. This would not limit negotiation near the completion of the participant's period of Commission employment for the payment of moving expenses coincident to post-Commission employment.

Participants of the fellows programs have been valuable additions to the Commission. They have generally been persons with extensive experience in the private sector or in academia. As a result, their presence on the staff has broadened the Commission's perspective and added a dimension to its expertise. The Commission desires to retain this program and attract the most able persons as applicants. The restrictions on the payment of relocation expenses, however, is having a detrimental effect on obtaining candidates for participation in the program.

The Commission has carefully structured the fellows programs to avoid conflicts of interest, which is the purpose of Section 209. Fellows in both the accounting and attorney fellow programs must sever all ties with their private employers before coming to the Commission. They are subject, while government employees, to the federal conflict of interest laws, as well as the Commission's own conduct regulations.

This legislation is particularly needed now since the application period for accounting fellows ends on December 31, 1982. Appointments will be made beginning in June and July of 1983.●

[9] For example, there are no SECO rules governing the sale of several securities products, such as variable annuity contracts and options, although the NASD has adopted rules specifically designed to cover industry selling practices in these areas.

By Mr. GARN:

S.J. Res. 271. Joint resolution to make technical corrections in certain banking and related statutes; to the Committee on Banking, Housing, and Urban Affairs.

TECHNICAL CHANGES IN CERTAIN BANKING STATUTES

● Mr. GARN. Mr. President, today I am introducing a joint resolution containing technical amendments to the recently enacted Garn-St Germain Depository Institutions Act of 1982.

In directing the committee staff to prepare them, I emphasized the need to narrow the scope of the amendments so as to take care of matters that are necessary to be corrected at this time and to leave all other matters for further review in the next Congress.

These amendments are narrow in scope, and I urge prompt consideration of them.

Mr. President, I ask unanimous consent that the joint resolution, as well as a section-by-section summary of it, be printed in their entirety in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 271

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 13(c)(5)(A) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(5)(A)), as added by section 111 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

SEC. 2. Section 5(o)(1) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(o)(1)), as added by section 112 of

Public Law 97-320, is amended by inserting "examination," after "operation".

SEC. 3. The last sentence of section 26(a) of the Federal Deposit Insurance Act (12 U.S.C. 1831c(a)), as added by section 113(p) of Public Law 97-320, is amended by striking out "Depository Institutions Amendments" and inserting in lieu thereof "Garn-St Germain Depository Institutions Act".

SEC. 4. (a) Section 13(f)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1832(f)(1)), as added by section 116 of Public Law 97-320, is amended by striking out "paragraphs" both places it appears and inserting in lieu thereof "paragraph".

(b) Section 13(f)(6) of such Act (12 U.S.C. 1823(f)(6)), as added by section 116 of Public Law 97-320, is amended—

(1) by redesignating subparagraph (C) and (D) as subparagraph (D) and (E), respectively; and

(2) by inserting after Subparagraph (B) the following:

"(C) In the case of a minority-controlled institution the Corporation shall seek an offer from other minority-controlled institutions before proceeding with the sequence set forth in the preceding subparagraph.".

SEC. 5. Section 406(c)(3) of the National Housing Act (12 U.S.C. 1729(c)(3)), as amended by section 122(f) of Public Law 97-320, is amended by striking out "paragraphs (1) or (2)" and inserting in lieu thereof "paragraph (1) or (2)".

SEC. 6. Section 408(l) of the National Housing Act (12 U.S.C. 1730a(l)) is amended by striking out "mergers or acquisitions approved under subsection (e)(2)" and inserting in lieu thereof "any transaction approved under subsection (e)(2) or (m)".

SEC. 7. (a) Section 408(m)(1)(A)(i) of the National Housing Act (12 U.S.C. 1730a(m)(1)(A)(i)), as added by section 123 of Public Law 97-320, is amended by striking out "subsections (e)(2) and (l)" and inserting in lieu thereof "subsections (e)(2) and (l)".

(b) Section 408(m)(1)(B)(iii) of such Act is amended by striking out "Board of Directors" each place it appears and inserting in lieu thereof "Federal Home Loan Bank Board".

SEC. 8. The second sentence of section 17(a) of the Federal Home Loan Bank Act (12 U.S.C. 1437(a)), as amended by section 127 of Public Law 97-320, is amended—

(1) by striking out "the Administrative Procedure Act" and inserting in lieu thereof "section 554 of title 5, United States Code"; and

(2) by striking out "Act" and inserting in lieu thereof "section".

SEC. 9. (a) Section 406(f)(5)(C)(ii) of the National Housing Act (12 U.S.C. 1729(f)(5)(C)(ii)), as added by section 202 of Public Law 97-320, is amended by striking out "if" the second place it appears.

(b) Section 406(f)(5)(I) of such Act (12 U.S.C. 1729(f)(5)(I)), as added by section 202 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

SEC. 10. Section 13(i)(9) of the Federal Deposit Insurance Act (12 U.S.C. 1923(i)(9)), as added by section 203 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

SEC. 11. Section 206 of Public Law 97-320 is amended to read as follows:

"SUNSET PROVISION

"SEC. 206. (a) Upon the expiration of three years after the date of enactment of this Act, section 406(f)(5) of the National Housing Act and section 13(i) of the Federal Deposit Insurance Act are repealed.

"(b) The repeal by subsection (a) shall have no effect on any action taken or authorized pursuant to the amendments made by this title by or for a qualified institution while such amendments were in effect and while net worth certificates issued pursuant to these amendments are outstanding.".

SEC. 12. The first sentence of section 5(b)(1)(B) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(b)(1)(B)), as amended by section 312 of Public Law 97-320, is amended by inserting "may accept a demand account from itself and" after "An association".

SEC. 13. Section 204 of the Depository Institutions Deregulation Act of 1980 (12 U.S.C. 3503), as amended by section 327 of Public Law 97-320, is amended by adding at the end thereof the following:

"(4) The transitional adjustment provisions in section 19(b)(8) of the Federal Reserve Act, providing for the phase-in of reserve requirements, shall not apply to an account or accounts established pursuant to this subsection.".

SEC. 14. (a)(1) Section 5(c)(3) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)(3)) is amended by adding at the end thereof the following:

"(D) CONSTRUCTION LOANS WITHOUT SECURITY.—Investments not exceeding the greater of (i) the sum of its surplus, undivided profits, and reserves, or (ii) 5 per centum of the assets of the association, in loans the principal purpose of which is to provide financing with respect to what is or is expected to become primarily residential real estate where (I) the association relies substantially for repayment on the borrower's general credit standing and forecast of income without other security, or (II) the association relies on other assurances for repayment, including but not limited to a guaranty or similar obligation of a third party. Investments under this subsection shall not be included in any percentage of assets or other percentage referred to in this subsection.".

(2) The amendment made by paragraph (1) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

(b) Section 5(r)(2)(B) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(r)(2)(B)), as added by section 334 of Public Law 97-320, is amended by striking out "Depository Institutions Amendments" and inserting in lieu thereof "Garn-St Germain Depository Institutions Act".

SEC. 15. Section 352 of Public Law 97-320, is amended by inserting "Home" after "Federal" the first place it appears.

SEC. 16. Section 6 (m) of the Federal Home Loan Bank Act (12 U.S.C. 1426 (m)), as added by section 355 (b) of Public Law 97-320, is amended by striking out "Banks" and inserting in lieu thereof "banks or in connection with obtaining a charter from the Federal Home Loan Bank Board".

SEC. 17. (a) Section 5200 (b) (1) of the Revised Statutes (12 U.S.C. 84), as amended by section 401 of Public Law 97-320, is amended by inserting a comma before "to the extent specified by the Comptroller of the Currency".

(b) Section 11 (m) of the Federal Reserve Act (12 U.S.C. 248 (m)) is amended by striking out in the first sentence "under paragraph (8) of section 5200 of the Revised Statutes, as amended (U.S.C., Supp. VII, title 12, sec. 84)" and inserting in lieu thereof "under section 5200 (c) (4) of the Revised Statutes".

SEC. 18. (a) Section 5169 (b) (1) of the Revised Statutes (12 U.S.C. 27 (b) (1)), as amended by section 404 (a) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engage exclusively"; and

(2) by striking out "depository institutions" the second place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,".

(b) The last proviso of section 5136 Seventh of the Revised Statutes (12 U.S.C. 24 Seventh), as amended by section 404 (b) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engaged exclusively";

(2) by striking out "depository institutions" the second place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,"; and

(3) by striking out "10 per centum of its" and inserting in lieu thereof "10 per centum of the association's".

(c) The last sentence of section (2)(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(c)), as amended by section 404 (d) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engaged exclusively"; and

(2) by striking out "depository institutions" the third place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,".

SEC. 19. (a) Section 2(b) of the Act of May 1, 1886 (12 U.S.C. 30(b)), as amended by section 405(a) of Public Law 97-320, is amended by inserting "for a relocation outside such limits" after "stock of such association".

(b) The first sentence of section 5154 of the Revised Statutes (12 U.S.C. 35) is amended by striking out "with any name approved by the Comptroller of the Currency" and inserting in lieu thereof "with a name that contains the word 'national' ".

SEC. 20. (a) Section 406 of Public Law 97-320 is amended to read as follows:

"VENUE PROVISIONS

"SEC. 406. The last sentence of section 5198 of the Revised Statutes (12 U.S.C. 94) is amended to read as follows: 'Any action or proceeding against a national banking association for which the Federal Deposit Insurance Corporation has been appointed receiver, or against the Federal Deposit Insurance Corporation as receiver of such association, shall be brought in the district or territorial court of the United States held within the district in which that association's principal place of business is located, or, in the event any State, county, or municipal court has jurisdiction over such an action or proceeding, in such court in the county or city in which that association's principal place of business is located.' ".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 21. Section 4 (b) (1) of the Act of March 9, 1933 (12 U.S.C. 95 (b) (1)), as amended by section 407 of Public Law 97-320, is amended by inserting "a State or" before "a State official".

SEC. 22. Section 23A (d) of the Federal Reserve Act (12 U.S.C. 371c (d)), as amended by section 410 (b) of Public Law 97-320, is amended—

(1) by striking out "except for the purchase of a low-quality asset which is prohibited" in paragraph (1) and inserting in lieu thereof "subject to the prohibition contained in subsection (a) (3)"; and

(2) by striking out "purchasing loans on a non-recourse basis from affiliated banks" in paragraph (6) and inserting in lieu thereof ", subject to the prohibition contained in subsection (a) (3), purchasing loans on a non-resource basis from affiliated banks".

SEC. 23. (a) Section 412 of Public Law 97-320 is amended to read as follows:

VISITORIAL POWERS

SEC. 412. The next to the last paragraph of section 5240 of the Revised Statutes (12 U.S.C. 484) is amended to read as follows:

(a) No national bank shall be subject to any visitorial powers except as authorized by Federal law, vested in the courts of justice or such as shall be, or have been exercised or directed by Congress or by either House thereof or by any committee of Congress or of either House duly authorized.

"'(B) Notwithstanding subparagraph (A), lawfully authorized State auditors and examiners may, at reasonable times and upon reasonable notice to a bank, review its records solely to ensure compliance with applicable State unclaimed property or escheat laws upon reasonable cause to believe that the bank has failed to comply with such laws.' ".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 24. Section 424(g) of Public Law 97-320 is amended by striking out "688" and inserting in lieu thereof "668".

SEC. 25. Section 107(5)(A)(i) of the Federal Credit Union Act (12 U.S.C. 1757(5)(A)(i)), as amended by section 507 of Public Law 97-320, is amended by striking out "Association" and inserting in lieu thereof "Administration".

SEC. 26. Section 107(7) of the Federal Credit Union Act (12 U.S.C. 1757(7)), as amended by section 514 of Public Law 97-320, is amended—

(1) by striking out "and" before "(J)";

(2) by striking out "(L)" and inserting in lieu thereof "(K)"; and

(3) by striking out "; and" at the end thereof and inserting in lieu thereof a period.

SEC. 27. The next to the last sentence of section 124 of the Federal Credit Union Act (12 U.S.C. 1770), as amended by section 515 of Public Law 97-320, is amended by inserting "of" after "installation".

SEC. 28. Section 113 of the Federal Credit Union Act (12 U.S.C. 1761b), as amended by section 522 of Public Law 97-320, is amended—

(1) by striking out "directions" and inserting in lieu thereof "direction";

(2) by striking out "unions" in paragraph (2) and inserting in lieu thereof "union";

(3) by inserting "by" after "interest paid" in paragraph (9); and

(4) by striking out "meetings" in paragraph (15) and inserting in lieu thereof "meeting".

SEC. 29. Section 202(c) of the Federal Credit Union Act (12 U.S.C. 1782(c)), as amended by section 529 of Public Law 97-320, is amended by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraph (2)".

SEC. 30. The first sentence of section 4(c)(8) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(8)), as amended by section 601 of Public Law 97-320, is amended—

(1) by inserting ": *Provided, however,* That such a bank holding company and its subsidiaries may not engage in the sale of life insurance or annuities except as provided in subparagraph (A), (B), or (C)" before "; or (G)"; and

(2) by striking out the proviso at the end thereof.

SEC. 31. Section 701(c) of Public Law 97-320 is amended—

(1) by striking out "both"; and

(2) by inserting ", on," after "prior to".

SEC. 32. The Bank Service Corporation Act, as amended by section 709 of Public Law 97-320, is amended—

(1) by striking out "the Financial Institutions Supervisory Act of 1966 (12 U.S.C. 1818(b) et seq.)" in section 7(b) and inserting in lieu thereof the following: "section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818)"; and

(2) by striking out "under this Act" in subsections (d) and (e) of section 4 and inserting in lieu thereof "under the law of the United States".

SEC. 33. Section 4(c)(14)(F) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)), as amended by section 203 of Public Law 97-290, is amended—

(1) by striking out the semicolon at the end of subparagraph (ii) and inserting in lieu thereof a period;

(2) by striking out "solely to do business with other banks and their officers, directors, or employees; (II) is owned primarily by the banks with which it does business; and (III) does not do business with the general public" in subparagraph (iii) and inserting in lieu thereof "to engage exclusively (except to the extent otherwise provided by law) in providing services for other depository organizations, subsidiaries thereof, and their officers, directors, and employees; and (II) is owned exclusively (except to the extent directors' qualifying shares are required by law) by other depository institutions";

(3) by striking the semicolon and the word "and" at the end of subparagraph (iii) and inserting in lieu thereof a period; and

(4) by striking out subparagraph (iv).

SEC. 34. Section 414(a) of the National Housing Act (12 U.S.C. 1730g) is amended by inserting "(which, for the purpose of this section, shall include a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation)" after "insured institution" the first place it appears.

SUMMARY OF JOINT RESOLUTION

Sec. 1. Confirms intent that deferral of State franchise taxes on deposits during period of federal assistance applies to both interest and dividends paid on such deposits.

Sec. 2. Makes clear the obvious intent that the Federal Home Loan Bank Board has the authority to examine savings banks that convert to federal charter but maintain FDIC insurance.

Sec. 3. Provides correct reference to short title.

Sec. 4(a) Grammatical correction.

Sec. 4(b) Clarifies that the preference for minority controlled institutions involved in extraordinary acquisitions applies to both commercial banks and thrifts.

Sec. 5. Grammatical correction.

Sec. 6. Corrects improper cross references.

Sec. 7(a) Corrects improper cross references.

Sec. 7(b) Corrects reference to Federal Home Loan Bank Board.

Sec. 8. Confirms expanded delegation authority of the Federal Home Loan Bank Board, particularly with respect to informal adjudications.

Sec. 9(a) Grammatical correction.

Sec. 9(b) Confirms intent that exemption from State franchise taxes on deposits during period of federal assistance applies to both interest and dividends paid on such deposits.

Sec. 10. Confirms intent that exemption from State franchise taxes on deposits during period of federal assistance applies to both interest and dividends paid on such deposits.

Sec. 11. Eliminates inconsistency by specifying that the Title II sunset does not apply to outstanding certificates.

Sec. 12. Specifies power of savings and loans to open demand accounts for themselves.

Sec. 13. Provides that money market deposit accounts in all depository institutions will not be subject to the phase-in of reserve requirements under the Monetary Control Act of 1980.

Sec. 14(a) Reinserts the 5 percent construction lending authority inadvertently eliminated.

Sec. 14(b) Provides correct reference to short title.

Sec. 15. Corrects reference to the Federal Home Loan Bank Act.

Sec. 16. Restores language inadvertently omitted to allow readmission to Federal Home Loan System membership.

Sec. 17(a) Grammatical correction.

Sec. 17(b) Corrects statutory cross reference.

Sec. 18. Confirms intent that bankers' banks can provide services to depository institutions and their holding companies.

Sec. 19. Reasserts that relocation of bank's headquarters within community limits does not necessitate shareholder approval and clairfies that name approval by the Comptroller is not required when a state bank converts to federal charter.

Sec. 20. Corrects the Revised Statutes reference to make clear that only the last sentence of Sec. 5198 is being amended.

Sec. Sec. 21. Clarifies that "a state" as well as a "state official" can declare holidays for national banks.

Sec. 22. Confirms intent that the low quality asset prohibition applies to all Sec. 23A transactions.

Sec. 23. Corrects the Revised Statutes reference to make clear that only the last paragraph of Sec. 5240 is being amended.

Sec. 24. Citation correct.

Sec. 25. Corrects citation to National Credit Union Administration.

Sec. Sec. 26. Grammatical and citation corrections.

Sec. 27. Grammatical correction.

Sec. 28. Grammatical correction.

Sec. 29. Citation correction.

Sec. 30. Confirms the intent that the limitation on life insurance activities in Title VI is applicable to small bank holding companies.

Sec. 31. Clarifies that the student loan exemption from truth-in-lending applies to loans made on date of enactment.

Sec. 32. Corrects a statutory reference and makes clear that bank service corporations owned by national banks may perform the same services a national bank may perform.

Sec. 33. Conforms the language describing bankers' banks in the Export Trading Company Act to the language used in the Garn-St Germain Act.

Sec. 34. Continues the application of Sec. 414(a) of the National Housing Act to savings banks that become FDIC-insured.●

ADDITIONAL COSPONSORS

S. 2225

At the request of Mr. BAUCUS, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 2225, a bill to amend the Internal Revenue Code of 1954 to remove certain limitations on charitable contributions of certain items.

S. 2948

At the request of Mr. DOLE, the name of the Senator from Delaware (Mr. ROTH) was added as a cosponsor of S. 2948, a bill to promote the development of nonanimal methods of research experimentation and testing, and to insure humane care of animals used in scientific research, experimentation, and testing.

S. 3048

At the request of Mr. THURMOND, the names of the Senator from Indiana (Mr. QUAYLE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BOREN), and the Senator from Utah (Mr. GARN) were added as cosponsors of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 3053

At the request of Mr. D'AMATO, the name of the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 3053, a bill to amend the Agriculture Act of 1949 to modify the dairy price support program.

S. 3069

At the request of Mr. EAGLETON, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 3069, a bill to amend the Natural Gas Policy Act of 1978 to prohibit increases in the wellhead prices of natural gas, and for other purposes.

SENATE JOINT RESOLUTION 263

At the request of Mr. THURMOND, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the name of the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of Senate Joint Resolution 265, a joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 122

At the request of Mr. PERCY, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of Senate Concurrent Resolution 122, a concurrent resolution relating to the processed product share of U.S. agricultural exports.

AMENDMENTS SUBMITTED FOR PRINTING

FEDERAL COURT REFORM ACT OF 1982

AMENDMENT NO. 4982

(Ordered to be printed and lie on the table.)

Mr. HEFLIN submitted an amendment intended to be proposed by him to the bill (H.R. 6872) to provide greater discretion to the Supreme Court in selecting the cases it will review, to extend to all Federal jurors eligibility for Federal worker's compensation, to provide for the taxing of attorney fees in certain actions brought by jurors, to authorize the service of jury summonses by ordinary mail, to permit courts of the United States to establish the order of hearing for certain civil matters, and for other purposes.

● Mr. HEFLIN. Mr. President, today, I offer an amendment to H.R. 6872 to deal with the bankruptcy jurisdiction problems raised by the Northern Pipeline decision of the U.S. Supreme Court.

Many varied solutions have been discussed in recent months. But due to the nature of a lameduck session, I am not optimistic of solving this problem by agreement, with the proposal that has been suggested. But I am hopeful that we can resolve this matter in a bipartisan manner a consensus approach.

My amendment would provide an interim solution to a problem which requires careful and thoughtful deliberation by Congress before any fundamental revamping of our bankruptcy system is made.

The Northern Pipeline decision struck down the present bankruptcy jurisdiction statute in our United States Code, section 1471(c) of title 28. That provision was viewed as constitutionally objectionable because it granted article I bankruptcy judges the power to decide traditional causes of action arising under State law. The Supreme Court held that such ancillary matters could only be decided by those life-tenured judges appointed by Congress under article III of the Constitution.

Basic to the bankruptcy reforms made by Congress in 1978 was the idea of a single forum for disposing of bankruptcy cases and related issues. The need for efficiency, economy, and timeliness motivated the creation of the single forum and the vesting of broad jurisdiction in article I judges.

The history and experience behind the 1978 Bankruptcy Reform Act strongly suggests that Congress carefully and thoughtfully study this area, before any major overhaul of the system.

But the Supreme Court decision in Northern Pipeline requires some timely modifications to prevent our bankruptcy process from stopping dead.

My amendment will address both these concerns by immediately limiting the power of bankruptcy judges for a period of transition, while basically leaving our present structure intact.

My measure will authorize article I bankruptcy judges to handle all aspects of "pure" bankruptcy cases, subject to appellate review, but would withdraw the jurisdiction of a bankruptcy judge to conduct jury trials or final judgments on "related cases."

"Related cases" are defined in my proposal as those "civil proceedings, that, in the absence of a petition in bankruptcy could have been brought in a district court or a State court." An article I bankruptcy judge could submit proposed findings of fact, conclusions of law and a proposed final judgment to a district judge, but, the article III district judge need not give deference to the recommendations of the bankruptcy judge. The district judge may hold a hearing and take additional evidence.

I believe that removing the power of the bankruptcy court to enter final judgment in related cases, and authorizing the district court to conduct an independent review of the findings of fact and conclusions of law involved, will remedy the constitutional flaws identified by the Supreme Court in Northern Pipeline.

As my amendment also provides that the parties could consent to entry of final judgment by a bankruptcy judge in a related case, the goals of efficiency, timeliness, and economy are preserved. The parties would so consent without waiving their right to traditional appellate review.

Finally, my amendment applies to the remaining transition period left under the 1978 act, that is, from now until April 1984. Such an interim measure will allow Congress to reexamine this issue with all its complexities without making rash and radical changes in the structure of our judicial system. It will permit the continued orderly disposition of bankruptcy petitions while avoiding the inevitable gaps and delay involved in the nominations process of some 200 article III judges.

I ask that my colleagues examine this measure and consider its impact on our judicial system. Congress is responsible for providing an efficient and constitutional mechanism for resolving bankruptcy matters. I hope that the Senate can act in a positive nonpartisan way to correct our system's present flaws.

Thank you, Mr. President.●

NUCLEAR WASTE POLICY ACT OF 1982

AMENDMENT NO. 4983

(Ordered to be printed and to lie on the table.)

Mr. McCLURE (for himself, Mr. SIMPSON, Mr. JACKSON, Mr. JOHNSTON, and Mr. DOMENICI) submitted an amendment intended to be proposed by them to the bill (H.R. 3809) to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes.

Mr. McCLURE. Mr. President, I submit for printing an amendment in the nature of a substitute to the House-passed nuclear waste legislation.

Mr. President, this amendment is a proposed amendment in the nature of a substitute for the House-passed nuclear waste bill, H.R. 3809, Calendar No. 968. The proposed amendment was developed jointly by the majority and minority staffs of the Committee on Energy and Natural Resources and the Committee on Environment and Public Works. The text of the proposed amendment reflects the results of consultations with the staffs of interested Senators, the House Committee leadership, DOE, NRC, and outside groups. The text is intended to accommodate the comments received in that consultation to the maximum extent possible. We appreciate the assistance of all Members.

The chairmen and ranking minority members of the committees intend that the proposed amendment be offered as a substitute for the provisions of H.R. 3809 during consideration of the bill this week. Please address any questions or comments about the proposed amendment to Paul Gilman (x44431), Will Smith (x47530) or Ben Cooper (x49894) of the Energy and Natural Resources Committee staff and Jim Curtis (x42991) or Keith Glaser (x43597) of the Environment and Public Works Committee staff. It remains the intention of the chairmen and ranking minority members of the two committees to fashion ultimately a final Senate consensus position on nuclear waste legislation during floor consideration of the proposed amendment. The assistance of all Members of the Senate in achieving that objective would be appreciated.

Mr. President, I ask unanimous consent that the printed amendment and a staff summary of the amendment be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 4983

Strike all after the enacting clause and insert in lieu thereof, the following:

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Nuclear Waste Policy Act of 1982".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Definitions.
Sec. 3. Separability.
Sec. 4. Territories and possessions.
Sec. 5. Ocean disposal.
Sec. 6. Limitation on spending authority.
Sec. 7. Protection of classified national security information.
Sec. 8. Applicability.

TITLE I—DISPOSAL AND STORAGE OF HIGH-LEVEL RADIOACTIVE WASTE, SPENT NUCLEAR FUEL, AND LOW-LEVEL RADIOACTIVE WASTE

Sec. 10. State and affected Indian tribe participation in development of proposed repositories for defense waste.

SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

Sec. 111. Findings and purposes.
Sec. 112. Recommendation of candidate sites for site characterization.
Sec. 113. Site characterization.
Sec. 114. Site approval and construction authorization.
Sec. 115. Review of repository site selection.
Sec. 116. Participation of States.
Sec. 117. Consultation with States and Indian tribes.
Sec. 118. Participation of Indian tribes.
Sec. 119. Judicial review of agency actions.
Sec. 120. Expedited authorizations.
Sec. 121. Certain standards and criteria.
Sec. 122. Disposal of spent nuclear fuel.
Sec. 123. Title to material.
Sec. 124. Consideration of effect of acquisition of water rights.
Sec. 125. Termination of certain provisions.

SUBTITLE B—INTERIM STORAGE PROGRAM

Sec. 131. Findings and purposes.
Sec. 132. Available capacity for interim storage of spent nuclear fuel.
Sec. 133. Interim at-reactor storage.
Sec. 134. Licensing of facility expansions and transshipments.
Sec. 135. Storage of spent nuclear fuel.
Sec. 136. Interim Storage Fund.
Sec. 137. Transportation.

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

Sec. 141. Monitored retrievable storage.

SUBTITLE D—LOW-LEVEL RADIOACTIVE WASTE

Sec. 151. Financial arrangements for site closure.

TITLE II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION REGARDING DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

Sec. 211. Purpose.
Sec. 212. Applicability.
Sec. 213. Identification of sites.
Sec. 214. Siting research and related activities.
Sec. 215. Test and evaluation facility siting review and reports.
Sec. 216. Federal agency actions.
Sec. 217. Research and development on disposal of high-level radioactive waste.
Sec. 218. Research and development on spent nuclear fuel.
Sec. 219. Payments to States and Indian tribes.
Sec. 220. Study of research and development needs for monitored retrievable storage proposal.
Sec. 221. Judicial review.
Sec. 222. Research on Alternatives for the Permanent Disposal of High-Level Radioactive Waste.

TITLE III—OTHER PROVISIONS RELATING TO RADIOACTIVE WASTE

Sec. 301. Mission plan.
Sec. 302. Nuclear Waste Fund.
Sec. 303. Alternate means of financing.
Sec. 304. Office of Civilian Radioactive Waste Management.
Sec. 305. Location of test and evaluation facility.

DEFINITIONS

SEC. 2. For purposes of this Act:

(1) The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) The term "affected Indian tribe" means any Indian tribe—

(A) within whose reservation boundaries a monitored retrievable storage facility, test and evaluation facility, or a repository for high-level radioactive waste or spent fuel is proposed to be located;

(B) whose federally defined possessory or usuage rights to other lands outside of the reservation's boundaries arising out of congressionally ratified treaties may be substantially and adversely affected by the locating of such a facility: *Provided*, That the Secretary of the Interior finds, upon the petition of the appropriate governmental officials of the tribe, that such effects are both substantial and adverse to the tribe;

(3) The term "atomic energy defense activity" means any activity of the Secretary performed in whole or in part in carrying out any of the following functions:

(A) naval reactors development;

(B) weapons activities including defense inertial confinement fusion;

(C) verification and control technology;

(D) defense nuclear materials production;

(E) defense nuclear waste and materials by-products management;

(F) defense nuclear materials security and safeguards and security investigations; and

(G) defense research and development.

(4) The term "candidate site" means an area, within a geologic and hydrologic system, that is recommended by the Secretary under section 112 for site characterization, approved by the President under section 112 for site characterization, or undergoing site characterization under section 113.

(5) The term "civilian nuclear activity" means any atomic energy activity other than an atomic energy defense activity.

(6) The term "civilian nuclear power reactor" means a civilian nuclear powerplant required to be licensed under section 103 or 104 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134(b)).

(7) The term "Commission" means the Nuclear Regulatory Commission.

(8) The term "Department" means the Department of Energy.

(9) The term "disposal" means the emplacement in a repository of high-level radioactive waste, spent nuclear fuel, or other highly radioactive material with no foreseeable intent of recovery, whether or not such emplacement permits the recovery of such waste.

(10) The terms "disposal package" and "package" mean the primary container that holds, and is in contact with, solidified high-level radioactive waste, spent nuclear fuel,

or other radioactive materials, and any overpacks that are emplaced at a repository.

(11) The term "engineered barriers" means manmade components of a disposal system designed to prevent the release of radionuclides into the geologic medium involved. Such term includes the high-level radioactive waste form, high-level radioactive waste canisters, and other materials placed over and around such canisters.

(12) The term "high-level radioactive waste" means—

(A) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations; and

(B) other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

(13) The term "Federal agency" means any Executive agency, as defined in section 105 of title 5, United States Code.

(14) The term "Governor" means the chief executive officer of a State.

(15) The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community of Indians recognized as eligible for the services provided to Indians by the Secretary of the Interior because of their status as Indians, including any Alaska Native village, as defined in section 3(c) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(c)).

(16) The term "low-level radioactive waste" means radioactive material that—

(A) is not high-level radioactive waste, spent nuclear fuel, transuranic waste, or byproduct material as defined in section 11e. (2) of the Atomic Energy Act of 1954 (42 U.S.C. 2014(e)(2)); and

(B) the Commission, consistent with existing law, classifies as low-level radioactive waste.

(17) The term "Office" means the Office of Civilian Radioactive Waste Management established in section 305.

(18) The term "repository" means any system licensed by the Commission that is intended to be used for, or may be used for, the permanent deep geologic disposal of high-level radioactive waste and spent nuclear fuel, whether or not such system is designed to permit the recovery, for a limited period during initial operation, of any materials placed and subsurface areas at which high-level radioactive waste and spent nuclear fuel handling activities are conducted.

(19) The term "reservation" means—

(A) any Indian reservation or dependent Indian community referred to in clause (a) or (b) of section 1151 of title 18, United States Code; or

(B) any land selected by an Alaska Native village or regional corporation under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).

(20) The term "Secretary" means the Secretary of Energy.

(21) The term "site characterization" means—

(A) siting research activities with respect to a test and evaluation facility at a candidate site; and

(B) activities, whether in the laboratory or in the field, undertaken to establish the geologic condition and the ranges of the parameters of a candidate site relevant to the location of a repository, including borings, surface excavations, excavations of exploratory shafts, limited subsurface lateral excavations and borings, and in situ testing needed to evaluate the suitability of a candidate site for the location of a repository, but not including preliminary borings and geophysical testing needed to assess whether site characterization should be undertaken.

(22) The term "siting research" means activities, including borings, surface excavations, shaft excavations, subsurface lateral excavations and borings, and in situ testing, to determine the suitability of a site for a test and evaluation facility.

(23) The term "spent nuclear fuel" means fuel that has been withdrawn from a nuclear reactor following irradiation, the constituent elements of which have not been separated by reprocessing.

(24) Term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

(25) The term "storage" means retention of high-level radioactive waste, spent nuclear fuel, or transuranic waste with the intent to recover such waste or fuel for subsequent use, processing, or disposal.

(26) The term "Storage Fund" means the Interim Storage Fund established in section 137(c).

(27) The term "test and evaluation facility" means an at-depth, prototypic, underground cavity with subsurface lateral excavations extending from a central shaft that is used for research and development purposes, including the development of data and experience for the safe handling and disposal of solidified high-level radioactive waste, transuranic waste, or spent nuclear fuel.

(28) The term "unit of general local government" means any borough, city, county, parish, town, township, village, or other general purpose political subdivision of a State.

(29) The term "Waste Fund" means the Nuclear Waste Fund established in section 302(c).

SEPARABILITY

SEC. 3. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

TERRITORIES AND POSSESSIONS

SEC. 4. Nothing in this Act shall be deemed to repeal, modify, or amend the provisions of section 605 of the Act of March 12, 1980 (48 U.S.C. 1491).

OCEAN DISPOSAL

SEC. 5. Nothing in this Act shall be deemed to affect the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.).

LIMITATION ON SPENDING AUTHORITY

SEC. 6. The authority under this Act to incur indebtedness, or enter into contracts, obligating amounts to be expended by the Federal Government shall be effective for any fiscal year only to such extent or in such amounts as are provided in advance by appropriation Acts.

PROTECTION OF CLASSIFIED NATIONAL SECURITY INFORMATION

SEC. 7. Nothing in this Act shall require the release or disclosure to any person or to the Commission of any classified national security information.

APPLICABILITY

SEC. 8. (a) ATOMIC ENERGY DEFENSE ACTIVITIES.—Subject to the provisions of subsection (c), the provisions of this Act shall not apply with respect to any atomic energy defense activity or to any facility used in connection with any such activity.

(b) EVALUATION BY PRESIDENT.—(1) Not later than 2 years after the date of the enactment of this Act, the President shall evaluate the use of disposal capacity at one or more repositories to be developed under subtitle A of title I for the disposal of high-level radioactive waste resulting from atomic energy defense activities. Such evaluation shall take into consideration factors relating to cost, efficiency, health and safety, regulation, transportation, public acceptability, and national security.

(2) Unless the President finds, after conducting the evaluation required in paragraph (1), that the development of a repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only is required, taking into account all of the factors described in such subsection, the Secretary shall proceed promptly with arrangement for the use of one or more of the repositories to be developed under subtitle A of title I for the disposal of such waste.

Such arrangements shall include the allocation of costs of developing, constructing, and operating this repository or repositories between the Federal Government and the separate account established by section 302. The costs resulting from permanent disposal of high-level radioactive waste from atomic energy defense activities shall be paid by the Federal Government, and not from the special account established under section 302.

(3) Any repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only shall (A) be subject to licensing under section 202 of the Energy Reorganization Act of 1973 (42 U.S.C. 5842); and (B) comply with all requirements of the Commission for the siting, development, construction, and operation of a repository.

(c) APPLICABILITY TO CERTAIN REPOSITORIES.—The provisions of this Act shall apply with respect to any repository not used exclusively for the disposal of high-level radioactive waste or spent nuclear fuel resulting from atomic energy defense activities, research and development, activities of the Secretary, or both.

TITLE I—DISPOSAL AND STORAGE OF HIGH-LEVEL RADIOACTIVE WASTE, SPENT NUCLEAR FUEL, AND LOW-LEVEL RADIOACTIVE WASTE

STATE AND AFFECTED INDIAN TRIBE PARTICIPATION IN DEVELOPMENT OF PROPOSED REPOSITORIES FOR DEFENSE WASTE

SEC. 101. (a) NOTIFICATION TO STATES AND AFFECTED INDIAN TRIBES.—Notwithstanding the provisions of section 3, upon any decision by the Secretary or the President to develop a repository for the disposal of high-level radioactive waste or spent nuclear fuel resulting exclusively from atomic energy defense activities, research and development activities of the Secretary, or both, and before proceeding with any site-specific investigations with respect to such repository, the Secretary shall notify the Governor and legislature of the State in which such repository is proposed to be located, or the governing body of the affected Indian tribe on whose reservation such repository is pro-

posed to be located, as the case may be, of such decision.

(b) PARTICIPATION OF STATES AND AFFECTED INDIAN TRIBES.—Following the receipt of any notification under subsection (a), the State or Indian tribe involved shall be entitled, with respect to the proposed repository involved, to rights of participation and consultation identical to those provided in sections 115 through 118, except that any financial assistance authorized to be provided to such State or affected tribe under section 116(c) or 118(b) shall be made from amounts appropriated to the Secretary for purposes of carrying out this section.

SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

FINDINGS AND PURPOSES

SEC. 111. (a) FINDINGS.—The Congress finds that—

(1) radioactive waste creates potential risks and requires safe and environmentally acceptable methods of disposal;

(2) a national problem has been created by the accumulation of (A) spent nuclear fuel from nuclear reactors; and (B) radioactive waste from (i) reprocessing of spent nuclear fuel; (ii) activities related to medical research, diagnosis, and treatment; and (iii) other sources;

(3) Federal efforts during the past 30 years to devise a permanent solution to the problems of civilian radioactive waste disposal have not been adequate;

(4) while the Federal Government has the responsibility to provide for the permanent disposal of high-level radioactive waste and such spent nuclear fuel as may be disposed of in order to protect the public health and safety and the environment, the costs of such disposal should be the responsibility of the generators and owners of such waste and spent fuel;

(5) the generators and owners of high-level radioactive waste and spent nuclear fuel have the primary responsibility to provide for, and the responsibility to pay the costs of, the interim storage of such waste and spent fuel until such waste and spent fuel is accepted by the Secretary of Energy in accordance with the provisions of this Act;

(6) State and public participation in the planning and development of repositories is essential in order to promote public confidence in the safety of disposal of such waste and spent fuel; and

(7) high-level radioactive waste and spent nuclear fuel have become major subjects of public concern, and appropriate precautions must be taken to ensure that such waste and spent fuel do not adversely affect the public health and safety and the environment for this or future generations.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to establish a schedule for the siting, construction, and operation of repositories that will provide a reasonable assurance that the public and the environment will be adequately protected from the hazards posed by high-level radioactive waste and such spent nuclear fuel as may be disposed of in a repository;

(2) to establish the Federal responsibility, and a definite Federal policy, for the disposal of such waste and spent fuel;

(3) to define the relationship between the Federal Government and the State governments with respect to the disposal of such waste and spent fuel; and

(4) to establish a Nuclear Waste Fund, composed of payments made by the generators and owners of such waste and spent fuel, that will ensure that the costs of carrying out activities relating to the disposal of such waste and spent fuel will be borne by the persons responsible for generating such waste and spent fuel.

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Director of the Geological Survey, and interested Governors and the concurrence of the Commission shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrology, geophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands.

"Such guidelines shall take into consideration the proximity to sites where high-level radioactive waste and spent nuclear fuel is generated or temporarily stored and the transportation and safety factors involved in moving such waste to a repository.".

Such guidelines shall specify population factors that will disqualify any site from development as a repository if any surface facility of such repository would be located in a highly populated area.

Such guidelines also shall require the Secretary to consider the cost and impact of transporting to the repository site the solidified high-level radioactive waste and spent fuel to be disposed of in the repository and the advantages of regional distribution in the siting of repositories.

Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recommend sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall recommend to the President at least 3 candidate sites that he determines suitable for site characterization for selection of the first repository site. Such sites shall be recommended by the Secretary not later than July 1, 1984. Not later than July 1, 1987, the Secretary shall recommend to the President at least 3 additional candidate sites the Secretary determines for possible subsequent selection as repository sites are suitable for site characterization. The Secretary shall not recommend for characterization any area of a site used for the test and evaluation facility pursuant to Title II that the Secretary determines would permit the physical integration of the test and evaluation facility and a proposed repository.

Each recommendation of a candidate site under this subsection shall be accompanied by an environmental impact statement prepared pursuant to subsection (g) and the National Environment Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(B) Each environmental impact statement prepared under this paragraph shall be made available to the public.

(C) Before recommending a candidate site to the President, the Secretary shall notify the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be, of such recommendation and the basis for such recommendation.

(2) Before recommending to the President any candidate site for site characterization, the Secretary shall hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of the proposed recommendation of such candidate site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental impact statement described in paragraph (1) and the site characterization plan described in section 113(b)(1).

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—The President shall review each candidate site recommendation made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be. If, during such 60-day period, the president fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the affected Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the affected Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study

other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this section, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (F).

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental impact statement described in subsection (g) shall be prepared within one year of the date of enactment of this Act; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c); and (3) the Secretary shall conduct public hearings under 113(b)(2) and comply with requirements under section 117 of this Act within one year of the date of enactment.

If site characterization is discontinued at any site under the second clause of the first sentence of this subsection, site characterization at such site may be continued by the President under subsection (c).

(g) ENVIRONMENTAL IMPACT STATEMENT.—Any recommendation of a candidate site under subsection (b) shall be accompanied by an environmental impact statement. With respect to the requirements imposed by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), compliance with the procedures and requirements of this Act shall be deemed adequate consideration of the need for a repository, the time of the initial availability of a repository, and all alternatives to the isolation of high-level radioactive waste and spent nuclear fuel in a repository. For purposes of complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and this section, all consideration of alternative sites by the Secretary, shall be considered adequate if the statement provides an explanation of the process and reasons for the elimination of other sites for recommendation for site characterization pursuant to this section.

SITE CHARACTERIZATION

SEC. 113. (a) IN GENERAL.—The Secretary shall carry out, in accordance with the provisions of this section, appropriate site characterization activities beginning with the candidate sites that have been approved under section 112 and are located various geologic media". The Secretary shall consider fully the comments received under subsection (b)(2) and section 112(b)(2) and shall, to the maximum extent practicable and in consultation with the Governor of the State involved or the governing body of the affected Indian tribe involved, conduct site characterization activities in a manner that minimizes any significant adverse environmental impacts identified in such comments or in the environmental assessment submitted under subsection (b)(1).

(b) COMMISSION AND STATES.—(1) Before proceeding to sink shafts at any candidate site to the Commission and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe on whose reservation such candidate site is located, as the case may be, for their review and comment—

(A) a general plan for site characterization activities to be conducted at such candidate site, which plan shall include—

(i) a description of such candidate site;

(ii) a description of such site characterization activities, including the following: the extent of planned excavations, plans for any onsite testing with radioactive or nonradioactive material, plans for any investigation activities that may affect the capability of such candidate site to isolate high-level radioactive waste and spent nuclear fuel, and plans to control any adverse, safety-related impacts from such site characterization activities;

(iii) plans for the decontamination and decommissioning of such candidate site, and for the mitigation of any significant adverse environmental impacts caused by site characterization activities if it is determined unsuitable for application for a construction authorization for a repository;

(iv) criteria to be used to determine the suitability of such candidate site for the location of a repository, developed pursuant to section 112(a); and

(v) any other information required by the Commission;

(B) a description of the possible form or packaging for the high-level radioactive waste and spent nuclear fuel to be emplaced in such repository, a description, to the extent practicable, of the relationship between such waste form or packaging and the geologic medium of such site, and a description of the activities being conducted by the Secretary with respect to such possible waste form or packaging or such relationship; and

(C) a conceptual repository design that takes into account likely site-specific requirements.

(2) Before proceeding to sink shafts at any candidate site, the Secretary shall (A) make available to the public the site characterization plan described in paragraph (1); and (B) hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of such plan, and to receive their comments.

(3) During the conduct of site characterization activities at a candidate site, the Secretary shall report not less than once every 6 months to the Commission and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be, on the nature and extent of such activities and the information developed from such activities.

(c) RESTRICTIONS.—(1) The Secretary may conduct at any candidate site only such site characterization activities as the Secretary considers necessary to provide the data required for evaluation of the suitability of such candidate site for an application to be submitted to the Commission for a contruction authorization for a repository at such candidate site, and for compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(2) In conducting site characterization activities—

(A) the Secretary may not use any radioactive material at a candidate site unless the Commission concurs that such use is necessary to provide data for the preparation of the required environmental reports and an application for a construction authorization for a repository at such candidate site; and

(B) if any radioactive material is used at a candidate site—

(i) the Secretary shall use the minimum quantity necessary to determine the suitability of such candidate site for a repository, but in no event more than the curie equivalent of 10 metric tons of spent nuclear fuel; and

(ii) such radioactive material shall be fully retrievable.

(3) If site characterization activities are terminated at a candidate site for any reason, the Secretary shall (A) notify the Congress, the Governors and legislatures of all States in which candidate sites are located, and the governing bodies of all affected Indian tribes where candidate sites are located, of such termination and the reasons for such termination; and (B) remove any high-level radioactive waste, spent nuclear fuel, or other radioactive materials at or in such candidate site as promptly as practicable.

(4) If a site is determined to be unsuitable for application for a construction authorization for a repository, the Secretary shall take reasonable and necessary steps to reclaim the site and to mitigate any significant adverse environmental impacts caused by site characterization activities.

(d) PRELIMINARY ACTIVITIES.—Each activity of the Secretary under this section that is in compliance with the provisions of subsection (c) shall be considered a preliminary decisionmaking activity. "No such activity shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act."

SITE APPROVAL AND CONSTRUCTION AUTHORIZATION

SEC. 114. (a) HEARINGS AND PRESIDENTIAL RECOMMENDATION.—(1) The Secretary shall hold public hearings in the vicinity of each site under consideration for recommendation to the President under this paragraph as a site for the development of a repository, for the purposes of informing the residents of the area in which such site is located of such consideration and receiving their comments regarding the possible recommendation of such site. If, upon completion of such hearings and completion of site characterization activities at not less than 3 candidate sites for the first proposed repository, or from all of the characterized sites for the development of subsequent repositories, under section 113, the Secretary decides to recommend approval of such site to the President, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such decision. No sooner than the expiration of the 30-day period following such notification, the Secretary shall submit to the President a recommendation that the President approve such site for the development of a repository. Any such recommendation by the Secretary shall be based on the record of information developed by the Secretary under section 113 and this section, in-

cluding the information described in subparagraph (A) through subparagraph (G).

In making site recommendations and approvals subsequent to the first site recommendation, the Secretary and the President, respectively, shall also consider the need for regional distribution of repositories and the need to minimize, to the extent practicable, the impacts and cost of transporting spent fuel and solidified high-level radioactive waste.

Together with any recommendation of a site under this paragraph the Secretary shall make available to the public, and submit to the President, a comprehensive statement of the basis of such recommendation, including the following:

(A) a description of the proposed repository, including preliminary engineering specifications for the facility;

(B) a description of the waste form or packaging proposed for use at such repository, and an explanation of the relationship between such waste form or packaging and the gerologic medium of such site;

(C) a discussion of data, obtained in site characterization activities, relating to the safety of such site;

(D) a final environmental impact statement prepared pursuant to subsection (f) and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), including an analysis of the consideration given by the Secretary to not less than 3 candidate sites for the first proposed repository or to all of the characterized sites for the development of subsequent repositories, with respect to which site characterization is completed under section 113, together with comments made concerning such environmental impact statement by the Secretary of the Interior, the Council on Environmental Quality, the Administrator, and the Commission, except that any such environmental impact statement concerning the first repository to be developed under this Act shall not be required to consider the need for a repository or the alternatives to geologic disposal,

(E) preliminary comments of the Commission concerning the extent to which the at-depth site characterization analysis and the waste form proposal for such site seem to be sufficient for inclusion in any application to be submitted by the Secretary for licensing of such site as a repository;

(F) the views and comments of the Governor and legislature of any State, or the governing body of any affected Indian tribe, as determined by the Secretary, together with the response of the Secretary to such views;

(G) such other information as the Secretary considers appropriate; and

(H) any impact report submitted under section 116(c)(2)(B) by the State in which such site is located, or under section 118(b)(3)(B) by the affected Indian tribe where such site is located, as the case may be.

(2)(A) Not later than March 31, 1987, the President shall submit to the Congress a recommendation of one site from the three sites initially characterized that the President considers qualified for application for a construction authorization for a repository. Not later than March 31, 1990, the President shall submit to the Congress a recommendation of a second site from any sites already characterized that the President considers qualified for a construction authorization for a second repository.

The President shall submit with such recommendation a copy of the report for such site prepared by the Secretary under paragraph (1).

(B) The President may extend the deadlines described in subparagraph (A) by not more than 12 months if, before March 31, 1986 for the first site and March 31, 1989 for the second site, (i) the President determines that such extension is necessary; and (ii) transmits to the Congress a report setting forth the reasons for such extension.

(3) If approval of any such site recommendation does not take effect as a result of a disapproval by the Governor or legislature of a State under section 116 or the governing body of an affected Indian tribe under section 118, the President shall submit to the Congress, not later than 1 year after the disapproval of such recommendation, a recommendation of another site for the first or subsequent repository.

(4)(A) The President may not recommend the approval of any site under this subsection unless the Secretary has recommended to the President under paragraph (1) approval of such site and has submitted to the President a report for such site as required under such paragraph.

"(B) No recommendation of a site by the President under this subsection shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act."

(b) SUBMISSION OF APPLICATION.—If the President recommends to the Congress a site for a repository under subsection (a) and the site designation is permitted to take effect under section 115, the Secretary shall submit to the Commission an application for a construction authorization for a repository at such site not later than 90 days after the date on which the recommendation of the site designation is effective under such section and shall provide to the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, a copy of such application.

(c) STATUS REPORT ON APPLICATION.—Not later than 1 year after the date on which an application for a construction authorization is submitted under subsection (b), and annually thereafter until the date on which such authorization is granted, the Commission shall submit a report to the Congress describing the proceedings undertaken through the date of such report with regard to such application, including a description of—

(1) any major unresolved safety issues, and the explanation of the Secretary with respect to design and operation plans for resolving such issues;

(2) any matters of contention regarding such application; and

(3) any Commission actions regarding the granting or denial of such authorization.

(d) COMMISSION ACTION.—The Commission shall consider an application for a construction authorization for all or part of a repository in accordance with the laws applicable to such applications, except that the Commission shall issue a final decision approving or disapproving the issuance of a construction authorization not later than—

(1) January 1, 1989, for the first such application, and January 1, 1992, for the second such application; or

(2) the expiration of 3 years after the date of the submission of such application, except that the Commission may extend such deadline by not more than 12 months if, not less than 30 days before such deadline, the Commission complies with the reporting requirements established in subsection (e)(2);

whichever occurs later.

The Commission decision approving the first such application shall prohibit the emplacement in the first repository of a quantity of spent fuel containing in excess of seventy thousand metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of such a quantity of spent fuel until such time as a second repository is in operation. In the event that a monitored retrievable storage facility, approved pursuant to subtitle C of this Act, shall be located, or is planned to be located, within fifty miles of the first repository; then the Commission decision approving the first such application shall prohibit the emplacement of a quantity of spent fuel containing in excess of seventy thousand metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of spent fuel in both the repository and monitored retrievable storage facility until such time as a second depository is in operation.

(e) PROJECT DECISION SCHEDULE.—(1) The Secretary shall prepare and update, as appropriate, in cooperation with all affected Federal agencies, a project decision schedule that portrays the optimum way to attain the operation of the repository involved, within the time periods specified in this subtitle. Such schedule shall include a description of objectives and a sequence of deadlines for all federal agencies required to take action, including an identification of the activities in which a delay in the start, or completion, of such activities will cause a delay in beginning repository operation.

(2) Any Federal agency that determines that it cannot comply with any deadline in the project decision schedule, or fails to so comply, shall submit to the Secretary and to the Congress a written report explaining the reason for its failure or expected failure to meet such deadline, the reason why such agency could not reach an agreement with the Secretary, the estimated time for completion of the activity or activities involved, the associated effect on its other deadlines in the project decision schedule, and any recommendations it may have or actions it intends to take regarding any improvements in its operation or organization, or changes to its statutory directives or authority, so that it will be able to mitigate the delay involved. The Secretary, within 30 days after receiving any such report, shall file with the Congress his response to such report, including the reasons why the Secretary could not amend the project decision schedule to accommodate the Federal agency involved.

(f) ENVIRONMENTAL IMPACT STATEMENT.—Any recommendation made by the Secretary under this section shall be considered a major Federal action significantly affecting the quality of the human environment for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.). A final environmental impact statement prepared by the Secretary under such Act shall accompany any recommendation to the President to approve a site for a repository. With respect to the requirements imposed by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), compliance with the procedures and requirements of this Act shall be deemed adequate consideration of the need for a repository, the time of the initial availability of a repository, and

all alternatives to the isolation of high-level radioactive waste and spent nuclear fuel in a repository. For purposes of complying with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and this section, the Secretary shall consider as alternate sites for the first repository to be developed under this subtitle 3 candidate sites recommended by the Secretary pursuant to the first sentence of section 112(b) and approved by the President for site characterization, pursuant to section 112(c), for which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination, including a statement of the reasons for such determination, of the suitability of each site for development as a repository. The Secretary shall consider as alternative sites for subsequent repositories those sites recommended by the Secretary by July 1, 1984, and by July 1, 1987, pursuant to section 112(b) and approved by the President for site characterization pursuant to section 112(c) for which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination, including a statement of the reasons for such determination, of the suitability of each site for development as a repository. Any environmental impact statement prepared in connection with a repository proposed to be constructed by the Secretary under this subtitle shall, to the extent practicable, be adopted by the Commission in connection with the issuance by the Commission of a construction authorization and license for such repository. To the extent such statement is adopted by the Commission, such adoption shall be deemed to also satisfy the responsiblities of the Commission under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and no further consideration shall be required, except that nothing in this subsection shall affect any independent responsibilities of the Commission to protect the public health and safety under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.). In any such statement prepared with respect to the first repository to be constructed under this subtitle, the need for a repository or nongeologic alternatives to the site of such repository shall not be considered.

SEC. 115. (a) IN GENERAL.—The designation of a site as suitable for application for a construction authorization for a repository shall be effective at the end of the 60-day period beginning on the date that the President recommends such site to the Congress under section 114, unless the Governor of the State in which such site is located, or the governing body of an affected Indian tribe on where such site is located, as the case may be, submits to the Congress a notice of disapproval under section 116 or 118. If any such notice of disapproval is submitted, the designation of such site shall not be effective except as provided under subsection (b).

(b) CONGRESSIONAL REVIEW OF SITES.—If any notice of disapproval of a repository site designation is submitted to the Congress under section 116 or 118 after a recommendation for approval of such site is made by the President under section 114, the designation of such site as suitable for license application as a repository shall be effective upon the expiration of the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval unless, during such period, either House of the Congress passes a resolution in accordance with this subsection disapproving such site designation.

(c) DEFINITION.—For purposes of this subsecton the term "resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That the ——— hereby approves the notice of disapproval submitted by ——— regarding the disapproval of the site at ——— for a repository for the disposal of high-level radioactive waste and spent nuclear fuel.". The first blank space in such resolution shall be filled with the designation of the appropriate House of the Congress; the second blank space in such resolution shall be filled with the designation of the State Governor or Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the geographic location of the proposed repository site involved.

(d) PROCEDURES APPLICABLE TO THE SENATE.—(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions under this section, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(2)(A) Not later than the first day of session following the day on which any notice of disapproval of a repository site selection is submitted to the Congress under section 116 or 118. a resolution under this section shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(B) Upon introduction, a resolution under this section shall be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same repository site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall make it recommendations to the Senate.

(3) If any committee to which is referred a resolution introduced under paragraph (2)(A), or, in the absence of such a reolution, any other resolution under this section introduced with respect to the site involved, has not reported such resolution at the end of 45 days of continous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(4)(A) When each committee to which a resolution under this section has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in paragraph (3), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(B) Debate on a resolution under this section and on all debatable motions and appeals in connection with such resolution, shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(C) Immediately following the conclusion of the debate on a resolution under this section and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(D) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution under this section shall be decided without debate.

(e) PROCEDURES APPLICABLE TO THE HOUSE OF REPRESENTATIVES.—(1) The provisions of this section are enacted by the Congress—

(A) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions under this section and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules and

(B) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) Resolutions of repository siting approval shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(3) Upon the expiration of 45 days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(4) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution under this section after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker

shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution without intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(f) COMPUTATION OF DAYS.—For purposes of this section—

(1) continuity of session of Congress is broken only by adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subsection (c) and the 45-day period referred to in subsections (d) and (e).

(g) INFORMATION PROVIDED TO CONGRESS.—In considerning any notice of disapproval submitted to the Congress under section 116 or 118, the Congress may obtain any comments of the Commission with respect to such notice of disapproval. The provision of such comments by the Commission shall not be construed as binding the Commission with respect to any licensing or authorization action concerning the repository involved.

PARTICIPATION OF STATES

SEC. 116. (a) NOTIFICATION OF STATES AND AFFECTED TRIBES.—The Secretary shall identify the States with one or more potentially acceptable sites for a repository within ninety days after the date of enactment of this Act. Within ninety days of such identification, the Secretary shall notify the Governor, the State legislature, and the Tribal Council of any affected Indian tribe in any State of the potentially acceptable sites within such State. For the purposes of this title, the term "potentially acceptable site" means any site at which, after geologic studies and field mapping but before detailed geologic data gathering, the Department undertakes preliminary drilling and geophysical testing for the definition of site location.

(b) STATE PARTICIPATION IN REPOSITORY SITING DECISIONS.—(1) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under paragraph (2). In any case in which State law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(2) Upon the submission by the President to the Congress of a recommendation of a site for a repository, the Governor or legislature of the State in which such site is located may disapprove the site designation and submit to the Congress a notice of disapproval. Such Governor or legislature may submit such a notice of disapproval to the Congress not later than the 60 days after the date that the President recommends such site to the Congress under section 114. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why such Governor or legislature disapproved the recommended repository site involved.

(3) The authority of the Governor or legislature of each State under this subsection shall not be applicable with respect to any site located on a reservation.

(c) FINANCIAL ASSISTANCE.—(1)(A) the Secretary shall make grants to each State notified under subsection (a) for the purpose of participating in activities required by sections 116 and 117 or authorized by written agreement entered into pursuant to subsection 117(c). Any salary or travel expense that would ordinarily be incurred by such State, or by any political subdivision of such State, may not be considered eligible for funding under this paragraph.

(B) The Secretary shall make grants to each State in which a candidate site for a repository is approved under section 112(c). Such grants may be made to each such State only for purposes of enabling such State—

(i) to review activities taken under this subtitle with respect to such site for purposes of determining any potential economic, social, public health and safety, and environmental impacts of such repository on the State and its residents;

(ii) to develop a request for impact assistance under paragraph (2);

(iii) to engage in any monitoring, testing, or evaluation activities with respect to site characterization programs with regard to such site;

(iv) to provide information to its residents regarding any activities of such State, the Secretary, or the Commission with respect to such site; and

(v) to request information from, and make comments and recommendations to, the Secretary regarding any activities taken under this subtitle with respect to such site.

(C) Any salary or travel expense that would ordinarily be incurred by such State, or by any political subdivision of such State, may not be considered eligible for funding under this paragraph.

(2)(A) The Secretary shall provide financial and technical assistance to any State requesting such assistance in which there is a site with respect to which the Commission has authorized construction of a repository. Such assistance shall be designed to mitigate the impact on such State of the development of such repository. Such assistance to such State shall commence within 6 months following the granting by the Commission of a construction authorization for such repository and following the initiation of construction activities at such site.

(B) Any State desiring assistance under this paragraph shall prepare and submit to the Secretary a report on any economic, social, public health and safety, and environmental impacts that are likely as a result of the development of a repository at a site in such State. Such report shall be submitted to the Secretary following the completion of site characterization activities at such site and before the recommendation of such site to the President by the Secretary for application for a construction authorization for a repository. As soon as practicable following the granting of a construction authorization for such repository, the Secretary shall seek to enter into a binding agreement with the State involved setting forth the amount of assistance to be provided to such State under this paragraph and the procedures to be followed in providing such assistance.

(3) The Secretary shall also grant to each State and unit of general local government in which a site for a repository is approved under section 112(c) an amount each fiscal year equal to the amount such State and unit of general local government, respectively, would receive were they authorized to tax site characterization activities at such site, and the development and operation of such repository, as such State and unit of general local government tax the other real property and industrial activities occurring within such State and unit of general local government. Such grants shall continue until such time as all such activities, development, and operation are terminated at such site.

(4)(A) A State may not receive any grant under paragraph (1) after the expiration of the 1-year period following—

(i) the date on which the Secretary notifies the Governor and legislature of the State involved of the termination of site characterization activities at the candidate site involved in such State;

(ii) the date on which the site in such State is disapproved under section 115; or

(iii) the date on which the Commission disapproves an application for a construction authorization for a repository at such site;

whichever occurs first, unless there is another candidate site in the State approved under section 112(c) with respect to which the actions described in clauses (i), (ii), and (iii) have not been taken.

(B) A State may not receive any further assistance under paragraph (2) with respect to a site if repository construction acitivities at such site are terminated by the Secretary or if such activities are permanently enjoined by any court.

(C) At the end of the 2-year period beginning on the effective date of any license to receive and possess for a repository in a State, no Federal funds shall be made available to such State under paragraph (1) or (2), except for—

(i) such funds as may be necessary to support State activities related to any other repository located in, or proposed to be located in, such State, and for which a license to receive and possess has not been in effect for more than 1 year; and

(ii) such funds as may be necessary to support State activities pursuant to agreements or contracts for impact assistance entered into, under paragraph (2), by such State with the Secretary during such 2-year period.

(5) Financial assistance authorized in this subsection shall be made out of amounts held in the Nuclear Waste Fund established in section 302.

(d) ADDITIONAL NOTIFICATION AND CONSULTATION.—Whenever the Secretary is required under any provision of this Act to notify or consult with the governing body of an affected Indian tribe where a site is located, the Secretary shall also notify or consult with, as the case may be, the Governor of the State in which such reservation is located.

CONSULTATION WITH STATES AND AFFECTED INDIAN TRIBES

SEC. 117. (a) PROVISION OF INFORMATION.—(1) The Secretary, the Commission, and other agencies involved in the construction, operation, or regulation of any aspect of a repository in a State shall provide to the Governor and legislature of such State, and to the governing body of any affected Indian tribe, timely and complete information regarding determinations or plans made with respect to the site characteriza-

tion siting, development, design, licensing, construction, operation, regulation, or decommissioning of such repository.

(2) Upon written request for such information by the Governor or legislature of such State, or by the governing body of any affected Indian tribe affected, as the case may be, the Secretary shall provide a written response to such request within 30 days of the receipt of such request. Such response shall provide the information requested or, in the alternative, the reasons why the information cannot be so provided. If the Secretary fails to so respond within such 30 days, the Governor or legislature of such State, or the governing body of any affected Indian tribe affected, as the case may be, may transmit a formal written objection to such failure to respond to the President. If the President or Secretary fails to respond to such written request within 30 days of the receipt by the President of such formal written objection, the Secretary shall immediately suspend all activities in such State authorized by this subtitle, and shall not renew such activities until the Governor or legislature of such State, or the governing body of any affected Indian tribe affected, as the case may be, has received the written response to such written request required by this subsection.

(b) CONSULTATION AND COOPERATION.—In performing any study of an area within a State for the purpose of determining the suitability of such area for a repository pursuant to section 112(c), and in subsequently developing and loading any repository within such State, the Secretary shall consult and cooperate with the Governor and legislature of such State and the governing body of any affected Indian tribe in an effort to resolve the concerns of such State and any affected Indian tribe regarding the public health and safety, environmental, and economic impacts of any such repository. In carrying out his duties under this subtitle, the Secretary shall take such concerns into account to the maximum extent feasible and as specified in written agreements entered into under subsection (c).

(c) WRITTEN AGREEMENT.—Not later than 60 days after (1) the approval of a site for site characterization for such a repository under section 112(c), or (2) the written request of the State or Indian tribe in any affected State notified under 116(a), to the Secretary, whichever, first occurs, the Secretary shall seek to enter into a binding written agreement, and shall begin negotiations, with such State and, where appropriate, to enter into a separate binding agreement with the governing body of any affected Indian tribe, setting forth (but not limited to) the procedures under which the requirements of subsections (a) and (b), and the provisions of such written agreement, shall be carried out. Any such written agreement shall not affect the authority of the Commission under existing law. Each such written agreement shall, to the maximum extent feasible, be completed not later than 6 months after such notification. If such written agreement is not completed within such period, the Secretary shall report to the Congress in writing within 30 days on the status of negotiations to develop such agreement and the reasons why such agreement has not been completed. Prior to submission of such report to the Congress, the Secretary shall transmit such report to the Governor of such State or the governing body of such affected Indian tribe, as the case may be, for the review and comments. Such comments shall be included in such report prior to submission to the Congress. Such written agreement shall specify procedures—

(1) by which such State or governing body of an affected Indian tribe, as the case may be, may study, determine, comment on, and make recommendations with regard to the possible public health and safety, environmental, social, and economic impacts of any such repository;

(2) by which the Secretary shall consider and respond to comments and recommendations made by such State or governing body of an affected Indian tribe, including the period in which the Secretary shall so respond;

(3) by which the Secretary and such State or governing body of an affected Indian tribe may review or modify the agreement periodically;

(4) by which such State or governing body of an affected Indian tribe is to submit an impact report and request for impact assistance under section 116(c) or section 118(b), as the case may be;

(5) by which the Secretary shall assist such State, and the units of general local government in the vicinity of the repository site, in resolving the offsite concerns of such State and units of general local government, including, but not limited to, questions of State liability arising from accidents, necessary road upgrading and access to the site, ongoing emergency preparedness and emergency response, monitoring of transportation of high-level radioactive waste and spent nuclear fuel through such State, conduct of baseline health studies of inhabitants in neighboring communities near the repository site and reasonable periodic monitoring thereafter, and monitoring of the repository site upon any decommissioning and decontamination;

(6) by which the Secretary shall consult and cooperate with such State on a regular, ongoing basis and provide for an orderly process and timely schedule for State review and evaluation, including identification in the agreement of key events, milestones, and decision points in the activities of the Secretary at the potential repository site;

(7) by which the Secretary shall notify such State prior to the transportation of any high-level radioactive waste and spent nuclear fuel into such State for disposal at the repository site;

(8) by which such State may conduct reasonable independent monitoring and testing of activities on the repository site, except that such monitoring and testing shall not unreasonably interfere with or delay onsite activities;

(9) for sharing, in accordance with applicable law, of all technical and licensing information, the utilization of available expertise, the facilitating of permit procedures, joint project review, and the formulation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws;

(10) for public notification of the procedures specified under the preceding paragraphs; and

(11) for resolving objections of a State and affected Indian tribes at any stage of the planning, siting, development, construction, operation, or closure of such a facility within such State through negotiation, arbitration, or other appropriate mechanisms.

PARTICIPATION OF INDIAN TRIBES

SEC. 118. (a) PARTICIPATION OF INDIAN TRIBES IN REPOSITORY SITING DECISIONS.—Upon the submission by the President to the Congress of a recommendation of a site for a repository located on the reservation of an affected Indian tribe, the governing body of such Indian tribe may disapprove the site designation and submit to the Congress a notice of disapproval. The governing body of such Indian tribe may submit such a notice of disapproval to the Congress not later than the 60 days after the date that the President recommends such site to the Congress under section 114. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the governing body of such Indian tribe disapproved the recommended repository site involved.

(b) FINANCIAL ASSISTANCE.—(1) The Secretary shall make grants to each affected Tribe notified under section 116(a) for the purpose of participating in activities required by section 117 or authorized by written agreement entered into pursuant to section 117(c). Any salary or travel expense that would ordinarily be incurred by such Tribe, may not be considered eligible for funding under this paragraph.

(2)(A) The Secretary shall make grants to each affected Indian tribe where a candidate site for a repository is approved under section 112(c). Such grants may be made to each such Indian tribe only for purposes of enabling such Indian tribe—

(i) to review activities taken under this subtitle with respect to such site for purposes of determining any potential economic, social, public health and safety, and environmental impacts of such repository on the reservation and its residents;

(ii) to develop a request for impact assistance under paragraph (2);

(iii) to engage in any monitoring, testing, or evaluation activities with respect to site characterization programs with regard to such site;

(iv) to provide information to the residents of its reservation regarding any activities of such Indian tribe, the Secretary, or the Commission with respect to such site; and

(v) to request information from, and make comments and recommendations to, the Secretary regarding any activities taken under this subtitle with respect to such site.

(B) The amount of funds provided to any affected Indian tribe under this paragraph in any fiscal year may not exceed 100 percent of the costs incurred by such Indian tribe with respect to the activities described in clauses (i) through (v) of subparagraph (A). Any salary or travel expense that would ordinarily be incurred by such Indian tribe may not be considered eligible for funding under this paragraph.

(3)(A) The Secretary shall provide financial and technical assistance to any affected Indian tribe requesting such assistance and where there is a site with respect to which the Commission has authorized construction of a repository. Such assistance shall be designed to mitigate the impact on such Indian tribe of the development of such repository. Such assistance to such Indian tribe shall commence within 6 months following the granting by the Commission of a construction authorization for such repository and following the initiation of construction activities at such site.

(B) Any affected Indian tribe desiring assistance under this paragraph shall prepare and submit to the Secretary a report on any economic, social, public health and safety,

and environmental impacts that are likely as a result of the development of a repository at a site on the reservation of such Indian tribe. Such report shall be submitted to the Secretary following the completion of site characterization activities at such site and before the recommendation of such site to the President by the Secretary for application for a construction authorization for a repository. As soon as practicable following the granting of a construction authorization for such repository, the Secretary shall seek to enter into a binding agreement with the Indian tribe involved setting forth the amount of assistance to be provided to such Indian tribe under this paragraph and the procedures to be followed in providing such assistance.

(4) The Secretary shall grant to each affected Indian tribe where a site for a repository is approved under section 112(c) an amount each fiscal year equal to the amount such Indian tribe would receive where it authorized to tax site characterization activities at such site, and the development and operation of such repository, as such Indian tribe taxes the other commercial activities occurring on such reservation. Such grants shall continue until such time as all such activities, development, and operation are terminated at such site.

(5) An affected Indian tribe may not receive any grant under paragraph (1) after the expiration of the 1-year period following—

(i) the date on which the Secretary notifies such Indian tribe of the termination of site characterization activities at the candidate site involved on the reservation of such Indian tribe;

(ii) the date on which such site is disapproved under section 115; or

(iii) the date on which the Commission disapproves an application for a construction authorization for a repository at such site;

whichever occurs first, unless there is another candidate site on the reservation of such Indian tribe that is approved under section 112(c) and with respect to which the actions described in clauses (i), (ii), and (iii) have not been taken.

(B) An affected Indian tribe may not receive any further assistance under paragraph (2) with respect to a site if repository construction activities at such site are terminated by the Secretary or if such activities are permanently enjoined by any court.

(C) At the end of the 2-year period beginnning on the effective date of any license to receive and possess for a repository at a site on the reservation of an affected Indian tribe, no Federal funds shall be made available under paragraph (1) or (2) to such Indian tribe, except for—

(i) such funds as may be necessary to support activities of such Indian tribe related to any other repository where a license to receive and possess has not been in effect for more than 1 year; and

(ii) such funds as may be necessary to support activities of such Indian tribe pursuant to agreements or contracts for impact assistance entered into, under paragraph (2), by such Indian tribe with the Secretary during such 2-year period.

(5) Financial assistance authorized in this subsection shall be made out of amounts held in the Nuclear Waste Fund established in section 302.

JUDICIAL REVIEW OF AGENCY ACTIONS

SEC. 119. (a) JURISDICTION OF UNITED STATES COURTS OF APPEALS.—(1) Except for review in the Supreme Court of the United States, the United States courts of appeals shall have original and exclusive jurisdiction over any civil action—

(A) for review of any final decision or action of the Secretary, the President, or the Commission under this subtitle;

(B) alleging the failure of the Secretary, the President, or the Commission to make any decision, or take any action, required under this subtitle;

(C) challenging the constitutionality of any decision made, or action taken, under any provision of this subtitle;

(D) for review of any environmental impact statement prepared pursuant to the National Environmental Policy Act or 1969 (42 U.S.C. 4321 et seq.) with respect to any action under this subtitle, or as required under section 135(c)(1), or alleging a failure to prepare such statement with respect to any such action;

(E) for review of any environmental assessment prepared under section 135(c)(2); or

(F) for review of any research and development activity under title II.

(2) The venue of any proceeding under this section shall be in the judicial circuit in which the petitioner involved resides or has its principal office, or in the United States Court of Appeals for the District of Columbia.

(c) DEADLINE FOR COMMENCING ACTION.—A civil action for judicial review described under subsection (a)(1) may be brought not later than the 180th day after the date of the decision or action or failure to act involved, as the case may be, except that if a party shows that he did not know of the decision or action complained of (or of the failure to act), and that a reasonable person acting under the circumstances would not have known, such party may bring a civil action not later than the 180th day after the date such party acquired actual or constructive knowledge of such decision, action, or failure to act.

EXPEDITED AUTHORIZATIONS

SEC. 120. (a) ISSUANCE OF AUTHORIZATIONS.—(1) To the extent that the taking of any action related to the site characterization of a site or the construction or initial operation of a repository under this substitle requires a certificate, right-of-way, permit, lease, or other authorization from a Federal aency or officer, such agency or officer shall issue or grant any such authorization at the earliest practicable date, to the extent permitted by the applicable provisions of law administered by such agency or officer. All actions of a Federal agency or officer with respect to consideration of applications or requests for the issuance or grant of any such authorization shall be expedited, and any such application or request shall take precedence over any similar applications or requests not related to such repositories.

(2) The provisions of paragraph (1) shall not apply to any certificate, right-of-way, permit, lease, or other authorization issued or granted by, or requested from, the Commission.

(b) TERMS OF AUTHORIZATION.—Any authorization issued or granted pursuant to subsection (a) shall include such terms and conditions as may be required by law, and may include terms and conditions permitted by law.

CERTAIN STANDARDS AND CRITERIA

SEC. 121. (a) ENVIRONMENTAL PROTECTION AGENCY STANDARDS.—Not later than 1 year after the date of the enactment of this Act, the Administrator, pursuant to authority under other provisions of law, shall, by rule, promulgate generally applicable standards for protection of the general environment from offsite releases from radioactive material in repositories.

(b) COMMISSION REQUIREMENTS AND CRITERIA.—(1)(A) Not later than January 1, 1984, the Commission, pursuant to authority under other provisions of law, shall, by rule, promulgate technical requirements and criteria that it will apply, under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et. seq.) and the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.), in approving or disapproving—

(i) applications for authorization to construct repositories;

(ii) applications for licenses to receive and possess spent nuclear fuel and high-level radioactive waste in such repositories; and

(iii) applications for authorization for closure and decommissioning of such repositories.

(B) Such criteria shall provide for the use of a system of multiple barriers in the design of the repository and shall include such restrictions on the retrievability of the solidified high-level radioactive waste and spent fuel emplaced in the repository as the Commission deems appropriate.

(C) Such requirements and criteria shall not be inconsistent with any comparable standards promulgated by the Administrator under subsection (a).

(2) For purposes of this Act, nothing in this section shall be construed to prohibit the Commission from promulgating requirements and criteria under paragraph (1) before the Administrator promulgates standards under subsection (a). If the Administrator promulgates standards under subsection (a) after requirements and criteria are promulgated by the Commission under paragraph (1), such requirements and criteria shall be revised by the Commission if necessary to comply with paragraph (1)(C).

"(c) ENVIRONMENTAL IMPACT STATEMENT.—The promulgation of standards or criteria in accordance with the provisions of this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2XC)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.".

DISPOSAL OF SPENT NUCLEAR FUEL

SEC. 122. Notwithstanding any other provision of this subtitle, any repository constructed on a site approved under this subtitle shall be designed and constructed to permit the retrieval of any spent nuclear fuel placed in such repository, during an appropriate period of operation of the facility, for any reason pertaining to the public health and safety, or the environment, or for the purpose of permitting the recovery of the economically valuable contents of such spent fuel. The Secretary shall specify the appropriate period of retrievability with respect to any respository at the time of design of such repository, and such aspect of such repository shall be subject to approval or disapproval by the Commission as part of the construction authorization process under subsections (b) through (d) of section 114.

TITLE TO MATERIAL

SEC. 123. Delivery, and acceptance by the Secretary, of any high-level radioactive waste or spent nuclear fuel for a repository

constructed under this subtitle shall constitute a transfer to the Secretary of title to such waste or spent fuel.

CONSIDERATION OF EFFECT OF ACQUISITION OF WATER RIGHTS

SEC. 124. The Secretary shall give full consideration to whether the development, construction, and operation of a repository may require any purchase or other acquisition of water rights that will have a significant adverse effect on the present or future development of the area in which such repository is located. The Secretary shall mitigate any such adverse effects to the maximum extent practicable.

TERMINATION OF CERTAIN PROVISIONS

SEC. 125. Sections 119 and 120 shall cease to have effect at such time as a repository developed under this subtitle is licensed to receive and possess high-level radioactive waste and spent nuclear fuel.

SUBTITLE B—INTERIM STORAGE PROGRAM

FINDINGS AND PURPOSES

SEC. 131. (a) FINDINGS.—The Congress finds that—

(1) the persons owning and operating civilian nuclear power reactors have the primary responsibility for providing interm storage of spent nuclear fuel from such reactors, by maximizing, to the extent practical, the effective use of existing storage facilities at the site of each civilian nuclear power reactor, and by adding new onsite storage capacity in a timely manner where practical;

(2) the Federal Government has the responsibility to encourage and expedite the effective use of existing storage facilities and the addition of needed new storage capacity at the site of each civilian nuclear power reactor; and

(3) the Federal Government has the responsibility to provide, in accordance with the provisions of this subtitle, not more than 1,900 metric tons of capacity for interim storage of spent nuclear fuel for civilian nuclear power reactors that cannot reasonably provide adequate storage capacity at the sites of such reactors when needed to assure the continued, orderly operation of such reactors.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to provide for the utilization of available spent nuclear fuel pools at the site of each civilian nuclear power reactor to the extent practical and the addition of new spent nuclear fuel storage capacity where practical at the site of such reactor; and

(2) to provide, in accordance with the provisions of this subtitle, for the establishment of a federally owned and operated system for the interim storage of spent nuclear fuel at one or more facilities owned by the Federal Government with not more than 1,900 metric tons of capacity to prevent disruptions in the orderly operation of any civilian nuclear power reactor that cannot reasonably provide adequate spent nuclear fuel storage capacity at the site of such reactor when needed.

AVAILABLE CAPACITY FOR INTERIM STORAGE OF SPENT NUCLEAR FUEL

SEC. 132. The Secretary, the Commission, and other authorized Federal officials shall each take such actions as such official considers necessary to encourage and expedite the effective use of available storage, and necessary additional storage, at the site of each civilian nuclear power reactor consistent with—

(1) the protection of the public health and safety, and the environment;

(2) economic considerations;

(3) continued operation of such reactor;

(4) any applicable provisions of law.; and

(5) the views of the population surrounding such powerplant.

INTERIM AT REACTOR STORAGE

SEC. 133. The Commission shall, by rule, establish procedures for the licensing of any technology approved by the Commission under section 219(a) for use at the site of any civilian nuclear power reactor. The establishment of such procedures shall not preclude the licensing, under any applicable procedures or rules of the Commission in effect prior to such establishment, of any technology for the storage of civilian spent nuclear fuel at the site of any civilian nuclear power reactor.

LICENSING OF FACILITY EXPANSIONS AND TRANSSHIPMENTS

SEC. 134. (a) ORAL ARGUMENT.—In any Commission hearing under section 189 of the Atomic Energy Act of 1954 (42 U.S.C. 2239) on an application for a license, or for an amendment to an existing license, filed after the date of the enactment of this Act, to expand the spent nuclear fuel storage capacity at the site of a civilian nuclear power reactor, through the use of high-density fuel storage racks, fuel rod compaction, the transshipment of spent nuclear fuel to another civilian nuclear power reactor within the same utility system, the construction of additional spent nuclear fuel pool capacity or dry storage capacity, or by other means, the Commission shall, at the request of any party, provide an opportunity for oral argument with respect to any matter which the Commission determines to be in controversy among the parties. The oral argument shall be preceded by such discovery procedures as the rules of the Commission shall provide. The Commission shall require each party, including the Commission staff, to submit in written form, at the time of the oral argument, a summary of the facts, data, and arguments upon which such party proposes to rely that are known at such time to such party. Only facts and data in the form of sworn testimony or written submission may be relied upon by the parties during oral argument. Of the materials that may be submitted by the parties during oral argument, the Commission shall only consider those facts and data that are submitted in the form of sworn testimony or written submission.

(b) ADJUDICATORY HEARING.—(1) At the conclusion of any oral argument under subsection (a), the Commission shall designate any disputed question of fact, together with any remaining questions of law, for resolution in an adjudicatory hearing only if it determines that—

(A) there is a genuine and substantial dispute of fact which can only be resolved with sufficient accuracy by the introduction of evidence in an adjudicatory hearing; and

(B) the decision of the Commission is likely to depend in whole or in part on the resolution of such dispute.

(2) In making a determination under this subsection, the Commission—

(a) shall designate in writing the specific facts that are in genuine and substantial dispute, the reasons why the decision of the agency is likely to depend on the resolution of such facts, and the reason why an adjudicatory hearing is likely to resolve the dispute; and

(B) shall not consider—

(i) any issue relating to the design, construction, or operation of any civilian nuclear power reactor already licensed to operate at such site, or any civilian nuclear power reactor for which a construction permit has been granted at such site, unless the Commission determines that any such issue substantially affects the design, construction, or operation of the facility or activity for which such license application, authorization, or amendment is being considered; or

(ii) any siting or design issue fully considered and decided by the Commission in connection with the issuance of a construction permit or operating license for a civilian nuclear power reactor at such site, unless (I) such issue results from any revision of siting or design criteria by the Commission following such decision; and (II) the Commission determines that such issue substantially affects the design, construction, or operation of the facility or activity for which such license application, authorization, or amendment is being considered.

(3) The provisions of paragraph (2)(B) shall apply only with respect to licenses, authorizations, or amendments to licenses or authorizations, applied for under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) before December 31, 2005.

(c) JUDICIAL REVIEW.—No court shall hold unlawful or set aside a decision of the Commission in any proceeding described in subsection (a) because of a failure by the Commission to use a particular procedure pursuant to this section unless—

(1) an objection to the procedure used was presented to the Commission in timely fashion or there are extraordinary circumstances that excuse the failure to present a timely objection; and

(2) the court finds that such failure has precluded a fair consideration and informed resolution of a significant issue of the proceeding taken as a whole.

STORAGE OF SPENT NUCLEAR FUEL

SEC. 135. (a) STORAGE CAPACITY.—(1) Subject to section 8, the Secretary shall provide, in accordance with paragraph (5), not more than 1,900 metric tons of capacity for the storage of spent nuclear fuel from civilian nuclear power reactors. Such storage capacity shall be provided through any one or more of the following methods, used in any combination determined by the Secretary to be appropriate:

(A) use of available capacity at one or more facilities owned by the Federal Government on the date of the enactment of this Act, including the modification and expansion of any such facilities, if the Commission determines that such use will adequately protect the public health and safety, except that such use shall not—

(i) render such facilities subject to licensing under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) or the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.); or

(B) acquisition of any modular or mobile spent nuclear fuel storage equipment, including spent nuclear fuel storage casks, and provision of such equipment, to any person generating or holding title to spent nuclear fuel, at the site of any civilian nuclear power reactor operated by such person or at any Federal site;

(C) construction of storage capacity at any site of a civilian nuclear power reactor.

(2) Storage capacity authorized by paragraph (1) shall not be provided at any Federal or non-Federal site within which there is a candidate site for a repository.

(3) In selecting methods of providing storage capacity under paragraph (1), the Secre-

tary shall consider the timeliness of the availability of each such method and shall seek to minimize the transportation of spent nuclear fuel, the public health and safety impacts, and the costs of providing such storage capacity.

(4) In providing storage capacity through any method described in paragraph (1), the Secretary shall comply with any applicable requirements for licensing or authorization of such method, except as provided in paragraph (1)(A)(i).

(5) The Secretary shall ensure that storage capacity is made available under paragraph (1) when needed, as determined on the basis of the storage needs specified in contracts entered into under section 136(a), and shall accept upon request any spent nuclear fuel as covered under such contracts.

(6) For purposes of paragraph (1)(A), the term "facility" means any building or structure.

(b) CONTRACTS.—(1) Subject to the capacity limitation established in subsections (a)(1) and (d), the Secretary shall offer to enter into, and may enter into, contracts under section 136(a) with any person generating or owning spent nuclear fuel for purposes of providing storage capacity for such spent fuel under this section only if the Commission determines that—

(A) adequate storage capacity to ensure the continued orderly operation of the civilian nuclear power reactor at which such spent nuclear fuel is generated cannot reasonably be provided by the person owning and operating such reactor at such site, or at the site of any other civilian nuclear power reactor operated by such person, and such capacity cannot be made available in a timely manner through any method described in subparagraph (B); and

(B) such person is diligently pursuing licensed alternatives to the use of Federal storage capacity for the storage of spent nuclear fuel expected to be generated by such person in the future, including—

(i) expansion of storage facilities at the site of any civilian nuclear power reactor operated by such person;

(ii) construction of new or additional storage facilities at the site of any civilian nuclear power reactor operated by such person;

(iii) acquisition of modular or mobile spent nuclear fuel storage equipment, including spent nuclear fuel storage casks, for use at the site of any civilian nuclear power reactor operated by such person; and

(iv) transshipment to another civilian nuclear power reactor owned by such person.

(2) In making the determination described in paragraph (1)(A), the commission shall ensure maintenance of a full core reserve storage capability at the site of the civilian nuclear power reactor involved unless the Commission determines that maintenance of such capability is not necessary for the continued orderly operation of such reactor.

(3) The Commission shall complete the determinations required in paragraph (1) with respect to any request for storage capacity not later than 6 months after receipt of such request by the Commission.

(c) ENVIRONMENTAL REVIEW.—(1) The provision of 300 or more metric tons of storage capacity at any one Federal site under subsection (a)(1)(A) shall be considered to be a major Federal action requiring preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

(2)(A) The Secretary shall prepare, and make available to the public, an environmental assessment of the probable impacts of any provision of less than 300 metric tons of storage capacity at any one Federal site under subsection (a)(1)(A) that requires the modification or expansion of any facility at site, and a discussion of alternative activities that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an estimate of the amount of storage capacity to be made available at such site;

(ii) an evaluation as to whether the facilities to be used at such site are suitable for the provision of such storage capacity;

(iii) a description of activities planned by the Secretary with respect to the modification or expansion of the facilities to be used at such site;

(iv) an evaluation of the effects of the provision of such storage capacity at such site on the public health and safety, and the environment;

(v) a reasonable comparative evaluation of current information with respect to such site and facilities and other sites and facilities available for the provision of such storage capacity;

(vi) a description of any other sites and facilities that have been considered by the Secretary for the provision of such storage capacity; and

(vii) an assessment of the regional and local impacts of providing such storage capacity at such site, including the impacts on transportation.

(B) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code. Such judicial review shall be limited to the sufficiency of such assessment with respect to the items described in clauses (i) through (vii) of subparagraph (A).

(3) Judicial review of any environmental impact statement or environmental assessment prepared pursuant to this subsection shall be conducted in accordance with the provisions of section 119.

(d) REVIEW OF SITES.—(1) Upon deciding to provide an aggregate of 300 or more metric tons of storage capacity under section (a)(1) at any one site, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such decision.

(2)(A) During the 60-day period following receipt of such notification, such governor or legislature or governing body may disapprove the provision of 300 or more metric tons of storage capacity at the site involved and submit to the Congress a notice of such disapproval. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the provision of such storage capacity at such site was disapproved by such Governor or legislature or the governing body of such Indian tribe.

(B) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under subparagraph (A). In any case in which State law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(C) The authority of the Governor and legislature of each State under this paragraph shall not be applicable with respect to any site located on a reservation.

(3)(A) If any notice of disapproval is submitted to the Congress under paragraph (2), the proposed provision of 300 or more metric tons of storage capacity at the site involved shall be disapproved unless, during the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval, the Congress passes a resolution approving such proposed provision of storage capacity in accordance with the procedures established in this paragraph and subsections (d) through (f) of section 115 and such resolution thereafter becomes law. For purposes of this paragraph, the term "resolution" means a joint resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the provision of 300 or more metric tons of spent nuclear fuel storage capacity at the site located at ————, with respect to which a notice of disapproval was submitted by ———— on ————.". The first blank space in such resolution shall be filled with the geographic location of the site involved; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or affected Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the date of submission of such notice of disapproval.

(B) For purposes of the consideration of any resolution described in subparagraph (A), each reference in subsections (d) and (e) of section 115 to a resolution of repository siting approval shall be considered to refer to the resolution described in such subparagraph.

(e) LIMITATIONS—Any spent nuclear fuel stored under this section shall be removed from the storage site or facility involved as soon as practicable following the date on which a repository developed under this Act is available for disposal of such spent fuel

(f) REPORT.—The Secretary shall annually prepare and submit to the Congress a report on any plans of the Secretary for providing storage capacity under this section. Such report shall include a description of the specific manner of providing such storage selected by the Secretary, if any. The Secretary shall prepare and submit the first such report not later than 1 year after the date of the enactment of this Act.

(g) CRITERIA FOR DETERMINING ADEQUACY OF AVAILABLE STORAGE CAPACITY.—Not later than 90 days after the date of the enactment of this Act, the Commission pursuant to section 553 of the Administrative Procedures Act, shall propose, by rule, procedures and criteria for making the determination required by subsection (b) that a person owning and operating a civilian nuclear power reactor cannot reasonably provide adequate spent nuclear fuel storage capacity at the civilian nuclear power reactor site when needed to ensure the continued orderly operation of such reactor. Such criteria shall ensure the maintenance of a full core reserve storage capability at the site of such reactor unless the Commission determines that maintenance of such capability is not necessary for the continued orderly operation of such reactor. Such criteria shall identify the feasibility of reasonably provid-

ing such adequate nuclear fuel storage capacity, taking into account economic, technical, regulatory, and public health and safety factors, through the use of high-density fuel storage racks, fuel rod compaction, transshipment of spent nuclear fuel to another civilian nuclear power reactor within the same utility system, construction of additional spent nuclear fuel pool capacity, or such other technologies as may be approved by the Commission.

(h) APPLICATION.—Notwithstanding any other provision of law, nothing in this Act shall be construed to encourage, authorize, or require the private or Federal use, purchase, lease, or other acquisition of any storage facility located away from the site of any civilian nuclear power reactor and not owned by the Federal Government on the date of the enactment of this Act.

(i) COORDINATION WITH RESEARCH AND DEVELOPMENT PROGRAM.—To the extent available, and consistent with the provisions of this section, the Secretary shall provide spent nuclear fuel for the research and development program authorized in section 217 from spent nuclear fuel received by the Secretary for storage under this section. Such spent nuclear fuel shall not be subject to the provisions of subsection (e).

INTERIM STORAGE FUND

SEC. 136. (a) CONTRACTS.—During the period following the date of the enactment of this Act, but not later than January 1, 1990, the Secretary is authorized to enter into contracts with persons who generate or own spent nuclear fuel resulting from civilian nuclear activities for the storage of such spent nuclear fuel in any storage capacity provided under this subtitle: *Provided, however,* That the Secretary shall not enter into contracts for spent nuclear fuel in amounts in excess of the available storage capacity specified in section 135(a). Those contracts shall provide that the Federal Government will (1) take title at the civilian nuclear power reactor site, to such amounts of spent nuclear fuel from the civilian nuclear power reactor as the Commission determines cannot be stored onsite, (2) transport the spent nuclear fuel to a federally owned and operated interim away-from-reactor storage facility, and (3) store such fuel in the facility pending further processing, storage, or disposal. Each such contract shall (A) provide for payment to the Secretary of fees determined in accordance with the provisions of this section; and (B) specify the amount of storage capacity to be provided for the person involved.

(2) The Secretary shall undertake a study and, not later than 180 days after the date of the enactment of this Act, submit to the Congress a report, establishing payment charges that shall be calculated on an annual basis, commencing on or before January 1, 1984. Such payment charges and the calculation thereof shall be published in the Federal Register, and shall become effective not less than 30 days after publication. Each payment charge published in the Federal Register under this paragraph shall remain effective for a period of 12 months from the effective date as the charge for the cost of the interim storage of any spent nuclear fuel. The report of the Secretary shall specify the method and manner of collection (including the rates and manner of payment) and any legislative recommendations determined by the Secretary to be appropriate.

(3) Fees for storage under this subtitle shall be established on a nondiscriminatory basis. The fees to be paid by each person entering into a contract with the Secretary under this subsection shall be based upon an estimate of the pro rata costs of storage and related activities under this subtitle with respect to such person, including the acquisition, construction, operation, and maintenance of any facilities under this subtitle.

(4) The Secretary shall establish in writing criteria setting forth the terms and conditions under which such storage services shall be made available.

(5) Except as provided in sections 137, nothing in this or any other Act requires the Secretary, in carrying out the responsibilities of this section, to obtain a license or permit to possess or own spent nuclear fuel.

(b) LIMITATION.—No spent nuclear fuel generated or owned by any department of the United States referred to in section 101 or 102 of title 5, United States Code, may be stored by the Secretary in any storage capacity provided under this subtitle unless such department transfers to the Secretary, for deposit in the Interim Storage Fund, amounts equivalent to the fees that would be paid to the Secretary under the contracts referred to in this section if such spent nuclear fuel were generated by any other person.

(c) ESTABLISHMENT OF INTERIM STORAGE FUND.—There hereby is established in the Treasury of the United States a separate fund, to be known as the Interim Storage Fund. The Storage Fund shall consist of——

(1) all receipts, proceeds, and recoveries realized by the Secretary under subsection (a), (b), and (e), which shall be deposited in the Storage Fund immediately upon their realization;

(2) any appropriations made by the Congress to the Storage Fund; and

(3) any unexpended balances available on the date of the enactment of this Act for functions or activities necessary or incident to the interim storage of civilian spent nuclear fuel, which shall automatically be transferred to the Storage Fund on such date——

(d) USE OF STORAGE FUND.—The Secretary may make expenditures from the Storage Fund, subject to subsection (e), for any purpose necessary or appropriate to the conduct of the functions and activities of the Secretary, or the provision or anticipated provision of services, under this subtitle, including—

(1) the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any interim storage facility provided under this subtitle;

(2) the administrative cost of the interim storage program;

(3) the costs associated with acquisition, design, modification, replacement, operation, and construction of facilities at an interim storage site, consistent with the restrictions in section 135; and

(4) the cost of transportation of spent nuclear fuel.

(e) ADMINISTRATION OF STORAGE FUND.—The Secretary of the Treasury shall hold the Storage Fund and, after consultation with the Secretary, annually report to the Congress on the financial condition and operations of the Storage Fund during the preceding fiscal year.

(2) The Secretary shall submit the budget of the Storage Fund to the Office of Management and Budget triennially along with the budget of the Department of Energy submitted at such time in accordance with chapter 11 of title 31, United States Code. The budget of the Storage Fund shall consist of estimates made by the Secretary of expenditures from the Storage Fund and other relevant financial matters for the succeeding 3 fiscal years, and shall be included in the Budget of the United States Government. The Secretary may make expenditures from the Storage Fund, subject to appropriations which shall remain available until expended. Appropriations shall be subject to triennial authorization.

(3) If the Secretary determines that the Storage Fund contains at any time amounts in excess of current needs, the Secretary may request the Secretary of the Treasury to invest such amounts, or any portion of such amounts as the Secretary determines to be appropriate, in obligations of the United States—

(A) having maturities determined by the Secretary of the Treasury to be appropriate to the needs of the Storage Fund; and

(B) bearing interest at rates determined to be appropriate by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

(4) Receipts, proceeds, and recoveries realized by the Secretary under this section, and expenditures of amounts from the Storage Fund, shall be exempt from annual apportionment under the provisions of subchapter II of chapter 15 of title 31, United States Code.

(5) If at any time the moneys available in the Storage Fund are insufficient to enable the Secretary to discharge his responsibilities under this subtitle, the Secretary shall issue to the Secretary of the Treasury obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be agreed to by the Secretary and the Secretary of the Treasury. The total of such obligations shall not exceed amounts provided in appropriation Acts. Redemption of such obligations shall be made by the Secretary from moneys available in the Storage Fund. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the obligations under this paragraph. The Secretary of the Treasury shall purchase any issued obligations, and for such purpose the Secretary of Treasury is authorized is use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, and the purpose for which securities may be issued under such Act are extended to include any purchase of such obligations. The Secretary of the Treasury may at any time sell any of the obligations acquired by him under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of obligations under this paragraph shall be treated as public debt transactions of the United States.

(6) Any appropriations made available to the Storage Fund for any purpose described in subsection (d) shall be repaid into the general fund of the Treasury, together with interest from the date of availability of the appropriations until the date of repayment. Such interest shall be paid on the cumula-

tive amount of appropriations available to the Storage Fund, less the average undisbursed cash balance in the Storage Fund account during the fiscal year involved. The rate of such interest shall be determined by the Secretary of the Treasury taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States of comparable maturity. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest.

SEC. 137. (a) TRANSPORTATION.—

(1) Transportation of spent nuclear fuel under section 136(a) shall be subject to licensing and regulation by the Commission and by the Secretary of Transportation as provided for transportation of commercial spent nuclear fuel under existing law.

(2) The Secretary, in providing for the transportation of spent nuclear fuel under this Act, shall utilize by contract private industry to the fullest extent possible in each aspect of such transportation. The Secretary shall use direct Federal services for such transportation only upon a determination of the Secretary of Transportation, in consultation with the Secretary, that private industry is unable or unwilling to provide such transportation services at reasonable cost.

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

MONITORED RETRIEVABLE STORAGE

SEC. 141. (a) FINDINGS.—The Congress finds that—

(1) the Federal Government has the responsibility to provide for long-term storage of high-level radioactive waste and spent nuclear fuel;

(2) the executive branch and the Congress should proceed as expeditiously as possible to consider fully a proposal for construction of one or more monitored retrievable storage facilities to provide such long-term storage;

(3) the Federal Government has the responsibility to ensure that such facilities are available with sufficient capacity when needed;

(4) the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities have primary responsibility to provide for, and the responsibility to pay the costs of, the long-term storage of such waste and spent fuel until such waste and spent fuel is accepted by the Secretary in accordance with the provisions of this title; and

(5) disposal of high-level radioactive waste and spent nuclear fuel in a repository developed under this Act should proceed regardless of any construction of a monitored retrievable storage facility pursuant to this section.

(b) SUBMISSION OF PROPOSAL BY SECRETARY.—

On or before June 1, 1985, the Secretary shall complete a detailed study of the need for and feasibility of, and shall submit to the Congress a proposal for, the construction of one or more monitored retrievable storage facilities for high-level radioactive waste and spent nuclear fuel. Each such facility shall be designed—

(A) to accommodate spent nuclear fuel and high-level radioactive waste resulting from civilian nuclear activities;

(B) to permit continuous monitoring management, and maintenance of such spent fuel and waste for the foreseeable future;

(C) to provide for the ready retrieval of such spent fuel and waste for further processing or disposal; and

(D) to safely store such spent fuel and waste as long as may be necessary by maintaining such facility through appropriate means, including any required replacement of such facility.

(2) Such proposal shall include—

(A) the establishment of a Federal program for the siting, development, construction, and operation of facilities capable of safely storing high-level radioactive waste and spent nuclear fuel, which facilities are to be licensed by the Commission;

(B) a plan for the funding of the construction and operation of such facilities, which plan shall provide that the costs of such activities shall be borne by the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities;

(C) site-specific designs, specifications, and cost estimates sufficient to (i) solicit bids for the construction of the first such facility; (ii) support congressional authorization of the construction of such facility; and (iii) enable completion and operation of such facility as soon as practicable following congressional authorization of such facility; and

(D) a plan for integrating facilities constructed pursuant to this section with other storage and disposal facilities authorized in this Act.

(3) In formulating such proposal, the Secretary shall consult with the Commission and the Administrator, and shall submit their comments on such proposal to the Congress at the time such proposal is submitted.

(4) The proposal shall include, for the first such facility, at least five alternative combinations of proposed sites and facility designs consistent with the criteria of paragraph (b)(1). The Secretary shall recommend the combination among the alternatives that the Secretary deems preferable. The environmental assessment under subsection (c) shall include a full analysis of the relative advantages and disadvantages of all five such alternative combinations of proposed sites and proposed facility designs.

(c) ENVIRONMENTAL IMPACT STATEMENTS.—(1) Preparation and submission to the Congress of the proposal required in this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the national Environmental Policy Act of 1969 (42 U.S.C. (2)(C)). The Secretary shall prepare, in accordance with regulations issued by the Secretary implementing such Act, an environmental assessment with respect to such proposal. Such environmental assessment shall be based upon available information regarding alternative technologies for the storage of spent nuclear fuel and high-level radioactive waste. The Secretary shall submit such environmental assessment to the Congress at the time such proposal is submitted.

(2) If the Congress by law, after review of the proposal submitted by the Secretary under subsection (b), specifically authorizes construction of a monitored retrievable storage facility, the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall apply with respect to construction of such facility, except that any environmental impact statement prepared with respect to such facility shall not be required to consider the need for such facility, alternate sites for such facility, or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(d) LICENSING.—Any facility authorized pursuant to this section shall be subject to licensing under section 202(3) of the Energy Reorganization Act of 1974 (42 U.S.C. 5842(3)). In reviewing the application filed by the Secretary for licensing of the first such facility, the Commission may not consider the need for such facility, alternate sites for such facility, or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(e) CLARIFICATION.—(1) Nothing in this section limits the consideration of alternative facility designs consistent with the criteria of paragraph (b)(1) in any environmental impact statement, or in any licensing procedure of the Commission, with respect to any monitored, retrievable facility authorized pursuant to this section.

(2) If Congress by law after review of the proposal submitted by the Secretary under subsection (b), authorizes construction of a monitored retrievable storage facility without specifying the site for such facility, any environmental impact statement, and any licensing procedure of the Commission, with respect to the facility shall consider alternate sites to the site selected for the facility pursuant to law.

(c) IMPACT ASSISTANCE.—(1) Upon receipt by the Secretary of congressional authorization to construct a facility described in subsection (b), the Secretary shall commence making annual impact aid payments to appropriate units of general local government in order to mitigate any social or economic impacts resulting from the construction and subsequent operation of any such facility within the jurisdictional boundaries of any such unit.

(2) Payments made available to units of general local government under this subsection shall be—

(A) allocated in a fair and equitable manner, with priority given to units of general local government determined by the Secretary to be most severely affected; and

(B) utilized by units of general local government only for planning, construction, maintenance, and provision of public services related to the siting of such facility.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines are necessary to ensure achievement of the purposes of this subsection. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Such payments shall be made available entirely from funds held in the Nuclear Waste Fund established in this Act and shall be available only to the extent provided in advance in appropriation Acts.

(5) The Secretary may consult with appropriate units of general local government in advance of commencement of construction of any such facility in an effort to determine the level of payments each such unit is eligible to receive under this subsection.

(f) LIMITATION.—No monitored retrievable storage facility developed pursuant to this section may be constructed in any State in which there is located any site approved for site characterization under section 112. No repository may be developed under this Act in any State in which there is located any monitored retrievable storage facility developed pursuant to this section.

(g) PARTICIPATION OF STATES AND INDIAN TRIBES.— Any facility authorized pursuant to this section shall be subject to the provisions of sections 115, 116(a), 116(b), 116(d), 117 and 118. For purposes of carrying out the provisions of this subsection, any refer-

ence in sections 115 through 118 to a repository shall be considered to refer to a monitored retrievable storage facility.

SUBTITLE D—LOW-LEVEL RADIOACTIVE WASTE

FINANCIAL ARRANGEMENTS FOR LOW-LEVEL RADIOACTIVE WASTE SITE CLOSURE

SEC. 151. (a) FINANCIAL ARRANGEMENTS.—(1) The Commission shall establish by rule, regulation, or order, after public notice, and in accordance with section 181 of the Atomic Energy Act of 1954 (42 U.S.C. 2231), such standards and instructions as the Commission may deem necessary or desirable to ensure in the case of each license for the disposal of low-level radioactive waste that an adequate bond, surety, or other financial arrangement (as determined by the Commission) will be provided by a licensee to permit completion of all requirements established by the Commission for the decontamination, decommissioning, site closure, and reclamation of sites, structures, and equipment used in conjunction with such low-level radioactive waste. Such financial arrangements shall be provided and approved by the Commission, or, in the case of sites within the boundaries of any agreement State under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021), by the appropriate State or State entity, prior to issuance of licenses for low-level radioactive waste disposal or, in the case of licenses in effect on the date of the enactment of this Act, prior to termination of such licenses.

(2) If the Commission determines that any long-term maintenance or monitoring, or both, will be necessary at a site described in paragraph (1), the Commission shall ensure before termination of the license involved that the licensee has made available such bonding, surety, or other financial arrangements as may be necessary to ensure that any necessary long-term maintenance or monitoring needed for such site will be carried out by the person having title and custody for such site following license termination.

(b) TITLE AND CUSTODY.—(1) The Secretary shall have authority to assume title and custody of low-level radioactive waste and the land on which such waste is disposed of, upon request of the owner of such waste and land and following termination of the license issued by the Commission for such disposal, if the Commission determines—

(A) the requirements of the Commission for site closure, decommissioning, and decontamination have been met by the licensee involved and that such licensee is in compliance with the provisions of subsection (a);

(B) such title and custody will be transferred to the Secretary without cost to the Federal Government; and

(C) Federal ownership and management of such site is necessary or desirable in order to protect the public health and safety, and the environment.

(2) If the Secretary assumes title and custody of any such waste and land under this subsection, the Secretary shall maintain such waste and land in a manner that will protect the public health and safety, and the environment.

(c) SPECIAL SITES.—If the low-level radioactive waste involved is the result of a licensed activity to recover zirconium, hafnium, and rare earths from source material, the Secretary, upon request of the owner of the site involved, shall assume title and custody of such waste and the land on which it is disposed when such site has been decontaminated and stabilized in accordance with the requirements established by the Commission and when such owner has made adequate financial arrangements approved by the Commission for the long-term maintenance and monitoring of such site.

TITLE II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION REGARDING DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

PURPOSE

SEC. 211. It is the purpose of this title—

(1) to provide direction to the Secretary with respect to the disposal of high-level radioactive waste and spent nuclear fuel;

(2) to authorize the Secretary, pursuant to this Title,

(A) to provide for the construction, operation, and maintenance of a deep geologic test and evaluation facility; and

(B) to provide for a focused and integrated high-level radioactive waste and spent nuclear fuel research and development program, including the development of a test and evaluation facility to carry out research and provide an integrated demonstration of the technology for deep geologic disposal of high-level radioactive waste, and the development of the facilities to demonstrate dry storage of spent nuclear fuel; and

(3) to provide for an improved cooperative role between the Federal Government and States affected Indian tribes, and units of general local government in the siting of a test and evaluation facility.

APPLICABILITY

SEC. 212. The provisions of this title are subject to section 8 and shall not apply to facilities that are used for the disposal of high-level radioactive waste, low-level radioactive waste, transuranic waste, or spent nuclear fuel resulting from atomic energy defense activities.

IDENTIFICATION OF SITES

SEC. 213. (a) GUIDELINES.—Not later than 6 months after the date of the enactment of this Act and notwithstanding the failure of other agencies to promulage standards pursuant to applicable law, the Secretary shall; in consultation with the Commission, the Director of the Geological Survey, the Administrator, the Council on Environmental Quality, and such other Federal agencies as the Secretary considers appropriate, is authorized to issue, pursuant to section 553 of title 5, United States Code, general guidelines for the selection of a site for a test and evaluation facility. Under such guidelines the Secretary shall specify factors that qualify or disqualify as site for development as a test and evaluation facility, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall require the Secretary to consider the various geologic media in which the site for a test and evaluation facility may be located and, to the extent practicable, to idenify sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering and selecting sites under this title.

(b) SITE IDENTIFICATION BY THE SECRETARY.—(1) Not later than 1 year after the date on the enactment of this Act, and following promulgation of guidelines under subsection (a), the Secretary is authorized to identify 3 or more sites, at least 2 of which shall be in different geologic media in the continental United States, and at least 1 of which shall be in media other than salt. Subject to Commission requirements, the Secretary shall give preference to sites for the test and evaluation facility in media possessing geochemical characteristics that retard aqueous transport of radionuclides. In order to provide a greater possible protection of public health and safety as operating experience is gained at the test and evaluation facility, and with the exception of the primary areas under review by the Secretary on the date of the enactment of this Act for the location of a test and evaluation facility or repository, all sites identified under this subsection shall be more than 15 statute miles from towns having a population of greater than 1,000 persons as determined by the most recent census unless such sites contain high-level radioactive waste prior to identification under this title. Each identification of a site shall include a detailed statement of the basis for such identification and of the probable impacts of the siting research activities planned for such site, and a discussion of alternative activities relating to siting research that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(A) an evaluation by the Secretary as to whether such site is suitable for siting research under the guidelines established under subsection (a);

(B) an evaluation by the Secretary of the effects of the siting research activities at such site on the public health and safety and the environment;

(C) a reasonable comparative evaluation by the Secretary of such site with other sites and locations that have been considered;

(D) a description of the decision process by which such site was recommended; and

(E) an assessment of the regional and local impacts of locating the proposed test and evaluation facility at such site.

(2) When the Secretary identifies a site, the Secretary shall as soon as possible notify the Governor of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, of such identification and the basis of such identification. Additional sites for the location of the test and evaluation facility authorized in section 302(d) may be identified after such 1 year period, following the same procedure as if such sites had been identified within such period.

SITING RESEARCH AND RELATED ACTIVITIES

SEC. 214. (a) IN GENERAL.—Not later than 30 months after the date on which the Secretary completes the identification of sites under section 213, the Secretary is authorized to complete sufficient evaluation of 3 sites to select a site for expanded siting research activities and for other activities under section 218. The Secretary is authorized to conduct such preconstruction activities relative to such site selection for the test and evaluation facility as he deems appropriate. Additional sites for the location of the test and evaluation facility authorized in section 302(d) may be evaluated after such 30-month period, following the same procedures as if such sites were to be evaluated within such period.

(b) PUBLIC MEETINGS AND ENVIRONMENTAL ASSESSMENT.—Not later than 6 months after

the date on which the Secretary completes the identification of sites under section 213, and before beginning siting research activities, the Secretary shall hold at least 1 public meeting in the vicinity of each site to inform the residents of the area of the activities to be conducted at such site and to receive their views.

(c) RESTRICTIONS.—Except as provided in section 218 with respect to a test and evaluation facility, in conducting siting research activities pursuant to subsection (a)—

(1) the Secretary shall use the minimum quantity of high-level radioactive waste or other radioactive materials, if any, necessary to achieve the test or research objectives;

(2) the Secretary shall ensure that any radioactive material used or placed on a site be fully retrievable; and

(3) upon termination of siting research activities at a site for any reason, the Secretary shall remove any radioactive material at or in the site as promptly as practicable.

(d) TITLE TO MATERIAL.—The Secretary may take title, in the name of the Federal Government, to the high-level radioactive waste, spent nuclear fuel, or other radioactive material emplaced in a test and evaluation facility. If the Secretary takes title to any such material, the Secretary shall enter into the appropriate financial arrangements described in subsections (a) or (b) of section 302 for the disposal of such material.

TEST AND EVALUATION FACILITY SITING REVIEW AND REPORTS

SEC. 215. (a) CONSULTATION AND COOPERATION.—The Governor of a State, or the governing body of an affected Indian tribe, notified of a site identification under section 213 shall have the right to participate in a process of consultation and cooperation as soon as the site involved has been identified pursuant to such section and throughout the life of the test and evaluation facility. For purposes of this section, the term "process of consultation and cooperation" means a methodology—

(1) by which the Secretary—

(A) keeps the Governor or governing body involved fully and currently informed about any potential economic or public health and safety impacts in all stages of the siting, development, construction, and operation of a test and evaluation facility;

(B) solicits, receives, and evaluates concerns and objections of such Governor or governing body with regard to such test and evaluation facility on an ongoing basis; and

(C) works diligently and cooperatively to resolve such concerns and objections; and

(2) by which the State or affected Indian tribe involved can exercise reasonable independent monitoring and testing of onsite activities related to all stages of the siting, development, construction and operation of the test and evaluation facility, except that any such monitoring and testing shall not unreasonably interfere with onsite activities.

(b) WRITTEN AGREEMENTS.—The Secretary shall enter into written agreements with the Governor of the State in which an identified site is located or with the governing body of any affected Indian tribe where an identified site is located in order to expedite the consultation and cooperation process. Any such written agreement shall specify—

(1) procedures by which such Governor or governing body may study, determine, comment on, and make recommendations with regard to the possible health, safety, and economic impacts of the test and evaluation facility;

(2) procedures by which the Secretary shall consider and respond to comments and recommendations made by such Governor or governing body, including the period in which the Secretary shall so respond;

(3) the documents the Department is to submit to such Governor or governing body, the timing for such submissions, the timing for such Governor or governing body to identify public health and safety concerns and the process to be followed to try to eliminate those concerns,

(4) procedures by which the Secretary and either such Governor or governing body may review or modify the agreement periodically; and

(5) procedures for public notification of the procedures specified under subparagraphs (A) through (D).

(c) LIMITATION.—Except as specifically provided in this section, nothing in this title is intended to grant any State or affected Indian tribe any authority with respect to the siting, development, or loading of the test and evaluation facility.

FEDERAL AGENCY ACTIONS

SEC. 216. (a) COOPERATION AND COORDINATION.—Federal agencies shall assist the Secretary by cooperating and coordinating with the Secretary in the preparation of any necessary reports under this title and the mission plan under section 301.

(b) ENVIRONMENTAL REVIEW.—(1) No action of the Secretary or any other Federal agency required by this title or section 301 with respect to a test and evaluation facility to be taken prior to the initiation of onsite construction of a test and evaluation facility shall require the preparation of an environmental impact statement under section 102(2)(C) of the Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require the preparation of environmental reports, except as otherwise specifically provided for in this title.

(2) The Secretary and the heads of all other Federal agencies shall, to the maximum extent possible, avoid duplication of efforts in the preparation of reports under the National Environmental Policy Act of 1969 (42 U.S.C. et seq.).

RESEARCH AND DEVELOPMENT ON DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

SEC. 217. (a) PURPOSE.—Not later than 64 months after the date of the enactment of this Act, the Secretary is authorized to, to the extent practicable, begin at a site evaluated under section 214, as part of and as an extension of siting research activities of such site under such section, the mining and construction of a test and evaluation facility. Prior to the mining and construction of such facility, the Secretary shall prepare an environmental assessment. The purpose of such facility shall be—

(1) to supplement and focus the repository site characterization process;

(2) to provide the conditions under which known technological components can be integrated to demonstrate a functioning repository-like system;

(3) to provide a means of identifying, evaluating, and resolving potential repository licensing issues that could not be resolved during the siting research program conducted under section 212;

(4) to validate, under actual conditions, the scientific models used in the design of a repository;

(5) to refine the design and engineering of repository components and systems and to confirm the predicted behavior of such components and systems;

(6) to supplement the siting data, the generic and specific geological characteristics developed under section 214 relating to isolating disposal materials in the physical environment of a repository;

(7) to evaluate the design concepts for packaging, handling, and emplacement of high-level radioactive waste and spent nuclear fuel at the design rate; and

(8) to establish operating capability without exposing workers to excessive radiation.

(b) DESIGN.—The Secretary shall design each test and evaluation facility—

(1) to be capable of receiving not more than 100 full-sized canisters of solidified high-level radioactive waste (which canisters shall not exceed an aggregate weight of 100 metric tons), except that spent nuclear fuel may be used instead of such waste if such waste cannot be obtained under reasonable conditions;

(2) to permit full retrieval of solidified high-level radioactive waste, or other radioactive material used by the Secretary for testing, upon completion of the technology demonstration activities; and

(3) based upon the principle that the high-level radioactive waste, spent nuclear fuel, or other radioactive material involved shall be isolated from the biosphere in such a way that the initial isolation is provided by engineered barriers functioning as a system with the geologic environment.

(c) OPERATION.—(1) Not later than 88 months after the date of the enactment of this Act, the Secretary shall begin an in situ testing program at the test and evaluation facility in accordance with the mission plan developed under section 301, for purposes of—

(A) conducting in situ tests of bore hole sealing, geologic media fracture sealing, and room closure to establish the techniques and performance for isolation of high-level radioactive waste, spent nuclear fuel, or other radioactive materials from the biosphere;

(B) conducting in situ tests with radioactive sources and materials to evaluate and improve reliable models for radionuclide migration, absorption, and containment within the engineered barriers and geologic media involved, if the Secretary finds there is reasonable assurance that such radioactive sources and materials will not threaten the use of such site as a repository;

(C) conducting in situ tests to evaluate and improve models for ground water or brine flow through fractured geologic media;

(D) conducting in situ tests under conditions representing the real time and the accelerated time behavior of the engineered barriers within the geologic environment involved;

(E) conducting in situ tests to evaluate the effects of heat and pressure on the geologic media involved, on the hydrology of the surrounding area, and on the integrity of the disposal packages;

(F) conducting in situ tests under both normal and abnormal repository conditions to establish safe design limits for disposal packages and to determine the effects of the gross release of radionuclides into surroundings, and the effects of various credible failure modes, including—

(i) seismic events leading to the coupling of aquifers through the test and evaluation facility;

(ii) thermal pluses significantly greater than the maximum calculated; and

(iii) human intrusion creating a direct pathway to the biosphere; and

(G) conducting such other research and development activities as the Secretary considers appropriate, including such activities necessary to obtain the use of high-level radioactive waste, spent nuclear fuel, or other radioactive materials (such as any highly radioactive material from the Three Mile Island nuclear powerplant or from the West Valley Demonstration Project) for test and evaluation purposes, if such other activities are reasonably necessary to support the repository program and if there is reasonable assurance that the radioactive sources involved will not threaten the use of such site as a repository.

(2) The in situ testing authorized in this subsection shall be designed to ensure that the suitability of the site involved for licensing by the Commission as a repository will not be adversely affected.

(d) USE OF EXISTING DEPARTMENT FACILITIES.—During the conducting of siting research activities under section 214 and for such period thereafter as the Secretary considers appropriate, the Secretary shall use Department facilities owned by the Federal Government on the date of the enactment of this Act for the conducting of generically applicable tests regarding packaging, handling, and emplacement technology for solidified high-level radioactive waste and spent nuclear fuel from civilian nuclear activities.

(e) ENGINEERED BARRIERS.—The system of engineered barriers and selected geology used in a test and evaluation facility shall have a design life at least as long as that which the Commission requires by regulations issued under this Act, or under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.), for repositories.

(f) ROLE OF COMMISSION.—(1)(A) Not later than 1 year after the date of the enactment of this Act, the Secretary and the Commission shall reach a written understanding establishing the procedures for review, consultation, and coordination in the planning, construction, and operation of the test and evaluation facility under this section. Such understanding shall establish a schedule, consistent with the deadlines set forth in this subtitle, for submission by the Secretary of, and review by the Commission of and necessary action on—

(i) the mission plan prepared under section 301; and

(ii) such reports and other information as the Commission may reasonably require to evaluate any health and safety impacts of the test and evaluation facility.

(B) Such understanding shall also establish the conditions under which the Commission may have access to the test and evaluation facility for the purpose of assessing any public health and safety concerns that it may have. No shafts may be excavated for the test and evaluation until the Secretary and the Commission enter into such understanding.

(2) Subject to section 305, the test and evaluation facility, and the facilities authorized in section 217, shall be constructed and operated as research, development, and demonstration facilities, and shall not be subject to licensing under section 202 of the Energy Reorganization Act of 1974 (42 U.S.C. 5842).

(3)(A) The Commission shall carry out a continuing analysis of the activities undertaken under this section to evaluate the adequacy of the consideration of public health and safety issues.

(B) The Commission shall report to the President, the Secretary, and the Congress as the Commission considers appropriate with respect to the conduct of activities under this section.

(g) ENVIRONMENTAL REVIEW.—The Secretary shall prepare an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) prior to conducting tests with radioactive materials at the test and evaluation facility. Such environmental impact statement shall incorprate, to the extent practicable, the environmental assessment prepared under section 217(a). Nothing in this subsection may be construed to limit siting research activities conducted under section 214. This subsection shall apply only to activities performed exclusively for a test and evaluation facility.

(h) LIMITATIONS.—(1) If the test and evaluation facility is not located at the site of a repository, the Secretary shall obtain the concurrence of the Commission with respect to the decontamination and decommissioning of such facility.

(2) If the test and evaluation facility is not located at a candidate site or repository site, the Secretary shall conduct only the portion of the in situ testing program required in subsection (c) determined by the Secretary to be useful in carrying out the purposes of this Act.

(3) The operation of the test and evaluation facility shall terminate not later than—

(A) 5 years after the date on which the initial repository begins operation; or

(B) at such time as the Secretary determines that the continued operation of a test and evaluation facility is not necessary for research, development, and demonstration purposes;

whichever occurs sooner.

(4) Notwithstanding any other provisions of this subsection, as soon as practicable following any determination by the Secretary, with the concurrence of the Commission, that the test and evaluation facility is unsuitable for continued operation, the Secretary shall take actions as are necessary to remove from such site any radioactive material placed on such site as a result of testing and evaluation activities conducted under this section. Such requirement may be waived if the Secretary, with the concurrence of the Commission, finds that short-term testing and evaluation activities using radioactive material will not endanger the public health and safety.

RESEARCH AND DEVELOPMENT ON SPENT NUCLEAR FUEL

SEC. 218. (a) DEMONSTRATION AND COOPERATIVE PROGRAMS.—The Secretary shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission. Not later than 1 year after the date of the enactment of this Act, the Secretary shall select at least 1, but not more than 3, sites evaluated under section 214 at such power reactors. In selecting such site or sites, the Secretary shall give preference to civilian nuclear power reactors that will soon have a shortage of interim storage capacity for spent nuclear fuel. Subject to reaching agreement as provided in subsection (b), the Secretary shall undertake activities to assist such power reactors with demonstration projects at such sites, which may use one of the following types of alternate storage technologies: spent nuclear fuel storage casks, caissons, or silos. The Secretary shall also undertake a cooperative program with civilian nuclear power reactors to encourage the development of the technology for spent nuclear fuel rod consolidation in existing power reactor water storage basins.

(b) COOPERATIVE AGREEMENTS.—To carry out the programs described in subsection (a), the Secretary shall enter into a cooperative agreement with each utility involved that specifies, at a minimum, that—

(1) such utility shall select the alternate storage technique to be used, make the land and spent nuclear fuel available for the dry storage demonstration, submit and provide site-specific documentation for a license application to the Commission, obtain a license relating to the facility involved, construct such facility, operate such facility after licensing, pay the costs required to construct such facility, and pay all costs associated with the operation and maintenance of such facility;

(2) the Secretary shall provide, on a cost-sharing basis, consultative and technical assistance, including design support and generic licensing documentation, to assist such utility in obtaining the construction authorization and appropriate license from the Commission; and

(3) the Secretary shall provide generic research and development of alternative spent nuclear fuel storage techniques to enhance utility-provided, at-reactor storage capabilities, if authorized in any other provision of this Act or in any other provision of law.

(c) DRY STORAGE RESEARCH AND DEVELOPMENT.—(1) The consultative-and-technical assistance-referred to in subsection (b)(2) may include, but shall not be limited to, the establishment of a research and development program for the dry storage of not more than 300 metric tons of spent nuclear fuel at facilities owned by the Federal Government on the date of the enactment of this Act. The purpose of such program shall be to collect necessary data to assist the utilities involved in the licensing process.

(2) To the extent available, and consistent with the provisions of section 135, the Secretary shall provide spent nuclear fuel for the research and development program authorized in this subsection from spent nuclear fuel received by the Secretary for storage under section 135. Such spent nuclear fuel shall not be subject to the provisions of section 135(e).

(d) FUNDING.—The total contribution from the Secretary from Federal funds and the use of Federal facilities or services shall not exceed 25 percent of the total costs of the demonstration program authorized in subsection (a), as estimated by the Secretary. All remaining costs of such program shall be paid by the utilities involved or shall be provided by the Secretary from the Interim Storage Fund established in section 136.

(e) RELATION TO SPENT NUCLEAR FUEL STORAGE PROGRAM.—The spent nuclear fuel storage program authorized in section 135 shall not be construed to authorize the use of research development or demonstration facilities owned by the Department unless—

(1) a period of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than 3 calendar days to a day certain) has passed after the Secretary has transmitted to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the

Senate a written report containing a full and complete statement concerning (A) the facility involved; (B) any necessary modifications; (C) the cost thereof; and (D) the impact on the authorized research and development program; or

(2) each such committee, before the expiration of such period, has transmitted to the Secretary a written notice to the effect that such committee has no objection to the proposed use of such facility.

PAYMENTS TO STATES AND INDIAN TRIBES

SEC. 219. (a) PAYMENTS.—Subject to subsection (b) the Secretary shall make payments to each State or affected Indian tribe that has entered into an agreement pursuant to section 215. The Secretary shall pay an amount equal to 100 percent of the expenses incurred by such State or Indian tribe in engaging in any monitoring, testing, evaluation, or other consultation and cooperation activity under section 215 with respect to any site. The amount paid by the Secrtary under this paragraph shall not exceed $3,000,000 per year from the date on which the site involved was identified to the date on which the decontamination and decommission of the facility is complete pursuant to section 217(h). Any such payment may only be made to a State in which a potential site for a test and evaluation facility has been identified under section 213, or to an affected Indian tribe where the potential site has been identified under such section.

(b) LIMITATION.—The Secretary shall make any payment to a State under subsection (a) only if such State agrees to provide, to each unit of general local government within the jurisdictional boundaries of which the potential site or effectively selected site involved is located, at least one-tenth of the payments made by the Secretary to such State under such subsection. A State or affected Indian tribe receiving any payment under subsection (a) shall otherwise have discretion to use such payment for whatever purpose it deems necessary, including the State or tribal activities pursuant to agreements entered into in accordance with 215. Annual payments shall be prorated on a 365-day basis to the specified dates.

STUDY OF RESEARCH AND DEVELOPMENT NEEDS FOR MONITORED RETRIEVABLE STORAGE PROPOSAL

SEC. 220. Not later than 6 months after the date of the enactment of this Act, the Secretary shall submit to the Congress a report describing the research and development activities the Secretary considers necessary to develop the proposal required in section 141(b) with respect to a monitored retrievable storage facility.

JUDICIAL REVIEW

SEC. 221. Judicial review of research and development activities under this title shall be in accordance with the provisions of section 119.

RESEARCH ON ALTERNATIVES FOR THE PERMANENT DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

SEC. 222. The Secretary shall continue and accelerate a program of research, development, and investigation of alternative means and technologies for the permanent disposal of high-level radioactive waste from civilian nuclear activities and Federal research and development activities except that funding shall be made from amounts appropriated to the Secretary for purposes of carrying out this section. Such program shall include examination of various waste disposal options.

TITLE III—OTHER PROVISIONS RELATING TO RADIOACTIVE WASTE

MISSION PLAN

SEC. 301. (a) CONTENTS OF MISSION PLAN.—The Secretary shall prepare a comprehensive report, to be known as the mission plan, which shall provide an informational basis sufficient to permit informed decisions to be made in carrying out the repository program and the research, development, and demonstration programs required under this Act. The mission plan shall include—

(1) an identification of the primary scientific, engineering, and technical information, including any necessary demonstration of engineering or systems integration, with respect to the siting and construction of a test and evaluation facility and repositories;

(2) an identification of any information described in paragraph (1) that is not available because of any unresolved scientific, engineering, or technical questions, or undemonstrated engineering or systems integration, a schedule including specific major milestones for the research, development, and technology demonstration program required under this Act and any additional activities to be undertaken to provide such information, a schedule for the activities necessary to achieve important programmatic milestones, and an estimate of the costs required to carry out such research, developmemt, and demonstration programs;

(3) an evaluation of financial, political, legal, or institutional problems that may impede the implementation of this Act, the plans of the Secretary to resolve such problems, and recommendations for any necessary legislation to resolve such problems;

(4) any comments of the Secretary with respect to the purpose and program of the test and evaluation facility;

(5) a discussion of the significant results of research and development programs conducted and the implications for each of the different geologic media under consideration for the siting of repositories, and, on the basis of such information, a comparison of the advantages and disadvantages associated with the use of such media for repository sites;

(6) the guidelines issued under section 112(a);

(7) a description of known sites at which site characterization activities should be undertaken, a description of such siting characterization activities, including the extent of planned excavations, plans for onsite testing with radioactive or nonradioactive material, plans for any investigations activities which may affect the capability of any such site to isolate high-level radioactive waste or spent nuclear fuel, plans to control any adverse, safety-related impacts from such site characterization activities, and plans for the decontamination and decommissioning of such site if it is determined unsuitable for licensing as a repository;

(8) an identification of the process for solidifying high-level radioactive waste or packaging spent nuclear fuel, including a summary and analysis of the data to support the selection of the solidification process and packaging techniques, an analysis of the requirements for the number of solidification packaging facilities needed, a description of the state of the art for the materials proposed to be used in packaging such waste or spent fuel and the availability of such materials including impacts on strategic supplies and any requirements for new or reactivated facilities to produce any such materials needed, and a description of a plan, and the schedule for implementing such plan, for an aggressive research and development program to provide when needed a high-integrity disposal package at a reasonable price;

(9) an estimate of (A) the total repository capacity required to safely accommodate the disposal of all high-level radioactive waste and spent nuclear fuel expected to be generated through December 31, 2020, in the event that no commercial reprocessing of spent nuclear fuel occurs, as well as the repository capacity that will be required if such reprocessing does occur; (B) the number and type of repositories required to be constructed to provide such disposal capacity; (C) a schedule for the construction of such repositories; and (D) an estimage of the period during which each repository listed in such schedule will be accepting high-level radioactive waste or spent nuclear fuel for disposal;

(10) an estimate, on an annual basis, of the costs required (A) to construct and operate the repositories anticipated to be needed under paragraph (9) based on each of the assumptions referred to in such paragraph; (B) to construct and operate a test and evaluation facility, or any other facilities, other than repositories described in subparagraph (A), determined to be necessary; and (C) to carry out any other activities under this Act; and

(11) an identification of the possible adverse economic and other impacts to the State or Indian tribe involved that may arise from the development of a test and evaluation facility or repository at a site.

(b) SUBMISSION OF MISSION PLAN.—(1) Not later than 15 months after the date of the enactment of this Act, the Secretary shall submit a draft mission plan to the States, the affected Indian tribes, the Commission, and other Government agencies as the Secretary deems appropriate for their comments.

(2) In preparing any comments on the mission plan, such agencies shall specify with precision any objections that they may have. Upon submission of the mission plan to such agencies, the Secretary shall publish a notice in the Federal Register of the submission of the mission plan and of its availability for public inspection, and, upon receipt of any comments of such agencies respecting the mission plan, the Secretary shall publish a notice in the Federal Register of the receipt of comments and of the availability of the comments for public inspection. If the Secretary does not revise the mission plan to meet objections specified in such comments, the Secretary shall publish in the Federal Register a detailed statement for not so revising the mission plan.

(3) The Secretary, after reviewing any other comments made by such agencies and revising the mission plan to the extent that the Secretary may consider to be appropriate, shall submit the mission plan to the appropriate committees of the Congress not later than 17 months after the date of the enactment of this Act. The mission plan shall be used by the Secretary at the end of the first period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than 3 calendar days to a day certain) following receipt of the mission plan by the Congress.

NUCLEAR WASTE FUND

SEC. 302. (a) CONTRACTS.—(1) In the performance of his functions under this Act,

the Secretary is authorized to enter into contracts with any person who generates or holds title to high-level radioactive waste, or spent nuclear fuel, of domestic origin for the acceptance of title, subsequent transportation, and disposal of such waste or spent fuel. Such contracts shall provide for payment to the Secretary of fees pursuant to paragraphs (2) and (3) sufficient to offset expenditures described in subsection (d).

(2) For electricity generated by a civilian nuclear power reactor and sold on or after the date ninety days after the date of enactment of this Act, the fee under paragraph (1) shall be equal to 1.0 mil per kilowatt-hour.

(3) For spent nuclear fuel, or solidified high-level radioactive waste derived from spent nuclear fuel, which fuel was used to generate electricity in a civilian nuclear power reactor prior to the application of the fee under paragraph (2) to such reactor, the Secretary shall, not later than ninety days after the date of enactment of this Act, establish a one time fee per kilogram of heavy metal in spent nuclear fuel, or in solidified high-level radioactive waste. Such fee shall be in an amount equivalent to an average charge of 1.0 mil per kilowatt-hour for electricity generated by such spent nuclear fuel, or such solidified high-level waste derived therefrom, to be collected from any person delivering such spent nuclear fuel or high-level waste, pursuant to section 123, to the Federal government. Such fee shall be paid to the Treasury of the United States and shall be deposited in the separate fund. established by subsection (c). In paying such a fee, the person delivering spent fuel, or solidified high-level radioactive wastes derived therefrom, to the Federal Government shall have no further financial obligation to the Federal Government for the long-term storage and permanent disposal of such spent fuel, or the solidified high-level radioactive waste derived therefrom.

(4) Not later than one hundred and eighty days after the date of enactment of this Act, the Secretary shall establish procedures for the collection and payment of the fees established by subsection (a) and subsection (c). The Secretary shall annually review the amount of the fees established by subsections (a) and (c) above to evaluate whether collection of the fee will provide sufficient revenues to offset the costs as defined in subsection (a) herein. In the event the Secretary determines that either insufficient or excess revenues are being collected, in order to recover the costs incurred by the Federal Government that are specified in section 601(a), the Secretary shall propose an adjustment to the fee to insure full cost recovery. The Secretary shall immediately transmit this proposal for such an adjustment to Congress. The adjusted fee proposed by the Secretary shall be effective after a period of ninety days of continuous session have elapsed following the receipt of such transmittal unless during such ninety-day period either House of Congress adopts a resolution disapproving the Secretary's proposed adjustment in accordance with the procedures set forth for congressional review of an energy action under section 551 of the Energy Policy and Conservation Act.

(5) The contracts entered into under this section shall provide that in return for the payment of fees established by paragraphs (2) and (3), the Federal Government will reasonably undertake to perform the duties required of it under this Act and shall no later than December 31, 1996—

(A) take title to the spent nuclear fuel and high-level radioactive waste owned or generated by such person, and

(B) store or dispose of the spent nuclear fuel or high-level radioactive waste in a Federally owned and operated repository or monitored, retrievable storage facility.

(6) The Secretary shall establish in writing criteria setting forth the terms and conditions under which such disposal services shall be made available.

(b) ADVANCE CONTRACTING REQUIREMENT.—(1)(A) The Commission shall not issue or renew a license to any person to use a utilization or production facility under the authority of section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) unless—

(i) such person has entered into a contract with the Secretary under this section; or

(ii) the Secretary affirms in writing that such person is actively and in good faith negotiating with the Secretary for a contract under this section.

(B) The Commission, as it deems necessary or appropriate, may require as a precondition to the issuance or renewal of a license under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) that the applicant for such license shall have entered into an agreement with the Secretary for the disposal of high-level radioactive waste and spent nuclear fuel that may result from the use of such license.

(2) Except as provided in paragraph (1), no spent nuclear fuel or high-level radioactive waste generated or owned by any person (other than a department of the United States referred to in section 101 or 102 of title 5, United States Code) may be disposed of by the Secretary in any repository constructed under this Act unless the generator or owner of such spent fuel or waste has entered into a contract with the Secretary under this section by not later than—

(A) June 30, 1983; or

(B) the date on which such generator or owner commences generation of, or takes title to, such spent fuel or waste;

whichever occurs later.

(3) The rights and duties of a party to a contract entered into under this section may be assignable with transfer of title to the spent nuclear fuel or high-level radioactive waste involved.

(4) No high-level radioactive waste or spent unclear fuel generated or owned by any department of the United States referred to in section 101 or 102 of title 5, United States Code, may be disposed of by the Secretary in any repository constructed under this Act unless such department transfers to the Secretary, for deposit in the Nuclear Waste Fund, amounts equivalent to the fees that would be paid to the Secretary under the contracts referred to in this section if such waste or spent fuel were generated by any other person.

(c) ESTABLISHMENT OF NUCLEAR WASTE FUND.—There hereby is established in the Treasury of the United States a separate fund, to be known as the Nuclear Waste Fund. The Waste Fund shall consist of—

(1) all receipts, proceeds, and recoveries realized by the Secretary under subsections (a), (b), and (e), which shall be deposited in the Waste Fund immediately upon their realization;

(2) any appropriations made by the Congress to the Waste Fund; and

(3) any unexpended balances available on the date of the enactment of this Act for functions or activities necessary or incident to the disposal of civilian high-level radioactive waste or civilian spent nuclear fuel, which shall automatically be transferred to the Waste Fund on such date.

(d) USE OF WASTE FUND.—The Secretary may make expenditures from the Waste Fund, subject to subsection (e), only for purposes of radioactive wste disposal activities under titles I and II, including—

(1) the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any repository monitored, retricable storage facility or test and evaluation facility constructed under this Act;

(2) the conducting of nongeneric research, development, and demonstration activities under this Act;

(3) the administrative cost of the radioactive waste disposal program;

(4) any costs that may be incurred by the Secretary in connection with the transportation, treating, or packaging of spent nuclear fuel or high-level radioactive waste to be disposed of in a repository, to be stored in a monitored, retrievable storage site or to be used in a test and evaluation facility;

(5) the costs associated with acquisition, design, modification, replacement, operation, and construction of facilities at a repository site, a monitored retrievable storage site or a test and evaluation facility site and necessary or incident to such repository monitored, retrievable storage facility or test and evaulation facility; and

(6) the provision of assistance to States, units of general local government, and Indian tribes under sections 116, 118, and 219.

No amount may be expended by the Secretary under this subtitle for the construction or expansion of any facility makes such construction or expansion is expressly authorized by this or subsequent legislation. The Secretary hereby is authorized to construct one repository and one test and evaluation facility.

(e) ADMINISTRATION OF WASTE FUND.—(1) The Secretary of the Treasury shall hold the Waste Fund and, after consultation with the Secretary, annually report to the Congress on the financial condition and operations of the Waste Fund during the preceding fiscal year.

(2) The Secretary shall submit the budget of the Waste Fund to the Office of Management and Budget triennially along with the budget of the Department of Energy submitted at such time in accordance with chapter 11 of title 31, United States Code. The budget of the Waste Fund shall consist of the estimates made by the Secretary of expenditures from the Waste Fund and other relevant financial matters for the succeeding 3 fiscal years, and shall be included in the Budget of the United States Government. The Secretary may make expenditures from the Waste Fund, subject to appropriations which shall remain available until expended. Appropriations shall be subject to triennial authorization.

(3) If the Secretary determines that the Waste Fund contains at any time amounts in excess of current needs, the Secretary may request the Secretary of the Treasury to invest such amounts, or any portion of such amounts as the Secretary determines to be appropriate, in obligations of the United States—

(A) having maturities determined by the Secretary of the Treasury to be appropriate to the needs of the Waste Fund; and

(B) bearing interest at rates determined to be appropriate by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

(4) Receipts, proceeds, and recoveries realized by the Secretary under this section, and expenditures of amounts from the Waste Fund, shall be exempt from annual apportionment under the provisions of subchapter II of chapter 15 of title 31, United States Code.

(5) If at any time the moneys available in the Waste Fund are insufficient to enable the Secretary to discharge his responsibilities under this subtitle, the Secretary shall issue to the Secretary of the Treasury obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be agreed to by the Secretary and the Secretary of the Treasury. The total of such obligations shall not exceed amounts provided in appropriation Acts. Redemption of such obligations shall be made by the Secretary from moneys available in the Waste Fund. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the obligations under this paragraph. The Secretary of the Treasury shall purchase any issued obligations, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, and the purposes for which securities may be issued under such Act are extended to include any purchase of such obligations. The Secretary of the Treasury may at any time sell any of the obligations acquired by him under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of obligations under this paragraph shall be treated as public debt transactions of the United States.

(6) Any appropriations made available to the Waste Fund for any purpose described in subsection (d) shall be repaid into the general fund of the Treasury, together with interest from the date of availability of the appropriations until the date of repayment. Such interest shall be paid on the cumulative amount of appropriations available to the Waste Fund, less the average undisbursed cash balance in the Waste Fund account during the fiscal year involved. The rate of such interest shall be determined by the Secretary of the Treasury taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States of comparable maturity. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest.

ALTERNATIVE MEANS OF FINANCING

SEC. 303. The Secretary shall undertake a study with respect to alternative approaches to managing the construction and operation of all civilian radioactive waste management facilties, including the feasibility of establishing a private corporation for such purposes. In conducting such study, the Secretary shall consult with the Director of the Office of Management and Budget, the Chairman of the Commission, and such other Federal agency representatives as may be appropriate. Such study shall be completed, and a report containing the results of such study shall be submitted to the Congress, within 1-year after the date of the enactment of this Act. Management and Budget, the Chairman of the Commission, and such other Federal agency representatives as may be appropriate. Such study shall be completed, and a report containing the results of such study shall be submitted to the Congress, within 1 year after the date of the enactment of this Act.

OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT

SEC. 304. (a) ESTABLISHMENT.—There hereby is established within the Department of Energy an Office of Civilian Radioactive Waste Management. The Office shall be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall be compensated at the rate payable for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

(b) FUNCTIONS OF DIRECTOR.—The Director of the Office shall be responsible for carrying out the functions of the Secretary under this Act, subject to the general supervision of the Secretary. The Director of the Office shall be directly responsible to the Secretary.

(c) ANNUAL REPORT TO CONGRESS.—The Director of the Office shall annually prepare and submit to the Congress a comprehensive report on the activities and expenditures of the Office.

(d) ANNUAL AUDIT BY COMPTROLLER GENERAL.—The Comptroller General of the United States shall annually make an audit of the Office, in accordance with such regulations as the Comptroller General may prescribe. The Comptroller General shall have access to such books, records, accounts, and other materials of the Office as the Comptroller General determines to be necessaary for the preparation of such audit. The Comptroller General shall submit to the Congress a report on the result of each audit conducted under this section.

LOCATION OF TEST AND EVALUATION FACILITY

SEC. 305. (a) REPORT TO CONGRESS.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall transmit to the Congress a report setting forth whether the Secretary plans to locate the test and evaluation facility at the site of a repository.

PROCEDURES.—(1) If the test and evaluation facility is to be located at any candidate site or repository site (A) site selection and development of such facility shall be conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of repositories; and (B) the Secretary may not commence construction of any surface facility for such test and evaluation facility prior to issuance by the Commission of a construction authorization for a repository at the site involved.

(2) No test and evaluation facility may be converted into a repository unless site selection and development of such facility was conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of respositories.

(3) The Secretary may not commence construction of a test and evaluation facility at a candidate site or site recommended as the location for a repository prior to the date on which the designation of such site is effective under section 115.

STAFF SUMMARY

The following summary sets forth those major changes in the House-passed bill that are being proposed. Technical and conforming changes are not discussed in this summary, but appear in the text of the attached draft. Except where noted in the text of the attached draft and the following summary, the language of the House-passed bill would be retained. The following changes are presented in the order that they appear in H.R. 7187.

I. HIGH-LEVEL RADIOACTIVE WASTE FROM ATOMIC ENERGY DEFENSE ACTIVITIES

If defense wastes are to be disposed of in a civilian repository, the federal government shall pay a *pro rata* share of the cost of developing, construction, and operating this repository (no such provision in 7187).

II. SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL WASTE

DOE, in issuing its guidelines for the recommendation of sites for repositories, must first obtain the concurrence of the NRC (7187 only requires consultation). DOE guidelines must include provisions for disqualifying potential repository sites if they are located in highly populated areas. Specific reference in 7187 to 1000 individuals in a 1 square mile area adjacent to the surface facility of the repository has been deleted.

DOE and the President, in developing and selecting repository sites, are directed to consider the cost and impact of transportation of high-level waste and the advantages of regional distribution in the siting of repositories. (No similar provision in 7187.)

DOE is directed to recommend 3 candidate repository sites to the President by July 1, 1984, and 3 additional candidate repository sites by July 1, 1987 that he determines are suitable for site characterization. Specific references to the number of media that must be represented are delated. (7187 requires 5 sites in at least 2 geologic media by July 1, 1984, and 1 additional site in a medium not included in the first round, by February 1, 1985.)

DOE is prohibited from recommending any candidate repository site that would permit the physical integration of the test and evaluation facility and the repository. (7187 includes certain restrictions *if* test and evaluation facility is to be located at repository site.)

DOE must submit an environmental impact statement on each candidate site recommended. This statement must include an analysis of each of the candidate sites considered and an explanation of the reasons for eliminating any sites not recommended to the President. The EIS need not consider the need for a repository, the time of the initial availability of a repository, nor alternatives to disposal in a repository (7187 required an environmental assessment to be submitted with each candidate site recommended.)

Capacity of the initial repository (or the combined capacity of the first repository and the monitored retrievable storage facility, if the latter is located within 50 miles of the repository) is limited to 70,000 metric tons, until such time as the second repository is in operation. (No similar provision in 7187.)

In examining alternative repository sites, DOE must consider 3 candidate sites for the

initial repository or all sites recommended for a subsequent repository for which (i) site characterization has been completed, and (ii) DOE has made a preliminary determination of the suitability of each site for development as a repository.

Rights conferred upon an Indian tribe to participate in the development of a repository, enter into a written agreement, transmit objections to Congress, and receive financial assistance, are extended to "affected Indian tribes." The term "affected Indian tribe" includes those tribes which, although the proposed repository is not located on the reservation, would suffer substantial and adverse effects to possessory or usage rights to lands outside of the reservation. (7187) limits tribal participation to those situations where the repository is located on the Indian reservation.)

NRC criteria for issuance of a construction authorization for a repository must provide for a system of multiple barriers in the design of the repository. (No similar provision 7187.)

DOE is authorized to take title to high-level waste when it is delivered to DOE for disposal in a repository (7187 prohibited title from passing until the high-level waste was delivered to DOE at the repository.)

DOE is authorized to provide for the transportation of such high-level waste, subject to the condition that the costs of transportation are to be paid by the generator of such waste. (Under 7187, transportation would be the responsibility of the generator.)

III. SUBTITLE B—INTERIM STORAGE PROGRAM

AFR storage capacity provided by DOE may not be located at any federal or nonfederal site within which there is a candidate site for a repository. (7187 allows the use of such sites.)

The NRC, in determining whether particular utilities require AFR capacity, is directed to ensure maintenance of a full core reserve capability at the site of the powerplant, unless the NRC determines that maintenance of such capability is not necessary for the continued orderly operation of the powerplant.

No authority is provided DOE under this bill to accept any foreign spent nuclear fuel. (7187 authorized DOE to accept up to 100 metric tons.)

Rights conferred upon an Indian tribe to participate in the development of an AFR and to transmit objections to Congress under 7187 are extended to any "affected Indian tribe". (See discussion under Subtitle A for definition.)

Opportunity for State or "affected Indian tribe" to transmit objections to the Congress, and requirement that such objections be overridden by two houses of Congress before DOE may proceed, are extended to the provision of any AFR storage capacity over 300 metric tons.

DOE is directed to take title to and transport spent nuclear fuel for which utilities have entered into contracts for storage, subject to the condition that the costs of transportation are to be paid by the generator of such waste. Transportation of such fuel is subject to licensing and regulation, as provided under existing law. (Under 7187, DOE is prohibited from taking title and transportation would be the responsibility of the generator of such waste.)

IV. MONITORED RETRIEVABLE STORAGE

DOE is directed to submit a report to Congress on the need for and feasibility of one or more MRS facilities by June 1, 1985 (7187 calls for report within 5 years of the date of enactment.)

The DOE report is to include at least 5 alternate combinations of proposed sites and designs, with a discussion of the advantages and disadvantages of each combination. DOE is to recommend the preferable alternative. (7187 prohibits DOE from selecting a specific site for the MRS facility.)

If Congress authorizes a MRS facility, NEPA shall apply to the construction of the facility, except that any EIS need not consider the need for the facility, nor any alternative to the design criteria. In addition, if Congress authorizes construction at a specific site, any EIS need not consider alternatives to that site. Similar restrictions apply to the NRC licensing of such a facility. (7187 states that NEPA shall apply to any proposal to construct a facility, and that such facility shall be licensed by the NRC, with no reference to any restrictions.)

Any impact assistance for a MRS would come from the repository fund (7187 provides for such assistance from the Interim Storage Fund).

V. NUCLEAR WASTE FUND

Adopted Senate one mil per kilowatt hour fee, but retained the basic structure of 7187 for the establishment and operation of the fund (7187 directed DOE to submit to Congress within 180 days a report establishing payment charges per unit of spent fuel.)

AUTHORITY FOR COMMITTEES TO MEET

Mr. McCLURE. Mr. President, on my time under the cloture rule. If I might make this statement before making the request, the Committee on Energy and Natural Resources this morning opened its hearing on the problems associated with the pricing of natural gas in the markets today. We have heard the congressional witnesses, we have heard the industry witnesses, and we just now have reached the public witnesses and the public interest group witnesses panel. We have no unanimous consent to sit beyond the hour of 2 o'clock.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, that has been cleared on this side, and there is no objection to it.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Monday, December 13, at 10 a.m., to hold a hearing to review current conditions in the natural gas market, including related proposals for modifications to existing law.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Monday, December 13, at 1:30 to hold a markup on S. 3074, the Agriculture Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, December 14, at 10 a.m., to receive a briefing on intelligence matters and at 10:45 a.m. to conduct a business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, December 14, at 10 a.m., to hold a top secret hearing on U.S. strategic doctrine.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, December 14, at 2 p.m., to hold a business meeting to discuss pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. STEVENS. Mr. President, I ask unanimous consent that the full Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, December 14, at 2 p.m., to hold a hearing to consider the nomination of W. Paul Thayer to be Deputy Secretary of Defense.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

HUD AUTHORIZATION BILL

Mr. GARN. Mr. President, as the clock moves on in this lameduck session, one of the many pieces of unattended business remaining on the agenda is the fiscal year 1983 HUD authorization bill. This bill is the culmination of months of effort begun last winter and represents the Banking Committee's best effort to strike a positive balance between the demands of the continuing housing and community development needs of our Nation and the very stark budget restraints weighing on us all. It contains many important housing initiatives and, moreover, establishes the structure and limits for housing appropriations that will be sent to us by the House of Representatives in the continuing resolution. I think it is important that we not abdicate our responsibility, especially at a time when housing is finally beginning to show signs of recovery.

Our former colleague, the honorable Edward Brooke, now serves among other duties as the chairperson of the National Low Income Housing coalition, and organization with whose goals I do not always agree, but which can be counted on through its board and able president, Cushing Dolbeare, to provide factual, persuasive assistance in meeting the complex problem of housing low income families. On behalf of more than 2,000 organizations comprising the coalition, Senator Brooke has sent me a letter calling for action on Housing legislation which I ask be printed in the RECORD.

The letter follows:

NATIONAL LOW INCOME HOUSING COALITION,
Washington, D.C., November 22, 1982.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR GARN: We have today sent the following letter to the Majority Leader:

This is an urgent plea to you to schedule action on low income housing legislation and appropriations early in the pending "lame duck" session so that the de facto Congressional moratorium on low income housing assistance can be ended promptly.

This is a time of housing crisis, especially for low income people. New production is at its lowest level in two generations. Rents in the private market are beyond the each of millions of low income households. An ever-growing number of people are homeless—unable to find any accommodations whatsoever. Almost 20 percent of all construction workers are unemployed.

Given this situation, it is little short of a tragedy that Congress recessed without acting on low income housing and adopted the appropriation for the Department of Housing and Urban Development with no funds whatsoever for providing additional low income housing assistance.

Within the last year, the hundreds of public officials and national, state, and local organizations listed below have endorsed continued federal housing assistance for low income people. We urge you to maintain this nation's commitment to meeting their housing needs by making low income housing legislation a top priority now. This Congress must not adjourn until low income housing programs have been adopted and the necessary funds to carry them out have been appropriated.

We urge you to give your full support to this effort.

Sincerely,

EDWARD W. BROOKE,
Honorary Chairperson.

CLINCH RIVER—$8.5 BILLION IN WASTE

● Mr. HUMPHREY. Mr. President, I have long opposed continued funding of the Clinch River breeder reactor project on the grounds that it is too expensive and is unnecessary. Indeed, the true cost of the project has been a contentious issue.

We now, however, have a fair idea of how much the project will cost. Today the General Accounting Office (GAO) released its final cost estimates on the project. Its report concludes that the project could cost $8.5 billion—over twice what the Department of Energy (DOE) projects.

GAO also noted in its report that the plutonium fuel for Clinch River would probably have to come from our military stockpile and that DOE intends to return to the military the plutonium the reactor will breed. As the GAO noted, this could raise serious legal questions. A key provision currently carried in both the House and Senate versions of the Nuclear Waste Policy Act prohibits the transfer of spent nuclear fuel from peaceful civilian reactor fuel to DOE for use in the manufacture of nuclear weapons.

A good review of the GAO report was published in yesterday's New York Times by Judith Miller. I ask that the entire text of the New York Times article be placed in the RECORD.

The article follows:

BREEDER REACTOR FAULTED ON COST

(By Judith Miller)

WASHINGTON, December 11.—The General Accounting Office has concluded that the Reagan Administration's cost estimates for the Clinch River breeder reactor "should be viewed with caution." It says the project at Oak Ridge, Tenn., could cost $8.5 billion, more than twice the Administration's estimate.

These conclusions are contained in a 20-page report by the Congressional auditing agency. The study, requested by the House Energy Subcommittee on Oversight and Investigations, is scheduled to be released Monday.

Energy Department spokesmen could not be found for comment today. But officials strongly disputed similar calculations in an interim study issued by the G.A.O. in September. Neverthless, the auditing agency has adhered to and expanded on its original estimates in this final report.

Because much of the Congressional debate about the Clinch River reactor is focused on cost, the latest report could intensify opposition to the project. The G.A.O's cost projections are expected to carry weight in Congress because the agency, while criticizing the management and the pace of the program, has consistently supported the effort to develop the breeder, a plutonium-fueled reactor intended to produce more plutonium than it consumes.

CRITICS CALL IT A LUXURY

Even in its final report, the agency says that because Clinch River was a research and development project, cost estimates "should not be the dominant considerations in funding decisions."

But some fiscal conservatives, critics of nuclear energy and liberals who oppose the project argue that building the Clinch River reactor is a luxury in an era of budgetary constraint.

"If Congress fails to kill this technological turkey in light of these new cost estimates," said Richard L. Ottinger, the Westchester Democrat who is chairman of the oversight subcommittee, "then we have totally lost our sense of budget priorities."

A vote in the Senate could come next week. There the majority leader, Senator Howard H. Baker Jr. of Tennessee, is championing the project. Last week Clinch River's proponents and opponents lobbied vigorously to win the votes of undecided legislators.

The Clinch River project, first authorized by Congress in 1972 and estimated then to cost $700 million, has survived many attempts in Congress to terminate financing. The Carter Administration tried to kill it because of concern that breeder reactors would facilitate the spread of nuclear weapons.

CONSTRUCTION ESTIMATE UNDISPUTED

The new report does not dispute the Department of Energy's estimates for plant construction and major reactor and nonreactor components, which represent about $3 billion of the department's $3.6 billion estimate.

But it says the Department has failed to include or has underestimated several other cost factors. It said the value of the plutonium required to fuel the reactor "could range from $196 million to $261 million," rather than the $10 million estimated by the department.

Based on interviews with officials from the Department of Defense and Energy, the G.A.O. said there could be problems with several assumptions about the source and disposition of the reactor's plutonium. The officials told the auditors that plutonium for Clinch River could come from military programs, among other sources. Defense Department officials said they expected that the plutonium supplied to Clinch River would eventually be returned to the military program.

But the report says this approach fails to take into account a provision in a bill now being considered by a House-Senate conference that would ban the use of plutonium from peaceful nuclear facilities in the manufacture of nuclear explosives. The G.A.O. said it had not analyzed whether such transfers of plutonium between the military and civilian sectors would be legal if that provision became law.

The report also calls insufficient the $165.6 million allocated by the Department of Energy for contingencies, including changes required by regulation, legal actions and design improvements. Allowances of $302 million to $644.3 million would be more appropriate, the G.A.O. concludes.

CITES SALARIES NOT INCLUDED

It says the Energy Department's failure to include salaries for department officials assigned to the project could add $29 million to $39 million.

The G.A.O. says the Energy Department has overestimated by as much as $212 million the expected revenues from the sale of electricity in Clinch River's five-year demonstration period.

But the major dispute between the Administration and the agency is over the interest the Treasury pays on borrowed money used to finance Federal projects. The report, like the earlier study, concludes that such interest through 1994 could total $3.9 billion.

When the G.A.O. issued its first report, Gordon L. Chipman, Deputy Assistant Secretary of Energy for Breeder Reactor Programs, argued that the interest should not be included in the assessment. Such interest costs, he argued, should not be applied to research and development projects that were not intended to break even.

The G.A.O. acknowledges that neither the Department of Energy nor the Office of Management and Budget requires that the interest be included in the cost of Government projects. "Nevertheless," the report says, "it is a real cost which G.A.O. believes is relevant to Congressional decisions on funding projects, such as C.R.B.R., which require large capital investments."●

BOB DOLE

● Mr. BOREN. Mr. President, this Sunday an interesting article appeared in the New York Times Magazine about the distinguished senior Senator from Kansas, BOB DOLE, with whom I am privileged to serve on the Finance Committee and the Agriculture Committee. I wish to share this article with the rest of the Senate. I ask that this article be printed in the RECORD.

The article follows:

[From the New York Times Magazine, Dec. 12, 1982]

THE CLOUT OF THE "NEW" BOB DOLE

(By Timothy B. Clark)

"When I first got to know Bob Dole," says George McGovern, "he was tough and mean." That was back in the early 1970's, when Senator Robert J. Dole was a most acerbic Republican Party chairman and Senator McGovern was a most liberal Democratic candidate for President. Today, the two men count each other as friends. "He has changed," says McGovern—not only on the personal and psychological levels, he adds, but in his "approach to Government policy."

The transformation of Bob Dole suggested by this unlikely friendship—the one-time political gunslinger turned into a defender of the poor, the hard-line conservative turned toward mainstream Republicanism—has taken on special significance of late. For the Senator from Kansas has become one of the most powerful and effective politicans in Washington. His political means and ends are shaping the key legislation of the day.

Earlier this year, as chairman of the Senate Finance Committee, he almost single-handedly engineered a huge tax increase in the face of a recalcitrant President and Congress—and managed to sell it as a reform measure aimed at collecting money from tax cheats and from little-taxed businesses.

In the months ahead, with a Federal budget deficit that could approach $200 billion, the 59-year-old Senator and his committee will be chief among those to determine whose ox will be gored if Congress decides to further raise taxes or cut spending. Next month, he and his committee will be holding hearings on two of the hottest issues before Congress. They will have to find answers to Social Security's financing problems—cutting benefits, increasing taxes or both. And they will seek to balance domestic needs against the principles of free trade as a world in recession scrambles for international business.

Dole's post usually receives little public notice, even though the committee's purview includes programs that will spend $435 billion in this fiscal year and every detail of the tax code, from levies on gasoline and liquor to corporate depreciation allowances to personal tax deductions. Tax action is traditionaly in the Ways and Means Committee of the House of Representatives, where revenue measures normally originate. But with the House held by the Democrats, it has fallen to the Republican-controlled Senate to confront the practical consequences of the President's pledge to "get the Government off our backs." And Bob Dole dominates the revenue machinery of the Senate. More than Howard H. Baker Jr., the majority leader—more than anyone except perhaps the President himself—Dole has initiated, manipulated and controlled the measures that constitute the fiscal posture of the United States Government. Indeed, Dole's performance in the job, coupled with the changes in his personal and political style, have made him one of a handful of Republican members of Congress who can alter the direction of Administration policy.

All of which has proven to be something of a double-edged sword for Senator Dole, who has Presidential ambitions he does not bother to hide. On the one hand, the role of tax raiser and budget cutter is not calculated to increase a candidate's political support. On the other hand, his responsibilities and visibility have been much enhanced.

Senator Dole spent the month of October on a brutal schedule of appearances in 21 states, campaigning for Republican candidates. But the election results spell trouble for the Finance Committee chairman. On Social Security particularly, he faces the prospect of writing legislation next year even less popular than the tax increases and budgets cuts on 1982, and there will be fewer Republicans in Congress to give him a helping hand.

Bob Dole's political roots are never far below the surface, and they are Populist roots. His recent attacks, for example, on pathologists who make a killing on Medicare, or lawyers and doctors who manipulate tax returns to provide themselves opu-

lent retirement plans—followed rapidly by his pleadings for "the guy who's struggling to get along on food stamps"—are echoes of the Populist revolt that swept the Kansaas plains nearly a century ago. During the depression of the 1890's, the State produced the likes of "Sockless Jerry" Simpson, who spent three terms in Congress as an implacable foe of Wall Street. And even after Populism faded, men like Alfred M. Landon, Republican Presidential nominee in 1936, could be heard plugging for the "little fellow" in the grip of the "interests."

Dole grew up in Russell, a town of 5,500 people surrounded by endless plains of wheat, and it was a shoulder-to-the-wheel, no-frills childhood for Bob, his brother and two sisters. His father, Doran, who died in 1975, managed a grain elevator; his mother, Bina, who is now 79, sold sewing machines; Bob and his brother worked at odd jobs, washing cars, digging pipe trenches.

At high school, Bob Dole was captain of the basketball team and he went on to premedical studies at the University of Kansas. He quit in 1943 to enter the Army, where he rose to the rank of captain. Twice wounded and twice decorated in World War II, he was put out of action when he led an infantry charge on a German machine-gun nest in Italy. His right shoulder was shattered, and he lost a kidney; doctors at first held little hope for his survival, then predicted he would never walk again. Dole spent 39 months hospitalized. His friends in Russell raised funds for special operations, and he stubbornly refused to accept physical dependency. He squeezed rubber balls constantly to strengthen his crippled hands, and exercised with home-built gadgets to build up weakened legs and nearly paralyzed arms.

Dole married Phyllis Holden, a physical therapist, soon after he was discharged from the hospital in 1948. "He never had planned to get married," she told an interviewer in 1976., "He felt so lacking." She also observed that much of what Dole had achieved since the war had been an effort to prove that he could do it in spite of his handicap. His education, for example: Unable to take lecture notes because his right hand was permanently crippled. Dole recorded the lectures and taught himself to write with his left hand, enabling him to transcribe them. He earned both a bachelor's and a law degree from Washburn University in Topeka, Kans.

At the age of 27, while still in law school, Dole was elected to the Kansas Legislature. Two years later, in 1952, he was elected to the first of four terms as Russell County Attorney and then, in 1960, he ran successfully for a seat in the House of Representatives. As a campaigner, Dole cut a handsome figure—and he still does. He stands 6 feet, 1½ inches, and weighs 175 pounds. His dark eyes are intense, yet they often convey the spirit of a boy who has done something mischievous.

During his eight years in the House, Dole and most of his Republican colleagues found themselves in constant and fruitless opposition to the spending programs advocated by Presidents Kennedy and Johnson. Dole voted against the first of the big antipoverty programs, in 1964, and against aid to impoverished Appalachia, subsidies for urban mass-transportation projects and Medicare. Americans for Democratic action gave him a zero approval rating four times during his stay in the House. His record on civil rights was mixed. For example, he voted for the Civil Rights Act of 1964 and the Voting Rights Act of 1965, but against the 1966 bill to ban discrimination in the sale or rental of housing.

It was after Dole's election to the Senate in 1968 that he began to attract national notice, particularly as a staunch defender of Richard M. Nixon. He backed his President's policies on Vietnam all the way, and when the Senate plunged into seven weeks of debate over an amendment to cut off money for military activities in Cambodia, Dole led the opposition, winning admiration for his clever tactics if not always for his rhetoric.

Dole's devotion to "my President," as he so often identified him, was epitomized by his tough defense of the two Nixon nominees to the Supreme Court who failed to pass muster in the Senate, Judges Clement F. Haynsworth Jr. and G. Harrold Carswell. He flayed Democrats who were concerned about Carswell's record on racial issues; Carswell made a speech supporting white supremacy, participated in the conversion of a municipal golf course to private ownership to avoid desegregation and was reported to have behaved with hostility toward civil-rights workers and lawyers who appeared in his courtroom. In a memorable moment just before the final vote on Carswell, confronted by uncertainty within his own party's ranks, Dole strode up and down the center aisle, pointing at individual Senators and proclaiming: "I would remind my Republican friends . . . that Richard Nixon was elected President in November 1968, and that with that election came the right and duty to nominate Justices of the Supreme Court." He then delivered a thinly veiled threat of political retribution. He said he hoped the President would leave the seat vacant if Carswell was rejected, and take the case to the American people. "It may be easier," he said, "to change the Senate than the United States Supreme Court."

In reward for this kind of loyalty, Nixon had Bob Dole installed as Republican national chairman in January 1971; he served in the post for two years. It was during this period that Dole's attacks on George McGovern for his antiwar stand escalated markedly as McGovern sought and won the Democratic nomination for the Presidency. McGovern recalls Dole's labels very well: "advocate of centralized power," "left-leaning big spender," "tool of organized labor." McGovern added, "There was the strong implication that those of us who opposed Nixon's war policies were giving aid and comfort to the enemy."

The Nixon campaign was controlled by the White House and operated by the Committee to Re-elect the President, with Dole and the Republican National Committee operating on the fringes. He was not privy to Watergate and he chose not to believe the allegations of illegality and White House cover-ups, actually drafting a resolution that sought to stop the Senate investigation of the White House.

Eventually, though, Dole faced the music. George McGovern dates some of the changes in Dole to that period—a "first step," as he puts it. Says Dole: "I was very disillusioned with the White House, the arrogant people who worked there. We went through purgatory for a while as a party. That, combined with a very close race for the Senate in 1974, made me think I'd better take a look at where I was going."

There was room for improvement. During his first four years in the Senate, Bob Dole won few popularity contests, with his colleagues or with his staff. Turnover was high among his aides. Those who knew him spoke of his "meanness," his sarcastic putdowns of other people.

Some of these attributes surfaced dramatically in his 1974 campaign for re-election to the Senate, a rough battle against a two-term House Democrat, William R. Roy, a doctor-lawyer from Topeka. Roy built up a comfortable lead by emphasizing Dole's connections with Nixon and Nixon's connections with Watergate. Dole exploited his opponent's admission that he had performed a number of abortions over the years. Dole called Roy an "abortionist" who favored "abortion on demand," though Roy insisted he viewed the operation as morally repugnant and only occasionally necessary to safeguard the woman's health. Dole won re-election by a 2 percent margin.

Less than two years later, Dole was on the stump again, this time as Gerald Ford's running mate. He traveled 65,000 miles through 44 states. "I'm one-man road show," he joked. "President Ford just winds me up and says 'go'."

His campaign style, though, was his own. He made much of the feelings of "lust" to which Jimmy Carter had admitted in an interview for Playboy magazine, leaving audiences with the impression that Carter favored lewd behavior. Then Dole went on to blame the Democrats for all the American wars of the 20th century. In a debate with Senator Walter F. Mondale, his counterpart on the Democratic ticket, Dole commented: "I figured up the other day, if we added all the killed and wounded in all Democrat wars in this century, it would be about 1.6 million Americans, enough to fill the city of Detroit." The remark haunted him for the rest of the campaign and added to his reputation as an unscrupulous partisan.

The Republicans lost the election by a whisker. It was a sobering experience for Dole. Vice-Presidential candidates are chosen with the idea that they will pull voters toward the national ticket, but election-day polls suggested that Dole might actually have cost Ford votes—maybe even enough to deny him election. Friends of Ford said as much to reporters.

As the 1970's progressed, evidence of change appeared in Senator Dole. As early as 1974, for example, he voted against the Republican Administration's plan to slash the antipoverty program—a program he had opposed at the time of its inception 10 years earlier. That turn-around may have reflected a new awareness of poverty gained through service on the Select Committee on Nutrition and Human Needs, of which McGovern was chairman. He started as a doubter, both of McGovern and of the committee. Dole recalls: "I may have thought McGovern was going too far" in publicizing hunger in America, "looking down the road at some Presidential contest." As Dole concentrated more on the committee's work after the 1972 election, he became impressed with the case that had been built for Federal food-assistance programs.

Together, McGovern and Dole pushed the Government deeper and deeper into the nutrition business. There was legislation nearly every year in the 1970's—fights over expanding food stamps or establishing new programs of school breakfasts and nutrition supplements for pregnant women and infants. The budget of the Food and Nutrition Service of the Agriculture Department, which administers the feeding programs, has now grown to $15 billion, and the

agency estimates that some 38 million people receive nutrition subsidies.

"I've said publicly, and much to the disgust of some of my conservative friends, that McGovern did a good job in that area," Dole says today. The statement suggests another lesson McGovern taught him—how to work with a Democrat of distinctly different philosophical outlook. Dole and McGovern were a team not only on nutrition issues, but also on other issues in the Agriculture Committee, becoming in the last half of the 1970's the dominant influence on expensive support programs for Middle Western corn and wheat crops.

The "new" Bob Dole continued to surprise. In 1978, he voted with the Democrats to give people earning from $10,000 to $30,000 larger tax cuts, a move opposed by the majority of his party. That same year he provided the key vote needed to gain Senate approval of a proposed constitutional amendment that would give the District of Columbia voting representation in the House and Senate—once again a move many Republicans opposed. Dole also won favor among liberals by proposing a program of catastrophic health insurance to provide families with Government protection against financial ruin because of extended, expensive illness.

In early 1978, Dole was the featured speaker at an Atlanta meeting of people interested in recruiting more black candidates to run under the G.O.P. banner. Applauding the effort, he said that "Republicans need to make the extra effort to erase the lingering image of our party as the cadre of the elite, the welathy, the insensitive. . . . Our job now is to demonstrate [our] concern to blacks and others who doubt [our] sincerity."

Dole's friend and admirers, when asked to explain the change in him, often point to his personal life—specifically, to his marriage in 1975 to Elizabeth Hanford, a lawyer 13 years his junior, who was serving as a Republican member of the Federal Trade Commission. (He obtained a divorce from Phyllis Dole in 1972 after 24 years of marriage and one daughter.)

Elizabeth Dole holds a Phi Beta Kappa key from Duke University and a law degree and master's in education from Harvard. She is a warm and open person who has helped chisel some of the rough edges from Dole's personality. Some say she is politically more liberal than her husband, and that this is reflected in his increasing advocacy of measures to protect the disadvantaged and in his exhortations to the Republican Party to broaden its base of support.

Mrs. Dole, herself, denies such influence. The most she will allow is that her views and those of her husband are mostly "compatible." An Assistant to the President for Public Liaison, she is a Washington power in her own right. But she is a Reagan operative, and Dole is determinedly his own man. Only occasionally do they work in tandem, as when the President came around on Dole's tax measure this year—Elizabeth Dole helped line up business support for the legislation.

Dole's physcial handicap is another significant factor in his makeup. McGovern remembers seeing Dole fall in the Senate subway one day, his crippled right arm unable to break the impact. The pain was obvious and, said McGovern, "It was a pitiful sight; he really was handicapped." Dole is virtually unable to use his right hand or arm; he must allow himself one hour to dress each morning. His concern for others who are handicapped is manifest. He has employed sign-language interpreters to enable deaf people to understand his speeches. He gave almost half of the $66,850 he earned in speaking fees last year to charities for crippled children, the blind, the retarded and other handicapped people. He has used his influence in Congress to secure tax breaks and other benefits for the handicapped.●

HUMAN RIGHTS WEEK IN MICHIGAN

● Mr. LEVIN. Mr. President, 34 years ago last Friday, representatives from member nations of the United Nations unanimously adopted the Universal Declaration of Human Rights. The event heralded a new age of global recognition that people everywhere should have certain inalienable rights not to be violated by anyone or any government—the right to freedom of thought, conscience, and religion; the right to life, liberty, and security of person; the right to be free of torture, arbitrary arrest and prolonged detention without trial or charge—to list only a few.

Being an international declaration, the document signaled to the world that making decisions affecting these rights was no longer exclusively the prerogative of individual nations. The declaration pronounced that guaranteeing fundamental human freedoms was the responsibility of the world community. This "Universal Bill of Rights" was not only a reflection of U.S. ideals but represented humanity's most basic desires. It contained a "common standard of achievement for all peoples of all nations."

Efforts to enhance respect of human rights in the international arena blossomed from the seed planted in 1948. The Genocide Convention, the Covenant on Civil and Political Rights, and the Covenant on Social, Economic and Cultural Rights—unfortunately unratified by the Senate—delineate the essential ideas of the declaration in the form of binding international treaties.

Mr. President, a structure setting forth the basic principles for promoting human rights that was agreed to 34 years ago has been finely turned and has become a growing concern to many. But it troubles me that so many nations persistently and conscientiously refuse to respect both the letter and the spirit of their international commitments. The 34th anniversary of the Declaration of Human Rights comes at a time when emigration from the Soviet Union and the Warsaw Pact nations has dropped to a distressingly low level, when Poland is clenched in the fist of martial law, when Afghanistan is fighting to expel a foreign power, when apartheid is a political reality in South Africa, when tens of thousands of missing persons in Argentina have yet to be accounted for, when cultural deprivation continues in the Baltic States, and the list trails on.

Although a great deal remains to be done to bridge the gap between aspiration and achievement, we must remember that progress has been made and future perseverence is vital. Our success in advancing the cause of human rights depends on our steadfast commitment. We must continue to care.

It is heartening that there are individuals, groups, and organizations who are committed to promoting fundamental human freedoms and who do care about people half way around the world who have been deprived of their legitimate rights.

In commemoration of Human Rights Week, the Ann Arbor and Lansing, Mich., chapters of Amnesty International are sponsoring a 24-hour candlelight vigil on the lawn of the State capitol building. Governor Milliken issued an executive declaration memorializing that "Vigil of Hope" and observance of December 10–16, 1982, as Human Rights Week in Michigan. I ask that the text of the executive declaration be printed at the close of my remarks.

Mr. President, as we commemorate the 1948 adoption of the Universal Declaration of Human Rights and recognize it as a mementous event in the history of international relations, we also thank those presently defending fundamental human freedoms, and we look to the future, rededicating ourselves to pursuing the objectives set down in the 30 articles of that document. Only with continued commitment and care can we hope to approach our aspirations.

The text referred to follows:

HUMAN RIGHTS WEEK IN MICHIGAN

December 10 marks the 34th anniversary of the adoption of the Universal Declaration of Human Rights by the United Nations.

The Michigan chapters of Amnesty International are proposing that all Michigan residents place a lighted candle in a window on the anniversary day, December 10, as an appropriate way to acknowledge the dignity and worth of all human beings.

At the same time, a "Vigil of Hope" has been planned in Lansing, where a candle will be kept burning for 24 hours and where members of Amnesty International will distribute copies of the declaration adopted 34 years ago and which still is so far from being universally implemented.

Therefore, I, William G. Milliken, Governor of the State of Michigan, do hereby declare December 10–16, 1982, as Human Rights Week in Michigan, and urge all citizens to join in a reaffirmation of commitment to human rights for all people—particularly during this week.●

WEST GERMAN PAPER COMMENTS ON TECHNOLOGY DIVERSION ISSUE

● Mr. NUNN. Mr. President, the Permanent Subcommittee on Investigations held 5 days of hearings last May

on the subject of technology diversions to the Soviet bloc and Soviet Union. On November 15, the subcommittee report was issued.

As ranking minority member of the subcommittee, I am encouraged by the fact that our hearings have played an important role in focusing needed public and Government attention on this issue, which is so critical to the national security.

The German newspaper, Frankfurter Allgemeine Zeitung, commented on the technology diversion issue in its July 15, 1982, edition.

Mr. President, I request that the article, translated into English by Dr. Edith Palmer of the Library of Congress, be printed at this point in the RECORD.

The article follows:

[Translation from the German]

ELECTRONICS EMBARGO

The Federal Republic was to be abused as a gate and, instead, it functioned as a trap. This is one way of looking at the timely seizure of four computers that were on their way from the United States via Canada. It was intended that they be sent through the Federal Republic to Switzerland, a country neutral on the issue of the technological embargo. The German customs authority became engaged in the implementation of an American search. How much might they already have missed before this time? How many German helpers make such transactions possible and how many German firms serve as a launching pad in return for a sizable compensation? Electronics has become the key to all defense. The latest war in the Near East has shown that the successful surprise effect of some Soviet precision weapons of the year 1973 has again been compensated for, and also that the West would be well-advised to maintain its traditional advantage in all fields of electronics and should under no circumstances promote a technological balance of strength. Since the Federal Republic is in need of assistance in this area, it has every reason to retain the American trust and to cooperate in the denial of high electronics technology to the Eastern Bloc. The bad example that American private firms are setting cannot be used as an excuse.●

THAT EXECUTION WASN'T PAINLESS

● Mr. HATFIELD. Mr. President, I would like to bring to the attention of my colleagues an editorial in Saturday's Washington Post authored by Chuck Colson, the president of Prison Fellowship. The editorial, "That Execution Wasn't Painless," concerned last week's execution of Charlie Brooks, Jr., in Texas. This execution, unlike that which took place in Virginia in August when Frank Coppola was electrocuted, involved the injection of sodium pentathol and three deadly poisons into the bloodstream of the condemned felon. Instead of having the individual writhe in tormented convulsions while strapped to an electric chair, the law in Texas sanctioned the neat and sterile process of lethal injection to carry out the sentence of death.

I do not rise today to pity or condone the criminal acts of Mr. Brooks, nor do I wish to slight the heartwrenching injustice done to Mr. David Gregory and to his relatives and friends. It does not follow that one who opposes the institution of capital punishment is a coddler of criminals or is insensitive to the suffering of victims and their families.

Rather, I rise to reiterate the statements I made in this Chamber on August 11 of this year to the effect that society is not God and must not judge who shall live and who shall die. Murderers should be stuck in jail permanently. Executing these men does nothing more than brutalize the very values society seeks to protect initially by sentencing criminals to death.

There is little doubt that capital punishment deters no one. When you talk about murderers whose acts were sufficiently heinous and appalling to meet the requirements of death-penalty statutes, you are talking about individuals with very sick minds. These people do not consider the consequences of their actions. They do not operate in the world of reason and responsibility.

They are violent and disturbed individuals, and they rightfully should be separated from the mainstream of society. But if we accept the premise that capital punishment does not deter capital offenders, then we must ask ourselves the troubling question: Why do we impose the sentence of death on criminals? Is is to effect "eye-for-an-eye" retribution? Is it simply to banish these murderers from the Earth?

There are two specific aspects of the execution of Charlie Brooks that are disquieting. First, as Mr. Colson pointed out in his editorial, the true issues involved in capital punishment relate to substance, not form. It matters not whether society permits the use of electric chairs or gas chambers or firing squads or "painless" lethal injections. I think this closely parallels the moral implications involved with abortion. Whether the means be saline solutions instead of suction instruments, abortion is still wrong. Capital punishment is no different. But for some reason, the public does not find lethal injections as objectionable as electrocution.

Mr. President, the public must not be misled into believing that one form of capital punishment can be more acceptable than another. Such notions divert attention from the nagging moral and spiritual issues, and place it on the clear-cut issues of time, place, and manner. Making capital punishment as painless as possible makes it no less morally reprehensible.

Mr. President, my second concern deals with the irrevocability of the death penalty. Various studies have shown that persons whose innocence is later convincingly established are convicted and sentenced to death. A study by Hugo Bedau lists 74 people since 1893 who, despite their innocence, were sentenced to death. Eight of those people were ultimately executed.

In the instant case, there is a great deal of doubt as to whether Charlie Brooks actually killed Mr. David Gregory. Brooks' codefendant, Woody Lourdes, received a 40-year sentence, and since no eyewitnesses were present, only Lourdes and Brooks know who actually killed the victim. Charlie Brooks maintained his innocence to his grave. He had no funds to stretch the appeals process any further, and he became ripe for execution. I will not seize this opportunity to discuss the racial and prosecutorial injustices inherent in our country's treatment of capital offenders. But even the most ardent supporter of capital punishment would have to confess that there was real doubt as to whether Charlie Brooks was the actual killer. The dreadful consequences to this society for taking the wrong man's life need not be spelled out.

Mr. President, I ask that the entire text of Mr. Chuck Colson's editorial be printed in the RECORD.

The editorial follows:

[From the Washington Post, Dec. 11, 1982]

THAT EXECUTION WASN'T PAINLESS

(By Charles W. Colson)

This week Charlie Brooks Jr., a 40-year-old Texas prisoner, was placed on a hospital bed, leather straps were tightened across his body, an IV needle inserted into his arm. A saline solution began to run through his veins; then, on command, an anonymous prison official emptied a syringe of sodium pentathol and a mixture of three lethal poisons into the flowing liquid.

No one knew for sure what would happen when the drugs entered Charlie Brooks' system. Would he convulse, would he die quickly? No doctor was present, or could be, of course, since medical ethics—we can be grateful—prevent doctors from deliberately taking a life. Charlie Brooks yawned deeply, wheezed a few times, gasped once or twice. Seven minutes later he was legally dead.

When the Nazis used similar procedures on humans a generation ago, the world recoiled in shock. Today, while Brook's execution is certainly headline news, within a week or so no one will remember his name except the few who keep up with such things, like his family. No surprise, however. The focus in this execution has always been on the method, not the man. And official witnesses said the death "appeared to be painless."

So the state has found a way to kill that doesn't broil a person's brain or necessitate pinning a target to the prisoner's chest. For the most part, everyone seems pleased.

Of course, putting stray or feeble animals to sleep is something humane societies have been doing for years. Now that the way has been cleared for humans through the experimental disposal of a condemned prisoner, what is to stop us from exercising the same

"humane" techniques on the unwanted, the aged, the deformed?

It is a ghastly notion that any deliberate taking of a life can be humane. And by calling it so we betray ourselves as all the more barbaric. Euphemisms cannot mask the awful truth of what we do. The old Testament prophet Isaiah had clear words for such twisted thinking: "Woe to those who call evil good and good evil."

And I can't think of a more inappropriate case to try out our newest humane form of execution. In the Bible, God demands there be two eyewitnesses before a person can be executed for a capital offense. In Charlie Brook's case, there was not only no eyewitness, there was no evidence that Brooks pulled the trigger. Two men participated in the crime; two men were found guilty. Brooks' partner was sentenced to 40 years (with parole, he can be out in two), and just last week, as Brooks' death date drew near, the partner said he would confess. Brooks maintained his innocence to his last "painless" breath.

Even the prosecutor of the case appealed for leniency, asking that the execution be stayed—but to no avail. The Supreme Court, for the second time in two months, denied a stay. Texas officials quickly strapped Brooks to a stretcher and put him to sleep forever.

Now that we have found such an easy, clean way to snuff out a life, who is to say where we will stop? ●

BILL NOURSE: AN EFFECTIVE FIGHTER FOR SMALL BUSINESS

● Mr. SASSER. Mr. President, recently Inc., a nationally known magazine for growing companies, published an article on the activities of Bill Nourse, a small businessman from Nashville, Tenn., who has earned a national reputation as an effective advocate of small business causes.

I first became associated with Bill Nourse during the 1980 White House Conference on Small Business and since that time we have worked together on small business issues and problems. He has been a source of inspiration to me, and recently he was actively involved in my campaign for reelection. As a matter of fact, he was kind enough to head our statewide small business campaign committee.

Bill Nourse understands how the wheels turn in the world of small business, both in the actual operation of small businesses and in the involvement of other factors—including political elements—that are so important to small business. He works in and around those wheels and helps to make them turn the right way.

As a member of the Senate Small Business Committee, I have found Bill's advice and counsel to be most helpful on a continuing basis, and I look forward to continuing to work with him in the years ahead.

I'm sure my colleagues are interested in leaders like Bill Nourse, and I ask that the article from Inc. be placed in the RECORD.

The article follows:

THE POLITICAL ODYSSEY OF BILL NOURSE

(By Tom Richman)

The following is a list of things Bill Nourse is not: a business wizard, devastatingly handsome, a high-tech genius, preppy, hilariously funny, a brilliant intellectual, a good ol' boy, a political radical, rich.

On the other hand, in virtually everything he does, Nourse is where most of us would like to be—somewhere on the high side of average. He and his wife run the family business, a moderately successful West Nashville hardware store. Their five kids all do well enough in school and earn most of their own tuition money. At 43, he is the businessman most businessmen would be happy to be. "He is," gushes a colleague, "the all-American small business guy. It warms your heart just to talk to him."

Nourse's eight-year-old Brookmeade Hardware & Supply Co. will gross $900,000 this year, 80 percent of it in sales to contractors and residential property management concerns. Poor location limits Brookmeade's retail volume, but Nourse has built his wholesale trade by becoming a one-stop shop for the maintenance managers of Nashville's apartment complexes.

Creative buying lets him price below much of his competition but still keep his margins healthy. Take the paint, for example. Brand-name paint prices include the manufacturer's national marketing and advertising costs. Brookmeade's wholesale accounts are interested in product performance, not label. So Nourse buys from a small independent paint-maker that can match the chemistry of the big-name companies and beat their price. And, because he is his paint supplier's largest buyer, Nourse can make demands. The supplier inventories Brookmeade's stock and ships virtually on demand. Brookmeade's private-label light bulbs also come from a small independent manufacturer.

Nourse has pushed the sale of bulbs and lightweight electrical parts to apartment complexes as far west as Little Rock, east to Jacksonville, and north into Illinois. He finds potential buyers in the Yellow Pages, mails a flier listing prices, and follows up with a telephone call. United Parcel Service makes the deliveries, usually within two days.

Next year Nourse expects Brookmeade sales to break $1 million. "If it weren't for this recession," he says, "we'd already be there."

There is something in Nourse, says a friend, that appeals to everyone who is in small business for the life-style rather than the money. "His strength," says another, "is in his typicality."

Thus no one is more surprised than Nourse himself that over the past three years he has become something more than the head of a growing family business—and that his ambitions run even higher.

Now, besides running the store and raising kids, he commutes frequently between Nashville and Washington, D.C. He talks to senators and members of Congress, and, more important, he talks to their staff aides. He has met with Presidents and is no stranger around the governor's office. Newspaper reporters seek him out. He sells paint to customers who saw him interviewed on TV the night before. He is a key man in a senatorial reelection campaign. He is asked to speak around the country. And, like the President, Nourse has acquired his own kitchen cabinet of trusted advisers. "I'm not satisfied being a small businessman," says Nourse. "I'm not contributing to society at my highest potential."

What happened to Nourse—his politicization—has happened to other small businesspeople. Jimmy Carter was a businessman before he was a governor. Rep. Berkley Bedell (D-Iowa) is still better know in some circles as a merchandiser of fishing tackle (Berkley & Co.) than as a congressman. Those, however, were isolated conversions, part of no discernible pattern, while Nourse is part of a group, one among many who had their political eyes opened by their participation the January 1980 White House Conference on Small Business.

Out of the nearly 2,000 delegates to that four-day Washington gathering—and the more than 30,000 people who attended preliminary sessions in major cities around the country—has come a crop of previously apolitical entrepreneurs and proprietors who, despite their predisposition to stubborn independence, got a bite of collective power and liked the taste.

To be elected a delegate to the January conference an individual had to campaign at one of the scores of state and regional meetings before the main event. Successful candidates were usually those who had put together a coalition of supporters and who had developed an identifiable position on an issue.

With no previous experience and motivated only by an "urge to get involved," in his words, Nourse composed a position paper, got himself elected a delegate, and jumped into public life along with several thousand others with similar backgrounds and motives.

The recommendations that conference delegates eventually made to President Carter and Congress on small business issues—taxes, regulation, economic policy—all began with gripes and proposals first made at these preliminary sessions. Coalitions were formed around specific tax reforms, for example. Compromises were made, deals were cut, parliamentary strategies were worked out.

The conference was a political training ground. Nourse had never run for office, never tried to organize support for a piece of legislation, never tried to maneuver an idea through a democratic forum. He had, in other words, never before competed in a political—as distinct from a business—environment. The White House Conference gave Nourse and others like him not just the unanticipated opportunity to enter the political world, but also on-the-job training in how to survive, and possibly thrive, there.

In the two years since the White House conference, these mostly middle-aged neophytes have organized small business conferences in their own states, gotten themselves appointed to advisory commissions and committees. They have created new small business associations, taken leadership positions in old-line business associations, worked to defeat or support candidates for political office, and otherwise started wielding their individual and collective influence. Nourse has been more active than most.

Nearly two years ago he worked to get a Tennessee banker appointed to the top job at the U.S. Small Business Administration. (If he had listened to Nourse, Reagan wouldn't have had to fire the managerially incompetent Michael Cardenas after his first year.)

Last year Nourse persuaded Gov. Lamar Alexander of Tennessee to convene a state small business conference.

This year Nourse initiated a resolution, eventually pased by the U.S. Senate, urging Reagan to fill the next empty slot on the Federal Reserve Board with someone with a background in small business or farming.

In January he showed up next to Reagan at a meeting the President held with small businesspeople the day before delivering his State of the Union address.

Currently Nourse is organizing an independent political action committee to put some cash behind small business issues on Capitol Hill, sitting on the Senate Small Business Committee's advisory panel, serving on the U.S. Chamber of Commerce's small business council, and campaigning across Tennessee for Democratic Senator Jim Sasser.

"The government doesn't understand what it unleashed with the White House Conference," says Nourse, "It created a reason and a vehicle for a whole new class of people to move into the political process. . . . I'm continually surprised that a guy who owns a hardware store in West Nashville can seriously sit down and talk with a U.S. senator about a candidate for the Federal Reserve Board."

People who have worked with Nourse say he is no rube as a political operative. "He can take a plan that is half-baked, put it together, take it to the right people, and get it done," says Jesse Hunter, a Nashville businessman, pointing to Nourse's role in effecting a change in the federal income tax laws. That change, part of last year's tax cut, permits businesses to treat the first $5,000 spent each year on capital equipment as a direct expense. That limit will rise to $10,000 in 1986. Direct expensing was not Nourse's idea, but if he hadn't pushed it persistently it might never have become law.

"We don't have to drive tractors around on the Mall to get our points across," Nourse says. He is very big on working through the system. When Nourse first approached the Tennessee governor's office about a state small business conference, says Hunter, their intitial reaction was to ask him who he thought he was "But he kept chipping away at it and won their respect."

"No other country on earth will let a guy with two or three employees affect the system the way I can," Nourse says.

"The man has charisma," says Andy Centerbury, a state government official. "Sometimes we think he get more interviews than the Governor."

He has something. He has attracted a group in Nashville and in Washington of nearly a dozen men and women who serve on his kitchen cabinet. One is a partner in a Big Eight accounting firm; another heads an advertising agency; two are lawyers; several own their own companies. Some are older than Nourse, and most of them make more money than he. All of them have more formal education. (Nourse left college after three years.) But Nourse clearly heads the group. They provide the advice, counsel, and assistance. "In high school," says one of his adviser/friends who has known him that long, "Bill would be the behind-the-scenes organizer. Now he'd be the guest of honor."

There is a cadre of people like himself, graduates of the White House conference, in every state, Nourse says. "If I want to bring a point of view to the attention of [Senator] Sam Nunn (D-Ga.), I only have to make one phone call. Another one to North Carolina, and I can be sure that [Senator] Jesse Helms (R-N.C.) will hear about it."

Nourse is no ideologue. In nearly five days of conversation, telephone calls, and addresses to groups on Sasser's behalf, he was never detected falling back on the sort of rhetorical clichés that politicians often resort to when reasoned logic fails them. Nourse usually had a reason for saying what he said that was stronger than a prejudice.

"Congress," he says, "has taken it for granted that the corner store is always going to be there. They can't make that assumption any longer. . . .

"It's not right that the banking industry is getting rich at the expense of everyone else. What's happening is a transfer of wealth from producers to bankers through interest rates. . . .

"You give big business all kinds of [tax] credit for buying machinery, but you don't give small business any credit for creating jobs. Why not have a new-jobs tax credit? It's cheaper than paying unemployment. Ronald Reagan agreed that it made sense to him. . . .

"Social Security is going to be the next major battle. Next year they're going to want to raise the tax rate by 1 percent. We're saying, 'wait a minute. That's cutting into my operating revenue.' It'll be just ruinous for people like me. . . .

"People abuse unemployment compensation. The law should be changed so that the second time you draw unemployment you have to pay half of it back. The third time you draw you should have to pay it all back. There are carpenters in my own family who draw unemployment every winter. I tell them, 'Don't you understand that you're destroying the United States? You're not entitled to a damn thing. . . .

"City services should be contracted out. That would give city council members real power. Now they have to worry about 'our poor employees.' If grass-cutting were contracted out and the grass didn't get cut, they could just tear up the contract and find someone else. I'm a firm believer that government should not be in business. . . .

"Industrial revenue bonds are abused now by the large chain stores. When the taxpayer subsidizes these new stores, it doesn't create new jobs. It just reshuffles community spending habits and hastens destruction of the small business infrastructure, which is usually the source of community political leadership. The blunt truth is that small business's track record of job creation and community leadership cannot continue if we don't restore small business's capital base. It's all part of the concentration of resources that's taking place in this country."

Nourse is not firmly in either party's political camp. Several years ago he attended a Republican weekend retreat for grassroots leaders. "Afterwards," he says "it was just assumed that I was a Republican, and probably I was."

Now that he is actively working for reelection of a Democrat, though, he would consider a switch. "I feel more comfortable with Democrats than with Republicans," he says. "Republicans have an arrogance about them. They always seem to be asking, 'What do you want from me? I'm a busy man.' Well, I may work with my hands and wear blue jeans, but I'm just as good as they are."

So far Nourse's short public life has evolved issue by issue with no clear, long-range goals. But his behavior is beginning to suggest that he is or soon will be running for something. "I wouldn't mind serving in Congress," he says, "but I can't honestly say I will. . . . I want to affect the environment in which small business operates."

His kitchen cabinet persuaded him not to run for the Tennessee legislature. "They felt I'd be bored," he says.

The term "small business movement" recurs in conversation, but Nourse can't define it. There are, as he points out, hundreds, maybe thousands, of people like himself giving more than just lip service to resolving issues affecting the small business environment, but there is no structure to that community, no glue holding them together, no vehicle for their common action.

"I see this huge vacuum out there, and I wonder who's going to fill it. The longer it's there," says Nourse, "the more I want to step in."

No one accuses Nourse of being a dreamy-eyed idealist. If he sees a movement by small businesspeople, it's probably there. And whether it is leadership of that movement or public office he eventually seeks, he already knows how he is going to get small businesspeople's support. "That hardware store is my log cabin," he says. "I'm one of them."●

AMERICA'S FIBER/TEXTILE/APPAREL INDUSTRY

● Mr. HOLLINGS. Mr. President, it was my pleasure during the congressional recess to hear a forward-looking and incisive address by one of the leaders of America's textile industry. Mr. Gerald Elden, president of Hoechst Fibers Industries and presently chairman of the board of Man-Made Fiber Producers Association, delivered a candid and realistic talk concerning some of the very serious problems facing America's fiber/textile/apparel industry. As many of my colleagues know, this industry is the largest in our manufacturing sector. Critical to America's employment and equally critical to our national security, the fiber/textile/apparel complex is integral to our economy. Any injury this industry sustains through economic problems here at home or imports from abroad reverberates throughout the economy. In terms of what this industry produces and who it employs, we are talking about one of the foundation stones of the national economy.

Written off only a few years ago by many of the so-called experts, this industry is modernized, retooled, and more than able to hold its own at home and even develop new markets overseas. Our producers can compete with businessmen in any country, but not with the governments of those countries. Only if our Government gets behind a strong trade policy, demanding from others the same kind of equity and access we have granted them over the years, can our economy sustain.

Mr. Elden has been one of the leading participants in industry-labor-government consultations looking toward the formulation of a more enlightened policy for America's textiles. He has been very much involved in various bilateral negotiations, and just a few months ago accompanied our coun-

try's textile negotiators to the People's Republic of China. The PRC has the capacity to inundate the American market, and the negotiations which will be taking place between now and the end of the year are absolutely vital to the stability of the textile industry and continuation of the jobs it provides.

I commend Mr. Elden's speech to my colleagues, both for the accuracy of the information it supplies on our fiber/textile/apparel problem, and for the sound good judgment it brings to the discussion of trade and economic problems in even a broader context. I think Mr. Elden's urgent plea for better Government-industry cooperation and understanding is right on target. Other countries have learned the success which can be achieved when all sectors of the economy are pulling together for the common good. Indeed, for much of our history, America understood that lesson full well. Unfortunately, in recent years we have lost sight of it. American industry can be competitive as never before, if only Government would develop the same spirit of competition and leadership evidenced by leaders of American industry such as Gerald Elden.

Mr. President, I ask that the text of Mr. Elden's remarks to the board of the Man-Made Fiber Producers Association be printed in the RECORD.

The remarks follow:

REMARKS TO THE MMFPA BOARD MEETING BY GERALD ELDEN

Good evening, gentlemen, and welcome to Florida. Rather at the beginning than at the end, I'd like to thank our president, Charlie Jones, and his staff in Washington—Fisher, Larry, Pat, and all the others—for their support, their effort and their dedication on behalf of our association during this past year. Without this group, under Charlie's warm but firm leadership, our association would be far less effective.

And I'd also like to thank our guest, Senator Ernest Hollings, for his leadership and help in the Congress of the United States to the fiber/textile/apparel industry of this country, in restraining imports from flooding our markets. I'd like, however, to make some additional remarks about the Senator a little later.

I am going to depart from the usual format this evening and not review the year past, since that summary is contained in the annual report, and since we will have detailed information from our various committees tomorrow. I will, however, review two specific areas, namely some of our bilateral negotiations, their progress and problems, and beyond that, I would like to talk a little about the future, the future of our industry, and the future of our country.

First to the bilaterals. As you know, I had the opportunity to travel as one of the advisors with our Government team to the Far East in August for negotiations with the PRC, with Indonesia, the Philippines, and, as it turned out, with Thailand. The most important of these bilaterals was obviously the People's Republic of China, and to summarize it for you at the outset: No agreement was reached. In addition to having to call the Chinese on various product categories where shipments were accelerating at an unprecedented rate, the group also had in its possession and presented to the Chinese at that time, the ATMI-prepared case on the dumping of polyester and cotton print cloth.

Naturally, considering the calls on various categories, the very restrictive stance taken by our government team as the basis for trading in the future, the bringing of additional categories into the bilateral scheme, and presenting the Chinese with the dumping case, set the stage for future negotiations rather than producing any possibility for agreement at that time. And this strategy—in my view—was well conceived. It's interesting to note, that in discussions with the Chinese, at one reception or another, representatives of the Ministery of Trade or China-Tex continually talked about "mutually beneficial trade," which meant in Chinese terms, anything that's good for them regardless of the problems we might encounter in the United States. The Chinese representatives were totally uninterested in the fact that the U.S. market was not growing, if, indeed, not momentarily declining, in the fact that mills were working short time or were actually being closed, in the fact that unemployment was reaching close to 20 percent in certain areas of the textile industry, in the fact that there were substantial financial losses and bankruptcies in this country. The primary goal for China is to increase its trade to the miximum with the U.S., to build its textile industry, and most of all to employ its people. "Mutually beneficial" in China means "one way."

We visited a shirting factory and a print cloth weaving mill, namely Peking Cotton Mill No. 2 and found the people disciplined, hard at work with relatively decent equipment. In fact, in the shirting mill the sewing equipment was quite up-to-date, but the number of hands that were available are unbelievable to one like myself who had not been in the Far East before. And where in typical American operations automation would be employed, for instance in packaging of men's dress shirts, the Chinese, in order to employ people, have all the packaging operations done by hand.

In Peking Cotton Mill No. 2, I asked Jim Turner of Dan River how many people a typical U.S. plant of that nature would employ for the output that they indicated, and Jim said somewhere between 800 and 1200. In Peking Cotton Mill No. 2, there were 800 people employed!

The negotiations in Indonesia and the Philippines were essentially no different in that the same concept of mutually beneficial trade meant to those countries the unrestricted or practically unrestricted growth of their exports to the United States regardless of conditions existing here. Naturally, the criteria for those negotiations were different than from those with China, since both countries are MFA signatories, and since quotas exist on many more categories than is the case with China. As you know, an agreement was reached with Indonesia recently, and negotiations are ongoing with the Philippines and with China whose representatives were in Washington until a few weeks ago.

Prior to the meeting with the People's Republic of China in Washington, a meeting was held with the President by representatives of ATMI, AAMA, MMFPA, and various legislative leaders as well as the special trade representative, Bill Brock. The President again committed the administration to a very low rate growth, tied to domestic market growth and indicated that our government would not allow linkage between these negotiations and other issues for instance sending arms to Taiwan.

China still believes that regardless of the tremendous rate of increase of their exports to the U.S. over the last two years, they should by virtue of their size, be the largest of the big four exporters to this country. Hopefully, we will reach a reasonable bilateral with China and maybe further into the future tie this tremendous threat into the multi-fiber agreement.

We must recognize that countries like Indonesia, the Philippines, and the PRC have as a major national goal employment, and we recognize that the textile industry is one of the first industries, so-called "less developed countries" turn to because of its potential labor intensity. We have much to do, as I indicated to the apparel industry at their convention in May, to become as cost-competitive as is humanly possible, through reinvestment of profits and automation where possible, and we must export. In that respect, it was happy to see the AAMA unveil a six month $260,000 program to develop a more unified and focussed approach to insure the U.S. apparel industry's competitiveness in the world market in the future, and, I am pleased that the President signed the export trading company bill S. 141 into law which is designed to encourage exports of American mechandise through establishment of separately run overseas trading companies, exempting these from certain anti-trust and pricefixing regulations.

It's a beginning; we need protectionism for a while and we cannot, at this time in our development follow a totally free trade philosophy without a worldwide fair trade philosophy. But we must also continue to modernize if we are to avoid the label of a sunset industry that some professors at MIT find an appealing description for the textile/apparel complete these days. We must work on the American retailer to buy American wherever he/she possibly can, and on the American consumer to buy American, if we are, indeed to help overcome our major unemployment problems. I like "made in America," by Americans, for Americans.

In reviewing what I said to the AAMA 6 months ago, I find that the rapidity of change continues and that it may be, indeed, accelerating. Only six months ago, I spoke about the world political focus being on Poland, Central and South America, and the Falkland Islands. Do people even remember the Falklands now with the focus on the middle east, on Israel/Lebanon, and the fall of a government through first no-confidence vote in Germany—and again on Poland?

Six months ago, I spoke of an ideology at home that had moved from liberalism to conservatism, and now, 6 months later, in the Democratic primary elections in New York State for Governor and Lieutenant Governor, a revitalized coalition of unions and typically liberal forces arrayed together as in the past, may possibly be a preview of things to come on the national scene.

I spoke about economic problems at home, an energy revolution, redistribution of the wealth of nations—changing the thrust of world politics, redirecting the flow of funds, investment policies and research programs, altering currency relationships, rebuilding dormant industries, i.e. oil exploration, and radically changing the life of the American consumer, his standard of living, and his mobility which were built on cheap energy.

Today, 6 months later, oil prices are declining, consumption is declining—energy efficiency is continuing to improve, alternate fuels, such as coal and gas, are making slower inroads, and Exxon has, in fact, discontinued its major oil shale extraction project in Colorado.

We Americans are faced with a psychological dilemma—a dilemma which on the one hand requires a large degree of flexibility in this rapidly changing world, yet on the other hand requires us to chart a steady course to a renewed and revitalized political and economically stable future.

An example of a steady course and a specific direction was brought to mind recently when I read in the Times of Secretary Shultz' first meeting with Gromyko. In 30 years, the USSR has had one foreign minister and one, totally unacceptable foreign policy for us. During those same 30 years, the U.S. has had 8 Secretaries of State and a vacillating foreign policy, and we might also be reminded that one of Kissinger's concepts in the conduct of foreign policy was that we should chart a direction for the next 20 years, fully taking into account the aberrations that take place from time to time on the world political scene. We Americans have not been able to accomplish that steady path in foreign policy.

We must also follow, it seems to me, a more focused and directed economic policy, a policy that takes a changed and more competitive world into account. We need a long-term national economic purpose, a direction to cope with the economic challenges of our time, 40 years after World War II, and those challenges still to come from a developing world a burgeoning population and a world reaching for a higher standard of living. This focus must lead to government-industry cooperation and understanding, not antagonism, to changes in anti-trust philosophy, to a recognition that the U.S. cannot support the rest of the world any longer, and that countries have a right to develop their economies, not, however, at the expense of U.S. markets, U.S. industries, U.S. taxpayers, and U.S. labor.

We have established a new economic course, and although we are facing problems, we should not radically change direction. As NASA directed the Apollo missions to their objective, the Moon, mid course corrections were made. As we in business target long-term objectives, mid course corrections are made, as some assumptions prove incorrect, and so, too, let industry try to help government stay on course, making corrections as required, but not losing sight of the long-term objective.

The information explosion provides every American with minute by minute political changes, daily world conflict updates, daily market fluctuations, daily interest rate changes, weekly money supply variations, continuous estimates on unemployment, a rash of monthly economic statistics and so on . . . ad nauseam. We have become, it seems to me, a somewhat schizophrenic public, trying in vain to chart a true course while attempting to respond rationally to a changing hurricane of events. And yet we have managed major economic problems of the past, and in the economic arena, an arena of expertise for us, we should speak loudly and clearly to our government, to help that government stay on the course it charted two years ago.

Inflation may have turned down in a very fundamental way, and we recognize productivity gains as the underlying requirement to keep inflation at low levels. Interest rates have declined, personal savings are way up, but we need to rebuild confidence of the American consumer. We need to overcome price resistance at the consumer level, at retail, by trying, if possible, to hold the line through increased productivity. And we must, through a slow and gradual recovery, reduce unemployment to restore that very confidence. "Consumers today are accumulating cash, not wardrobes," said Phil Miller of Neiman Marcus, which, of course, has its beneficial consequences elsewhere but does not help our industry short-term.

There are futurists who believe in a coming boom over the next 20 years, and I would like to join Herman Kahn of the Hudson Institute in that belief.

No, we can't do it all alone because the rest of the world will have to be part of that boom.

But here at home, current trends, conservative concepts, technical fixes, new technologies, industrial management's reawakening of our expertise, our competitive nature, our will to win and the changed energy scenario are but some of the things that make me optimistic. Our recovery is slower in coming than we had thought or hoped, but I believe still that it is coming, if not already started. After 4 months of upturn in the leading economic indicators, let not the one month's downturn during the month of August cause the short-term reactions I spoke of before.

Let me close with the following thoughts: King Hubbard, an influential geologist, suggests that children born in the 1960's will see most of the world's oil consumed in their lifetime. Oil's relevance, he says, therefore, is very, very brief in terms of human civilization. And one of the things I memorized in high school comes from Shakespeare's Macbeth and goes as follows: "Life is but a walking shadow, a poor player that struts and frets his hour upon the stage and then is heard no more."

We must work, we must try, and we must achieve, and yet, in the context of our time, I guess we should not take our individual selves too seriously.

Thank you. Good night and good luck!●

INTERIOR AND RELATED AGENCIES APPROPRIATIONS

● Mr. DOMENICI. Mr. President, H.R. 7356 as reported by the Appropriations Committee on December 8, 1982, provides $7.4 billion in new budget authority for fiscal year 1983.

Mr. President, the reported bill together with outlays from prior year authority and actions completed to date in the continuing resolution puts the Interior Subcommittee at its crosswalk allocation for budget authority but over by $0.2 billion in outlays.

The subcommittee is below the House bill by $0.1 billion in budget authority and is the same in outlays.

H.R. 7356, as reported, together with actions completed to date and possible later requirements exceeds the President's budget request by $0.8 billion in budget authority and $0.3 billion in outlays.

There are two areas where the Senate is significantly over the President's request: Energy conservation and fossil fuels, a total of $0.2 billion; and the land and water conservation fund and historic preservation, a total of $0.2 billion.

In addition, the reported bill is $0.1 billion over the President's request in each of the following: The abandoned mine reclamation fund, payments in lieu of taxes, and the National Foundations for the Arts and Humanities.

With respect to the credit budget, the committee's recommendation is within the first budget resolution's 9(2)B credit allocation for both new direct loan obligations and new loan guarantee commitments.

Mr. President, I ask that the two tables showing the relationship of the reported bill to the congressional spending and credit budgets and the President's budget requests be printed in the RECORD at the conclusion of my remarks.

The tables follow:

INTERIOR SUBCOMMITTEE SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1983	
	Budget authority	Outlays
Outlays from prior year budget authority and other actions completed [1]	0.3	3.3
H.R. 7356 as reported in the Senate	7.4	5.2
Possible later requirements: Forest firefighting	.1	.1
Total for Interior Subcommittee	7.8	8.6
1st budget resolution 302(b) allocation	7.8	8.4
House-passed level	7.9	8.6
President's request	7.0	8.3
Total compared to:		
1st budget resolution 302(b) allocation		+.2
House-passed level	−.1	
President's request	+.8	+.3

[1] Adjusted to include $0.3 billion in budget authority to account for full year appropriation of costs associated with site preparation and construction activities of the Strategic Petroleum Reserve, construction activities of the Smithsonian Institution and the Native Hawaiian Claims Commission that are funded for the full year in the continuing resolution, Public Law 97-276.

INTERIOR SUBCOMMITTEE CREDIT TOTALS

[In billions of dollars]

	Fiscal year 1983	
	New direct loan obligations	New primary loan guarantee commitments
H.R. 7356 as reported in Senate, with direct loan obligations resulting from prior year commitments and other actions completed (total)	0.7	−0.7
1st budget resolution 9(b)(2) allocation	.7	.6
House-passed	.7	.7
President's request	.7	.6
Subcommittee compared to:		
1st budget resolution 9(b)(2)		([1])
House-passed		
President's request		([1])

[1] Less than $50 million.●

THE LAW OF THE SEA TREATY

● Mr. PELL. Mr. President, last week the participants of the Third United Nations Conference on the Law of the Sea met in Jamaica to culminate their 8 long years of negotiations with the signing of the treaty document as well as the final act of the Conference by interested states. Unfortunately, and

in my view misguidedly, President Reagan has decided that the United States will not become a party to this treaty, despite the fact that this treaty will, for the first time, provide a comprehensive legal regime to govern the myriad uses of the oceans.

President Reagan in announcing his decision not to sign the treaty, stated that the treaty as negotiated failed to meet U.S. objectives. He also decided at that time that the United States would no longer participate in any other deliberations of the Conference, although he did indicate that the United States would sign the final act of the Conference. In my view, this decision was ill conceived.

As you know, Mr. President, I have been urging President Reagan to send a representative to the Preparatory Commission (PrepCom) as signing of the final act entitles us to do. I believe that many of the President's objections to the treaty could be dealt with in that forum. In any event, The United States loses nothing by participating in the PrepCom since it in no way obligates the United States to ratify the treaty if upon conclusion of PrepCom the United States still finds the treaty unaceptable. Experts on the treaty have pointed out that much of what arouses concern about the treaty rests in the ambiguous nature of a number of the seabed mining provisions. These provisions will be clarified during the work of the PrepCom when the specific rules and regulations which will govern deep seabed mining are drafted.

President Reagan is currently considering whether or not to issue a proclamation, unilaterally declaring all living and nonliving resources within 200 miles of our shores to be within the exclusive economic zone (EEZ) of the United States. As you know, the Law of the Sea Treaty contains provisions which will establish such EEZ's for all coastal States, as well as provisions which will govern the exploitation and exploration of the minerals of the ocean floor beyond the jurisdiction of any State—provisions which the President has found to be unpalatable. Apparently the President considers the various provisions of the treaty to be like cherries in a bowl from which he is free to select only those most pleasing to him which he would call customary international law, while declaring others, which do not appeal to him, to be nonbinding on the United States. Unfortunately, he seems to have ignored the fact that the provisions of the treaty are a carefully balanced package of rights and obligations, woven together over 8 years of negotiation and compromise.

I fear that the administration is in for a rude awakening once other nations begin to challenge—as they surely will once the treaty enters into force—the U.S. right to certain privileges granted only to signatories of the treaty, such as the unimpeded transit of U.S. ships and planes through and over some 116 strategic straits. I need not stress too strongly my deep concern about the potential conflicts which might arise in such an environment. I would hope that before the President were to take any unilateral steps to "create his own international law" he would take into account the significant foreign policy implications which are likely to result from such an action, and would consult closely with Members of Congress to ascertain their views on the wisdom of such a step.

My initial reaction to the prospect of the issuance of such a proclamation is that it would be counterproductive to take such steps which can clearly only be successful in the context of a multilateral treaty. From the President's point of view, it would seem to me that such action would have the opposite effect of what the President intends; namely it would simply encourage other countries to "rally round" the treaty. This is presumably not the President's goal. It may be true that the President would be prepared to defend U.S. interests against "all comers" within 200 miles of our shores. But, what are our commercial and military ships and aircraft to do, thousands of miles from home, when right of transit passage through and over major waterways is defined to them because the United States is not a party to the treaty which grants such rights? What kind of reception can U.S. scientists expect to receive when they attempt to conduct important marine scientific research off foreign shores? There is no proclamation which the President may issue or law which Congress may enact that can in any way change the fact that once the treaty enters into force—which it undoubtedly will—a body of international law will be created which will govern the uses of the oceans.

I am confident that with time critics of the treaty will find that it will not be possible or practical for the United States to remain outside the framework of international law. There is no way that U.S. companies will be able to undertake commerically viable deep seabed mining operations without an internationally recognized and respected procedure for allocating exclusive mining operations, which only a multilateral treaty can provide.

Mr. President, I ask that a very thoughtful editorial on this subject which appeared on December 6 in the Providence Journal be printed in the RECORD at this point.

The editorial follows:

[From the Providence Journal, Dec. 6, 1982]

U.S. WILL BE HURT BY REFUSAL TO SIGN LAW OF SEA TREATY

The nations of the world that spent eight years negotiating the Law of the Sea Treaty are meeting in Jamaica this week to sign the final act of the LOS conference. But the isolationist attitude taken by the Reagan administration toward the treaty leaves many doubts about the effectiveness of the new ocean management regime and even more doubts about U.S. ability to profit from seabed mining—the controversial issue that has split American opinion.

Signing of the final act is largely a formal step, in which even the dissident U.S. delegation will participate. Signing of the treaty itself is the crucial step, and it is there that U.S. participation has broken down.

This is a deplorable state of affairs, since most of the White House objections could be met through actual improvements in language at a meeting of the Preparatory Commission, which will be convened after 50 nations have signed the treaty. If the United States refuses to sign, it will still be eligible to attend the PrepCom as an observer but without a vote. Unfortunately, the President has decided not to send an observer.

This means the chance to influence the regulations adopted by the PrepCom will be lost, and the United States will be out in left field, not only on the mining issues but on all the other aspects of ocean law covered by the comprehensive treaty. This country could, to better advantage, go along on the PrepCom negotiations, still reserving its right to shun the treaty if its objections had not been resolved.

As things stand, France, Canada, Japan, Australia and the Soviet Union, among the nations capable of seabed mining, are expected to sign the treaty. And while Great Britain and West Germany haven't decided whether to sign, they are going to participate in the PrepCom sessions. Thus, the Reagan administration's proposal for an "alternative regime" covering seabed mining looks ever more unlikely—and in the end it probably will fail.

Where will that leave the United States? The situation will be more serious than when the U.S. Senate refused to ratify the Versailles Treaty and the League of Nations after World War I. When the Law of the Sea Treaty goes into effect—as it will when 60 nations have signed it—U.S. seabed mining interests will have no protection under international law. Investors will probably refuse to put money into ventures that seem legally risky.

That prospect was what prompted Elliot Richardson, former chief U.S. delegate to the LOS conference, to say recently, "The rest of the world can get along without us in the law of the sea, but the question is: can we get along without the rest of the world?"

Richardson was the key U.S. negotiator who drove the hard bargains that clinched the LOS agreement after years of difficult talks among 157 nations, only to have his work repudiated by the Reagan administration. He knows, better than most Americans, the damage that will be done to American prestige in the world if this country insists on going its own way.

At a time when most of the world is looking to the United States to lead it out of an economic morass and away from perilous political confrontations, the official position on the LOS treaty is an irresponsible abdication of leadership.●

DAVID ROCKFELLER COMMENTS ON THE SOUNDNESS OF THE BANKING SYSTEM

● Mr. HATCH. Mr. President, David Rockefeller, the now retired chairman of the Chase Manhattan Bank made some interesting observations on the state of the economy and the interrelationship thereof with foreign economics, with particular reference to the nature and wisdom of international loans by American banks, in the October 11, 1982, issue of U.S. News & World Report. Especially commendable has been his efforts to bolster the economy of Jamaica at the request of the administration. Jamaica has done an economic turnaround in the worst possible times, and its beginning successes have established a beacon of free enterprise and have opened a window of freedom, especially when compared with Castro's Cuba.

His early support of a policy of quiet diplomacy, particularly among our friends, and his early support of President Reagan's economic program make his remarks all the more relevant.

Latin American, Africa, and even the actions of the World Bank meant careful watching; and, despite his perhaps more sanguine views in some of these areas, what he has said deserves attention. I commend this interview to you and suggest that it makes a very useful contribution to the discussion on these issues. I, therefore, ask that this interview be printed in the RECORD.

The interview follows:

[From the U.S. News & World Report, Oct. 11, 1982]

DESPITE "A FEW FAILURES, BANKING SYSTEM IS SOUND"—INTERVIEW WITH DAVID ROCKEFELLER, RETIRED CHAIRMAN, THE CHASE MANHATTAN BANK

(Will economic upsets abroad cause losses to American investors? Are bankers making imprudent loans? When will interest rates fall further? An international financial leader answers these questions and more)

Q. Mr. Rockefeller, bank failures and bankruptcies in this country and fears of defaults abroad are making many people worried about the safety of their money. How sound is the U.S. banking system?

A. The U.S. banking system is very sound. Obviously, in times of recessions there are more business failures, and business failures have their impact on the banking system. There have been a few failures, but my own view is that the system itself is well managed and strong and that regulatory authorities are working wisely and cooperatively with the banking system to deal with these problems.

Q. How much danger is there that we could get a situation in which some bank could collapse overseas and drag the international banking system down with it?

A. It is certainly a fact that the entire world banking system is very much interrelated. Necessarily, banks do a lot of business with one another, so there is tremendous interdependence. For that reason, the regulators in the U.S. and other countries are sure to take strong steps to prevent any major failure that appeared imminent. I think it is most unlikely that it will happen.

Q. Do you see any countries abroad that may actually default on their debts and trigger a financial panic?

A. I've been asked this question a number of times in recent years. The best answer I can give is that the nations being mentioned today are different than those mentioned a few years ago. Then, people were talking about Zaire and Peru and Turkey. Banks didn't lose money on loans to these countries, as was expected. Actually, in all three cases, the banks are making out reasonably well.

Today, we're talking about different names. In many respects, they may be stronger countries. Mexico is one. But I don't see any likelihood of default. I think that what will happen there, just as it did in Turkey, is that the banks that extended credits will get together with Mexican officials, the International Monetary Fund and the World Bank and work out a program. It may mean a stretchout of the debt rather than paying it exactly as planned. Nobody likes to be paid later than was planned, but that isn't the end of the world.

Q. That sounds like a short-range solution. What are the prospects for financial stability over the long run?

A. The long-range situation in Mexico involves its enormous oil and gas reserves. Mexico based its plans on overly optimistic forecasts for oil prices. At the moment, the world price of oil and gas has declined because of low demand, creating a short-run problem for Mexico. But, over the long run, there's no doubt in my mind that there will be very substantial demand for oil and gas—perhaps at more stable prices rather than constantly rising prices. As a result, Mexico will come back. I'm sure it will continue to be a country that bankers and investors will look at with favor.

Q. How about Canada? Has its economy been so mismanaged that it may be in trouble?

A. I feel rather unhappy about a number of measures that the Canadian government has taken in order to get control of their industries from foreign investors. They've done it in a way that has certainly frightened investment capital. Nevertheless, Canadian financial institutions are very strong, and the country has enormous natural resources. Therefore, I view the problems as being very much short-term ones which will be overcome.

Q. So you would not discourage private investment in either country—

A. Well, I don't know that I would say that this is the best moment to make new and big investments. The climate is unsettled, and people would probably rather wait and see how things work out. But I do think that both countries are basically strong, and I do not anticipate that banks or investors in either country will lose large sums of money.

Q. Should U.S. banks reduce their overseas lending?

A. I don't think one can give a broad answer to that. The banking system has acted prudently and wisely, generally speaking, in making foreign loans. Furthermore, had it not been for the commercial banking system and the existence of the Eurocurrency market, the world would have been in far more trouble in 1973 and again in 1978 and 1979 than we were. During those periods, the banking system stepped in to recycle the petro-dollars generated by the enormous increases in the price of oil produced by OPEC nations.

The banking system may have made mistakes here and there, but it has acted responsibly. In fact, during the past decade, most of the major international banks in this country have suffered far greater losses on domestic loans than on international loans.

Q. Have banks, as critics contend, been too aggressive, imprudent or greedy in their domestic lending practices?

A. As a general rule, they haven't. There may have been a few cases where they got overly enthusiastic and took exposures they were, perhaps, not fully aware of. One example is Penn Square Bank in Oklahoma City. Even there, the banks involved have dealt with the problem through their loan-loss reserves, which is precisely why such reserves exist.

But it is true that when a major-corporation is threatened by bankruptcy, banks stand to get hurt. If banks took no risks and had no losses, one would have to question whether they were performing the role that they should be playing.

Q. How do you size up Reagan's economic program? Are you disturbed that it hasn't brought the prosperity that was promised?

A. Certainly the steps taken have not achieved all the results that were sought. On the other hand, the No. 1 objective was to cut back on inflation. In that regard, the results have been dramatically favorable. Also, interest rates have fallen substantially from their peaks. And the estimates of economic output during the second and third quarters suggest that the recession perhaps has bottomed out and that a modest recovery is on the way.

Obviously, the bad part is that unemployment has been very high and the rate of new investment has not met expectations. In other words, the tax incentives passed by Congress have worked more slowly than anticipated. I would have to say that a principal reason for the bad results has been the fact that the federal deficit has been growing. This is the most serious problem facing the economy.

Q. Can we get sustained recovery without further action on the deficit? If not, what needs to be done?

A. I don't believe we will have a sound, healthy recovery unless more is done to cut the deficit. The most desirable solution is to have the economy improve so that existing taxes will pay a larger share of the deficit. I'm not sure that that's going to happen soon enough.

So, realistically, Congress is going to have to decide whether it is going to deal with the automatic increases in entitlement programs and Social Security. I'm not proposing a cutback of legitimate programs that assist the disadvantaged and elderly people. But when you see entitlement programs growing at a faster pace than the economy as a whole, that must be addressed.

The other question is whether there is some way to cut back the enormous expansion in defense programs without giving a false signal to our allies or the Soviet Union.

Q. In that situation, are interest rates going to come down some more? What can we look forward to?

A. I'm afraid they're not going to come down much from present levels until the deficit is reduced significantly.

Q. Should the Federal Reserve stay on its tight-money course, or is it time to loosen up?

A. The worst thing that could happen—after going through all the pain of getting inflation down—would be to have the Fed

open the floodgates and permit inflationary pressures to rise again. My feeling is that Paul Volcker, as chairman of the Fed, has done an outstanding job. There are signs that the Fed has slightly eased its controls on money growth in the last few months, but that was probably justified by the downturn in inflation and interest rates.

Q. Can't banks do something to bring interest rates down?

A. When loan funds came in large part from interest-free deposits or low-rate savings accounts, banks could be more flexible in their rates. But at present the money-center banks that are the nation's big lenders must purchase their funds from the money markets. The spread between the interest banks must pay on that money and the rate they charge borrowers has become very thin indeed. Whether banks can afford to cut their rates by a quarter or half percent is debatable, but the notion that banks can make reductions of, say, 4 or 5 percentage points is unrealistic.

Q. During your trip to Africa earlier this year, there were reports that you said that African Marxism is not a threat to the U.S. or to U.S. business interests. Is that your view?

A. That is not an accurate reflection of what I did say. What I said and what I believe to be true is that socialism to many African leaders today is not so much an ideology but an objective to improve the lot of their people—an objective that I think most of us would agree with. Many leaders have adopted a lot of the trappings and lingo of Marxism—but neither are nor act like Marxists. Indeed, one leader who is viewed as a strong Marxist told me that Africans can never be Communists since they believe both in God and in private property.

Q. Yet some have strong ties to Cuba and the Soviet Union—

A. Yes, but it's interesting how quickly they seem to get disillusioned. Guinea is a dramatic example:

When Guinea became independent from France in 1958, President Sékou Touré refused to go along with the plans of President de Gaulle. As a result, de Gaulle was furious and withdrew support of every kind. Other European countries would not provide aid, so Sékou Touré turned to the Soviets, who gave him substantial aid. However, he discovered that the Soviets were using him for their own purposes and that Guinea did far less well than some of its neighbors who had less natural resources but had followed a different route. In 1975, Sékou Touré invited a consortium of aluminum companies to Guinea under the leadership of Alcoa. The resulting project now provides 75 percent of Guinea's foreign-exchange currency. A similar enterprise, started by the Russians, has been a failure.

Almost all of the African countries today would rather work with the United States and the West than with the Soviet Union and are looking for friendship and support from us. I think it's in our interest to give it.

Q. Closer to home: What should the U.S. do to counter the spread of Cuban Marxism among Caribbean nations?

A. Central America is a different situation. There's no question that Cuba, with Soviet support, has been trying to establish socialist or Communist countries in Central America to work against U.S. interests. The United States should try to support groups within those countries that have a different point of view. However, Americans tend to assume that because a particular country has accepted support from a Communist state and has used Marxist rhetoric, we should never deal with them. Cutting off all contact—even with the Sandinistas in Nicaragua—may be a mistake. I'm not saying we should support them, but we need to be concerned about them. I think we need in our foreign policy more sophistication and flexibility.

Q. Have your efforts to aid the private sector of Jamaica made any progress?

A. As chairman of the U.S. Business Committee on Jamaica, I am working with 22 heads of corporations and financial institutions with interests in Jamaica to see what could be done to bolster that economy. I think significant progress has been made. After heading toward Castro Communism and economic decline for eight years, Jamaica held free elections and put in office Prime Minister Edward Seaga, who is an outspoken exponent of free enterprise. Since then, tourism, which had virtually disappeared, has come back. Foreign investors have been invited to help revive the banana industry, a major source of exports. With any sign of improvement in the world economy, one would see Jamaica come back fairly well.●

CBO AND GAO ON THE NUCLEAR FUEL CYCLE ACTIVITIES ACCOUNT

● Mr. HUMPHREY. Mr. President, just a few days ago, the Environment and Energy Study Conference Floor Brief focused attention on a House and Senate Appropriations Committee proposal to establish a nuclear fuel cycle activities account. In the past all nuclear programs, except for uranium enrichment, were placed in a single account. What the committees now proposed to create is two accounts. One account would consist of nuclear research and development activities. Another would consolidate uranium supply and enrichment, the Clinch River breeder reactor project, and nuclear waste disposal activities.

The logic behind this move, the committees state, is to "bring together those parts of the nuclear fuel cycle from which revenues are currently or will in the future be derived." Uranium enrichment is sold to utilities and produces revenues. Clinch River will produce revenues if it is completed and operates. And under the Nuclear Waste Policy Act, waste disposal activities will be paid for through fees that will be levied against the utilities.

At first glance, this scheme looks sensible. House Members, however, have already voiced concern that this new accounting procedure may lead to enrichment and waste disposal fees being used to pay for controversial account activities such as Clinch River.

I share this concern. Recently, the General Accounting Office and the Congressional Budget Office wrote replies to a letter of inquiry I sent them concerning the account. Both GAO and CBO state in their letters that moneys from enrichment and nuclear waste fees could be used to fund Clinch River's construction. The GAO, moreover, states that the proposed account would violate both existing uranium enrichment law and the House and Senate versions of the Nuclear Waste Policy Act. Existing uranium enrichment law prohibits the use of enrichment fees for anything but enrichment activities, and the Nuclear Waste Policy Act as it now reads prohibits the use of nuclear waste disposal fees for anything but nuclear waste disposal.

Neither the Department of Energy nor the Office of Management and Budget have yet replied to the letters I sent them. Both are waiting for clarification from the House Appropriations Committee. They both would like more legislative history on the report to ascertain its meaning. I believe they are entitled to this and that we ought not to reference the nuclear fuel cycle activities account language in the continuing appropriations resolution during the lameduck session. Certainly, it would be a mistake to move without some debate about the account.

In any such discussion, GAO's and CBO's replies will be useful. I ask that the complete text of my letter and these replies be placed in the RECORD.

The letters follow:

NOVEMBER 18, 1982.

Mr. CHARLES A. BOWSHER,
Comptroller General of the United States, The U.S. General Accounting Office, Washington, D.C.

DEAR MR. BOWSHER: I am writing to learn what your office's view is concerning the House Appropriations Committee proposed Nuclear Fuel Cycle Activities Account. I have enclosed copies of the pertinent passages of the Committee's House Energy and Water Development Appropriations Bill and report where this account is described. Is it your office's interpretation of the Committee's legislative and report language that:

1. The account would have two revenue streams in Fiscal Year 1983. The first would be gross receipts raised from DOE's sale of uranium enrichment services and the second would be revenues from the nuclear waste disposal fee proposed in pending nuclear waste legislation.

2. There would be outlays from the account to pay for three types of activities—enrichment, fuel cycle demonstration activities (Clinch River now and possibly commercial reprocessing later), and nuclear waste disposal activities.

3. Under the Committee's proposed accounting procedure, user fees now paid by enrichment customers to cover enrichment activity costs could be spent on account activities unrelated to enrichment (Clinch River Breeder Reactor Project and nuclear waste disposal activities) and user fees proposed to pay the costs of nuclear waste disposal activities could be spent on account activities not listed under the "Nuclear Waste Disposal Activities" heading.

4. Nearly $173,604,000 will be available to the account after making all of the Committee's projected account outlays for FY 1983 and this money could be used to cover part of the future costs of such account activities as the Clinch River Breeder Reactor Project.

Finally, I would also like to know if it is your office's view if the Committee's proposal particularly as described in points two through four above accords with the President's desires.

Given that this matter will come before the Congress during the Lame Duck session, I would appreciate a reply as soon as possible.

With warm regards, I am

Sincerely yours,

GORDON J. HUMPHREY, USS.

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., December 10, 1982.

Re Subject: Comments on the new "Nuclear Fuel Cycle Activities" Account Included in House Bill 7145 (GAO/RCED-83-79).

Hon. GORDON J. HUMPHREY,
U.S. Senate.

DEAR SENATOR HUMPHREY: On November 18, 1982, you requested our views on aspects of the new "nuclear fuel cycle activities" appropriation account included in House Bill H.R. 7145, 97th Congress. The bill makes appropriations for energy and water development for fiscal year 1983. The bill would create a new appropriation account for current and potential revenue-producing Department of Energy (DOE) civilian nuclear fuel cycle activities. These activities include uranium supply and enrichment, nuclear waste management, reprocessing, and demonstration projects. The bill requires that DOE use the revenues it receives from each activity to offset its costs for that activity, to deposit any such revenues received in excess of such costs in the "nuclear fuel cycle activities" account, and to use these excess revenues to offset any other obligations against the account.

OBJECTIVE, SCOPE, AND METHODOLOGY

You requested our views on four statements listed in your letter:

The account would have two revenue streams in fiscal year 1983. The first would be gross receipts raised from DOE's sale of uranium enrichment services and the second would be revenues from the nuclear waste disposal fee proposed in pending nuclear waste legislation.

There would be outlays from the account to pay for three types of activities—enrichment, fuel cycle demonstration activities (Clinch River now and possibly commercial reprocessing later), and nuclear waste disposal activities.

Under the committee's proposed accounting procedure, user fees now paid by enrichment customers to cover enrichment activity costs could be spent on account activities unrelated to enrichment (Clinch River Breeder Reactor Project and nuclear waste disposal activities) and user fees proposed to pay the costs of nuclear waste disposal activities could be spent on account activities not listed under the "nuclear waste disposal activities" heading.

Nearly $173,604,000 will be available to the account after making all of the committee's projected account outlays for FY 1983 and this money could be used to cover part of the future costs of such account activities as the Clinch River Breeder Reactor Project.

In responding to your request, we reviewed H.R. 7145 and the accompanying House Report No. 97-850, the applicable provisions of DOE's authorizing legislation, and the respective differing nuclear waste policy bills passed by the Senate (S. 1662) and the House (H.R. 3809). DOE officials declined to discuss this matter with us pending the Secretary of Energy's determination of DOE's position on the proposed new account. Our audit was performed in accordance with generally accepted government auditing standards.

Our views on the statements in your letter are discussed below.

THE ACCOUNT WOULD HAVE TWO REVENUE STREAMS IN FISCAL YEAR 1983

The statement in your letter is correct. The House Appropriations Committee report (Report No. 97-850) on H.R. 7145 states that the purpose of the new "nuclear fuel cycle activities" account is to bring together those parts of the nuclear fuel cycle from which revenues are currently or will in the future be derived. In so doing, not only does the bill appropriate funds for nuclear fuel cycle activities, but it requires DOE to retain the revenues generated by those activities to offset costs of the activities. Without this requirement the revenues would be deposited into miscellaneous receipts of the treasury. In fiscal year 1983, according to the bill, only the uranium enrichment and nuclear waste management activities are expected to produce revenues.

Fiscal year 1983 revenues from DOE's uranium enrichment activities are expected to be slightly more than $2 billion. Revenues from nuclear waste management activities are estimated to be $300 million. At present, however, DOE is not authorized to collect revenues from utilities or others to offset DOE's cost of managing their nuclear wastes. Therefore, estimated revenues from waste management activities are dependent on the Congress enacting the pending nuclear waste policy legislation. Separate versions of this proposed legislation have passed the Senate and the House. Both versions would permit DOE to begin collecting revenues for its civilian nuclear waste management activities.

THERE WOULD BE OUTLAYS FROM THE ACCOUNT TO PAY FOR THREE TYPES OF ACTIVITIES

There would be outlays from the "nuclear fuel cycle activities" account up to the amounts appropriated for three activities—uranium enrichment, Clinch River Breeder Reactor, and nuclear waste management. The total appropriation for these activities is slightly more than $2.36 billion in fiscal year 1983. Revenues from these activities, estimated to be slightly less than $2.31 billion, would be placed in the "nuclear fuel cycle activity" account. These estimated revenues, plus an additional estimated net appropriation of $53,646,000, would be used as shown below.

Activity	*Appropriations*
Uranium supply and enrichment	$1,949,096,000
Clinch River Breeder Reactor	227,250,000
Nuclear waste management	185,000,000
Total	2,361,346,000

The amounts that would be appropriated for nuclear fuel cycle activities and available for DOE's use in fiscal year 1983 under H.R. 7145 are not dependent upon the actual revenues realized in fiscal year 1983. Regardless of the revenues received from uranium enrichment and waste management activities, the bill makes definite appropriations in the amounts shown above for each of the three activities.

For example, as noted earlier, the estimated $300 million in revenues from the waste management activity is contingent upon enactment of the pending nuclear waste policy legislation. If this proposed legislation is not enacted, revenues received into the account will decrease by $300 million. However, the total appropriation for the "nuclear fuel cycle activities" account—and the amounts appropriated for each of the three activities—would remain as shown above. In this case, the net fiscal year 1983 appropriation for the account would be $353,646,000 instead of $53,646,000.

REVENUES FROM ANY ONE NUCLEAR FUEL CYCLE ACTIVITY COULD BE SPENT ON OTHER ACTIVITIES

As we interpret H.R. 7145, revenues from any one nuclear fuel cycle activity in excess of the appropriation for that activity could be used to offset costs of other activities in the account for which funds have been appropriated. As such, the bill is inconsistent with both the existing uranium enrichment program authorization legislation and the pending bills on nuclear waste policy because the enrichment legislation and waste policy bills prohibit the use of revenues from these respective activities for any other purposes. This interpretation is compelled by the following language of the bill: "* * * (3) any revenues received in excess of fiscal year 1983 appropriations for uranium supply and enrichment activities or nuclear waste management activities shall be deposited to the credit of the *nuclear fuel cycle activities account and used to offset any other fiscal year 1983 or future obligations against the account:* Provided further, that the total sum herein appropriated shall be reduced as revenues are received during fiscal year 1983 so as to result in a final fiscal year 1983 appropriation estimated at not more than $53,646,000." (italics added)

Under the quoted last proviso, a final fiscal year 1983 appropriation estimate of not more than $53,646,000 from the general funds of the Treasury cannot be achieved without using revenues in excess of appropriations for uranium enrichment and nuclear waste management activities to offset costs of the Clinch River Breeder Reactor. As long as the excess receipts over activity appropriations are retained in the individual uranium enrichment subaccount and the individual nuclear waste management subaccount, there will always be a final appropriation from the general funds of the Treasury for the "nuclear fuel cycle activities" account of at least the dollar amount of the appropriation for the Clinch River Breeder Reactor Project, since it does not yet generate any offsetting revenues. In fiscal year 1983, that would be $227,250,000.

Moreover, subparagraph (3), quoted above, states that excess revenues from any activity over and above that activity's appropriation shall be used to offset any other fiscal year 1983 obligations against the "nuclear fuel cycle activities" account. Under the Antideficiency Act (31 U.S.C. Section 1341), the activity with the excess revenues could not legally incur any obligations for fiscal year 1983 over and above the dollar amount appropriated for that activity. Therefore, the language "any other fiscal year 1983 . . . obligations against the account" in subparagraph (3) must be referring to obligations of other activities within the "nuclear fuel cycle activities" account. This constitutes specific authority to commingle receipts of any particular activity in excess of its appropriation with those of any other activity within the "nuclear fuel cycle activities" account for the purpose of offsetting obligations of the other activities.

As we interpret H.R. 7145, revenues received from DOE's uranium enrichment activity in excess of the approximately $1.95

billion appropriation for this activity would be deposited in the "nuclear fuel cycle activities" account and would be used to offset other obligations against that account—such as the Clinch River Breeder Reactor Project and nuclear waste management activity. The bill estimates that revenues from DOE's uranium enrichment activity will exceed the appropriations for that activity by slightly less than $59 million. We emphasize, however, that the total amount of funds which could be spent on any individual nuclear fuel cycle activity, such as the Clinch River Project, is limited to the amount appropriated for that activity in the bill.

H.R. 7145 is inconsistent with DOE's program statute with respect to the use of uranium enrichment receipts. Subsection (h) of section 111, Energy Reorganization Act of 1974, as amended (42 U.S.C. 5821(h)), authorizes DOE, when so provided in an appropriation act, to retain revenues produced by its uranium enrichment activity, but only for the expressed purpose of offsetting operating expenses of that activity. The receipts are not available to DOE for any other purpose.

Similarly, according to H.R. 7145, revenues received from DOE's nuclear waste management activities in excess of the $185 million appropriation for those activities would also be deposited in the "uranium fuel cycle activities" account, and would be used for uranium enrichment activities and/or the Clinch River Breeder Reactor Project. The bill estimates that revenues from the nuclear waste management activity will exceed the appropriation for that activity by $115 million.

Both the House and Senate versions of the pending nuclear waste policy legislation would establish a trust fund or similarly segregated fund for the deposit of nuclear waste management fees. However, both the House and Senate versions of this proposed legislation would permit DOE to use these monies only for specified waste management activities. Therefore, H.R. 7145 is inconsistent with these bills.

THE $173,604,000 WILL BE AVAILABLE TO THE ACCOUNT AFTER MAKING PROJECTED ACCOUNT OUTLAYS

As shown below, revenues estimated in H.R. 7145 from uranium enrichment and nuclear waste management fees exceed the appropriations for these two activities by $173,604,000.

[In thousands of dollars]

Activity	Fiscal year 1983		Amount available for other account uses
	Estimated revenues	Appropriation	
Uranium enrichment	2,007,700	1,949,096	58,604
Nuclear waste management	300,000	185,000	115,000
Total	2,307,700	2,134,096	173,604

The bill, specifically the provision quoted above, provides that these revenues shall be used to offset any other obligations against the "nuclear fuel cycle activities" account in fiscal year 1983 or in future years. The only legally permissible fiscal year 1983 obligation against the "nuclear fuel cycle activities" account, besides the uranium enrichment and nuclear waste management activities, is the Clinch River Breeder Reactor Project. Therefore, all of the estimated $173,604,000 of revenues in excess of appropriations would have to be used to cover the costs of the Clinch River Project. The $173,604,000 of excess revenues, added to the $53,646,000 estimated net appropriation shown in H.R. 7145, equals the $227,250,000 appropriation for the Clinch River Project. This further confirms our interpretation that the bill provides for the use of revenues in excess of appropriation from any one nuclear fuel cycle activity to be used to offset the cost of other activities.

As noted earlier, however, the fiscal year 1983 appropriation for the Clinch River Breeder Reactor is not dependent upon DOE's receipt of revenues in the amounts estimated in H.R. 7145. The bill establishes a definite appropriation for that project of $227,250,000 regardless of revenues received into the account. Conversely, an increase in revenues beyond estimates in H.R. 7145 would not allow additional expenditures in fiscal year 1983 beyond the specific amounts appropriated in the bill for the Clinch River Breeder Reactor Project or the other nuclear fuel cycle activities. The additional revenues would instead be used to decrease the estimated $53,646,000 net fiscal year 1983 appropriation for the "nuclear fuel cycle activities" account.

Copies of this report are being sent to the Subcommittee on Energy and Water Development, House Appropriations Committee; to the Director, Office of Management and Budget and the Secretary of Energy; and to other interested committees of the Congress. Copies of this request will also be made available to others upon request.

Sincerely yours,

J. DEXTER PEACH,
Director.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., November 30, 1982.

Hon. GORDON J. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: This letter is in response to your questions concerning the House Appropriations Committee's proposed nuclear fuel cycle account. CBO's understanding of the Committee report is that there would be two receipt streams in fiscal year 1983, receipts collected from uranium enrichment sales and fees for nuclear waste disposal, which would be used to finance activities designated by the Committee under that account. Such activities include uranium enrichment, nuclear waste disposal, and development of the Clinch River Breeder Reactor. The receipts would not be earmarked for specific programs, and thus the fees derived from uranium enrichment or nuclear waste disposal could be used to cover the costs of other programs within the account. We estimate that approximately $174 million in 1983 receipts will be available to cover the costs of such activities.

The President in his 1983 budget request, the Senate in S. 1662, the National Nuclear Waste Policy Act of 1982, and the authorizing committees of the House, have all proposed that fees for nuclear waste disposal be placed in a fund established in the Treasury for the sole purpose of developing a nuclear waste program. Under these proposals, receipts in excess of annual obligations would be invested in interest yielding bonds and would be used in future years to fund nuclear waste disposal activities. If some of these receipts are spent for other purposes, future fees for nuclear waste disposal would have to be adjusted to replace the expended amounts, and any interest that would have been earned.

As you state in your letter, outlays for the proposed nuclear fuel cycle account would represent the collection of receipts and spending for uranium enrichment, nuclear waste disposal, and the Clinch River Breeder Reactor. If at a later stage, the funding levels in the House-reported Energy and Water Development Appropriations Bill were limited to uranium enrichment and nuclear waste disposal activities, outlays charged to the account would decrease. Outlays, however, would increase in another account, assuming that Clinch River funding remains constant. This would result in no change in total federal outlays. As a result, total federal outlays in 1983 will not be affected by differences between the President's proposed structure and that of the House Appropriation's Committee.

Should you so desire, we would be pleased to provide further details.

Sincerely,

ALICE M. RIVLIN,
Director.●

THE FUTURE OF HOUSING

● Mr. GARN. Mr. President, I would like to share with my colleagues a speech given by Mr. John B. Fery, chairman of Boise Cascade. Mr. Fery charts the course of the housing industry in the dawning economic recovery. I hope that every one who wants to buy a home and everyone connected with building homes will be heartened by this speech.

Mr. Fery is optimistic about the ability of the housing industry to provide affordable homes. After a decade of building larger, more expensive homes, there is a huge untapped market for todays smaller households. Mr. Fery is also enthusiastic about transformations within the mortgage financing community. New sources of capitol and new mortgage instruments are significantly improving the viability of housing.

According to Mr. Fery, a good housing market with reasonable mortgage rates requires a good economic environment. Lower interest rates can only be achieved by putting an end to heavy deficit spending by the Federal Government. I certainly agree with this conclusion and will continue to work for budget reductions.

The speech follows:

THE FUTURE OF HOUSING: WHAT IS IN STORE FOR THE AMERICAN DREAM?

For generations, families have wanted to buy the house of their dreams. You know what that is. The traditional detached, single-family home with a year, a white picket fence, located on a tree-lined street, in a wholesome suburban community. During most of the 1970s, seven of every ten families who wanted to buy that home could do so without undue financial hardship or sacrifice. Three found the cost of home ownership too high, so didn't buy.

Today those numbers are reversed. Today only three of the ten families can achieve their housing desires. The other seven walk away frustrated, having discovered that, for them, houses are unaffordable.

For now, the great American dream of home ownership has become a nightmare. Not only for home buyers, but for everyone associated with housing—home builders, realtors, thrift institutions, even my own forest products industry.

Further, everyone in this room feels the impact. The fate of housing is tied to that of the general economy, traditionally generating more than 10 percent of the gross national product. Housing has served as a bellwether for turns in the economy. When extreme events shake the housing industry, we all feel the tremor.

As a result, the magazine and newspaper articles one commonly reads about housing these days, as well as the news stories on television, are decidedly negative.

Here are some typical headlines:

"A Housing Era Ends"—Nation's Business.

"Housing's Unsheltered Future"—Fortune.

"The Great Housing Collapse"—Newsweek.

"Housing: A Boom That May Never Come"—Dun's Business Month.

My company, Boise Cascade, is a major supplier of building materials to the housing industry. So those dreary reports about home building concern us. We take them seriously. So seriously, in fact, that we recently set out to see whether the fundamental characteristics of housing had really changed so much in so short a time.

Some months ago, our senior management spent three days in an intensive, shirt-sleeve session with distinguished, thoughtful authorities on various aspects of housing. We asked those housing experts to give us their best thinking on what the future holds.

That session pulled together a comprehensive body of knowledge about housing. It gave us the facts and the expert value judgments we needed to assess the arguments for and against housing's future.

The current pessimism about the future of housing revolves around three issues—the demand for housing, the method of financing housing and the affordability of housing. Some say that the so-called underlying, pent-up demand for housing is neither underlying nor pent up. Rather, it is nonexistent or at least dwindling. Others say that insufficient mortgage money and the lack of acceptable, understandable mortgage instruments will preclude much home-buying activity—no matter what else happens. Still others say that, even if there's a demand, and if mortgage money is available, the costs of house and mortgage are so high that people can no longer afford them. And included in everyone's consideration is the presence of the federal government and the question of its future role in housing.

Let's examine each of these issues.

DEMAND FOR HOUSING

First, the question of demand for housing—a concern easily dispatched.

Earlier this year, Market Opinion Research Corporation conducted surveys on the subject of home ownership for the National Forest Products Association. That research shows that nearly 90 percent of Americans continue to place a very high value on home ownership. When asked about the goals and aspirations they have for themselves and their children, respondents ranked home ownership near the top of the list. While having a job was the most important, home ownership shared second place with quality health care. Further, they defined home ownership as owning a single-family home on its own lot with a lawn.

These findings shouldn't surprise us. They're simply the elements of the American dream that have existed for years. The dream hasn't died, nor even changed much.

Now add to that underlying American concept a number of demographic pressures that are building.

The U.S. population is growing—from 227 million in 1980 to 287 million forecast for the year 2000.

The post-World War II baby boom generation is forming families and will continue to do so throughout the 1980s. More than 1½ million Americans will reach home-buying age each year in the 1980s—twice the rate of the 1970s.

People are living longer in the U.S.—nearly four years longer on average than just 20 years ago.

More senior citizens want to remain in their own housing units. In 1970, 16 percent of those 65 and older lived in institutions or with someone else. By 1978, only 10 percent did so.

More single heads of households want their own housing units. People stay single longer. People divorce more often. As a result, the number of people living alone has jumped from more than seven million in 1960 to nearly 18 million in 1980.

Clearly, there's a strong and growing need for housing in this country. Let's examine for a moment how that demand's been exercised and by whom.

During the late 70s, the dominant force in the housing market was the so-called upgrader. This buyer tended to have a growing family, more disposable income and was motivated partly by the investment advantage. He or she traded up from a small single-family home to a larger one. That continual, upward flow accounted for roughly 80 percent of the new housing market during those years. Builders concentrated on supplying the larger, trade-up type of house—four bedrooms, 2½ baths and the like.

The upgrade market has diminished significantly, at least for now. Homes are not appreciating at the same rates they were. Homeowners are not willing to give up a reasonable mortgage rate of 7, 8, 9 or 10 percent to swallow a 15 or 16 percent rate. Those folks are sitting on the sidelines until rates come within reach, or have chosen to fix up the old homestead.

The upgraders did do one thing in those years. They left behind their old homes for first-time buyers. If it hadn't been for that housing stock created by the upgrade market, the housing needs of first-time buyers could have been largely ignored.

As prices and interest rates rose in the late 1970s, the number of first-time buyers still in the housing market dropped off considerably. In 1977 first-time buyers purchased 36 percent of all the homes sold, according to the U.S. League of Savings Associations. During 1979, that group purchased less than 18 percent of all the homes sold. In the last few years, we estimate that that number has fallen even more.

So where have the discouraged first-time home buyers gone? Some are living with Mom and Dad. (How long can Mom and Dad tolerate that?) Some have doubled up. Some have accepted various multifamily options—townhouses, single-family attached, condominiums and the like. And some are renting (which, in turn, increases the pressure to build more rental units).

Besides first-time buyers, other important elements of the demand picture have also been ignored in recent years. The home buyer whose children are grown—the empty nester—wants to trade down to a smaller home. Other nontraditional buyers—single heads of households, divorcees, senior citizens—seek more modest homes. These potential buyers are standing by, temporarily frozen out of the housing market. But wanting in nonetheless.

Don't doubt it for a minute. The demand for housing is strong!

MORTGAGE FINANCING

That brings us to issue number two—financing. Even if housing demand exists, some say, there's insufficient mortgage money available and inadequate mortgage instruments in place to meet the demand. Let me tell you why I believe mortgage money sources and availability won't be a problem long term.

Mortgage financing is undergoing a transformation. The 30-year fixed-rate mortgage, for example, will comprise a smaller portion of the market. More affordable financing vehicles are being created and are gradually being accepted.

In just the past year, several new financing devices have emerged. Some, such as the growing-equity mortgages, are especially promising. These loans typically have a fixed interest rate, but payments increase so that the loans mature in 15 years or less.

In a period of disinflation, the idea of paying off debt quickly has obvious advantages. Some 60 percent of the families in this country now earn two paychecks. These new instruments allow those people to devote more of their income to house payments.

Just as the mortgage instruments will be different, so too the mortgage lending scene is changing. The Garn Financial Institutions Bill, hailed by many as the most significant banking legislation in nearly 50 years, was enacted a few weeks ago.

The Garn bill deregulates the S&Ls. They can now offer interest rates on savings deposits that will compete with those of money market mutual funds, while having the added advantage of being federally insured. The result will likely be the return of billions of dollars in deposits to the S&Ls, and probably a lowering of mortgage interest rates.

The question of sources of mortgage capital is partially addressed by the changing role of the thrift institutions. In addition, Fannie Mae estimates that the market share of mortgage companies and commercial banks will grow.

But that still may not be enough. Where else will the new money that housing needs come from?

Pension funds, with their vast and steadily growing reservoir of investable funds, will likely play a major role in the secondary market. Mortgage bankers predict that large institutional investors, such as pension funds, will buy up to 70 percent of all new mortgages by 1989.

Another concern with regard to the secondary market is the role of the federal government. It has helped create a healthy home-buying environment over the years through federally supported secondary mortgage institutions like Ginnie Mae and Fannie Mae, as well as FHA, VA and other programs.

This active role of government in housing is under scrutiny in some quarters today. The administration wants to eliminate all off-budget federal loan guarantee programs—of which Ginnie Mae, for example, is one. I submit that Ginnie Mae is not a drain on the U.S. Treasury. Rather, it pro-

vides a financial return, as well as a valuable, needed service. This type of government involvement should continue, and I believe the Administration and Congress will come to recognize this.

In sum, I believe the problems with mortgage money sources, instruments and secondary markets are working their way toward resolution.

AFFORDABILITY

Issue number three is the most difficult—the question of affordability. Even if the demand for housing exists and mortgage money is available, some say, the cost is too high at today's prices and today's interest rates. Let me describe for you some things that are happening, that can happen and that should happen to deal effectively with the problem of affordability.

Here's a typical statistic about housing costs: In 1978, the median price of a new house was $55,700. In August this year, that price hit a record $73,200—a staggering leap. But let's not be misled by numbers like these.

Largely it is upgraders—the folks who can afford $73,200 and who have dominated the housing market these last several years—who are paying those "median" prices. Upgraders still represent the major share of those folks who are buying. And, builders have been tailoring their work to the large-home desires of upgraders. The median price reflects that.

I'm not suggesting that prices are not high. What I am suggesting is that we can meet the needs of major segments of the market at more reasonable prices.

The single greatest cost element in a median-priced single-family home is the labor and nonwood structural materials—34 percent of the total, according to Data Resources, Inc. Lumber and plywood comprise only about 12 percent. These percentages have declined slightly over time.

Another major element is the land. The cost of a developed lot, as a proportion of the total price of a house, has risen from 22.6 percent in 1979 to 25 percent this year. Land prices have steadily reflected rising inflation.

The big leap has been in overhead, construction financing and marketing costs. These have grown by nearly half—from 10.7 percent of the price of a mid-range home in 1979 to 15 percent of that price in 1982.

With these percentages growing, you may wonder which ones are dropping. That's not difficult to figure. The builder's profit declined in the period 1979 to 1982—from 20 percent to 14 percent.

The question is how to lower those costs. Land prices are not likely to shift downward much, although the size of the lot can be reduced. And we can control other elements. We can tailor housing toward the market segments most anxious to participate—the first-time buyer, the empty nester and the single houshold head, as well as upgraders when they return in force.

Through the Market Opinion Research study and the investigations of others, we've learned that people have apparently changed their ideas of what the ideal home is. It's smaller than it was just a few years ago. It may be attached to another unit. It may be on a smaller lot. It appears that people will accept a house that's very close to, but not exactly the same as, the traditional single-family, detached home with a lawn.

So in the housing industry, it's time to think small—less than 1,500 square feet—and think attached. Tomorrow's houses will be smaller, if home buyers choose to reduce housing costs this way. Attached housing or townhouses are growing in popularity. More homeowners will repair, remodel or expand their present homes.

As housing units get smaller, however, how space is used and what amenities are provided become critical factors. The National Association of Homebuilders tells us that buyers demand greater quality if they accept less space—more attention to detail in design, construction and energy efficiency.

As homes are modified, wood will continue to be an important ingredient. Wood is the champion insulator among all structural materials in general use. When it comes to keeping homes as warm or as cool as you like, wood is six times as efficient as brick, 15 times better than concrete or stone, 400 times better than steel and, I'm told, 1,770 times more efficient than aluminum.

In spite of the market adaptations we expect, the affordability issue may cause the number of housing starts to fall short of the two million a year we experienced in the 1970s.

That may sound like bad news for the wood products business. Not so. Single-family starts may not return to their former levels, and those homes may be smaller. But we believe that other major domestic markets—multi-family construction and the repair and remodel market—will increase. And the multifamily unit will be larger. Further, world markets for wood products, especially in Japan and Europe, are growing. These expanding markets will be good for the wood business.

In addition, the forest products industry is changing. We're not adding much capacity today in wood products. In fact, we're losing capacity as marginally efficient facilities shut down permanently. New capacity is being delayed due to capital constraints and high inherent risks. And, some industry consolidations are occurring due to companies' shortage of capital and/or raw materials. These consolidations will continue as the recession plays itself out. We expect there to be less lumber and plywood capacity in place when these hard times are over.

HIGH MORTGAGE INTEREST RATES

So, what do we know so far? We know that a substantial demand for housing is waiting to be exercised. We've seen that mortgage money can be available and that appropriate mortgage vehicles are gaining acceptance. And we understand that homes must be tailored to potential buyers and that costs must be managed to tap that demand and make homes more affordable.

But there's a major facet of affordability we haven't talked about yet—high mortgage interest rates, probably the key determinant in reestablishing housing's viability.

A good housing market with reasonable mortgage rates requires a good economic environment. And that's where the federal government comes in. A lot of people, particularly in the Reagan Administration, have concentrated—and properly so—on controlling inflation, thus bringing short- and long-term rates down over time and allowing the economy to revive. The trick is to put an end to heavy deficit spending by the federal government.

We must be prepared for the fact that it will take more time. Frankly, more time, than most of us thought. But some important elements are in place for rates to gradually decline.

First, inflation is coming under control. Inflation in 1979 ran at 13.4 percent; this year it will be close to 5 percent—and seems to be holding. We are seeing a higher rate of personal savings. Consumer debt is down. And finally, interest rates are trending lower.

Of equal importance, however, is that economic improvement, like beauty, is in the eye of the beholder. The perception must grow that the federal government's deficit spending will be curtailed.

Confidence in a recovery must continue to spread. People aren't likely to make major investments in homes if they're concerned about having jobs next month, or next year. Borrowers and lenders alike must share the view that interest rates will stabilize.

Mortgage rates should then slowly decline, as the recovery spreads, reaching and holding at a more affordable level. We peg that to be in the 12 to 14 percent range.

In my judgment, a lot of pent-up housing demand will then be released—obviously more at 12 percent than at 14 percent. We already have some evidence that it will. A major developer who spoke at our Boise Cascade housing session said, and I quote:

"We have a very vital housing market. People are really struggling to find a way to buy. We've had two brief breaks in interest rates in the last two years. During each one, we broke sales records for our entire company for those periods. If we get some reasonable relief in rates, we could have a very strong market." End quote.

We have a fair idea of what the markets for our products will be throughout this decade—and that's a critical piece of knowledge.

But that's not all that's necessary. Another theme has threaded its way through my remarks today, and it's this: Everyone involved in the housing business will have to give a little so that, overall, housing can recover a lot.

Home buyers must diminish their expectations, adjusting to a smaller housing unit on a smaller piece of land. Or they must be willing to devote a large share of their income to housing.

Home builders must concentrate on being more efficient.

The forest products industry must continue working toward improved productivity and efficiency in its wood products mills. Other suppliers must do likewise.

Financial institutions must work harder to market the new instruments now available.

Everyone must do a little, make do with less, work more effectively—and the result will be the revitalized housing industry so important to our nation.

Efficient builders will provide desirable, affordable homes for key segments of the home-buying population. Those homes will be financed through instruments which respond to the needs of both borrower and lender.

The American dream of home ownership is alive, waiting and will be fulfilled, once people can afford to buy. What will do the trick is an overall improvement in the economy and in consumer confidence.

In the meantime, the adaptations a changing housing market requires are taking place—on the part of home buyers, the construction industry, the mortgage finance institutions and building material suppliers.

Traditionally, the housing industry has led America out of recessions. It might not lead this time, but it will certainly follow closely. Home ownership is so woven into the fabric of our social and economic structure that it should be a benchmark of Amer-

ican accomplishment. It has been in the past, and I'm convinced it will be again.●

PROGRAM

Mr. STEVENS. Mr. President, there is an order previously entered to convene at 9:30 a.m. in the morning; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Are there any requests for special orders?

The PRESIDING OFFICER. There are none.

Mr. STEVENS. Mr. President, after the two leaders have been recognized under the standing order, it is my understanding there will be a routine morning business period until 10 a.m. with Senators being permitted to speak therein for not to exceed 3 minutes apiece, that at 10 a.m. we will resume the Interior appropriations bill which is the pending business. There is a planned recess from 12 noon until 2 p.m. At 2 p.m. we will resume consideration of the highway and gas tax bill.

It is the urgent plea of the leadership that if it is at all possible the Interior appropriations bill get passed by the Senate.

As a matter of fact, I am informed that there have already been preliminary negotiations for the conference on that bill, that it could become law very quickly. There is not that much disagreement between the two Houses, and I urge Senators to confer with the Senator from Idaho so that if there are amendments we may program them for tomorrow.

I am sure that the distinguished Senator from West Virginia knows this bill as well as anyone and would share the opinion that if it is at all possible this bill that affects so many separate small agencies that need the guidance of Congress on appropriations should be passed if it is at all possible.

Mr. ROBERT C. BYRD. I agree.

RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. STEVENS. Is there further business to come before the Senate?

Mr. President, if there be no further business, I ask unanimous consent that the Senate stand in recess until 9:30 a.m. tomorrow in accordance with the previous order.

There being no objection, the Senate, at 6:44 p.m., recessed until Tuesday, December 14, 1982, at 9:30 a.m.

HOUSE OF REPRESENTATIVES—*Monday, December 13, 1982*

The House met at 12 o'clock noon.

The SPEAKER. Today we have the pleasure of an old friend and former Chaplain of this House beloved by all of us, the Reverend Edward G. Latch, former Chaplain of the U.S. House of Representatives.

Rev. Edward G. Latch, D.D., former Chaplain of the House of Representatives, offered the following prayer:

Be strong and of good courage; be not afraid, neither be thou dismayed: for the Lord Thy God is with thee whithersoever thou goest—Joshua 1: 9.

Almighty God, our Heavenly Father, we pray that Thy spirit may be on our minds and in our hearts as we move through the hours of this day and as we conduct the business that relates to the welfare of our beloved country. Give to the Members of this body the insight to see clearly the steps they should take, the patience to take each step carefuly and the strength to keep on until right decisions are made for the highest good of our Nation. Continue to guide our President, our Speaker, the Members of this House and all who work under the dome of the Capitol that justice and peace and good will may come to new life in our country and in our world: to the glory of Thy holy name and the good of our human race. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

H.R. 2329. An act conferring jurisdiction on certain courts of the United States to hear and render judgment in connection with certain claims of the Cherokee Nation of Oklahoma;

H.R. 6417. An act to amend Public Law 96-432 relating to the U.S. Capitol Grounds; and

H.J. Res. 595. Joint resolution designating December 11, 1982, as "Fiorello H. LaGuardia Memorial Day."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a joint resolution of the House of the following title:

H.J. Res. 531. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Parkinson's Disease Week."

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 2336) entitled "An act to authorize appropriations for fiscal year 1983 for certain maritime programs of the Department of Transportation, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, Mr. LONG, and Mr. INOUYE to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 1562. An act to provide comprehensive national policy dealing with national needs and objectives in the Arctic;

S. 2279. An act to designate the Alben Barkley National Historic Site;

S. 3081. An act to modify the judicial districts of West Virginia, and for other purposes;

S.J. Res. 254. Joint resolution designating September 22, 1983, as "American Business Women's Day"; and

S.J. Res. 263. Joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

LET US MONITOR EVENTS IN POLAND

(Ms. MIKULSKI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. MIKULSKI. Mr. Speaker, I was relieved to hear this weekend that Polish authorities plan to partially lift martial law restrictions. I am cautiously optimistic that this marks a first step in reestablishing some of the basic freedoms that Poles enjoyed for a brief period.

The repression of the last year has caused enormous suffering for the Polish people both in terms of basic human needs and political freedom. I welcome any movement toward the restoration of political freedom and the easing of shortages in food, medical supplies, and other family essentials.

I want to stress, however, that the announcement this weekend is in no way a substitute for the full recognition of Solidarity and acceptance of the Gdansk Shipyard Agreement. I believe that Polish authorities must recognize that no regime or government can claim legitimacy without first taking these steps. The gains that were made by Polish patriots must not be denied.

I ask that my colleagues pay special attention to the situation in Poland over the coming weeks and months. Our commitment to free people everywhere demands nothing less.

COMMITTEE ORDER NO. 34—ALLOWANCE FOR OFFICIAL EXPENSES

(Mr. HAWKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HAWKINS. Mr. Speaker, the Committee on House Administration, under the Authority granted in Public Law 92-184 and Public Law 94-440, last Thursday issued committee order No. 34, which is effective on January 3, 1983.

I include committee order No. 34 in the RECORD at this point:

COMMITTEE ORDER (34)

Resolved, That effective January 3, 1983, until otherwise provided by the Committee on House Administration, the Allowance for Official Expenses is as follows:

1. The base allowance for Official Expenses is increased to $52,000.

2. The Travel Allowance is increased to a minimum of $5,700, and the multiplier in the formula used to compute the variable for travel is increased to a range of 21 to 35 cents.

Expenditures of these funds shall be made in accordance with rules and regulations established by the Committee on House Administration.

KGB LEADERSHIP FOR THE SOVIET UNION

(Mr. McDONALD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDONALD. Mr. Speaker, a lot of nonsense has appeared in the popular press relative to the rise to leadership of Yuri Andropov in the Soviet Union. Specifically, some claim he is really a "liberal" with Western tastes and that, somehow, we should all feel hopeful. However, the evidence we have does not agree with this theory.

The evidence is that Andropov's rise to power started some time before the death of Brezhnev, and that Brezhnev, while still alive and in very failing health, was not really ruling the

Soviet Union during his last year on this Earth.

It was noticeable that after death on January 25, 1982, of the U.S.S.R's brittle ideolog—Mikhail Suslov—that some things began to change in foreign policy. Most notably serious moves to heal rifts with Communist China and Yugoslavia now took place. Andropov also moved back to the Central Committee Secretariat in April, where he could now have a direct influence on U.S.S.R. foreign and military policies.

Also prior to Brezhnev's death, there were a series of leaks to the Western press, probably orchestrated by the KGB, regarding the alleged crimes of friends and family of Brezhnev. For such things to be in open circulation in Moscow is rather unprecedented.

As for Andropov himself, we should note that he has been the head of the Soviet secret police—the KGB—longer than anyone in its history. He is also known to have played a major role in the subjugation of the Karelo Finns after the winter war (1939-40), with Finland and during the Hungarian revolt in 1956. During his tenure the KGB achieved new high levels of refinement of KGB tactics in repression, and espionage. All of this hardly adds up to great hopes for the free world. In order to provide additional details on this important topic, I am placing an expanded version of this statement in Extensions of Remarks today.

AMERICAN SAMOA FACES ECONOMIC DISASTER

(Mr. SUNIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SUNIA. Mr. Speaker, over the weekend, I circulated a dear colleague letter to the offices of all Members with the hope that they will have a chance to see it before floor consideration of H.R. 7397, the Caribbean Basin Economy Recovery Act. If that bill were to pass in its present form, American Samoa, the Nation's lone territory in the South Pacific, faces a real economic disaster.

All that is necessary to avert that disaster is for canned tuna to be excluded. A motion by RICHARD GEPHARDT to that extent was narrowly defeated during committee markup.

Mr. Speaker, tuna canning is American Samoa's only industry. If Caribbean-packed tuna were to be allowed to enter duty free, tuna packed in the U.S. territories—where all of the Nation's laws, rules, and regulations must be obeyed—stands no chance to compete.

When our industry is gone, sir, the alternative is to seek additional Federal appropriations for general support. While this Congress has been more than generous to my territory in the recent past, we feel a nearness to our goal of economic self-sufficiency, through the further development of tuna canning operations in our islands. There is no other resource available.

I know this Congress, the Federal Government, will come to our aid, as it has in the past. But Mr. Speaker, the pride and self-respect that comes from knowing you are beginning to pay your own keep, will be dealt a fatal blow.

We do not oppose the President's Caribbean Basin Initiative. We only ask that tuna canning be excluded.

"SOCPAC"—ALL-INCLUSIVE SOLUTION

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, today, because of the confusion in the other body on the major issues facing this lameduck session, I am forced to offer a solution so we can go home before the 98th Congress takes over.

My solution will solve the 5-cent gas tax filibuster, provide funds for improving our rail and road system, alleviate the MX crisis, contribute to a nuclear freeze, and assist in creating jobs. I call this solution the "SILVIO O. CONTE Put 'em on Amtrack Cars," or SOCPAC solution. SOCPAC is a nonnuclear approach to solving the window of vulnerability. The plan envisions putting rockets without nuclear warheads on railcars and buses all over the country. The money that we give DOD for this system would be used to improve our rail beds and roadways and thus provide jobs.

We can meet the arms control objectives of the nuclear freeze because the missiles will not have nuclear warheads on them. The warheads will be removed and stored at another location, only to be joined with the rocket in time of emergency. This will eliminate the criticism that we are building a first strike system. Yet, it will pose a targeting problem to the Soviets which they cannot solve.

Then, as Art Buchwald suggests, we can give the Soviets the Amtrak schedules and they will never be sure where anything in the system is.

Hopefully, someone will see the wisdom of SOCPAC in order to get our colleagues on the other side of this building out of their trance before Santa Claus comes.

UPDATE ON BANKRUPTCY LEGISLATION

(Mr. BUTLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUTLER. Mr. Speaker, on June 28, 1982, the Supreme Court of the United States in the now famous Marathon Pipeline case determined that much of the jurisdiction granted the Bankruptcy Court in 1978 is unconstitutional; and gave the Congress until October 4 to do something about it.

Relying on representations of great progress in Congress, and expectation of early resolution of the problems created by this decision, the Supreme Court on October 4, extended the time for congressional action to December 24.

The indicated legislative response was passed by the full Judiciary Committee on August 19, 1982, as H.R. 6978, supporting comments have been in the hands of our colleagues for some little time. Chairman RODINO has extensive remarks on the subject in the RECORD on December 8, 1982; and I have suggested possible areas of compromise in a separate bill, H.R. 7349, and my comments are in the RECORD of December 1, 1982.

On Friday of last week, the Attorney General of the United States by letter to the Speaker reviewed the situation once more and reminded the Speaker once more "that it is imperative that the necessary remedial legislation be enacted before the end of this session."

It is implicit in such a letter from the Attorney General that the Department of Justice does not intend to ask the Supreme Court of the United States for additional time if the Congress does not act by December 24; and it is my own view that the possibility of a further stay by the Supreme Court under these circumstances is extremely remote even if asked.

Mr. Speaker, it is quite apparent to me that there will be chaos in the bankruptcy courts if Congress does not act to create the appropriate article III bankruptcy judges before adjournment; and the blood will be on our hands.

HON. CLAIR W. BURGENER—A STANDUP, STANDOUT CONGRESSMAN

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, what we all will miss in bidding goodby to CLAIR BURGENER of California, is many things, the extraordinary qualities that made him such a standup, standout Congressman. He had a singular talent for getting to the heart of the matter. In committee or in the well, he rarely spoke unless the issue under consideration was of great importance. And he never failed to contribute something of value. With Mr. BURGENER acrimonious argument yielded to eloquent, gentle persuasion, always acknowledging the good points in the

other Member's case, unerringly pointing out the greater merit of his. He was formidable as an ally or as an opponent; but he was never a foe.

For the way in which I would like to be pictured by the folks at home, his portrait is the prototype. Intelligence, wit, eloquence, impeccable moral standards, a stunning wife, CLAIR has it all. The Congress and candidly the whole Nation will be the losers when Mr. BURGENER strikes his last word and leaves the well for the last time. For all of us heading into the 98th Congress, it will be a gloomy day.

□ 1215

JOB CREATION EFFORTS

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, we have all heard about the job creation effort attached to the continuing resolution. While the effort should be complimented, I do think the "nuts and bolts" of the proposal has serious problems. We should not cast a stamp of approval for an effort which will really help only a small segment of the unemployed of this Nation. We need more than political expediency.

If this Congress is serious about helping the unemployed, and I believe it is, then we should consider efforts that will help our idle workers secure gainful, meaningful employment. It is important to get our workers back to work but not jobs that will be nonexistent in just a few months.

I plan to introduce legislation that I believe goes hand in hand with the job creation efforts currently under discussion. My legislation, the Job Opportunity and Business Stimulation Act (JOBS), will allow States and hard-hit localities the flexibility to address their own particular problems in creating jobs and stimulating business. My legislation will allow States and hard-hit localities the leeway to initiate projects which will be most beneficial to the needs of their area. My legislation acknowledges differing needs not only from State to State but also from county to county within a State.

I fear the Congress may approve a job creation effort that really will not be much more than a pacifier to the voting constituencies back home. Job creation should and must be geared toward permanent, marketable employment. I urge your cosponsorship of my proposal and your help to make this effort a reality.

IS IT $700,000 OR IS IT $134,700 OR LESS?

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I am a longtime admirer of the beloved late former Vice President Alben Barkley, a native of my home county and a former resident of Paducah, Ky., who rose from McCraken County judge to be Vice President of the United States. In fact, Alben Barkley, is one of my predecessors as First District U.S. Representative of Kentucky.

I am a supporter of efforts to make his Paducah home a national historic site.

Legislation was introduced in the U.S. Senate last March 24 for this purpose and allocates up to $700,000 for the "acquisition of lands and interests therein." This bill, S. 2279, was quietly, adroitly and by voice vote passed in the U.S. Senate last Friday, December 10.

Press accounts in Kentucky yesterday indicated that a respected member of the Kentucky House delegation will push this bill through the House for passage under unanimous consent this week—possibly as early as today.

It would be unfair to my colleagues in the House if I did not point out that a fair appraisal of the real estate in question—13 acres and the Barkley homeplace—is a lot less than even $200,000. In fact, the total 30.9 acres including the homeplace is listed for tax purposes at 100 percent valuation in the McCracken County Courthouse, Paducah, Ky., for $134,700.

I can assure my colleagues in the House that this legislation deserves hearings and adequate consideration by the House. Incidentally, during the brief Senate action on this bill last Friday, the cost to the Federal Government—"not to exceed $700,000 for the acquisition of lands and interests therein"—was never mentioned. Also, opposition to the cost of this legislation by the U.S. Department of the Interior and the National Park Service was never mentioned.

There has been tremendous pressure, even this morning, upon me to support this bill today in the U.S. House of Representatives.

A fair question is why, may I ask, is there such a rush?

ROBERT F. HENRY LOCK AND DAM

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2034) to designate the lock and dam known as the Jones Bluff Lock and Dam, located on the Alabama River, as the "Robert F. Henry Lock and Dam," and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2034

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Jones Bluff Lock and Dam, located on the Alabama River between Lowndes and Autauga Counties, Alabama, is designated and shall hereafter be known as the "Robert F. Henry Lock and Dam".

(b) Any reference in a law, map, regulation, document, record, or other paper of the United States to that lock and dam shall be deemed to be a reference to the "Robert F. Henry Lock and Dam".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill just considered.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

ROBERT B. GRIFFITH WATER PROJECT

Mr. KAZEN. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from the further consideration of the Senate bill (S. 1681) to designate the Southern Nevada water project the "Robert B. Griffith Water Project," and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1681

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the southern Nevada water project, in Clark County, Nevada, shall hereafter be known and designated as the "Robert B. Griffith Water Project". Any reference in a law, map, regulation, document, record or other paper of the United States to that water project shall be held and considered to be a reference to the "Robert B. Griffith Water Project".

Mr. KAZEN. Mr. Speaker, S. 1681 changes the name of the southern Nevada project, which furnishes water for municipal and industrial purposes

to the Las Vegas area, to the "Robert B. Griffith Water Project."

This simple, noncontroversial bill honors a Nevada pioneer largely through whose efforts the project was constructed. I know of no objection to the bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. KAZEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill just considered.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken today after debate has been concluded on all motions to suspend the rules.

EXPRESSING SENSE OF CONGRESS WITH RESPECT TO SCIENTIFIC AND TECHNOLOGICAL SUPERIORITY OF COMMUNICATIONS AND ELECTRONICS INDUSTRY IN THE UNITED STATES

Mr. FUQUA. Mr. Speaker, I move to suspend the rules and concur in the Senate concurrent resolution (S. Con. Res. 130) expressing the sense of the Congress that the advancement of science and technology in the communications and electronics industry is vital to the needs of the United States.

The Clerk read as follows:

S. CON. RES. 130

Whereas the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Energy and Commerce of the House of Representatives, the Federal Communications Commission, and the Congress have long recognized the importance of scientific and technological developments in the United States in meeting its defense, industrial, and other needs;

Whereas such scientific and technological developments in the communications and electronics industry are of particular importance to the United States in meeting its defense, industrial, and other needs;

Whereas the traditional technological superiority enjoyed by the United States in the area of communications and electronics is dwindling due to the disparity in the commitment;

Whereas it is in the best interest of the United States to reverse the trend of declining United States technological superiority and to continue to lead in all areas of communications and electronics;

Whereas it is in the best interest of the United States to support the establishment of a national center dedicated to the advancement of science and technology in communications and electronics; and

Whereas such a national center would promote the interest of the public at large in such advancements in communications and electronics; tie the corporate and governmental worlds together to reach a common goal: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress shall take an active and leading role in making the public, and the corporate and governmental worlds aware of the importance of assuring and maintaining the scientific and technological superiority of the United States in the area of electronics and communications, and to encourage the establishment within the United States of a national center dedicated to communications and electronics.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from Florida (Mr. FUQUA) will be recognized for 20 minutes, and the gentleman from Pennsylvania (Mr. WALKER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. FUQUA).

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on Senate Concurrent Resolution 130.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today we are considering Senate Concurrent Resolution 130, which expresses the sense of the Congress that the Congress shall take an active and leading role in making the public, and the corporate and governmental worlds aware of the importance of assuring and maintaining the scientific and technological superiority of the United States in the area of electronics and communications, and to encourage the establishment within the United States of a national center dedicated to communications and electronics.

My colleague, DOUG BARNARD, introduced a similar resolution (H. Con. Res. 204) which was considered by the Committee on Science and Technology in markup on August 3, 1982, and by unanimous voice vote the committee favorably reported House Concurrent Resolution 204 without amendment. On December 1, the Senate passed Senate Concurrent Resolution 130 which was referred jointly to the Committee on Energy and Commerce and the Committee on Science and Technology on December 6. Both committees support the adoption of the language proposed by the Senate in Senate Concurrent Resolution 130.

Senate Concurrent Resolution 130 is based on the views that the traditional technological superiority enjoyed by the United States in the area of communications and electronics is dwindling due to the disparity in the commitment, and that it is in the best interest of the United States to support the establishment of a national center dedicated to the advancement of science and technology in communications and electronics.

As we all know, America's international position in both science and technology is currently being challenged. The national security and the economic and social well-being of the United States will in a large measure rest on the ability of our country to remain in the forefront of the rapidly advancing communications and electronics technologies. The proposed science center could provide the assistance necessary to encourage young people to enter these important fields which are currently experiencing a shortage of qualified scientists.

This resolution does not authorize or appropriate Federal funds, but would assist the nonprofit foundation created by leaders in communications and electronics in their effort to obtain funds to build this science center. I urge my colleagues to pass Senate Concurrent Resolution 130.

The SPEAKER pro tempore (Mr. KILDEE). The Chair recognizes the gentleman from Pennsylvania (Mr. WALKER) for 20 minutes.

Mr. WALKER. Mr. Speaker, the gentleman from Florida has done an excellent job of explaining this bill. I know of no controversy. It was passed out, as the gentleman indicated, from the Committee on Science and Technology unanimously.

The minority is certainly in agreement with the gentleman that this is a policy that this Nation should pursue, and we wholly concur with the gentleman in saying that the Congress should go ahead and pass this legislation.

Mr. Speaker, I yield back the balance of my time.

Mr. FUQUA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. FUQUA) that the House suspend the rules and concur in the Senate concurrent resolution (S. Con. Res. 130).

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the

Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

A similar House concurrent resolution (H. Con. Res. 204) was laid on the table.

TELECOMMUNICATIONS FOR THE DISABLED ACT OF 1982

Mr. WIRTH. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 2355) to amend the Communications Act of 1934 to provide that persons with impaired hearing are insured reasonable access to telephone service, as amended.

The Clerk read the Senate bill, as follows:

S. 2355

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Telecommunications for the Disabled Act of 1982".

SEC. 2. The Congress finds that—

(1) all person should have available the best telephone service which is technologically and economically feasible;

(2) currently available technology is capable of providing telephone service to some individuals who, because of hearing impairments, require telephone reception by means of hearing aids with induction coils, or other inductive receptors;

(3) the lack of technical standards ensuring compatibility between hearing aids and telephones has prevented receipt of the best telephone service which is technologically and economically feasible; and

(4) adoption of technical standards is required in order to ensure compatibility between telephones and hearing aids, thereby accommodating the needs of individuals with hearing impairments.

SEC. 3. Title VI of the Communications Act of 1934 (47 U.S.C. 601 et seq.) is amended by adding at the end thereof the following new section:

"TELEPHONE SERVICE FOR THE DISABLED

"SEC. 610. (a) The Commission shall establish such regulations as are necessary to ensure reasonable access to telephone service by persons with impaired hearing.

"(b) The Commission shall require that essential telephones provide internal means for effective use with hearing aids that are specially designed for telephone use. For purposes of this subsection, the term 'essential telephones' means only coin-operated telephones, telephones provided for emergency use, and other telephones frequently needed for use by persons using such hearing aids.

"(c) The Commission shall establish or approve such technical standards as are required to enforce this section.

"(d) The Commission shall establish such requirements for the labeling of packaging materials for equipment as are needed to provide adequate information to consumers on the compatibility between telephones and hearing aids.

"(e) In any rulemaking to implement the provisions of this section, the Commission shall specifically consider the costs and benefits to all telephone users, including persons with and without hearing impairments. The Commission shall ensure that regulations adopted to implement this section encourage the use of currently available technology and do not discourage or impair the development of improved technology.

"(f) The Commission shall complete rulemaking actions required by this section and issue specific and detailed rules and regulations resulting therefrom within one year after the date of enactment the Telecommunications for the Disabled Act of 1982. Thereafter the Commission shall periodically review such rules and regulations. Except for coin-operated telephones and telephones provided for emergency use, the Commission may not require the retrofitting of equipment to achieve the purposes of this section.

"(g) Any common carrier or connecting carrier may provide specialized terminal equipment needed by persons whose hearing, speech, vision, or mobility is impaired. The State commission may allow the carrier to recover in its tariffs for regulated service reasonable and prudent costs not charged directly to users of such equipment.

"(h) The Commission shall delegate to each State commission the authority to enforce within such State compliance with the specific regulations that the Commission issues under subsections (a) and (b), conditioned upon the adoption and enforcement of such regulations by the State commission.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Colorado (Mr. WIRTH) will be recognized for 20 minutes, and the gentleman from California (Mr. DANNEMEYER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Colorado (Mr. WIRTH).

GENERAL LEAVE

Mr. WIRTH. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks and to insert letters of support, and that all Members may have 5 legislative days within which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. WIRTH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks, to insert in the RECORD letters of support, and to allow Members 5 legislative days to revise and extend their remarks.

The Telecommunications for the Disabled Act of 1982 represents a consensus approach the need of persons with hearing impairments or other physical disabilities to have access to the telecommunications services that are vital to life in modern society. The bill has been endorsed by each of the major carriers and by representatives of the telephone manufacturing industry. It is supported by groups representing the disabled, including Easter Seals, the American Association of Retired Persons, and the Disabled American Veterans. It is a common sense and economic approach to a problem that has vexed several Congresses. It recognizes the historic commitment of the telephone companies to accommodate the handicapped and relies on that tradition, rather than on Government subsidies and Federal regulation.

The Committee on Energy and Commerce has unanimously reported S. 2355, the Telecommunications for the Disabled Act of 1982. This legislation takes two constructive steps to insure that disabled Americans continue to have access to our telephone network. First, the bill modifies a regulation issued by the Federal Communications Commission (FCC) that would prevent State regulators from making specialized telephone equipment available to the disabled. Second, the legislation directs the FCC to establish a technical standard to insure that telephones needed by persons with impaired hearing are compatible with hearing aids.

Unless Congress acts during the special session, the FCC regulation will become effective on January 1, and disabled Americans will no longer be able to obtain new terminal equipment under State-supervised tariffs. As the executive director of the Paralyzed Veterans of America recently wrote to me:

> I want to express my gratitude for your efforts. The FCC regulation would preclude many individuals from obtaining this necessary, and often only, means of contact with other people, including vital medical and emergency personnel . . . Telephone companies would be prevented from subsidizing special and unique equipment to meet the needs of handicapped individuals . . . in certain cases, preventing their gainful employment. This decision . . . presents a great hardship and peril to many of our most catastrophically disabled citizens.

More than one-third of all Americans over 65 wear hearing aids. The legislation recognizes the difficulties that these persons encounter when they need to use noncompatible telephones. All standard Bell telephones are now compatible; AT&T, GTE, and some independent telephone companies have also retrofitted coin telephones. Nonetheless, places of business are installing increasing numbers of noncompatible telephones, generally because they are unaware that many of their customers will be unable to use them. The result is an unnecessary hardship, since at the present time new telephones can be manufactured to be compatible without any significant increase in cost.

A broad coalition has recognized the need for this legislation. The Nation's major telephone carriers have joined the North American Telephone Association in approving the Telecommunications for the Disabled Act. Representatives of the handicapped community and the medical profession (including the Disabled American Veterans and the American Association of Retired Persons) also endorse S. 2355.

Historically, the telephone industry (particularly Bell Labs) has done an outstanding job of developing technology that allows the disabled to use our telephone network. An intrusive Federal regulation should not interfere with the development of these technologies or prevent telephone carriers from making them available to the handicapped in cooperation with the State commissions. I urge your support for this consensus legislation, which is vital to America's elderly and disabled citizens.

MODIFYING THE COMPUTER RULE

After the introduction of this bill, AT&T petitioned the Commission for a temporary waiver of the computer rule, 47 CFR 64.702, which precludes a carrier from offering terminal equipment on a regulated basis. Subsequently, Mr. David Saks on behalf of the Organization for the Use of the Telephone requested that the Commission extend such a waiver to allow all telephone companies to offer specialized terminal equipment under tariff. Mr. Saks subsequently clarified that he intended such a waiver to be permanent.

Passage of this legislation moots the pending waiver proceedings by removing specialized terminal equipment from the jurisdiction of the computer rule. The Commission will be required to adopt a permanent modification of the computer rule to allow States to tariff specialized equipment.

For years, the special needs of the disabled have not received adequate attention at the Commission. The Commission has taken no action to resolve the issues raised in Docket 78-50, opened 4 years ago to consider standards for hearing aid compatibility and to resolve problems facing the deaf. There is no evidence that the Commission gave any consideration to the needs of the disabled during the second computer inquiry, which led to the indescriminate prohibition on the tariffing of terminal equipment.

Given such neglect, explicit legislative guidance is required. The Commission must forbear from forcing the States to deregulate any device that the disabled need in order effectively to use the Nation's telephone services. Specialized equipment now includes teletypewriters for the deaf, "hands off" equipment for quadriplegic telephone users, and artificial larynxes for persons unable to speak. It also includes optional equipment, such as speakerphones and automatic dialers, but only provided that tariffs are limited to those users who need these features in order to use telephone services effectively and independently. Automatic dialers and speakerphones could only be made available under tariff only to persons with impaired memory or mobility, not to the public at large.

In the future, the Commission may define by rule the scope of the "specialized terminal equipment" which this bill authorizes States to tariff; the Commission may attempt to enjoin tariffs that it regards as overbroad. The legislation intends a flexible reading of the term, placing primacy on the needs of the handicapped and on the desirability of making new technologies broadly available to disabled groups.

The legislation recognizes that States will not necessarily require that carriers offer terminal equipment under tariff. It recognizes that many carriers will continue their outstanding efforts of providing below-cost equipment on a deregulated basis, subsidized by charitable contributions from its shareholders. In such a case, there may be no reason for the State to prescribe tariffs for the affected equipment.[1] The bill simply states that the Commission cannot interfere with the State's decision to tariff such equipment and to allow the recovery of reasonable and prudent costs not charged directly to the user in tariffs for regulated services.

The Commission should continue to prevent distortions in the nationwide markets for terminal equipment by precluding a State from allowing recovery of any excess over the reasonable and prudent costs of providing terminal equipment on a subsidized basis. In particular, the State may not authorize a carrier to recover in tariffs for regulated services the costs of discriminatory procurement practices. Moreover, the State may not include as expenses in any regulated rate base contributions made to an affiliated entity ostensibly to subsidize equipment, unless such entity files tariffs (or other justifications of costs) to show that the costs of such equipment exceeded the price at which it was sold by an amount not less than the contribution allowed from the rate base.

The principle of the legislation is straightforward. The Commission can only preempt a State tariff when it demonstrates one of three conditions: First, the tariff concerns equipment other than specialized terminal equipment; that is, it involves devices that are not necessary for the disabled to use generally available telecommunications services (or those services that have been specially designed for their use) effectively or without assistance. Second, the tariff makes specialized equipment which has general utility (such as speakerphones) to persons who do not require it by virtue of a physiological impairment. Third, a tariff for regulated services includes costs of providing equipment that are not "reasonable and prudent," including any claimed reduction in the price at which an unregulated affiliate offers equipment that the carrier does not demonstrate to be below the actual costs of production and distribution.

ESTABLISHING A TECHNICAL STANDARD FOR EFFECTIVE USE OF TELEPHONES WITH HEARING AIDS

The second purpose of the legislation is to insure that persons with impaired hearing have access to essential telephones that are compatible with hearing aids. Today, these citizens face a hardship that is totally unnecessary, since current technology allows new telephones to be manufactured for compatibility without any significant increase in cost. A uniform technical standard is essential to insure that these Americans can travel among the States, transact business, and seek employment without discrimination based on their disability.

Persons with impaired hearing have experienced special difficulty in obtaining telephone service offered to the public in hotels and other places of public accommodation. While traveling away from home, these persons have been unable to call their families from certain hotel rooms, to use telephones in business meeting rooms, or even to seek emergency aid from elevators. Although the hotel industry has attempted to accommodate these guests, it was often prevented from doing so by the absence of a uniform technical standard and adequate labeling requirements. Therefore, the bill does not require that hotel owners retrofit telephones (other than emergency phones). Except with regard to emergency phones, the bill does not extend the jurisdiction of the Commission, nor does it express or imply an intention with regard to any pending or future proceeding under sections 201 and 208 of the Communications Act, or affect the tariffing obligations under those sections which the Commission recently recognized in its Competitive Carrier rulemaking.

The purpose of the bill is not to freeze technology. It does not mandate any particular method for achieving compatibility with hearing aids. Currently, magnetic induction provides a means for providing compatibility without incurring additional manufacturing costs. In the future, new technologies may make possible improved service to the ordinary user. This bill promotes efficiency by encouraging the development of those new technologies while holding the hearing-impaired user harmless from any potential degradation of hearing-aid compatible service.

[1] The bill does not "specify that offerings of specialized terminal equipment be under tariff," and it is "permissible for carriers to offer such equipment under tariff or on a deregulated basis." The State commission may direct the carrier to provide affordable specialized equipment to the handicapped; the carrier may elect to do so on an unregulated basis subsidized by the shareholders rather than on a regulated basis subsidized by the ratepayers.

□ 1230

Mr. KAZEN. Mr. Speaker, will the distinguished gentleman yield?

Mr. WIRTH. I am glad to yield to the gentleman from Texas.

Mr. KAZEN. Mr. Speaker, I am very glad to hear the explanation the gentleman has made. I have been contacted by motel and hotel people who were under the impression that this measure would make it mandatory for them to have these telephones in every single room.

Mr. WIRTH. That is not the case. That was the case in previous legislation, but it seemed to us on the committee that this was an onerous provision.

Let me add at this point that the objections of some members of the hotel and motel industry to not reflect on the general attitude or record of hotel and motel owners across our country to accommodate all their guests, including those with physical disabilities. Today, without the benefit of a uniform standard, equipment is manufactured with a variety of inductive characteristics, and it is not possible to design a hearing aid that is compatible with all of them. As a result, hotel owners often do not know whether the equipment they buy is or is not compatible. In the future, virtually all equipment will have the same magnetic characteristics and will be compatible with hearing aids. The hotel owner will know any exceptions—noncompatible equipment will be clearly packaged. Hotels will have the opportunity, which they generally do not have today, to choose whether they want to have compatible equipment. With comparable prices, one would expect the overwhelming majority of the hospitality industry to accommodate their guests. The requirements placed on those who choose, for some reason, to buy noncompatible systems is minimal. In the face of these minimal burdens, we have a substantial benefit to the hearing-impaired population. Over one-third of all Americans over 65 is hearing impaired. This bill assures that they will be able to phone home when they travel, to participate equally in conventions and business meetings, and to summon help if they are trapped in an elevator.

Mr. KAZEN. It certainly would be if that were to be the requirement because there are not that many people who are hotel guests in proportion to the people who do not need the telephones, so it is not necessary to have the entire industry go to this great expense of converting.

Mr. Speaker, will the gentleman go over that requirement again or explain the suggestion again?

Mr. WIRTH. Mr. Speaker, I will be glad to do that.

As far as having coin telephones be compatible, the industry is very happy with doing that. They are in the process of doing it anyway.

Mr. KAZEN. Mr. Speaker, does the gentleman refer to the manufacturing industry?

Mr. WIRTH. The manufacturers, the distributors, and the carriers.

Mr. KAZEN. All right.

Mr. WIRTH. The manufacturers are in the process of moving toward that kind of standard so that all equipment is compatible with hearing aids. The suppliers want uniformity. Since all instruments have to have a magnetic field, it makes sense to adjust telephones to have uniform strength and orientation so that hearing aids can work with telephones from different manufacturers

Let us consider the perspective of service providers, say, a hotel or motel. If you were operating a motel in downtown Dallas, the law would not apply (except to emergency phones) until you bought a new telephone system. Compatible systems are available at comparable prices, so one would expect that most hotels would simply buy compatible phones. But if, for some reason, a hotel elects a system that is not compatible, it can simply maintain a reasonable number of instruments for hearing-aid wearers to use on demand. These could be rooms reserved for the hearing impaired, or there could even be portable instruments that the hearing impaired could request. But there is no requirement that every telephone in the lobby or every room would have to have telephones that are compatible with hearing aids.

Mr. KAZEN. Mr. Speaker, what does the gentleman consider as a reasonable requirement?

Mr. WIRTH. We had a similar discussion in hearings on H.R. 5158. We encouraged the FCC to work with the industry. Working together, so that the manufacturing industry will come in, along with the motel and hotel industry, and we say that a 20-percent level could be reached in the lobbies, and that there would be 1 out of 10 rooms that would be compatible. And then the Commission would determine what was a reasonable number.

I would also point out, if I may, that this is in a transitional period. As telephones are being replaced, older hotels and motels are going to be replacing their equipment as they go along anyway, and virtually all the new equipment manufactured after this legislation would be compatible anyway. So 5 years from now or 8 years from now it is not going to be a concern. It is in the transitional phase that the FCC should give particular concern to encouraging voluntary compliance with the legislation and its purposes.

Mr. KAZEN. Mr. Speaker, I thank the gentleman.

Mr. WIRTH. Mr. Speaker, I thank the gentleman for his questions.

Mr. McDONALD. Mr. Speaker, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from Georgia.

Mr. McDONALD. Mr. Speaker, I appreciate the gentleman's yielding.

I was curious about one aspect of this. What is the estimated cost that would be required for hotels and motels? Can the gentleman give us a cost estimate?

Mr. WIRTH. Mr. Speaker, a great number of the motels and hotels already have this equipment available, and as to installing any kind of new hearing compatible phone, there is no greater cost now. One can go, for example, to the Bell Telephone System or its new subsidiary and find that all standard telephones are compatible. You just cannot buy a nonconforming telephone. From most other manufacturers, the cost of a hearing compatible phone is no different from the cost of a regular telephone. I am pleased to submit representative letters from manufacturers which assured us that this legislation will not increase the cost of new telephones.

TELTONE,
December 9, 1982.

Hon. TIMOTHY WIRTH,
Chairman, House Telecommunications Subcommittee, Washington, D.C.

DEAR SIR: Teltone Corporation is a manufacturer of telecommunications equipment. This letter will confirm that S. 2355 presents a good solution to assure electromagnetic compatibility between the telephone and the hearing aid.

It is our opinion, as a manufacturer and supplier of related products, that such compatibility insofar as new telephone instruments are concerned, can be realistically achieved within the time frame proposed by legislation and with insignificant additional cost to the manufacturer.

Sincerely,

TELTONE CORPORATION,
DALE E. JOHNSON,
Vice President, Sales.

CREST INDUSTRIES, INC.,
Puyallup, Wash., December 9, 1982.

Hon. TIMOTHY WIRTH,
Chairman, House Telecommunications Subcommittee, Rayburn Building, Washington, D.C.

DEAR MR. WIRTH: As manufacturers of telephone equipment including miniature transfer keys, two-line telephones and modular hardware, this is to confirm that S. 2355 and the corresponding House Bill present a feasible and affordable solution to the problem of ensuring electromagnetic compatibility between telephone receivers and hearing aids. It is our opinion as a supplier of telephone instruments and related products, that such compatibility insofar as new telephone instruments are concerned, can be realistically achieved within the time frame proposed by legislation and at insignificant additional cost to manufacturers.

Should you have any questions, please contact me at Crest Industries, Puyallup, Washington, telephone 927-6922.

Sincerely,

EARL L. MASON,
Vice President, Corporate Planning.

Mr. McDONALD. Mr. Speaker, if the gentleman will yield further, I was particularly curious about the small hotels and motels. Would there be any cost to them?

Mr. WIRTH. There would be no significant costs. There is no retrofitting required under the legislation. If you have a hotel or a motel now that has no hearing compatible telephones, there is no requirement for retrofitting. All we are saying is that when new telephones are put in, the standards are there anyway and these are going to have the technical capability of handling the hearing-impaired.

So we do not say that you would have to go back and redo rooms or tear out telephones of that sort. It is all for new installations.

Mr. McDONALD. Mr. Speaker, I thank the gentleman.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. WIRTH. I am pleased to yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I simply want to join with the gentleman from Colorado (Mr. WIRTH), and I want to express my appreciation to him and to the subcommittee for providing leadership here in an area that is extremely important to a great many Americans. I am pleased to join in support of this legislation.

Mr. Speaker, the Telecommunications for the Disabled Act is a vital step in assuring that the handicapped members of our society have an equal opportunity to participate in the social and work opportunities in this Nation. The act requires the establishment of uniform standards to insure that essential telephones—those phones which are to be found in public facilities, workplaces, businesses, and which are to be used to summon help in case of emergencies—are accessible to the disabled population.

The telephone companies of this country have done an admirable job in designing and providing equipment for the handicapped. The Bell System in particular has demonstrated a substantial commitment to providing the best feasible service to disabled customers. In most cases, it has been a cooperative effort between telephone companies, State utility commissions and the Federal Communications Commission to insure that the disabled have reasonable access to telephone service. In many cases, the physically impaired have been able to afford these innovations only because telephone companies have provided specialized equipment at below cost. However, a recent Federal Communications Commission decision prohibits telephone companies from subsidizing terminal equipment and requires users to pay the full cost of equipment in their homes and places of business. The effect of this ruling could be devastating to the handicapped. The Telecommunications for the Disabled Act would only insure that individuals with disabilities would have access to telephone services at affordable costs. I encourage you to support this important legislation.

Mr. WIRTH. Mr. Speaker, I thank the gentleman from Illinois.

In closing, Mr. Speaker, let me point out that this legislation is also cosponsored by the ranking minority member of the Energy and Commerce Committee, the gentleman from North Carolina (Mr. BROYHILL) and was unanimously reported out of the full committee. Our subcommittee held hearings on this issue on March 27, 1980 and February 26, 1982. Extensive hearings were also held on the Senate side, with various aspects of the industry represented.

Mr. Speaker, I reserve the balance of my time.

Mr. DANNEMEYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on behalf of my colleague, the gentleman from Virginia (Mr. BLILEY), a member of the subcommittee, who met with an unfortunate accident this morning and cannot be on the floor to address the House concerning this legislation, I would like to make this following statement on behalf of the gentleman relative to S. 2355.

The remarks of the gentleman from Virginia (Mr. BLILEY), are as follows:

Though I concur with the bill's purpose of insuring telephone service for the deaf and other handicapped individuals, the manner of achieving this goal poses several questions which need further consideration.

The Telecommunications Subcommittee, which has jurisdiction over S. 2355, never held a hearing or markup session. Only one witness was heard on "related provisions" of H.R. 5158. The bill was brought before the Energy and Commerce Committee on extremely short notice during consideration of other unrelated measures.

In urging local telephone companies to continue to provide subsidized service to the handicapped, the bill would require an alteration of the FCC's "computer II" decision which was upheld by the U.S. court of appeals only last month. And it would require that the changes be made before January 1, 1983, only 3 weeks away.

S. 2355 would preempt all State regulations on the subjects covered and then ask States to bear the burden of enforcing the Federal law. The bill would regulate not only technical standards for phone equipment but require "detailed guidance as to the locations where * * * telephones must be available" in drugstores, gas stations, private clubs, workplaces, and hotels and motels.

Over 80 percent of all telephones in the United States are already hearing aid-compatible. Every coin-operated phone in the Bell and GTE systems is already in compliance. Hotel and motel operators have offered to work with organizations for the handicapped to voluntarily insure that phone service is available.

In short, this bill is a prime example of "duck fever." An attractive title hides a vast and probably unneeded new regulatory program. Affected industries and consumers deserve the courtesy of a hearing and proper legislative procedure.

● Mr. BROYHILL. Mr. Speaker, I would like to make one point in order to clarify an ambiguity in this legislation. S. 2355 does not grant jurisdiction to any Government agency to require any person to manufacture "essential" telephones or to market such telephones to anyone desiring to purchase or lease an essential telephone. There is every reason to believe that the marketplace will insure that a large supply of essential telephones are manufactured and marketed. But if it does not, no one can point to this bill as granting jurisdiction to any Government agency to require that such phones are either manufactured or marketed.●

Mr. DANNEMEYER. Mr. Speaker, I reserve the balance of my time.

Mr. WIRTH. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Speaker, I rise in support of S. 2355, the Telecommunications for the Disabled Act of 1982.

Unless Congress acts now, Federal Communications Commission regulations prohibiting State regulators from making subsidized specialized telephone equipment available to the disabled will go into effect on January 1, 1983. It is vital to the very existence of the hearing impaired and disabled that they are insured access to our telephone network. Use of a telephone is not a luxury, it is a necessity. Particularly for the disabled person, access to a telephone could mean the difference between life and death.

State regulators must be allowed to set a subsidized rate for the specialized terminal equipment. The full cost of this equipment would put it out of reach of most hearing impaired and handicapped individuals.

S. 2355 would also require that all new telephones be made compatible with hearing aids. Although all Bell telephones are currently compatible with the aids, the proliferation of new telephone equipment has seen a rise in noncompatible terminals. One-third of all Americans over 65 wear hearing

aids. It is imperative that these people have access to our network telephone. This bill would direct the FCC to establish a technical standard for the manufacture of compatible telephones to insure this access.

S. 2355 has the backing of the Nation's major telephone carriers, State regulators, the handicapped community, and the medical profession. I urge a "yes" vote.

● Mr. CORRADA. Mr. Speaker, I rise in support of S. 2355, to amend the Federal Communication Act of 1934 to provide that persons with impaired hearing are insured reasonable access to telephone service.

Telephone services have become the most important means of communication in today's fast growing world. The telephone companies have been providing services to the physically disabled by selling these users special telephone equipment below cost, and the unrecovered cost of including these persons in the network are shared by all users. According to a new regulation issued by the FCC, that will become effective January 1, 1983, the telephone company will be impeded from subsidizing the physically disabled users to pay the full costs of the equipment.

This bill will help the many U.S. citizens with impaired hearing in Puerto Rico as well as the mainland, to have access to telephone services by requiring the Federal Communications Commission to develop regulations to assure reasonable access to the hearing impaired and other handicapped persons and allowing the State regulatory commission to permit the telephone company to recover costs of providing such equipment by spreading the costs among all users of the system.

I urge my colleagues to vote in favor of S. 2355 and thank them for their support.●

● Mr. LONG of Maryland. Mr. Speaker, I rise in support of S. 2355, as amended, the Telecommunications for the Disabled Act of 1982.

The purpose of this bill is simple: to insure that hearing-impaired and other physically disabled Americans can enjoy greater access to the telephone network in our Nation.

Every day more telephones are being installed in homes, hospitals, schools and businesses with receivers that are useless to hearing-aid users. These receivers work, and look, like any other telephone receiver, except for one important difference—they do not give off an electromagnetic signal strong enough to be picked up by the magnetic pickup or "telecoil" in many hearing aids. They are thus incompatible with hearing aids. Of the 170 million telephones in the United States today, an estimated 40 million are incompatible with hearing aids and the number is growing.

Is the problem serious? With millions of Americans—estimates run as high as 16 million—suffering impaired hearing, and with as many as 3 million of these reliant on hearing aids, the answer is "Yes."

The incompatibility of telephone equipment with hearing aids is especially serious for the many hearing-impaired elderly who are homebound and heavily dependent upon the telephone.

The problem affects not only the hearing impaired—their family, friends, coworkers, and others who must communicate with them. With incompatible phone units such communication for personal, social, and business purposes—not to mention vital health and emergency needs—becomes impossible.

The Telecommunications for the Disabled Act recognizes and begins to address this problem by insuring that hearing impaired Americans have reasonable access to telephones that are compatible with hearing aids. It requires that all essential telephones—public and emergency phones, and telephones frequently used by the hearing impaired, for example—be made compatible with hearings aids.

Although S. 2355 does not go as far as my bill, H.R. 375, in requiring that all telephones work with all hearing aids, everywhere, it does insure that the hard of hearing are not completely excluded from the communications system.

I ask my colleagues to join me in voting for S. 2355, the Telecommunications for the Disabled Act of 1982.

The Telecommunications for the Disabled Act does not require expensive retrofitting of those phones now in place.

It does not require research and testing of new, expensive technologies.

The telephone industry supports the bill and has advised the Subcommittee on Telecommunications that making telephones compatible with hearing aids will not increase the costs of new telephones.●

● Mr. HARKIN. Mr. Speaker, the Telecommunications for the Disabled Act of 1982 recognizes that although the telephone has come to be a basic necessity of life, many hearing impaired people may not have full access to the telephone. This bill will go a long way toward removing one of the major obstacles to integration into society that the hearing impaired face. By allowing telephone companies to continue to provide specialized equipment to deaf and other handicapped individuals under the approval of State regulatory commissions, S. 2355 changes a Federal Communications Commission regulation that would hinder this ability. This regulation, now scheduled to go into effect on January 1, 1983, would prevent many disabled people from obtaining specialized terminal equipment at reasonable prices. Consumers with special needs would be thus faced with two alternatives—to forego the use of the telephone or to pay charges considerably higher than those borne by the general public.

A second beneficial aspect of this bill is the provision directing telephone companies to provide reasonable access to telephone services for persons with impaired hearing by making telephones that are compatible with hearing aids. Telephones can now be manufactured to be compatible without any significant increase in cost. Coin operated telephones, emergency service telephones, and others frequently used by the hearing impaired would be required by this bill to be compatible hearing aids.

Many disabled persons rely on specialized telephone equipment to lead productive, self-sufficient, independent lives. Since the elderly and other hearing-impaired individuals are more likely than others to feel isolated from the mainstream of society their ability to use the telephone becomes even more important. Lack of access to telephones exacerbates problems of emergency protection and the ability of the hearing impaired to obtain employment. Moroever, for those with restricted mobility the telephone may be their only means of contact, either for social purposes or in case of an emergency.

More than one-third of all Americans over age 65 wear hearing aids. Numerically, this translates into about 10.8 million citizens, many of whom are elderly. Unfortunately, not all telephones in the United States are compatible with hearing aids and not all those who need specialized terminals are able to purchase the equipment. This legislation recognizes the difficulties that hearing impaired individuals face, and I urge the House to support it.●

Mr. WIRTH. Mr. Speaker, I have no further requests for time.

Mr. DANNEMEYER. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. WIRTH) that the House suspend the rules and pass the Senate bill, S. 2355, as amended.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

STATE COMMISSIONS ON TEACHER EXCELLENCE

Mr. SIMON. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 429) to establish State commissions on teacher excellence, as amended.

The Clerk read as follows:

H.J. RES. 429

Whereas the education of Americans is the foundation on which the future well-being and progress of the Nation depend;

Whereas the quality of the Nation's teachers is vital to the quality of that education; and

Whereas under the American federal system it is the responsibility of the States to regulate the certification and licensing of those teachers: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds and declares—

(1) that the governments of the States should carefully evaluate the training and performance requirements which they specify for teachers and teacher preparation institutions to ensure the competence and encourage the excellence of their teachers;

(2) that such an evaluation by any individual State could well profit from the investigation of teacher recruitment, selection, training, certification, licensing, and retention in other States;

(3) that, in order to promote this evaluation, the States should establish commissions on teacher excellence to undertake consideration of the broad range of factors involved in the entire process by which teachers are recruited, selected and trained from admission to college and university degree programs through preparation for teaching in the current educational environment, certification, licensing, and retention, and continuing professional development; and

(4) that, in addition to the progress which could be obtained by the use of this evaluation by State and local government, the national interest in the continuous improvement of the Nation's teachers would be served if the results of these investigations were made available to the President and Congress, together with recommendations from the States on ways in which improvements in the quality of school instruction could be assisted by research, evaluation, new policy initiatives, and changes in existing Federal laws.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Illinois (Mr. SIMON) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think we have a matter of some importance, but not a matter of great controversy. This resolution simply calls on the State governments to appoint commissions—and some of them have the commissions already—to take a look at the whole question of teacher excellence.

The subcommittee which I chair held hearings on this question. We had witnesses from the Department of Education, the National Education Association, the American Federation of Teachers, various schools of teacher education, the NIE, and others.

The reality is that in the last 8 years those entering the field of teaching, those going to our schools to prepare themselves to become teachers, have dropped 79 points in the SAT tests, more than any other profession.

Equally disconcerting, studies in the States of Wisconsin and North Carolina suggest that the ablest teachers too often are leaving the teaching profession and those of the least ability too often are staying. I should add that this Nation has many fine, dedicated teachers of whom we should be proud.

I am not suggesting that one can always measure dedication or concern for young people by tests, but the tests show clearly that we are not appealing to the ablest in our society to become teachers, and if we believe that we build the future of this Nation through education, and if we believe the key ingredient in that process is the teacher, then we have a problem of major proportions.

It became clear in the course of the hearings that there is nothing very specific that the Federal Government can do or ought to be doing, and that the jurisdiction is one that is left to State and local governments. There are some answers that are fairly obvious. One is pay, but it is much more complicated than that.

So after consultation with my colleagues on the subcommittee, we ended up with this resolution calling on States to examine this problem to see what they should do. They may make recommendations to the Federal Government. It involves no expenditures at the Federal level at all, and it could result in some significant progress on a problem that, frankly, we are not facing up to at this point.
